TO THE

Most Reverend Father in GOD

THOMAS,

Lord Archbishop of *Canterbury*, &c.

May it please your Grace,

NE who appear'd for the *Church* in time of her greatest Danger, briskly defended her *Doctrines* against the daring Assaults of her most virulent Opposers; took Care to erect a *Synagogue* for God, where he found a *Synagogue* for Satan: And One, whose *Life* has all along been one continued Sermon against *Vice* and *Immorality*, does well deserve to wear a *Mitre*. And the fixing of such an One, at the *Helm* of this *National Church*, did not only proclaim the *Royal Wisdom* in making that prudent Choice; but did also prognosticate to
the

The Epistle Dedicatory.

the Church herself what she has seen already come to pass: Even those wish'd for *Halcyon Days*, and Safety from Danger, which by the Care of such an *Able, Watchful Pilot*, she has, Thanks to Heaven, hitherto enjoy'd. This *mighty Blessing* [most Reverend Father] we owe, under the *Auspicious Providence* of God, to your Grace's excellent *Management of Things*. And, as 'twere not enough to influence and govern the *Established Church* at home, your Grace takes also care to enlarge her *Bounds*, and the number of her *Members* abroad. Bless'd be God, our implacable Adversaries can no longer upbraid us with a *supine Neglect* of our *Heathen American Neighbours* in their *Spiritual Concerns*. We may now boast of a settled Society *de propaganda Fide* as well as they: And hope to bring over, in in progress of Time, good store of real *Converts* to the *Truth*, in lieu of the many pretended *Ones* of theirs. That most venerable Society, as it consists of a considerable number of excellent Persons both in *Church and State*, so it is singularly happy in having the benefit of your Grace's ready *Advice* and *Assistance* upon all Occasions. You are inded the *main Spring*, that animates that *truly Christian Body*, and it is your *extraordinary Zeal* for the *Cause of Christ*, that gives *Life* and *Vigour* to her many great *Designs*.

Upon which Account it is, That I presume to lay at your Grace's Feet this *New Edition* of the following *Geographical Treatise*. For, having considered in it [under the general Head of *Religion*] the *Spiritual State* of *Mankind* through all *Quarters* of the known World; and finding, by a modest Calculation, that scarce Five of Twenty-five Parts thereof are *Christian*: Who can refrain from wishing, That the thick *Mists* of *Pagan Ignorance* and

The Epistle Dedicatory.

and *Error* were dispell'd by the radiant Beams of the Sun of *Righteousness*; so that those People who sit in *Darkness* might know the *True God* their Maker: And be yet so happy as to see the *saving Light* of the *Gospel* of *Jesus Christ*. [My Lord,] There is none, I am confident, that more cordially wisheth this than your self; and none more earnestly desireth, that all human Means were used to Effect the same in those Parts of the *Heathen* World, where the *English* Nation is mostly concern'd. To whom therefore could I so properly address my self as to your *Grace*; being well assur'd that you'll leave no Stone unturn'd, in endeavouring to set that most desirable Design on foot, when you, in your godly Wisdom, shall see it truly feasible.

That great *Work*, I'm sensible, requires the joint Assistance of many Hands, and calls aloud for the ready Concurrence of every *Christian*; and truly all who bear that *Honourable Title* may be assistant therein one way or other; Whether it be by their Advice, their Prayers, or their Purse. But, to promote the same in the most expeditious manner, it's much to be wish'd that such a *Glorious Undertaking* were made a *National Concern*, and had a proper Fund appointed for it in a *Parliamentary* way. This still remains to be done; and all Men believe, That there's none so likely to bring that about as Your Grace, whenever a favourable Juncture shall offer. In the mean time, May Heaven long preserve Your Grace in Health and Welfare: And bless with Success your many Noble Designs for the Church of God. May it graciously please the True God, the Sovereign Lord of Heaven and Earth, to make known his Ways upon Earth, his saving Health among all Nations. May the Chariot-Wheels of the blessed Gospel drive swiftly through the whole inhabited World: And may all the
King-

The Epistle Dedicatory.

Kingdoms thereof become the Kingdoms of the Lord and of his Christ. In fine, may it please God to call in his ancient People the Jews, with the Fulness of the Gentiles: That as there is but one Shepherd, so there may be but one Sheepfold. This is the daily Prayer of the best Church upon Earth, and the hearty Wish and Petition of every True Son thereof: Particularly of him who is, with the profoundest Veneration,

May it please your Grace,

Your Grace's

Most Obedient,

Humble Servant,

P. G.

To the Right Honourable

THOMAS

BARON OF

COVENTRY,

EARL OF

ALESBOROUGH

IN

Worcester-Shire.

HIS New Edition of
the following Tract of
the MODERN GEOGRAPHY is
B (with

The Epistle Dedicatory.
(with the profoundest Respect)
Dedicated by

Your Lordship's

Most Humbly

Devoted Servant,

Pat. Gordon.

THE PREFACE.

MY principal Design, in publishing the following Treatise, is, To present the younger sort of our Nobility and Gentry, with a Compendious, Pleasant and Methodical Tract of *MODERN GEOGRAPHY*, that most useful Science, which highly deserves their Regard in a peculiar Manner. If it be alledg'd, That the *World* is already overstock'd with Composures of this Nature; I freely grant the Charge; but withal, I'll be bold to say, That there's none as yet publish'd, which is not palpably Faulty, in one or more of these three Respects. Either they are too Volumincus, and thereby Fright the Young Student from so much as ever attempting that Study: Or, Secondly, too Compendious, and thereby give him only a bare

The PREFACE.

Superficial Knowledge of Things: Or finally, confus'd (being writ without any due Order or Method) and so confound him before he is aware. But all these are carefully avoided in the following Treatise; for, in framing of it, I've industriously endeavour'd, to make it observe a just Mean, between the two Extreams of a large Volume and a narrow Compend. And, as to the Method in which it now appears, the same is (I presume) so Plain and Natural, that I may safely refer the Trial thereof to the Impartial Judgment of the Severest Critick.

To descend to Particulars. The whole consists now of Two Parts, whereof the first gives a General, and the second a Particular View of the Terraqueous Globe.

Part I. In giving a General View of the said Globe, I've perform'd these five Things, viz. (1.) I've illustrated (by way either of a Definition, Description, or Derivation) all those Terms that are any ways necessary for the right Understanding of the aforesaid Globe, as also the Analytical Tables of the following Treatise. (2.) I've set down all those pleasant Problems performable by the Terrestrial Globe, together with the manner of their Performance. (3.) I've subjoin'd divers plain Geographical Theorems [or self-evident Truths] clearly deducible from the foregoing Problems. (4.) I've advanc'd some Paradoxical Positions in Matters of Geography, which mainly depend on a thorough Knowledge of the Globe, and are equally certain with the aforesaid Theorems, though many of them may possibly appear to some as the greatest of Fables. Lastly, I've taken a Transient Survey of the whole Surface of the Terraqueous Globe, as it consists of Land and Water, as its sole constituent Parts.

This

THE PREFACE.

This is the Substance of the First Part, and, before I proceed to the Second, I must here desire the Reader may be pleas'd to observe these two Things, viz. (1.) That in defining the various Geographical Terms [mention'd Sect. I.] I have not strictly ty'd my self to the Logical Rules of a Definition; for, if the Term propos'd be only explain'd, that is all requir'd here. (2.) In advancing those Geographical Paradoxes [mention'd Sect. IV.] which will probably so startle the Reader at first (being a meer Novelty in Tracts of this kind) as that he can't readily comprehend either their Meaning or Design; let him therefore be pleas'd to know, that the main Drift of such an uncommon Essay, is, in short, To whet the Appetite of our Geographical Student for a compleat Understanding of the Globe, [upon a thorough Knowledge of which, these seeming Mysteries do mainly depend] or, more briefly, 'tis to set our young Student a thinking. Although the Soul of Man is a cogitative Being, and its Thoughts so nimble as to surround the Universe it self in a trice; yet so unthoughtful and strangely immur'd in Sense is the generality of Persons, that they need some startling Noise (like a sudden Clap of Thunder) to rouse and awaken them. Now, as a strange and unheard of Phenomenon, suddenly appearing in the Natural World, doth attract the Eyes of all Men, and raiseth a Curiosity in some to inquire into the Reason of it; even so is the Proposal of a Paradoxical Truth to the Intellectual: For it immediately summons all the Powers of the Soul together, and sets the Understanding a-work to search into, and Scan the Matter. To awaken the Mind of Man to its Natural Act of Thought and Consideration, may be justly reckon'd no trivial Business; if we consider, that 'tis to the want thereof (or a stupid Inconsideration) that we may chiefly impute all Enormities of Mankind, whether in Judgment or Practice. If therefore these Paradoxes above-mention'd shall obtain the End
pro-

The PREFACE.

propos'd, (the rousing of the Mind to think) it matters the less, if some of them, upon strict Enquiry, should be found to consist of Equivocal Terms, or perhaps prove little more than a Quibble at the Bottom. Proceed we now to

Part II. *Giving a Particular View of the Terraqueous Globe. By such a View I understand a clear and exact Prospect of all remarkable Countries, and their Inhabitants, on the Face of the whole Earth, and that in these following Particulars, viz. Their*

| | Arms ——— | | 2 Things, viz. | { The true Coat quarter-ed. The proper Motto. | |
| | Religion ——— | | 2 Things, viz. | { The chief Tenets thereof. When and by whom Christianity was plant-ed, if ever. | |

The Reader can't here expect a very large Account of all these several Heads, it being impossible in so little room, as the narrow Compass of a Compend allows, to say the half of what might be said upon many of 'em; however, he may here find all those things that are most essential: These few Sheets being an Abstract of what is more largely express'd in the greatest Volumes. Several of those Heads above-mention'd being Subjects that don't admit of new Relations, I reckon my self no Plagiary, to grant, that I've taken the Assistance of others; esteeming it needless sometimes to alter the Character either of a People or Country, when I found it succinctly worded by a credible Pen. Here the Reader may be pleas'd to know, that in treating of all Countries,
I have

The P R E F A C E.

I have made their Situation my only Rule, beginning still with those towards the North, excepting North America, where I thought good to end at the Pole. But, as touching the Analytical Tables of this Treatise, (the main Business of the Book) their Design and Use, in short, is, To present to the Eye, at one View, a compleat Prospect of a Country in all its remarkable Divisions, Subdivisions, and Chief Towns, with the manner how all these are most readily found. The Letters of the N. S. W. E. [signifying the Four Cardinal, and N. W. N. E. S. W. S. E. the Four Intermediate Points of the Compass] being affix'd to the outside of the various Braces in the aforesaid Tables, do express the Situation of the Parts of the Country there mention'd; as (page 45.) where the Divisions of Africa are said to be found from N. to S. If only Cities and Towns, and no Divisions of a Country are set down, then these Letters have the same Relation to them, shewing their Situation in respect of one another. If a little Brace fall within a greater [as page 45. where Egypt and Barbary have their peculiar Brace] this is to shew, that those two Countries are taken together, express'd on the backside of the outmost Brace: the same is to be said of Cities and Towns, if only such are set down. But finally, if neither Divisions nor Towns can be so order'd, as to have their Situation express'd in a conjunct manner; then the respective Distance of such Towns from some remarkable City is particularly declar'd in English Miles, as (pag. 144.) where those in the Circle of Suabia are so set down. If it be objected, that not all but only the chief Towns of every Country are mention'd in these Tables: To this I answer, That to mention all were needless; for I presume, that he who knows the true Situation of the fifty two Counties in England, and can readily point at the chief Towns in each of 'em, may easily find any other in the same County, if express'd in the Map. Besides, the Business of a Geographical Tract is not so much to heap up a vast multitude

The PREFACE.

multitude of Names, as to shew the Divisions, and Subdivisions of every Country, with the Principal Town in each of 'em, and how all such are most readily found. If it be farther objected, that neither the Analytical Tables of this Treatise, nor the various Descriptions of Countries annext to them, are any thing of a new Discovery in the Science of Geography, but only the bare Crambe recolta of those who have gone before us: To this I answer, that the Tables are indeed materially the same with others [and otherways it cannot be, unless we of this Age were so extremely fortunat as to make a compleat Discovery of all the Countries and Towns as yet unknown; or so absurdly ridiculous, as to coin new Names for those we know already] yet notwithstanding this, they are highly preferable to all others whatsoever. For such Tables, hitherto publish'd, (whether English, French, or Dutch) being only a bare Catalogue of Names, confus'dly set down without any due Order and Method are of so little use to the Reader, that his Pains are still the same as before, to find out those Names in the Map: Whereas the Tables of the following Treatise are so contriv'd, by particular Directions on the outside of their respective Braces, that he may point at those various Countries and Towns in the Map (almost) as fast as he can read their Names in the Table. And, as touching the Descriptions of those Countries and their Inhabitants; 'twere indeed most unreasonable to expect a Narrative of them compleatly new, unless it be in those Countries, which have undergone such wonderful Changes, that the very Face of Things is compleatly New; or some remote Parts of the World, where later Intelligence hath rectified former Mistakes. Besides, 'tis not so much my present Design in the following Tract, to present the Reader with perfectly new Relations (except in such Cases above-mention'd) as to Abridge and Methodize those already known. And this sufficiently answers the

The PREFACE.

the proposed end of the Treatise, being calculated (as I already hinted) for those, who are meer Strangers to Geography, or [at least] but young Proficients in that excellent Science; I mean, the generality of them, who either attend our publick Schools, or Study under the Care and Conduct of private Tutors. And so much for the Second Part.

To these two Parts is annexed an Appendix comprehending, (1.) A Short View of the chief European Plantations abroad, whether Countries, Towns, or Factories. (2.) Some Reasonable Proposals for the Propagation of the Blessed Gospel in all Pagan Countries.

This, in short, is the Sum and Method of the following Geographical Treatise, which (as I said) is principally design'd for the use and benefit of the younger Sort of our Nobility and Gentry. And, did such Persons apply their Minds, in their younger Years, to this most useful and diverting Science; 'tis more than probable, that they might thereby avoid those many and gross Immoralities which abound among us. For, if we strictly enquire into the Source of these foul and loathsome Streams, (especially in those whom Fortune hath rais'd above the common Level,) we may readily find, that they mainly flow from that detestable Habit of Idleness, in which the generality of such Persons are bred up, during their youthful Days, and to which they wholly give up themselves, when arriv'd to riper Years. By which means they're expos'd to a thousand Temptations, and continually lie open to the grand Adversary of Souls. For the remedying of this great Evil, 'tis highly to be wish'd, that such Persons would daily employ a few of their many spare Hours (that now lie heavy upon their Hands) in some proper diverting Study, which carries along with it both Profit and Pleasure, as its constant Attendants. Now, such a Study

The P R E F A C E.

is undoubtedly that of History, a Study that's particularly proper for a Gentleman, and adorns him with the best Accomplishments; a Study that begets Experience without Grey Hairs, and makes a Man wise at the Toil and Charge of others. If it be objected, that many have made Attempts of the same, and that without Success; most certain it is, I own, and the Reason is ready at hand, namely, their Omision of a needful Preliminary Study, viz. That of GEOGRAPHY, which, with some small taste of Chronology, may be deservedly term'd The Eyes and Feet of History; and ought to be acquir'd by our Historian, either in his younger Days, or (at least) in the first place. On which account I've drawn up the following Treatise, adapting it chiefly to the younger Sort of our Nobility and Gentry; by the help of which they may quickly acquire such an Idea of all remarkable Countries, as to fit 'em sufficiently for turning over any Modern History whatsoever. This one Step in Education of Youth were preferable [methinks] to a Seven Years Drudgery in the dry Study of bare Words; and a Second Apprenticeship that's usually spent in a Phantastick Improvement of the Mind with many useles Speculations. And I may be bold to say, that to exercise the Thoughts in such a manner as this, or to be but tolerably accomplish'd in these diverting Studies, would vastly transcend most of those other Accomplishments and Diversions, so much in Vogue among our Gentry at present. And 'tis highly probable, that such a Method as this might more effectually check the growth of Vice among them, than the most elaborate Moral Discourse that can be fram'd; [the very Title of such Composes being enough many Times to fright them from the Perusal] whereas a moderate Application of Mind to the aforesaid Sindies would insensibly wean the Thoughts of some from the reigning Impieties of the Age; and in others it might even happily prevent an early acquaintance with Vice in general.

And

The PREFACE.

And thus you see the Design, Method, and Substance of the whole Treatise. One Word now concerning this Edition, and I have done. The kind Reception of the former Impressions of this Geographical Tract, and its ready admittance into many of our publick Schools, give me fresh Encouragement to Revise it once more, and to make what farther Improvements either the Nature of the Subject, or Bigness of the Volume would admit of. Besides a careful Correction of a few Mistakes in the last Impression, I've made in this, some material Additions, and those dispers'd through the Body of the Book, which, I confess, is a Loss to the Gentlemen who bought the former Editions, but there is no Remedy for it now. In the mean time, if it could any ways atone for what is done; or rather to prevent at least the fears of any such Thing for the Future; I may here adventure to declare once for all, that this is the last Time I ever intend to make any considerable Additions to this Treatise; even supposing it should bear a great many Impressions hereafter. I may likewise take this Occasion to declare, that, Health and Opportunity serving, 'tis probable, I may publish, some Years hence, a Compendious Body of Ancient Geography; and that fitted likewise for the Schools, and made much more Methodical and Useful than any as yet extant. A Work extremely wanted, and may be justly rank'd among the Desideranda of this inquisitive Age. But to return to the present Treatise. As for the Maps belonging to it; I have not augmented the Number of them, because the Analytical Tables of this Tract are to be read with particular Sheet Maps [whether English, French, or Dutch,] and not with those here inserted; which, though good enough of their kind, yet being so small a Scale, they are more for Ornament than Use. How far this Treatise in the whole doth answer its proposed End; and how much this Impression is preferable

THE PREFACE.

able to any of the former, I intirely leave to the Reader's Judgment to determine. This being all I think necessary to premise concerning the following Composure, I shall no longer detain the Reader by way of Preface, concluding the same with the Words of the Poet,

Vive, vale : Si quid novisti rectius istis,
Candidus imperti : Si non, his utere mecum.

Modern

Modern Geography.

PART I.

Comprehending a

GENERAL VIEW OF THE *Terraqueous GLOBE.*

*****!*****

INTRODUCTION.

BY a *General View* of the *Terraqueous Globe*, we understood such a Prospect of it and all its Appendages, as sufficiently amounts to a *Compendious* (yet compleat) *System* of the true *Fundamentals* of the whole Body of *Modern Geography*. In taking such a *View*, we shall observe the following Method.

1. We shall illustrate (by way either of *Definition*, *Description*, or *Derivation*, especially the first) all those *Terms*, that are any ways necessary for the right Understanding of the aforesaid *Globe*; as also the *Analytical Tables* of the following Treatise:

C

2. We

2. We shall set down in due Order and Method, all those pleasant Problems, or delightful Operations, performable by the artificial Globe: together with the Manner of their Performance.

3. We shall subjoin divers plain Geographical Theorems, or self-evident Truths, clearly deducible from the foregoing Problems.

4. We shall advance some Paradoxical Positions in Matters of Geography; (or a few infallible Truths in Masquerade) which mainly depend upon a thorough Knowledge of the Globe; and are equally certain with the aforesaid Theorems, tho' many of them may possibly appear to some as the greatest of Fables.

Lastly, We shall take a transient Survey of the whole Surface of the terraqueous Globe, as it consists of Land and Water, as its sole constituent Parts.

Of these Five general Heads Separately, and in their Order. Therefore.

S E C T. I.

Containing some necessary Geographical Definitions.

Def. 1. **G**E O G R A P H Y [a Science both pleasant and useful] doth mainly consist, in giving a true Description of the exterior Part of the Earthly Globe, as 'tis compos'd of Land and Water, especially the former.

That Geography doth merit the Title of Science in several Respects, and that the Knowledge thereof is both pleasant and useful to Mankind, is a Truth so universally granted, that 'twere altogether needless to enter upon a Probation of it. Geography derives its compound Name from the two Greek Primitives of $\gamma\eta$, Terra, and $\gamma\rho\alpha\phi\omega$, scribo vel describo; and differeth from Cosmography, [quasi $\tau\epsilon\ \kappa\omicron\sigma\mu\omicron\varsigma\ \gamma\rho\alpha\phi\eta$ vel $\sigma\pi\omicron\gamma\rho\alpha\phi\eta$, i. e. Mundi Descriptio] as a part doth from the whole; as alio from Chorography and Topography, [quasi $\tau\epsilon\ \chi\omicron\rho\epsilon\ \kappa\alpha\iota\ \tau\epsilon\ \tau\omicron\tau\epsilon\ \sigma\pi\omicron\gamma\rho\alpha\phi\eta$, i. e. Regionis ac Loci Descriptio] as the whole from its parts. By a true Description of the exterior Part of the Globe of the Earth, we understand purely an Account of the Situation, Extent, Divisions, and Subdivisions, of all remarkable Countries on the Surface of the said Globe, together with the Names of their Cities and chief Towns, and that according as those Countries are already projected to our Hands upon particular Geographical Maps, and not an actual Survey of Mensuration of 'em, which the Science of Geography presupposeth, and which properly belongs to Geodesia, or the Art of Surveying Land. In giving such a Description of Countries (as a-

fore-

foreſaid) doth the Science of *Geography* properly conſiſt; as for o-
ther Narratives relating either to Countries themſelves, or their In-
habitants, and which commonly ſwell up Geographical Tracts, we
reckon them (tho' the more pleaſant Part of this Study) rather the
Fringes of *Geography*, than its real or eſſential Parts. In the fore-
going Definition we entirely reſtrict the Science of *Geography* to the
exterior Part or *Surface* of the earthly Globe, and that as 'tis compo-
ſed of *Land* and *Water*, as its ſole conſtituent Parts; deſigning there-
by to diſtinguiſh it from *Natural Philoſophy*, which (in its curious
and pleaſant Enquiries) reacheth not only the ſaid Surface and all its
conſtituent Parts, but alſo the whole Globe of the Earth, with the
whole Body of the Atmosphere ſurrounding the ſame: Yea, and
even the outmoſt imaginable Expanſe of the Firmament itſelf. We
again reſtrict that Science mainly to *one Part* of the aforeſaid Sur-
face (*viz.* the *dry Land*) thereby to diſtinguiſh it from *Hydrography*,
which particularly treateth of the other, namely, *Water*. The Ob-
ject therefore of *Geography* in a large Senſe, is the *whole Surface* of
the Ball of the Earth, conſiſting of *Land* and *Water* as its ſole con-
ſtituent Parts; or (in a ſtrict and more proper Senſe) only one of
thoſe Parts, to wit, the *firm Land*. For the more diſtinctly view-
ing which Parts, and the better comprehending of the Science of
Modern Geography in the true Fundamentals thereof, we ſhall begin
with that artificial Representation of the Earthly Ball, commonly
call'd the *Terraqueous Globe*.

Def. 2. *The Terraqueous Globe is an Artificial Spherical Body, on whose Convex Part is truly represented the whole Surface of the Ball of the Earth, as it conſiſts of Land and Water.*

This Globe is term'd *Terraqueous*, from *Terra* and *Aqua*, (the two
conſtituent Parts of its Surface) or *Terreſtrial*, to diſtinguiſh it from
the *Cœleſtial*; or finally, the *Artificial Globe* as a differing Mark
from the natural or real Globe of the Earth, are all ſo notoriously
known, that the leaſt Illuſtration were wholly ſuperfluous. We reck-
on it alſo ſuperfluous to ſhow, that there is a true Reſemblance in
Figure, between the artificial and natural Globe, or that the Body of
the Earth is truly Spherical: This being now beyond all Diſpute, and
never (at leaſt very rarely) call'd in Queſtion, except it be only by Wo-
men and Children. But here note, That in the following Treatiſe,
we entirely reſtrict ourſelves to this Globe; ſo that whereſoever the
Name of *Globe* is indefinitely mention'd, we are never to underſtand the
Cœleſtial. Note alſo, that whereſoever we are upon the Surface of the
natural Globe, that the Point in the Heavens, exactly vertical to us,
is term'd our *Zenith*; and that Point diametrically oppoſite thereto,

is stil'd our *Nadir*; which are two corrupted *Arabian* Terms in *Astronomy* importing what is here asserted of them. The *Observable* that present themselves to our *View* in treating of the *Globe*, are its *Axis* and *Poles*.

Def. 3. *The Axis is an imaginary Line passing through the Center of the real Globe of the Earth, upon which the whole Frame thereof is supposed to turn round.*

It's term'd *Axis* from ἀξω, quod circa illam agatur Terra. As this *Axis* in the *Natural Globe*, is an *imaginary Line*, so in *Artificial Globes* it is a *real one*, being a *streight piece of Iron*, or *solid Wood*, passing thro' the *middle of the Globe*, as the *Axle-tree of a Wheel*.

Def. 4. *The Poles are the two Extremities of the Axis, one whereof term'd the North or Arctick, and the other the South and Antarctick.*

They are call'd *Poles* from πᾶλέω, verito, because upon them the whole frame of the *Globe* turneth round. The *North* is term'd *Arctick* from ἀρκίος, signifying a *Bear*, because the *real North Pole* in the *Heavens* is commonly taken for a certain noted *Star* in that *Constellation* which bears the *Name of the Little Bear*: And the *South* is stil'd *Antarctick*, from ἀντι, [contra] and ἀρκίος [ursa] cause of its *Diametrical Opposition* to the other. The *Terraqueous Globe* being a *Spherical Body* (as aforesaid) turning round upon its own *Axis*: For the better *Understanding* of that *Globe* in all its exterior *Parts*, and the various *Operations* perform'd by the same; we are to conceive it, not only as a *bare Spherical Body*, but also as such a *Body* surrounded with many *imaginary Circles*; the chief of which are *Eight*, divided into

| | | | | | |
|----------|---|------------------------|-----------|---|---------------|
| Five Pa- | { | The Equator. | Three not | { | The Horizon, |
| rallels, | | The two Tropicks, | Parallel, | | The Meridian, |
| viz. | | The two Polar Circles. | viz. | | The Zodiack. |

Otherwise divided into

| | | | | | | |
|---------------|---|---------------|--------------|---|-------------------|------------------------|
| Four Greater, | { | The Horizon, | Four Lesser, | { | The two Tropicks. | |
| | | The Meridian, | | | viz. | The two Polar Circles. |
| | | The Equator, | | | | |
| | | The Zodiack. | | | | |

Def. 5. *The Horizon is that great Circle which divideth the Globe into two equal Parts, term'd the Upper and the Lower Hemispheres.*

It's so called from ὁρίζων, Terminans vel finiens, quia nostrum terminat prospectum, it being the outmost bounds or limits of our *Sight* when situated in any *Plain*, or at *Sea*. This *Circle* is twofold, viz.
The

PART I. *Geographical Definitions*

5

The *Sensible* and the *Rational Horizon*: The *Sensible*, is that already describ'd, bounding the outmost Prospect of the Eye, when viewing the Heavens round from any Part of the Surface of the Earth; but the other is purely formed in the Mind, and supposeth the Eye to be placed in the very Centre of the Earth, beholding the entire Upper Hemisphere of the Firmament: The Circle terminating such a Prospect is reckon'd the true *Rational Horizon*, which is duly represented by that broad wooden Circle, usually fitted for all Globes. Upon which are inscrib'd several other Circles, particularly those two containing the Names of the Months, and Number of their Days, according to the *Julian* and *Gregorian* Account; as also that other divided into the thirty two Points of the Compass.

Def. 6. *The Meridian is that great Circle, which, passing through the two Poles, divideth the Globe into two equal Parts, term'd the Eastern and Western Hemispheres.*

It's so call'd from *Meradies* vel *medius dies*, because the Sun, coming to the Meridian of any Place, is due *South*, or maketh *Mid-Day* in the said Place. The Meridian here defin'd is that great brazen Circle, in which the Globe turneth round upon the two Extremities of its Axis passing thro' the said Circle; but the Meridians inscrib'd on the Globe it self, are those thirty six Semicircles terminating in both the Poles; besides which we may imagine as many as we please; only Note, That one of those Meridians is always reckoned the *first*; however 'tis matter of Indifference, which of them we take for such.

Def. 7. *The Equator or Equinoctial, is that great Circle which divideth the Globe into two equal Parts, called the Southern and Northern Hemispheres.*

It's call'd *Equator*, because the Sun coming to this Circle, *tunc æquantur noctes & dies*, or *Equinoctial* for the same reason, viz. *æqualita noctium cum diebus*. By others it's simply term'd the *Line* $\epsilon\chi\chi\eta$, and that chiefly by Navigators, as being of singular use in their Operations. It's divided into 360 Degrees, and those are reckon'd round the Globe, beginning at the first Meridian, and proceeding *Eastward*.

Def. 8. *The Zodiack is that great broad Circle which cutteth the Equinoctial Line obliquely, one Side thereof extending it self so far North, as the other doth to the South of the said Line.*

It's so call'd from $\zeta\omega\omicron\nu$, (*Animal*) because it's adorn'd with twelve Afterisins, (commonly term'd the twelve *Signs*) being most of them Representations of divers Animals. The Names and Characters of which Signs are these following.

| | | | | | |
|--------|----------|--------------|--------------|-----------|---------|
| Aries. | Taurus. | Gemini. | Cancer. | Leo. | Virgo. |
| ♈ | ♉ | ♊ | ♋ | ♌ | ♍ |
| Libra. | Scorpio. | Sagittarius. | Capricornus. | Aquarius. | Pisces. |
| ♎ | ♏ | ♐ | ♑ | ♒ | ♓ |

Of all the Circles inscrib'd on either of the Globes, this alone admits of Latitude, and is divided in the middle by a concentrick Circle, term'd the *Ecliptick*, which properly is that Circle set upon the Globe comprehending the Characters of the twelve Signs above mention'd, each of which Signs is $\frac{1}{12}$ Part of that Circle, and contains 30 Degrees.

Def. 9. *The Tropicks are the two biggest of the four lesser Circles, which run Parallel to the Equator, and are equidistant therefrom.*

They're term'd *Tropicks* from $\tau\rho\acute{\epsilon}\pi\omega$. (*verto*) because the Sun in his annual Course, arriving at one of those Circles, doth return towards the other. They derive their respective Denominations of *Cancer* and *Capricorn* from touching the Zodiack at the two Signs of that Name, and each of them is distant from the Equator, exactly 23 deg. $\frac{1}{2}$.

Def. 10. *The Polar Circles are the two least of the four lesser Circles, running parallel to the Equator, and at the same Distance from the Poles, as the Tropicks are from the Equator.*

They're term'd *Polar*, because of their Vicinity to the Poles. That Circle nearest the *North*, is call'd the *Arctick*; and th' other, next to the *South* Pole, the *Antarctick Polar Circle*, and that for the Reason already given, (Def. 4.) when treating of the Poles themselves.

These are the eight necessary *Circles* above-mention'd, but to compleat the Furniture of the Globe, there remain as yet but three Particulars, viz. the *Horary Circle*, the *Quadrant of Altitude*, and *Semi-Circle of Position*.

Def. 11. *The Horary Circle is a small Circle of Brass, and so affix'd to the Brazen Meridian, that the Pole (or End of the Axis) proves its Center.*

Upon this Circle are inscrib'd the twenty four Hours of the Natural Day, at equal Distances from one another; the XII. for Mid-day, being in the upper Part towards the *Zenith*, and the other XII. for Midnight in the lower towards the *Horizon*; so that the Hours before Noon are in the *Eastern*, and those for the Afternoon in the *Western* Semi-Circle: As for an Index to this Horary Circle, the same is fix'd upon the End of the Axis, and turneth round with the

the Globe. The Use of this Circle and Index will sufficiently appear in many pleasant Problems hereafter mention'd.

Def. 12. *The Quadrant of Altitude is a narrow thin Plate of pliable Brass, exactly answerable to a fourth Part of the Equinoctial.*

Upon this Quadrant are inscrib'd 90 Degrees, each of them being according to the same Scale with those upon the Equator. How useful this Quadrant is, will also appear in the Solution of several Problems hereafter mention'd.

Def. 13. *The Semi-Circle of Position is a narrow solid Plate of Brass, exactly answerable to one half of the Equinoctial.*

Upon this Semi-Circle are inscrib'd 180 Degrees, exactly the same with those upon the equinoctial. We may term it a double Quadrant of Altitude in some respect, and it is of considerable Use in several delightful Problems.

To these I might add the *Mariner's Compass*, that most necessary Instrument, commonly us'd by Navigators, which being duly touch'd with the Load-stone, and horizontally fix'd upon the Pedestal of the Globe, is frequently needful for the right Solution of several Problems.

The necessary Circles of the Globe being Eight (as aforesaid:) Of them, and some others, hereafter mention'd, are form'd the *Latitude and Longitude* of Places, as also *Zones* and *Climates*.

Def. 14. *Latitude is the Distance from the Equator to either of the Poles, and measur'd upon the brazen or first Meridian.*

To Term is more frequently us'd in Geography than that of *Latitude*, which is two-fold, *viz.* *North* and *South*. In reckoning of the *Northern Latitude*, you are to begin at the Equinoctial Line, and proceed to the Arctick: And the *Southern*, from the Equinoctial to the Antarctic Pole; still numb'ring the Degrees of Latitude, either upon the brazen, or first Meridian. The many Circles inscrib'd on the Globe, at the Distance of 10 Degrees from one another, and parallel to the Equator, are term'd *Parallels* of Latitude. But besides those actually inscrib'd, we are to conceive the Globe as furnish'd with a vast Multitude of such Circles; for every Degree of Latitude; yea, and every sixtieth Part of each Degree, is suppos'd to have an imaginary Parallel Circle, passing through the same. But since *Latitude* (as aforesaid) is the Distance from the Equator to either of the Poles; it from hence follows, that the greatest Latitude consisteth of 90 Degrees. Now correspondent to each of those Degrees (or the $\frac{1}{360}$ of a great Circle in the Heavens) is a certain Space of the Surface of the Earth, which is every where of the same Ex-

tent in it self, but different in its number of Parts, according to the different reckoning of various Countries. To know the said different Number of Parts, (of what sort soever, whether they be *Miles, Leagues, or other Measures*) corresponding to one Degree in the Heavens, is absolutely necessary for the right Understanding of the true *Distance* of Places in different Countries, we shall therefore illustrate the same, and that by the following Table.

| | | |
|----------------------------|---|-----|
| Answerable to one Deg. are | Common <i>Italian, English, and Turkish Miles</i> ————— | 60 |
| | Ordinary <i>French Leagues</i> ————— | 20 |
| | <i>Spanish Miles</i> , according to Vulgar reckoning ———— | 17½ |
| | <i>German, Dutch, Danish, and Great Poland Miles</i> ———— | 15 |
| | <i>Miles usual in Swedeland</i> ————— | 12 |
| | <i>Miles usual in Hungary</i> ————— | 10 |
| | The <i>Versts of Muscovy</i> ————— | 80 |
| | <i>Persian, Arabian, and Egyptian Parasanga</i> ———— | 20 |
| | The <i>Indian Cos</i> ————— | 24 |
| | The <i>Stades of China</i> ————— | 250 |
| | The <i>Ins of Japan</i> ————— | 400 |

But here Note, That tho' these are the most remarkable Measures of Distance throughout the inhabited World, with their respective Proportion to one Degree in the Heavens; yet, we are not to imagine that these Measures are of the same Extent in the various Provinces of the same Country; as is evident from the different Length of Leagues in different Parts of *France*; as also the Diversity of Miles in the *South and North of England*.

Def. 15. Longitude is the Distance from the first Meridian, and measured upon the Equator.

In reckoning the various Degrees of Longitude (which are 360 in all) you are to begin at the first Meridian where-ever it is, and to proceed upon the Equator quite round the Globe. Correspondent to each of those Degrees in the Equator, (as to Degrees of Latitude on the Meridian) are sixty *Italian Miles*, or twenty *French Leagues*, according to vulgar Calculation: But this is to be understood only of Places exactly under the Equator; for the true Distance between two Places lying due *East and West* in any considerable Latitude, is far less in Miles, than between other two Places lying exactly under the Equator, and likewise under the same Meridians; the Reason of which is most evident, namely the approaching of the Meridians nearer and nearer to one another, 'till at last they unite all in the Pole; but that you may readily find the true Distance in Miles from *East to West*, between any two Places in any Parallel of Latitude; we shall here subjoin the following Table: In which is set down, to every Degree of Latitude, the exact Number of Miles, and sixtieth part of a Mile, that are answerable to one Degree in the Equator; still allowing sixty *Italian Miles* to such a Degree.

| 22 | 55 | 26 | 45 | 42 | 24 | 68 | 22 | 32 | | | |

Def. 16. *Zones are large Tracts of the Surface of the Earth, lying Parallel to the Equator, and distinguish'd by the Four lesser Circles of the Globe.*

They are term'd *Zones* from ζώνη, [*Zona vel Cingulum*], because they encompass the Globe of the Earth in some manner, as a Girdle doth surround the Body of a Man, and are in number Five.

viz. $\left\{ \begin{array}{l} \text{Two Frigid} \\ \text{Two Temperate} \\ \text{One Torrid} \end{array} \right\} \left\{ \begin{array}{l} \text{comprehen-} \\ \text{ded between} \end{array} \right\} \left\{ \begin{array}{l} \text{The Polar Circles, and the Poles.} \\ \text{The Polar Circles, and the Tropicks.} \\ \text{The Two Tropicks and divided} \\ \text{by the Equator.} \end{array} \right.$

Of these the Ancients imagin'd only the two Temperate to be habitable, esteeming the scorching Heart of the Torrid and pinching Cold of the two Frigid, to be equally intolerable, according to that of the Poet.

Quarum qua media est, non est habitabilis estu:

Nix regit alta duas: ————— Ovid. Metam. I.

Def. 17. *Climates are those Tracts of the Surface of the Earth, bounded by imaginary Circles, running Parallel to the Equator, and of such a Breadth from South to North, that the length of the Artificial Day in one surpasseth that in the other, by half an Hour.*

They're term'd *Climates* from κλίμα, [*Declino vel Inclino*] because in numbring of them, they decline from the Equator, and incline to either Pole. Not to mention what the Ancients taught of *Climates*, either as to their Number, or manner of reckoning them, it's sufficient for our present Purpose, to consider that modern Geographers have advanc'd the Number of 'em to 60. From the Equator to each of the Polar Circles, are 24, arising from the Difference of $\frac{1}{2}$ Hour in the longest Day; and from the Polar Circles to the Poles themselves are Six, arising from the Difference of an intire Month; the *Sun* being seen in the first of these, a whole Month without setting; in the second two; and in the third, three Months, &c. How all these *Climates* are fram'd, viz. the true Parallel of Latitude in which they end, (that being likewise the Beginning of the following) with the respective Breadth of each of 'em, you may clearly see by the following Tables:

| Climates between the Equator and Polar Circles. | | | | | | | | | | | |

Having thus taken a View of the chief Circles belonging to the Terrestrial Globe, as also the manner how *Latitude* and *Longitude* with *Zones* and *Climates* are fram'd: Proceed we next to the various Positions of the Globe, commonly term'd *Spheres*, which are three in Number, viz. *Parallel*, *Right* and *Oblique*.

Def. 18. *A Parallel Sphere, is that Position of the Globe, which hath these three Properties; viz. (1.) The Poles in the Zenith and Nadir. (2.) The Equator in the Horizon: (3.) The parallel Circles parallel to the Horizon.*

The Inhabitants of this Sphere are those (if any) who live under the two Poles.

Def. 19. *A Right Sphere is that Position of the Globe, which hath these three Properties; viz. (1.) Both the Poles in the Horizon. (2.) The Equator passing through the Zenith and Nadir. (3.) The parallel Circles perpendicular to the Horizon.*

The Inhabitants of this Sphere, are they who live under the Equinoctial Line.

Def. 20. *An Oblique Sphere is that Position of the Globe which hath these three Properties; viz. (1.) One of the Poles above, and the other under the Horizon. (2.) The Equator partly above, and partly under the Horizon. (3.) The parallel Circles cutting the Horizon obliquely.*

The Inhabitants of this Sphere, are they who live on all Parts of the Globe of the Earth; except those exactly under the Poles, and Equinoctial Line.

But having no regard to these *Positions* of the Globe; the various Inhabitants of the Earth are likewise consider'd with respect to the several

veral *Meridians* and *Parallels*, peculiar to their Habitations; and that under these three Titles, *viz. Antæci, Periæci, and Antipodes.*

Def. 21. *The Antæci, are those People of the Earth who live under the same Meridian, but opposite Parallels.*

Peculiar to such People are these following Particulars: *viz. (1.)* They have both the same Elevation of the Pole, but not the same Pole. *(2.)* They are equally distant from the Equator, but on different sides. *(3.)* They have both Noon and Midnight at the same time. *(4.)* The Days of one are equal to the Nights of the other, & *vice versa.* *(5.)* Their Seasons of the Year are contrary; it being Winter to one, when Summer to the other, &c.

Def. 22. *The Periæci, are those People of the Earth who live under the same Parallels, but opposite Meridians.*

Peculiar to such People are these following Particulars, *viz. (1.)* One of the Poles is equally elevated to both; and the other equally depress'd. *(2.)* They are equally distant from the Equator, and both on the same side. *(3.)* When it is Noon to one, it is Midnight to the other, & *è contra.* *(4.)* The length of the Day to one, is the Compliment of the others Night, & *vice versa.* *(5.)* They both agree in the four Seasons of the Year, &c.

Def. 23. *The Antipodes are those People of the Earth who live under opposite Parallels and Meridians.*

Peculiar to such People are these following Particulars; *viz. (1.)* They have both the same Elevation of the Pole. *(2.)* They are both equally distant from the Equator; but on different Sides, and in opposite Hemispheres. *(3.)* When it's Noon to one, it is Midnight to the other, & *vice versa.* *(4.)* The longest Day or Night to the one, is the shortest to the other. *(5.)* Their Seasons of the Year are contrary, &c.

The Inhabitants of the Earth, were likewise considered by the Ancients with respect to the Diversity of their *Shadows*, and accordingly reduc'd to three Classes; *viz. Amphiscii, Periscii, and Heteroscii.*

Def. 24. *Amphiscii, were those People of the Earth who liv'd in the Zone, or between the two Tropicks.*

They are so term'd from ἀμφὶ [*Utrunque*] and οὐρά [*Umbra*] because they cast their *Shadows* on both sides of 'em, *viz. North and South*, according to the Nature of the *Sun's Declination.*

Def. 26: *Periscii, were those People of the Earth who liv'd in the Frigid Zones, or between the Polar Circles and the Poles.*

They're

They're so call'd from $\mu\epsilon\lambda$, [*Circa*,] and $\sigma\kappa\iota\delta$ [*Umbra*], be-
cause they cast their Shadows round about them towards all Points
of the Compass.

Def. 27. *Heteroscii*, were those People of the Earth who
liv'd in the two Temperate Zones; or between the Tropicks
and the Polar Circles.

They're so call'd from $\epsilon\tau\epsilon\rho$, [*Alter*] and $\sigma\kappa\iota\delta$ [*Umbra*], be-
cause they cast their Shadows only one way; viz. North, if in the
North temperate; or South, if in the South temperate Zone.

The Earth, in respect of its Inhabitants, was likewise considered
by the Ancients as divided into the Right-Hand and the Left; and that
by several sorts of Persons; viz. (1.) Poets, who accounted North
the Right-Hand, and South the Left. (2.) Astronomers, who ac-
counted West Right-Hand, and East the Left. (3.) Geographers,
who accounted East the Right-Hand; and West the Left.

But leaving the various Inhabitants of the Earth, and to come
closer to our main Design; let us return to the Globe of the Earth it
self, consider'd simply as a Spherical Body, whose Surface we are
to view as compos'd of Land and Water, as its sole constituent Parts,
and those two Parts thus subdivided as followeth; to wit,

Land into

 Continens, Isthmus's,
 Islands, Promontories,
 Peninsula's, Mountains.

Water into

 Oceans, Straits,
 Seas, Lakes,
 Gulfs, Rivers.

Def. 27. A Continent [*Lat.* *Continens à contineo*] is a large and spacious Space of dry Land, comprehending
divers Countries, Kingdoms and States all join'd together
without any entire Separation of its Parts by Water.

Def. 28. An Island [*Lat.* *Insula, quasi in salo*] is a part
of dry Land environ'd round with Water.

Def. 29. A Peninsula [*quasi pene Insula, otherwise Cher-
sonesus from χερσονησ, Terra, and νησ Insula*] is a part
of the dry Land every where enclosed with Water, save one
narrow Neck adjoining the same to the Continent.

Def. 30. An Isthmus [*ad εισεμ vel εισμ ingredior*] is
that narrow Neck of Land annexing the Peninsula to the
Continent; by which People may enter into one from the other.

Def. 31.

Def. 31. *A Promontory* [quasi Mons in mare prominens] is a high Part of Land stretching itself out in the Sea; the Extremity whereof is commonly term'd, a Cape or Head-Land.

Def. 32. *A Mountain* [à moneo vel emineo] is a rising part of the dry Land, over-topping the adjacent Country, and appearing the first at a Distance.

Def. 33. *The Ocean* [Gr. ὠκεανὸς quasi ex ὠκείως, citò, & ὠς Fluo] is a mighty Rendezvous, or large Collection of Waters environing a considerable part of the main Continent.

Def. 34. *The Sea* [Lat. Salum à sale quia salsum] is a smaller Collection of Waters, intermingled with Islands, and entirely (or mostly) environed with Land.

Def. 35. *A Gulf* [Lat. Sinus, quasi sinu suo mare complectens] is a part of the Sea every where environ'd with Land, except one Passage, whereby it communicates with the neighbouring Sea, or main Ocean.

Def. 36. *A Strait* [Lat. Fretum, à ferveo, quod ibi serveat mare propter angustiam] is a narrow Passage, either joining a Gulf to the neighbouring Sea or Ocean, or one part of the Sea or Ocean to another.

Def. 37. *A Lake* [Lat. Lacus, à Gr. λίμνη Fossa vel Fovea] is a small Collection of deep standing Water, intirely surrounded with Land, and having no visible or immediate Communication with the Sea.

Def. 38. *A River* [Lat. Flumen vel Fluvius, à fluo] is a considerable Stream of fresh Water issuing out of one or various Fountains, and continually gliding along in one, or more Channels, till it disgorgeth itself at last into the gaping Mouth of the thirsty Ocean.

These being all the necessary Terms commonly us'd in Modern Geography; and particularly those, that either need or can well admit of a Definition, Description, or Derivation: We proceed in the next Place.

S E C T. II.

Containing some pleasant Geographical Problems.

Prob. 1. **T**HE Diameter of the Artificial Globe being given, to find its Surface in Square, and its Solidity in Cubick Measure.

Multiply the Diameter by the Circumference (or a great Circle dividing the Globe into two equal Parts) and the Product will give the first: Then multiply the said Product by $\frac{1}{2}$ of the Diameter, and the Product of that will give the second. After the same manner we may find the Surface and Solidity of the Natural Globe, as also the whole Body of the Atmosphere surrounding the same, provided it be always and every where of the same Height; for having found the perpendicular Height thereof by that common Experiment of the Ascent of Mercury at the Foot and Top of a Mountain; double the said Height, and add the same to the Diameter of the Earth; then multiply the whole (as a new Diameter) by its proper Circumference, and from the Product subtract the Solidity of the Atmosphere.

Prob. 2. *To rectify the Globe.*

The Globe being set upon a true Plane, raise the Pole according to the given Latitude, then fix the Quadrant of Altitude in the Zenith, and (if any Mariner's Compass upon the Pedestal) let the Globe be so situated, as that the brazen Meridian may stand due South and North, according to the two Extremities of the Needle.

Prob. 3. *To find the Longitude and Latitude of any Place.*

By Longitude we do not here understand that *Opprobrium Navigatorum* of Easting and Westing, but simply the distance between the given place and the first Meridian inscrib'd on the Surface of the Globe. For the finding of which, bring the given Place to the East Side of the brazen Meridian, and observe what Degree of the Equator is just under the said Meridian, for that is the Degree of Longitude peculiar to the given Place; and the Degree of the Meridian exactly above that place is its proper Latitude, which is either Southern or Northern, according as the Place is South or North of the Equinoctial Line.

Prob. 4. *The Longitude and Latitude of any place being given, to find that place on the Globe.*

Bring

Bring the given Degree of Longitude to the brazen Meridian, reckon upon the same Meridian the Degree of given Latitude, whether *South* or *North*, and make a Mark with Chalk where the reckoning Ends, the Point exactly under that Chalk is the Place desir'd.

Prob. 5. *The Latitude of any Place being given, to find all those Places that have the same Latitude.*

The Globe being rectify'd (a) according to the Latitude of the given Place, and that Place being brought to the brazen Meridian, make a Mark exactly above the same, and turning the Globe round, all those Places passing under the said Mark, have the same Latitude with the given Place.

Prob. 6. *To find the Sun's place in the Ecliptick at any time.*

The Month and Day being given, look for the same upon the wooden Horizon, and overagainst the Day you will find the particular Sign and Degree in which the *Sun* is at that Time (observing withal the difference between the *Julian* and *Gregorian* Kalendar) which Sign and Degree being noted in the Ecliptick, the same is the *Sun's* Place (or pretty near it) at the Time desir'd.

Prob. 7. *The Month and Day being given, as also the particular time of that Day, to find those places of the Globe, to which the Sun is in the Meridian at that particular time.*

The Pole being elevated according to the Latitude of the given Place; bring the said Place to the brazen Meridian, and setting the Index of the Horary Circle at the Hour of the Day, in the given Place, turn the Globe till the Index point at the upper Figure of XII. which done, fix the Globe in that Situation, and observe what Places are exactly under the upper Hemisphere of the brazen Meridian, for those are the Places desir'd.

Prob. 8. *To know the Length of the Day and Night in any Place of the Earth at any time.*

Elevate the Pole (a) according to the Latitude of the given Place; find the *Sun's* Place in the Ecliptick (b) at that Time, which being brought to the *East* Side of the Horizon, set the Index of the Horary Circle at Noon (or the upper Figure of 12.) and turning the Globe about till the aforesaid Place of the Ecliptick touch the *Western* Side of the Horizon, look upon the Horary Circle, and wheresoever the Index pointeth, reckon the

the Number of Hours between the same and the upper Figure of 12. for that is the length of the Day at the Time desir'd, the Complement whereof is the length of the Night.

Prob. 9. *To find by the Globe the Antæci, Periæci and Antipodes, of any given place.*

Bring the given place to the brazen Meridian, and finding (a) its true Latitude, count upon the Equator the same Number of Degrees towards the opposite Pole, (a) Prob. 3. and observe where the reckoning ends, for that is the place of the *Antæci*. The given place continuing under the brazen Meridian, set the Index of the Horary Circle at Noon, and turning the Globe about till the same point at Mid-night (or the lower 12.) the place which then comes to the Meridian, (having the same Latitude with the former) is that of the *Periæci*. As for the *Antipodes* of the given Place, reckon from the said place upon the brazen Meridian 180 Degrees, either *South* or *North*, or as many Degrees beyond the farthest Pole as you are to the nearest; and observe exactly where the reckoning ends, for that is the place desir'd.

Prob. 10. *To know what a-Clock it is by the Globe in any place in the World, and at any time, providing you know the Hour of the Day where you are at the same time.*

Bring the place in which you are to the brazen Meridian (the Pole being rais'd (b) according to the Latitude thereof) and set the Index of the Horary Circle at the Hour of the Day at that Time. Then bring the desir'd place to the brazen Meridian, and the Index will point out the present Hour at that place wherever it is. (b) Prob. 3.

Prob. 11. *To know by the Globe when the Great Mogul of India, and Czar of Moscovia sit down to Dinner.*

This being only to know when its Noon at *Agra* and *Moscow*, (the Imperial Seats of those mighty Monarchs) which we may very easily do, at what Time soever it be, or wheresoever we are: For finding (by the foregoing Problem) the present Hour of the Day in the Cities above-mention'd, supposing withal that Mid-day in the aforesaid Cities is Dining-time, we may readily determine how near it is to the Time desir'd.

Prob. 12. *To find the Hour of the Day by the Globe at any time when the Sun shines.*

Divide your Ecliptick Line into 24 equal Parts, and in small Figures set down the Hours of the Natural Day after the following manner. At the Intersections of the Ecliptick and Equator place the Figure 6; and bring both these Figures to the brazen Meridian, one
D being

being in the upper, and the other in the lower Hemisphere. Which done, place the twelve Figures in the *Western* Hemisphere in this order following, 6, 7, 8, 9, 10, 11, 12. 1, 2, 3, 4, 5, 6. beginning then at the same Figure of 6, and proceeding *Eastward*, set down the other twelve Figures thus, 6, 5, 4, 3, 2, 1. 12, 11, 10, 9, 8, 7, 6. The Equinoctial being thus divided and mark'd, elevate the

- (a) *Prob. 3.* Globe (a) according to the Latitude of the Place where you are, and bring the Interfection of the Vernal Equinox to the upper Part of the brazen Meridian; and situating the Globe (b) duly *South* and *North*, observe exactly that half of the Globe upon which the *Sun* doth actually shine; for the last Part of the enlightned Hemisphere doth always shew the Hour of the Day upon the Equinoctial Line.

Prob. 13. The Latitude of the place, and Height of the Sun being given at any time, to find thereby the Hour of the Day.

- The Globe being rectify'd (a) according to the Latitude of the given Place, and the Height of the *Sun* at that time being found by an exact Quadrant; mark his Place in the Ecliptick (b) for the given Day; and bring the same to the brazen Meridian. After this, fix the Quadrant of Altitude in the Zenith, and mark in the said Quadrant the particular Degree of the *Sun's* Altitude, and placing the Index of the Horary Circle at Noon, move the Globe together with the Quadrant of Altitude, 'till the *Sun's* Place mark'd in the Ecliptick, and his Degree of Altitude mark'd upon the said Quadrant do come both in one. Which done, observe what Hour the Index doth point at, for that is the Hour desir'd.

Prob. 14. The Latitude of the Place being given as also the true bearing of the Sun in the said Place at any time, to find thereby the Hour of the Day.

- The Globe being (a) rectify'd, and the *Sun's* Place (b) mark'd in the Ecliptick, fix the Quadrant of Altitude in the Zenith, and by the Mariner's Compass observe the true bearing of the *Sun*; then bring the Quadrant of Altitude to the observ'd Point of the Compass upon the wooden Horizon, and move the Globe till the *Sun's* Place in the Ecliptick co-incide with the said Quadrant. Which done, and the Globe continuing in that Position, the Index of the Horary Circle will point at the Hour of the Day at the Time desir'd.

Prob. 15. The Latitude of the Place, and Sun's Place in the Ecliptick being given, to find thereby the Hour of the Day.
Ele-

Elevate the Pole according to the given Latitude, and situate the Globe duly *South* and *North* (a) by the Mariners Compass; then fix a small Needle perpendicularly in the *Sun's* Place in the Ecliptick, and, bringing the same to the brazen Meridian, set the Index of the Horary Circle at Noon; which done, turn the Globe till the Needle cast no Shadow at it, and then observe the Index, for it will then point at the true Hour of the Day. (a) *Prob. 2.*

Prob. 16. Any Place being given to move the Globe so as that the wooden Horizon shall be the Horizon of the same.

Bring the given Place to the brazen Meridian, and reckon from it upon the said Meridian the number of 90 Degrees towards either of the Poles, and where the reckoning ends, place that part of the Meridian in the Notch of the wooden Horizon, and it will prove the Horizon of the given Place.

Prob. 17. To find the Meridian Line by the Globe in any place, and at any time of the Day.

The Latitude of the Place being known, and the Globe (a) elevated accordingly; observe the height of the *Sun* (a) *Prob. 2.* above the Horizon at that time, and draw upon a true Plane a streight Line in, or Parallel to, the Shadow of a Stile perpendicularly erected upon that Plane: In which describe a Circle at an opening of the Compasses, and find (b) the *Sun's* Place in the Ecliptick, and mark his observed height in the (b) *Prob. 2.* Quadrant of Altitude. Then move the Globe together with the said Quadrant, till that Mark in the Quadrant, and the *Sun's* place in the Ecliptick, come both in one; which done, count upon the wooden Horizon the number of Degrees between the Quadrant of Altitude, and the brazen Meridian, and set off the said Number of Degrees upon the aforesaid Circle drawn upon the Plain, by making a visible Point in the Circumference where the reckoning ends, (beginning still at the side towards the *Sun*, and proceeding *East* or *West* according to the time of the Day.) Then draw a Line from that Point in the Circumference through the Centre of the said Circle, and the same will prove the true Meridian Line of that Place, at what time soever the Observation is made.

Prob. 18. A Place being given in the Torrid Zone, to find those Days in which the Sun shall be vertical to the same.

Bring the given Place to the brazen Meridian, and mark what Degree of Latitude is exactly above it. Move the Globe round, and observe the two Points of the Ecliptick that pass through the said Degree of Latitude. Search upon the wooden Horizon (or by proper Tables of

the *Sun's* Annual Motion) on what Days he passeth through the aforesaid Points of the Ecliptick, for those are the Days required in which the *Sun* is vertical to the given Place.

Prob. 19. *The Month and Day being given to find by the Globe those places of the North Frigid Zone, where the Sun beginneth then to shine constantly without setting; as also those places of the South Frigid Zone, in which he then beginneth to be totally absent.*

The Day given, (which must always be one of those, either between the Vernal Equinox and Summer Solstice, or between the Autumnal Equinox and Winter Solstice) find (a) the *Sun's* place in the Ecliptick, and marking the same bring it to the brazen Meridian, and reckon the like Number of Degrees from the North Pole towards the Equator, as there is betwixt the Equator and the *Sun's* Place in the Ecliptick, and set a mark with Chalk where the reckoning ends. Which done, turn the Globe round, and all the Places passing under the said Chalk are those in which the *Sun* begins to shine constantly without setting upon the given Day. For Solution of the latter part of the Problem; set off the same Distance from the South Pole upon the brazen Meridian towards the Equator, as was formerly set off from the North, and making a mark with Chalk, and turning the Globe round, all Places passing under the said Mark are those desir'd, viz. them in which the *Sun* beginneth his Total Absence, or Disappearance from the given Day.

Prob. 20. *A place being given in the North Frigid Zone, to find by the Globe what Number of Days the Sun doth constantly shine upon the said Place, and what Days he is absent, as also the first and last Day of his Appearance.*

Bring the given Place to the brazen Meridian, and (a) Prob. 2. observing its Latitude, (a) elevate the Globe accordingly, then turn the Globe about till the first Degree of *Cancer* come under the Meridian, and count the same number of Degrees upon the Meridian from each side of the Equator, as the place is distant from the Pole; and making a mark where the reckoning ends, turn the Globe round, and carefully observe what two Degrees of the Ecliptick pass exactly under the two Points mark'd in the Meridian, for the Northern Arch of the Circle (viz. that comprehended between the two mark'd Degrees being reduc'd to time, will give the Number of Days that the *Sun* doth constantly shine above the Horizon of the given Place, and the opposite Arch of the said Circle will give the number of
Days

Days in which he is absent. The Pole continuing in the same Elevation, bring the beginning of *Cancer* to the brazen Meridian, and observe the two Degrees of the Ecliptick, which in the mean time co-incide with the Horizon; then search upon the wooden Horizon, for those Days that the *Sun* doth enter into the aforesaid Degrees of the Ecliptick, for those are the Days of his first and last Appearance in the given Place.

Prob. 21. *The Month and Day being given, to find that place on the Globe to which the Sun (when in its Meridian) shall be vertical on that Day.*

The *Sun's* Place in the Ecliptick being (a) found bring the same to the brazen Meridian, in which make (a) Prob. 6. a small mark with Chalk, exactly above the *Sun's* Place. Which done, find (b) those Places that have the *Sun* (b) Prob. 7. in the Meridian at the time given; and bringing them to the brazen Meridian, observe that part of the Globe exactly under the aforesaid mark in the Meridian, for that is the Place desired.

Prob. 22. *The Month and Day being given to find upon what Point of the Compass the Sun riseth and setteth in any place at the Time given.*

Elevate the Pole according to the Latitude of the desired Place, and finding the *Sun's* Place in the Ecliptick at the given Time, bring the same to the *Eastern* side of the Horizon, and you may clearly see the Point of the Compass upon which he then riseth. By turning the Globe about till his place co-incide with the *Western* side of the Horizon, you may also see upon the said Circle the exact Point of his setting.

Prob. 23. *To know by the Globe the Length of the longest and shortest Days and Nights in any place of the World.*

Elevate the Pole according to the Latitude of the given Place, and bring the first Degree of *Cancer* (if in the *Northern*, or *Capricorn*, if in the *Southern* Hemisphere) to the *East* side of the Horizon; and setting the Index of the Horary Circle at Noon, turn the Globe about till the Sign of *Cancer* touch the *Western*-side of the Horizon, and then observe upon the Horary Circle the Number of Hours between the Index and the upper Figure of XII. (reckoning them according to the Motion of the Index) for that is the length of the longest Day, the Complement whereof is the Extent of the shortest

Night. As for the shortest Day and longest Night, they are only the reverse of the former.

Prob. 24. *To know the Climates of any given Place.*

Find (a) the length of the longest Day in the given (a) Prob. 23. Place, and whatever be the number of Hours whereby it surpasseth twelve, double that Number, and the Product will give the true Climate of the Place desir'd. But here note, That this is to be understood of Places within the Latitude of $66\frac{1}{2}$. As for those of a greater Latitude, (where the Climates increase by intire Months) enter the second Table of Climates (pag. 11.) with the Latitude of the given Place, and opposite thereto you'll find the proper Climate of a place in the said Latitude.

Prob. 25. *The Length of the longest Day in any Place being known, to find thereby the Latitude of that place.*

Having the length of the longest Day, you may (a) Prob. 24. know thereby (a) the proper Climate of that Place, and by the Table of Climates (pag. 10.) you may see what Degree of Latitude corresponds to that Climate, which Degree is the Latitude of the Place desir'd.

Prob. 26. *The Latitude of the Place being given, as also the Sun's Place in the Ecliptick, to find thereby the beginning of the Morning, and end of the Evening Twilight.*

The Globe being rectify'd, and the Sun's Place brought to the brazen Meridian, set the Index of the Horary Circle at Noon; then bring that Degree of the Ecliptick, (which is opposite to the Sun's Place) to the *Western* Quarter, and so move the Globe together with the Quadrant of Altitude, till the Degree opposite to the Sun's Place, and the 18th Degree of the said Quadrant come both in one; which done, observe what Hour the Index then pointeth at, for at that Hour doth in the Morning Twilight begin. As for the Evening Twilight bring the Degree of the Ecliptick opposite to the Sun's Place at that time to the *Eastern* Quarter, and so move the Globe till the same, and the 18th Degree of the Quadrant come both to one, and the Index will point at the Hour when the Evening Twilight doth end.

Prob.

Prob. 27. *The length of the longest Day being given, to find thereby those places of the Earth, in which the longest Day is of that Extent.*

By the given length of the longest Day (*a*) find the true Degree of Latitude, where the Day is of that (*a*) Prob. 25. Extent, and making a mark upon that Degree in the brazen Meridian, turn the Globe round, and observe what Places pass exactly under the said Mark, for they are the Places desir'd.

Prob. 28. *A certain number of Days, not surpassing 182. being given, to find thereby that Parallel of Latitude on the Globe, where the Sun setteth not during those Days.*

Take half of the given Number of Days, and whatever it is, count so many Degrees upon the Ecliptick, beginning at the first of *Cancer*, and make a mark where the Reckoning ends; only observe, that if your number of Days surpass thirty, then your number of Degrees ought to be less than it by one. Bring then the mark'd Point of the Ecliptick to the brazen Meridian, and observe exactly how many Degrees are intercepted between the aforesaid Point and the Pole, for the same is equal to the desir'd Parallel of Latitude. If the desir'd Parallel of Latitude be *South* of the Line, the Operation is the same, bringing only the first Degree of *Capricorn* to the Meridian in lieu of *Cancer*.

Prob. 29. *The Hour of the Day being given, according to our way of reckoning in England, to find thereby the Babylonick Hour at any time.*

The *Babylonick Hour* is the number of Hours from *Sun* rising, it being the manner of the *Babylonians* of old, and the Inhabitants of *Norimberg* at this Day, to commence their Hours from the appearance of the *Sun* in the *Eastern Horizon*. For the finding of this Hour at any time, and in any place, first elevate the Pole (*a*) according to the Latitude of the given Place, and (*b*) noting the *Sun's* Place in the Ecliptick at that time, bring the same to the brazen Meridian, and set the Index of the Horary Circle at Noon; after this, rowl the Globe either *Eastward* or *Westward* according to the time of the Day, 'till the Index point at the given Hour. Then fix the Globe in that Position, and bring back the Index again to Noon, and move the Globe from *West* to *East*, till the *Sun's* Place mark'd in the Ecliptick, co-incide with the *Eastern Horizon*, which done, reckon upon the Horary Circle of the Number of Hours between the Index Noon (or the upper Figure of 12.) for that is the

ber of Hours from *Sun*-rising for that Day in the given Place, or the true *Babylonick Hour* desir'd.

Prob. 30. *The Babylonick Hour being given, to find the Hour of the Day at any time, according to our way of reckoning in England.*

Elevate the Pole according to the given Latitude of the Place, and marking the *Sun*'s place in the Ecliptick, bring the same to the brazen Meridian, and set the Index of the Horary Circle at Noon. Then rowl the Globe *Westward* till the Index point at the given Hour from *Sun* rising, and fixing the Globe in that Situation, bring the Index back again to Noon, and turn the Globe backward till the *Sun*'s place, mark'd in the Ecliptick, return to the same Semicircle of the brazen Meridian from whence it came; which done, observe what Hour the Index of the Horary Circle pointeth at, for the same is the Hour desir'd.

Prob. 31. *The Hour of the Day being given according to our way of reckoning in England, to find thereby the Italick Hour at any time.*

The *Italick Hour* is the number of Hours from *Sun*-setting at all times of the Year, to *Sun*-setting the next following day.

(a) Prob. 2. For the ready finding of such Hours, (a) elevate the

(b) Prob. 6. Pole according to the Latitude of the Place, and (b) noting the *Sun*'s place in the Ecliptick upon the given Day, bring the same to the brazen Meridian, and set the Index of the Horary Circle at Noon. Then turn the Globe either *East* or *West*, according to the time of the Day, till the Index point at the given Hour, and fixing the Globe in that Situation, bring the Index back to Noon. Which done turn the Globe about *Eastwards* till the mark of the *Sun*'s place in the Ecliptick co-incide with the *Western* Horizon, and observe how many Hours there are between the upper Figure of 12 and the Index (reckoning them *Eastward* as the Globe moved) for these are the Hours from *Sun* set, or the *Italick Hour* desir'd.

Prob. 32. *The Italick Hour being given, to find thereby the Hour of the Day at any time according to our way of reckoning in England.*

(a) Prob. 2. This being the Reverse of the former Problem (a) elevate the Pole according to the Latitude of the given Place, and noting the *Sun*'s place in the Ecliptick, bring the same to the *Western* Horizon, and setting the Index of the Horary Circle at

(b) Prob. 31. Noon, turn the Globe *Westward* till the Index point at (b) the *Italick Hour* given; then fixing the Globe in that Position, bring the Index back to Noon, and move the Globe backward

ward till the Mark of the *Sun's* Place return to the same Semicircle of the brazen Meridian from whence it came. Which done, observe how many Hours are between Noon and the Index, (reckoning them from *West to East*) for those are the Hours desired according to our way of reckoning in *England*.

Prob. 33. *The Hour of the Day being exactly given according to our way of reckoning in England, to find thereby the Judaical Hour at any time.*

By the *Judaical Hour* we understand the exact time of the Day according to the Ancient *Jews*, who, in reckoning their Time, divided their artificial Day into twelve Hours, and the Night into as many, which Hours prov'd every Day unequal in extent (unless in Places exactly under the Equator) they still decreasing or increasing according to the Seasons of the Year, or the various Declination of the *Sun*. For the finding of which Hours, observe the following Method. (a) Elevate the Pole according to the Latitude of the given Place, and (b) marking the *Sun's* Place in the Ecliptick at that time, bring it to the *Eastern* Horizon, and set the Index of the Horary Circle at Noon; then turn the Globe about till that place mark'd in the Ecliptick come to the *Western* Horizon, and observe the number of Hours between Noon and the Index, these being the Hours of which the given Day doth consist, which number you are to Note down, and (c) to find what Hour from Sun-rising corresponds with the given Hour, or from Sun-setting, if the given Hour be after Sun-setting. Which done, work by the following Proportion. As the number of Hours, whereof the given Day consisteth, (*viz.* those noted down) is to 12; so is the number of Hours from Sun-rising, (if it be an Hour of the Day) or from Sun-setting (if an Hour of the Night) to a fourth proportional, which is the number desired, *viz.* the *Judaical Hour* at the time given.

(a) Prob. 2.

(b) Prob. 6.

(c) Prob.

29, 31.

Prob. 34. *The Judaical Hour being given, to find thereby the Hour of the Day at any time, according to our way of reckoning in England.*

Elevate the Pole according to the Latitude of the given place, and finding the *Sun's* place in the Ecliptick at the time given, bring the same to the *Eastern* Horizon, and set the Index of the Horary Circle at Noon, then rowl the Globe *Westward*, till the *Sun's* Place co-incide with the *Western* Horizon, and the Index will point at the number of equal Hours, whereof that Day consisteth. Which number you are to note down, and bring the *Sun's* place to the brazen Meridian and setting the Index again at Noon, turn the Globe about till the *Sun's* place co-incide with the *Eastern* Horizon, and the

the Index will point at the Hour when the *Sun* riseth in the given Place. Which done, work by the following proportion. As 12 is to the given Number of *Judaical Hours*, so is the Length of the Day in equal Hours (formerly found out) to a fourth proportional, which is the Number desir'd, *viz.* the Hour of the Day according to our way of reckoning in *England*. Only note, That if the fourth proportional be less than 12, you are to add the same to the Hour of the *Sun* rising, and the Product will give the Number of Hours before Noon for that Day; but if it be more than 12, then subtract it from 12 and the Remainder will give the Hour of the Day for the Afternoon.

Prob. 35. *To find the true Area of the five Zones in square Measure, allowing 60 Miles to one Degree in the Equator.*

The Breadth of the Torrid Zone being 47 Degrees, which reduc'd Miles, make 2820; each of the Temperate 43 Degrees, which make 2580; and each of the Frigid 23 Degrees $\frac{1}{2}$, which make 1410 Miles; the true *Area* of each of those Zones may be found in square Measure by the following proportion. (1.) For the Torrid, The *Area* of the whole Globe being found, (*per Prob. 1.*) say as *Rad.* to the Sine of 47; so is the $\frac{1}{2}$ the *Area* of the Globe to the *Area* of the Torrid Zone. (2.) For each of the Temperate Zones; say as *Rad.* to the difference of the Sines of $23\frac{1}{2}$ and $66\frac{1}{2}$, so is $\frac{1}{2}$ Arch of the Globe to the *Area* of one of the Temperate Zones. Lastly, For the Frigid Zones, add $\frac{1}{2}$ *Area* of the Torrid to the whole *Area* of one of the Temperate, and subtract the Product from $\frac{1}{2}$ *Area* of the Globe, and the Remainder will give the true *Area* of either of the Frigid Zones.

Prob. 36. *A Place being given on the Globe to find those which have the same Hour of the Day with that in the given Place: As also that have the contrary Hours, i. e. Mid-night in the one when it's Mid-day in the other.*

Bring the given Place to the brazen Meridian, and observe what Places are then exactly under the Semi-circle of the said Meridian, for the People in them have the same Hour with that they have in the given Place. The Globe continuing in that Position, set the Index of the Horary Circle at Noon, and turn the Globe till the Index point at Mid-night, and observe what places are then in that Semi-circle of the Meridian, for the Inhabitants of those Places do reckon their Hours contrary to those in the given Place.

Prob. 37. *The Hour of the Day being given in any place, to find those places of the Earth where it's either*
Noon

Now or Midnight, or any other particular Hour at the same Time.

Bring the given Place to the brazen Meridian, and set the Index of the Horary Circle at the Hour of the Day in that place. Then turn about the Globe till the Index point at the upper Figure of XII, and observe what Places are exactly under the upper Semi-Circle of the brazen Meridian, for in them it's Mid-day at the time given. Which done, turn the Globe about till the Index point at the lower Figure of XII, and what Places are then in the lower Semi-Circle of the Meridian, in them it's Midnight at the given Time. After the same manner we may find those places that have any other particular Hour at the Time given, by moving the Globe till the Index point at the Hour desir'd, and observing the Places that are then under the brazen Meridian.

Prob. 38. The Day and Hour being given, to find by the Globe that particular Place of the Earth to which the Sun is vertical at that very time.

The *Sun's* Place in the Ecliptick (a) being found and brought to the brazen Meridian, make a mark above the same with Chalk; then (b) find those Places of the Earth, in whose Meridian the *Sun* is at that instant, and bring them to the brazen Meridian. Which done, observe narrowly that individual part of the Earth which falls exactly under the aforesaid Mark in the brazen Meridian, for that is the particular Place, to which the *Sun* is vertical at that very time. (a) *Prob. 6.* (b) *Prob. 37.*

Prop. 39. The Day and Hour of the Day being given to find those Places on the Globe, in which the Sun then riseth. 2dly, Those in which he then setteth. 3dly, Those to whom it's Mid-day. And Lastly, These Places that are actually enlightned, and those that are not.

Find that Place of the (a) Globe, to which the *Sun* is vertical at the given Time, and, bringing the same to the brazen Meridian, (b) elevate the Pole according to the Latitude of the said Place. The Globe being fixt in that Position, observe what Places are in the *Western* Semi-Circle or the Horizon, for in them the *Sun* riseth at that time: 2dly, Those in the *Eastern* Semi-Circle, for in them the *Sun* setteth. 3dly, Those that are exactly under the brazen Meridian, for in them it's Mid-day. And Lastly, All those upon the upper Hemisphere of the Globe, for they are actually enlightned, and those upon the lower are them in darkness, are deprived of the *Sun* at that very time. (a) *Prob. 38.* (b) *Prob. 6.*

Prob.

Prob. 40. *The Month and Day being given, as also the Place of the Moon in the Zodiack, and her true Latitude, to find thereby the exact Hour when she shall rise and set, together with her Southing (or coming to the Meridian) of the given Place.*

The Moon's Place in the Zodiack may be found ready enough at any time by an ordinary Almanack, and her Latitude (which is her distance from the Ecliptick) by applying the Semi-circle or Position to her Place in the Zodiack. For the solution of the

- (a) Prob. 2. Problem, (a) elevate the Pole according to the Latitude of the given Place, and the Sun's place in the Ecliptick, at that time being (b) found, and mark'd with

Chalk, as also the Moon's place at the same time, bring the Sun's place to the brazen Meridian, and set the Index of the Horary Circle at Noon, and turn the Globe till the Moon's place successively coincide with the Eastern and Western side of the Horizon, as also the brazen Meridian, and the Index will point at those various times, the particular Hour of her Rising, Setting and Southing.

Prob. 41. *The Day and Hour of either a Solar or Lunar Eclipse being known, to find by the Globe all those Places in which the same will be visible.*

- Mark the Sun's place in the (a) Ecliptick for the given Day, as also the opposite Point thereto, which is the Place of the Moon at that time. Then find (b) that Place of the Globe to which the Sun is vertical at the given Hour, and bring the same to the Pole (or vertical Point) of the wooden Horizon, and fixing the Globe in that Situation, observe what Places are in the upper Hemisphere, for in most of them will the Sun be visible during his Eclipse. As for the Lunar (c) Prob. 9. Eclipse, you are to find (c) the Antipodes of that Place which hath the Sun vertical at the given Hour, and bringing the same to the Pole of the wooden Horizon, observe (as formerly) what Places are in the upper Hemisphere of the Globe, for in such will the Moon be visible during her Eclipse, except those that are very near unto, or actually in the Horizon.

Prob. 42. *A Place being given on the Globe, to find the true Situation thereof from all other Places desir'd, or how it bareth in respect to such Places.*

The various Places desir'd [which are supposed to be some of those that lie upon the intermediate Points of the Compass] being pitch'd upon,

upon, bring the given Place to the brazen Meridian, and elevate the Pole according to its Latitude, and fixing the Quadrant of Altitude in the Zenith, apply the same successively to the Places desir'd, and the lower Part of the said Quadrant will intersect the wooden Horizon at those various Points of the Compass, (inscrib'd upon the said Circle) according to the true bearing of the given Place, in respect to the Places desir'd.

Prob. 43. *A Place being given on the Globe, to find all other places that are situated from the same, upon any desired Point of the Compass.*

Elevate the Pole according to the Latitude of the given Place, and bring the said Place to the brazen Meridian, and fixing the Quadrant of Altitude in the Zenith, apply the lower part thereof to the desir'd Point of the Compass upon the wooden Horizon; and observe what Places are exactly under the Edge of the said Quadrant, for those are the Places that are situated from, or bear off, the given Place according to the desired Point of the Compass.

Prob. 44. *Two Places being given on the Globe, to find the true Distance between them.*

The Two Places given must of necessity lie under either the same Meridian, the same Parallel of Latitude, or else differ both in Longitude and Latitude. (1.) If they lie under the same Meridian, then bring them both to the brazen Meridian, and observe the Number of Degrees of Latitude comprehended between them, which being reduc'd into Leagues or Miles, will give the Distance requir'd. (2.) If they lie under the same Parallel of Latitude, then bring them separately to the brazen Meridian, and observe the Number of Degrees between them upon the Equator; which done, enter the Table [pag. 9.] with the Latitude of the given Places, and seeing thereby how many Miles in that Parallel are answerable to one Degree in the Equator, multiply those Miles by the aforesaid Number of Degrees upon the Equator, and the Product will give the Distance requir'd. But, *Lastly*, if the two Places given do differ both in Longitude and Latitude, then bring one of 'em to the vertical Point of the brazen Meridian, and extending the Quadrant of Altitude to the other, observe upon the said Quadrant the Number of Degrees between 'em, which being reduc'd into Leagues or Miles, will give the Distance requir'd. The third Case of the Problem being most considerable, and occurring more frequently than the other two, we shall here annex another way of performing the same besides the Globe, and that is by resolving a Spherical Triangle, two Sides whereof (*viz.*) the Compliments of the different Latitudes, or the Distance of the given Places (from the Poles) are not only given, but also the Angle comprehended between them, (it being equal to the difference of their Longitude) by which Sides and

and Angle given, we may very easily find the third Side by the noted Rules in Trigonometry, which third Side is the distance required.

Prob. 45. *A Place being given on the Globe, and its true Distance from a second place, to find thereby all other Places of the Earth that are of the same distance from the given Place.*

Bring the given Place to the brazen Meridian, and elevate the Pole according to the Latitude of the said Place; then fix the Quadrant of Altitude in the Zenith, and reckon up the said Quadrant, the given Distance between the first and second place (providing the same be under 90 Degrees, otherwise you must use the Semi-Circle of Position) and making a Mark where the reckoning ends, and moving the said Quadrant or Semi-Circle quite round upon the Surface of the Globe, all Places passing under that Mark, are those desir'd

Prob. 46. *The Latitude of two Places being given, and how one of them beareth of the other, to find thereby the true distance between them.*

For the Solution of this Problem, suppose the first Meridian to be the true Meridian of one of the given Places, particularly that whose bearing is unknown. Upon the Upper Semi-Circle of that Meridian mark the Latitude of the said Place; then elevate the Pole according to the Latitude of the other Place, and fixing the Quadrant of Altitude in the Zenith, extend the same to the given Point of the Compass upon the wooden Horizon, and turn the Globe about till the Point mark'd in the aforesaid Meridian co-incide with the said Quadrant. Which done, reckon upon that Quadrant the Number of Degrees between that Point mark'd in the first Meridian and the vertical Point; which Degrees being converted into Leagues or Miles, will give the Distance requir'd.

Prob. 47. *The Longitude of two Places being given, as also the Latitude of one of them, and its bearing from the other, to find thereby the true Distance between them.*

For the Solution of this Problem, suppose the first Meridian to be the true Meridian of the Place, whose Latitude is unknown, reckon from that Meridian upon the Equator the number of Degrees equal to the difference of Longitude of the two Places, and make a mark where the reckoning ends, and bringing the same to the brazen Meridian, (which represents the Meridian of the second Place) reckon upon it the Degrees of the given Latitude; and fixing the Globe in
that

that Situation, raise the Pole according to that Latitude, and fix the Quadrant of Altitude in the Zenith, extending the other extremity thereof to the given Point of the Compass upon the wooden Horizon. The Globe continuing in this Position, observe that Point of the Surface, where the Quadrant of Altitude intersects the first Meridian, for the same representeth the second Place, and that Arch of the Quadrant between the said Point and Zenith, being converted into Leagues or Miles, will give the Distance requir'd.

Prob. 48. *The Distance between two Places lying under the same Meridian being given, as also their respective bearing from a third Place, to find thereby that place with its true Distance from the other two.*

The given Distance being reckon'd any where upon the brazen Meridian, and those Places of the Globe exactly under the beginning and end of that reckoning being mark'd, raise the Pole according to the Latitude of one of them, (which for Distinction sake, we'll term the first Place) and fixing the Quadrant of Altitude in the Zenith, extend the other Extremity thereof to the given Point of the Compass upon the wooden Horizon, according as the said first place beareth off the third unknown, and make a small Tract with Chalk upon the Globe, where the Edge of the Quadrant passeth along. Which done elevate the Pole according to the Latitude of the second Place, and fixing the Quadrant of Altitude in the Zenith, extend the same (as formerly) to the given Point of the Compass upon the wooden Horizon, and observe where the said Quadrant intersects the aforesaid Tract of Chalk made upon the Surface of the Globe, for that is the third Place desir'd, whose Distance from the other two may be found by the foregoing Problem.

These are the chief *Problems* performable by the Terrestrial Globe, as also the manner of their Performance: But if the Reader desire more, let him consult *Varenius*, (his *Geographia Generalis*) from whom we have borrowed several of those abovementioned, Now followeth, according to our proposed Method.

S E C T. III.

Containing some Plain Geographical Theorems.

Theor. 1. **T**HE Latitude of any Place is always equal to the Elevation of the Pole in the same Place, & è contra.

Theor. 2. The Elevation of the Equator in any Place is always equal to the Compliment of the Latitude in the same Place, & vice versa.

Theor. 3. Those Places lying under the Equinoctial Line, have nothing of Latitude, it being there that the Calculation of Latitude begins.

Theor. 4. Those Places lying exactly under the two Poles have the greatest Latitude, it being there that the Calculation of Latitude doth end.

Theor. 5. Those Places lying exactly under the first Meridian, have nothing of Longitude, it being there that the Calculation of Longitude begins.

Theor. 6. Those Places immediately adjacent to the Western-side of the first Meridian have the greatest Longitude, it being there that the Calculation of Longitude doth end.

Theor. 7. All Places lying upon either side of the Equator have the greater or lesser Latitude according to their respective Distance therefrom.

Theor. 8. All Places lying upon either side of the Equator, and exactly under the same, have the greater or lesser Longitude, according to their respective Distance from the first Meridian.

Theor. 9. That particular Place of the Earth lying exactly under the Intersection of the first Meridian and Equinoctial Line hath neither Longitude nor Latitude.

Theor. 10. No place of the Earth is distant from another above 10800 Italian Miles, allowing 60 to one Degree in the Equator.

Theor.

Theor. 11. No place of the Earth is distant from its proper Antipodes (diametrically taken) above 7200 Italian Miles, still allowing 60 to one Degree in the Equator.

Theor. 12. The sensible Horizon of every place doth as often change, as we happen to change the Place it self.

Theor. 13. The apparent Semi-diameter of the sensible Horizon in most Places, doth frequently vary according to the Refraction of the Sun-beams.

Theor. 14. All Countries upon the Face of the whole Earth do equally enjoy the Light of the Sun (in respect of Time) and are equally depriv'd of the Benefit thereof.

Theor. 15. In all Places on the Globe of the Earth, save exactly under the Poles, the Days and Nights are of an equal Length, (viz. twelve Hours each) when the Sun cometh to the equinoctial Line.

Theor. 16. In all Places between the Equinoctial and the two Poles, the Days and Nights are never equal to one another, save only those two times of the Year, when the Sun entereth the Signs of Aries and Libra.

Theor. 17. The nearer any Place is to the Line, the lesser is the difference between the length of the artificial Days and Nights in the said Place; and on the contrary, the farther remov'd, the greater.

Theor. 18. In all Places lying under the same Parallel of Latitude, the Days and Nights are of the same extent, and that at all times of the Year.

Theor. 19. Three or more Places being given on the Globe that lie between the Equator and either of the Poles, and equi-distant from one another, the Extent of the longest Day in those Places doth not encrease proportionably to the distance of the places themselves.

Theor. 20. Three or more places being given on the Globe that lie between the Equator and the Poles, in which the length of the longest Day doth equally encrease; the Distance between the Parallels of those Places is not equal to one another.

Theor. 21. Three or more Places being given on the Globe, whose Distance from the Equator to either Pole exceeds one another in Arithmetical Proportion: The length of the longest Day in one doth not keep the same Analogy to that in the other, according to the Proportion of their distance.

E

Theor.

Theor. 22. *In all Places of the Torrid Zone, the Morning and Evening Twilight is least; in the Frigid, greatest; and in the Temperate it's a Medium between the two.*

Theor. 23. *To all places lying within the Torrid Zone, the Sun is duly Vertical twice a Year, to those under the Tropicks, once; but to them in the Temperate and Frigid, never.*

Theor. 24. *In all places of the two Frigid Zones, the Sun appeareth every Year without setting for a certain Number of Days, and disappeareth for the same space of time. And the nearer unto, or the farther from the Pole those Places are, the longer or shorter is his continued Presence in, or Absence from, the same.*

Theor. 25. *In all places exactly under the Arctick and Ant-Arctick Circles, the Sun (at his greatest Declination) appeareth every Year for one Day compleatly without setting, and intirely disappeareth another, but daily riseth and setteth in those Places at all other times, as elsewhere.*

Theor. 26. *In all places between the Equator and the North Pole, the longest Day and shortest Night, is always when the Sun hath the greatest Northern Declination; and the shortest Day and longest Night, when he hath the greatest Southern.*

Theor. 27. *In all places between the Equator and the South Pole, the longest Day and shortest Night, is always when the Sun hath the greatest Southern Declination; and the shortest Day and longest Night, when the greatest Northern.*

Theor. 28. *In all places situated under the Equinoctial Line, the Meridian Shadow of a Style perpendicularly erected, doth cast it self towards the North for one half of the Year, and towards the South during the other.*

Theor. 29. *In all places lying under the Equinoctial Line, there is no Meridian Shadow on those two Days of the Year, that the Sun doth enter the Signs of Aries and Libra.*

Theor. 30. *The nearer that Places are unto, or the farther remov'd from, the Equator, the shorter or longer accordingly is the Meridian Shadow of a Style perpendicularly erected in such Places.*

Theor. 31. *The farther that Places are removed from the Equator (yet not surpassing 66 Degrees of Latitude) the greater is the Sun's Amplitude, or that Arch of the Horizon between the Points of due East and West, and those in which the Sun riseth*

riseth and setteth on the Days of the Summer and Winter Solstice.

Theor. 32. *In all places lying under the same Semi-circle of the Meridian, the Hours both of the Day and Night are always the same in one, as in the other.*

Theor. 33. *In all places both of the North and Southern Hemispheres, that lie under opposite Parallels of Latitude, the Seasons of the Year are not the same in one, as in the other.*

Theor. 34. *In all places situated in a Parallel Sphere, the Circle of the Sun's Diurnal Motion runs always Parallel (or very near it) to the respective Horizon of such Places.*

Theor. 35. *In all places situated in a Right Sphere, the Circle of the Sun's Diurnal Motion is still perpendicular (or very near it) to the respective Horizon of such Places.*

Theor. 36. *In all places situated in an Oblique Sphere, the Circle of the Sun's Diurnal Motion is always Oblique unto, or cutteth the Horizon of such Places at unequal Angles.*

Theor. 37. *If the Difference of Longitude in two Places be exactly 15 Degrees. The People residing in the Eastmost of them will reckon the time of the Day sooner by one Hour, then those in the other. If the Difference be 30 Degrees, then they'll reckon their Hours sooner by two. If 45 Degrees, by three. And if by 60, then by four, &c.*

Theor. 38. *If People residing in two distinct Places do differ exactly one Hour in reckoning their time (it being only Noon to one, when one in the Afternoon to the other) the true Distance between the respective Meridians of those Places is exactly 15 Degrees upon the Equator. If they differ two Hours, the distance is 30 Degrees. If three, it's 45. And if four, it's compleatly 60, &c.*

Theor. 39. *If any Ship set out from any Port, and steering Eastward doth intirely surround the Globe of the Earth, the People of the said Ship, in reckoning their time, will gain one Day compleatly at their return, or count one more than those residing at the said Port. If Westward, then they'll lose one, or reckon one less.*

Theor. 40. *If two Ships set out from the same Port at the same Time, and both surround the Globe of the Earth, one steering East, and the other Westward, they'll differ from one another in reckoning their time two Days compleatly at their return;*

even suppose they happen to arrive on the same Day. If they surround the Earth twice (steering as aforesaid) they'll differ four Days; if thrice, then Six, &c.

Theor. 41. If several Ships set out from the same Port, either at the same or different Times, and do all surround the Globe of the Earth, some steering due South, and others due North, and arrive again at the same Port; the respective People of those different Ships at their return will not differ from one another in reckoning their Time, nor from those who reside at the said Port.

These are the chief Geographical Theorems, or Self-evident Truths clearly deducible from the fore-going Problems, and to these we might add a great many more; but leaving such Truths, we pass to some others (in pursuance of our proposed Method) and such as are equally certain with the aforesaid Theorems, though not so apparent, yet probably more diverting. Therefore followeth

S E C T. IV.

Containing some Amazing GEOGRAPHICAL PARADOXES.

Parad. 1. **T**HERE are two remarkable Places on the Globe of the Earth, in which there is only one Day and one Night throughout the whole Year.

Par. 2. There are also some places on the Earth, in which it is neither Day nor Night at a certain time of the Year, for the space of twenty four Hours.

Par. 3. There is a certain place of the Earth, at which if two Men should chance to meet, one would stand upright upon the Soles of the others Feet, and neither of them should feel the other's Weight, and yet the both should retain their Natural Posture.

Par. 4. There is also a certain place of the Earth, where a Fire being made, neither Flame nor Smoak would ascend, but
move

move circularly about the Fire. Moreover, if in that place one should fix a smooth or plain Table without any Ledges whatsoever, and pour thereon a large Quantity of Water, not one Drop thereof could run over the said Table, but would raise it self up in a large Heap.

Par. 5. There is a certain place on the Globe, of a considerable Southern Latitude, that hath both the greatest and least Degree of Longitude.

Par. 6. There are three remarkable places on the Globe, that differ both in Longitude and Latitude, and yet all lie under one and the same Meridian.

Par. 7. There are three remarkable places on the Continent of Europe, that lie under three different Meridians, and yet all agree both in Longitude and Latitude.

Par. 8. There is a certain Island in the *Ægean Sea*, upon which, if two Children were brought forth at the same instant of Time, and living together for several Years, should both expire on the same Day, yea, at the same Hour and Minute of that Day, yet the Life of one would surpass the Life of the other by divers Months.

Par. 9. There are two observable places belonging to Asia, that lie under the same Meridian, and of a small distance from one another; and yet the respective Inhabitants of them in reckoning their time, do differ an intire Natural Day every Week.

Par. 10. There is a particular place of the Earth, where the Winds, (though frequently veering round the Compass) do always blow from the North Point.

Par. 11. There is a certain Hill in the South of Bohemia, on whose Top, if an Equinoctial Sun-Dial be duly erected; a Man that is Stone-blind may know the Hour of the Day by the same, if the Sun shines.

Par. 12. There is a considerable Number of places lying within the Torrid Zone, in any of which, if a certain kind of Sun-Dial, be duly erected; the Shadow will go back several Degrees upon the same, at a certain time of the Year; and that twice every Day for the space of divers Weeks: Yet no ways derogating from that miraculous returning of the Shadow upon the Dial of Ahaz, in the Days of King Hezekiah.

Par. 13. There are divers places on the Continent of Africa, and the Islands of Sumatra and Borneo, where a certain kind of Sun-dial being duly fix'd, the Gnomon thereof will cast no

shadow at all, during several Seasons of the Year; and yet the exact Time of the Day be known thereby.

Par. 14. *There is a certain Island in the vast Atlantick Ocean, which being descry'd by a Ship at Sea, and bearing due East of the said Ship, at twelve Leagues distant by Estimation; the truest Course for hitting of the said Island, is to steer six Leagues due East, and just as many due West.*

Par. 15. *There is a remarkable place on the Globe of the Earth, of a very pure and wholesome Air, to breathe in, yet of such a strange and detestable Quality, that it's absolutely impossible for two of the intirest Friends that ever breath'd, to continue in the same, in Mutual Love and Friendship for the space of two Minutes of time.*

Par. 16. *There is a certain noted place in the vast Atlantick Ocean, where a brisk Levant is absolutely the best Wind for a Ship that is to shape a due East Course; and yet she shall still go before it.*

Par. 17. *There are divers remarkable places upon the Terraqueous Globe, whose sensible Horizon is commonly fair and serene; and yet 'tis impossible to distinguish properly in it any one of the Intermediate Points of the Compass; nay, nor so much as two of the four Cardinal themselves.*

Par. 18. *There is a certain Island in the Baltick Sea, to whose Inhabitants the Body of the Sun is clearly visible in the Morning before he ariseth, and likewise in the Evening after he is set.*

Par. 19. *There is a certain Village in the Kingdom of Naples, situated in a very low Valley, and yet the Sun is nearer to the Inhabitants thereof every Noon by 3000 Miles and upwards, than when he either riseth or setteth to those of the said Village.*

Par. 20. *There is a certain Village in the South of Great Britain, to whose Inhabitants the Body of the Sun is less visible about the Winter Solstice, than to those who reside upon the Island of Ice-land.*

Par. 21. *There is a vast Country in Æthiopia Superior, to whose Inhabitants the Body of the Moon doth always appear to be most enlightned when she's least enlightned; and to be least when most.*

Par. 22. *There is a certain Island, (whereof mention is made by several of our latest Geographers) whose Inhabitants cannot properly be reckon'd either Male or Female, nor altogether Her-*
maphro-

maphrodites; yet such is their peculiar Quality, that they're seldom liable unto either Hunger or Thirst, Cold or Heat, Joy or Sorrow, Hopes or Fears, or any such of the common Attendants of Human Life.

Par. 23. There is a remarkable place of the Earth of a considerable Southern Latitude, from whose Meridian the Sun removeth not for several Days at a certain time of the Year.

Par. 24. There is a certain place of the Earth of a considerable Northern Latitude, where though the Days and Nights, (even when shortest) do consist of several Hours; yet in that place it's Mid-day or Noon every Quarter of an Hour.

Par. 25. There are divers places on the Globe of the Earth, where the Sun and Moon, yea, and all the Planets, do actually rise and set according to their various Motions, but never any of the fixed Stars.

Par. 26. There is a very remarkable place upon the Terraqueous Globe, where all the Planets, notwithstanding their different Motions, and various Aspects, do always bear upon one and the same Point of the Compass.

Par. 27. There is a certain noted part of the Earth, where the Sun and Moon [*ipso tempore plenilunii*] may both happen to rise at the same Instant of Time, and upon the same Point of the Compass.

Par. 28. There is a certain place on the Continent of Europe, where if several of the ablest Astronomers (the World now affords) should nicely observe the Cœlestial Bodies, and that at the same Instant of time, yet the Planetary Phases, and their various Aspects would be really different to each of them.

Par. 29. There is a large and famous Country on the Continent of Africa, many of whose Inhabitants are born perfectly Deaf, and others Stone-blind, and continue so during their whole Lives; and yet such is the amazing Faculty of those Persons, that the Deaf are as capable to judge of Sounds as those that hear, and the Blind of Colours as they who see.

Par. 30. There are certain People in South America, who are properly furnish'd with only one of the five Senses, viz. that of Touching, and yet they can both Hear and See, Taste and Smell, and that as nicely as we Europeans, who have all the Five.

Par. 31. There is a certain Country in South America, many of whose Savage Inhabitants are such unheard of Canibals, that they not only feed upon Human Flesh, but also some of them do a-

actually eat themselves, and yet they commonly survive that strange Repast.

Par. 32. *There is a remarkable River on the Continent of Europe, over which there is a Bridge of such a breadth, that above three thousand Men abreast may pass along upon the same, and that without crowding one another in the least.*

Par. 33. *There is a large and spacious Plain in a certain Country of Asia, able to contain six hundred thousand Men drawn up into Battle Array: which Number of Men being actually brought thither, and there drawn up, it were absolutely impossible for any more, than one single Person, to stand upright upon the said Plain.*

Par. 34. *There is a certain European City, whose Buildings, being generally of firm Stone, are (for the most part) of a prodigious height, and exceeding Strong; and yet it is most certain that the Walls of those Buildings are not parallel to one another, nor perpendicular to the Plain on which they are built.*

Par. 35. *There is a certain City in the Southern part of China, whose Inhabitants (both Male and Female) do observe almost the same Posture and Gate in Walking, as we Europeans; and yet they frequently appear to Strangers, as if they walk'd on their Heads.*

Par. 36. *There are ten places of the Earth, distant from one another three hundred Miles and upwards, and yet none of them hath either Longitude or Latitude.*

Par. 37. *There are two distinct places of the Earth lying under the same Meridian, whose difference of Latitude is sixty Degrees compleatly; and yet the true distance between those two places doth not really surpass sixty Italian Miles.*

Par. 38. *There are also two distinct places of the Earth, lying under the Equinoctial Line, whose difference of Longitude is compleatly 86 Degrees $\frac{1}{2}$; and yet the true distance between those two places, is not full eighty six Italian Miles.*

Par. 39. *There are three distinct places of the Earth, all differing both in Longitude and Latitude, and distant from one another two thousand Miles compleatly, and yet they do all bear upon one and the same Point of the Compass.*

Par. 40. *There are three distinct places on the Continent of Europe, equidistant from one another (they making a true Equilateral Triangle, each of whose sides doth consist of a thousand Miles) and yet there is a fourth place so situated in respect*

of the other three, that a Man may travel on Foot from it to any of the other three, in the space of one Artificial Day at a certain time of the Year; and that without the least Hurry or Fatigue whatsoever.

Par. 41. There are three distinct places on the Continent of Europe, lying under the same Meridian, and at such a distance, that the Latitude of the third surpasseth that of the second by so many Degrees and Minutes exactly, as the second surpasseth the first, and yet the true distance of the first and third from the second (or intermediate place) is not the same by a great many Miles.

Par. 42. There are two distinct places on the Continent of Europe, so situated in respect of one another, that though the first doth lie East from the second, yet the second is not West from the first.

Par. 43. There is a certain European Island, the Northmost Part whereof doth frequently alter both its Longitude and Latitude.

Par. 44. There is a certain place in the Island of Great Britain, where the Stars are always visible at any time of the Day, if the Horizon be not overcast with Clouds.

Par. 45. It may be clearly demonstrated by the Terrestrial Globe, That it is not above twenty four Hours Sailing from the River of Thames in England to the City of Messina in Sicily, at a certain time of the Year; providing there be a brisk North Wind, a light Frigate, and an Azimuth Compass.

These are the chief *Paradoxical Positions* in Matters of Geography, which mainly depend on a thorough Knowledge of the Globe; and though it is highly probable, that they'll appear to some as the greatest of Fables; yet, we may boldly affirm, That they're not only equally certain with the afore-said *Theorems*, but also we are well assur'd, That there's no Mathematical Demonstration of *Euclid*, more infallibly true in it self than is every one of them. However, we think it not fit to pull off the Vizor, or expose those masked *Truths* to publick View, since to endeavour the unmasking of 'em may prove a private Diversion, both pleasant and useful to the ingenious Reader, at his more vacant Hours; we hastening in the mean time to the last Thing propos'd, *viz.*

S E C T. III.

Concerning Land and Water.

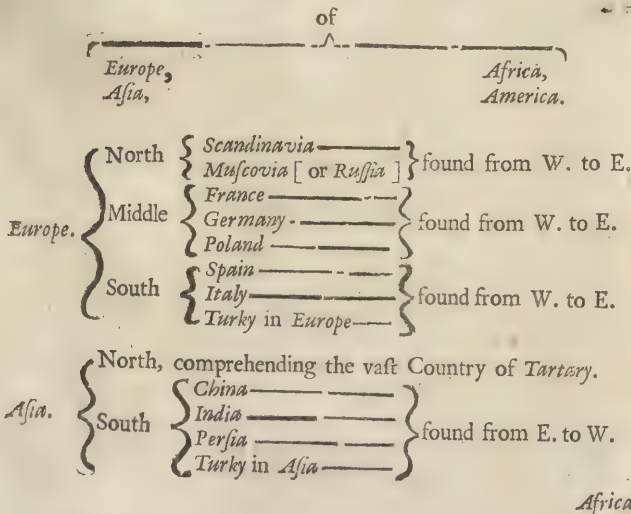

THE Surface of the Terraqueous Globe [to which we intirely restrict our selves both here, and in the following Parts of this *Treatise*] being always considered by Geographers as the Superficies compos'd of *Land* and *Water*, as its sole constituent Parts, and these Parts being subdivided (Page 13.) as followeth, *viz.*

| Land into | Water into |
|---|--|
| Continents, Isthmus's, Islands, Promontories, Peninsula's, Mountains. | Oceans, Straits, Seas, Lakes, Gulfs, Rivers. |

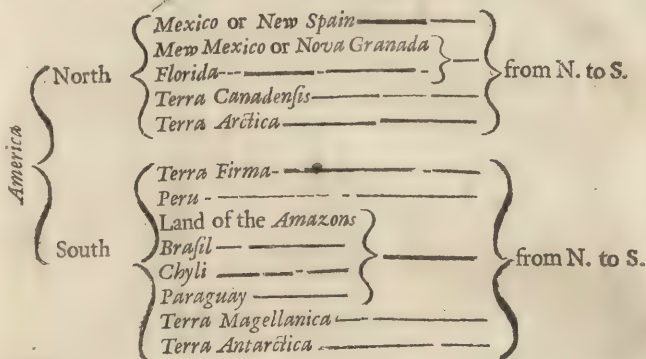

Of all these separately, and in their Order. Therefore

§. I. Of CONTINENTS.

Commonly reckon'd Four, *viz.* Those

found from W. to E.

§. 2. Of ISLANDS.

They belong either

| | | | | |
|---------------------------|-------------------------------|---------------------------------|----------------------|----------------------|
| Asia | The Japan Island ————— | | Lying | E. of China. |
| | The Philippin ————— | | | S. W. of Japan. |
| | The Isles des Larrons ————— | | | E. of the Philippin |
| | The Moluccoes ————— | | | S. of the Philippin. |
| | The Islands of the Sund ————— | | | W. of the Moluc. |
| | Ceylon and the Maldives ————— | | W. of the Isl. of S. | |
| Africa | More remarkable | Madagascar ————— | E. of Æthiopia. | |
| | | The Islands of Cape Verde ————— | W. of Negroland. | |
| | | The Canary Islands ————— | W. of Biledulger. | |
| | | The Madera ————— | W. of Barbary. | |
| | Best remarkable | The Isles of Gomoro ————— | N. W. of Madag. | |
| | | S. Thomas's Island ————— | W. of Æth. L. 00. | |
| | | The Princess Island ————— | W. of Æth. La. 3. | |
| | | S. Helena ————— | S. W. of S. Thom. | |
| | | Isle of Ascension ————— | N. E. of S. Helena. | |
| | America | North are | California ————— | W. of Nova Gran. |
| Newfoundland ————— | | | E. of Terra Cana. | |
| Middle are the Antiles | | Greater { Cuba ————— | E. of New Spain. | |
| | | Jamaica ————— | [Antilles. | |
| | | Hispaniola ————— | S. E. of the greater | |
| | | Portorico ————— | S. E. of Florida. | |
| Lesser { | | Caribees ————— | N. of Terra Fir. | |
| | | Lucayes ————— | E. of Florida. | |
| | | Sotovento ————— | S. of Terra Magel. | |
| | | Bermudas ————— | | |
| South is Terra del Fuogo. | | | | |

§. 3. OF PENINSULA'S.

| | | | | | |
|----------------------------|-----------------------|---------------------------------------|-------------|------------------------|----------|
| Europe | { | Frisland - ———— | Adjacent to | Germany. | |
| | | Morea ————— | | Greece. | |
| | | Taurica Cherfonesus -- ———— | | Little Tartary. | |
| | | Peninsula India { intra Gang. | | The Contin. } of Asia. | |
| Malacca [Cherfonesia d'or] | Peninsula India intra | | | | |
| Asia | { | | | | [Gangem, |
| | | In Africa is none but Africa it self— | | The W. of Asia. | |
| | | Mexico or North America ———— | | | South } |
| | | Peru or South America ———— | America. | | |
| Americ. | { | | | North } | |
| | | | | | |
| | | | | | |
| | | | | | |

§. 4. Of ISTHMUS's.

| | | |
|-------------------------------------|--|--|
| In Europe are the Isthmus's of | { Corinth ————— Taurica Chersonesus } | { Morea to Greece. Taurica Chersonesus to Little Tartary. |
| In Asia is the Isthmus of Malacca— | } Joining | Malacca to Penins. India intra Gangem. |
| In Africa is the Isthmus of Suex— | | Africa to Asia. |
| In America is the Isthmus of Panama | | Mexico and Peru. |

§. 5. Of PROMONTORIES or CAPE S.

| | | |
|-----------|--|---|
| In Europe | { Cape Nord— Cape la Hogue— The Lands-end— The Lizard— The Start— Cape de Finisterra— Cape de Rocca— Cape S. Vincent— | { The Northmoſt part of Norway. The N. of France. The S. W. } of England. The S. The S. } of Spain. The W. The W. The W. |
| Asia | { Cape Ningpo— Cape Comerin— Cape Razalgate— | { The E. of China. Penins. India intra Gangem. S. E. part of Arabia. |
| Africa | { Cape Spartel— Cape Verde— Cape of Good Hope— Cape of Guardifou— | { The W. of Barbary. The W. of Negroland. The S. of Æthiopia exterior. The N. E. part of Æthiopia exter. |
| America | { Cape de Florida— Cape de Coriente— Cape Froward— Cape Horn— Cape de S. Auguſtine } | { The S. of Florida. The W. of New Spain. The S. of Terra Magellanica. The S. of Terra del Fuogo. The E. of Braſil. |

§. 6. Of MOUNTAINS.

| | | | |
|---------------------------------|------------|-----------------------|--------------------------------------|
| Remarkable Mountains in Europe. | To be seen | The Dolfrino Hills— | Between Sweden and Norway |
| | | Boglowy— | In the South. part } of Moscovia. |
| | | Hyperborean Mountains | In the North. part } |
| | | The Cevennes— | } In the South part of France. |
| | | Anvergne— | |
| | | The Vaugue— | In Lorrain. |
| | | Fitzstetberge— | Incirculating Bohemia. |
| | | Schwarzwalden— | In the S. of Germany, viz. Suabia. |
| | | The Carpathian Moun. | In the South parts of Poland. |
| | | The Pyrenean Hills— | Between Spain and France. |
| | | The Alps— | Between Italy and } France. |
| | | | } Germany. |
| | | The Apennine Hills— | |
| | | Vesuvius [a Vulcano] | Dividing Italy into } East. |
| | | Balkan— | } West. |
| | | The Holy Mount— | |
| | | Lacha— | In the Kingdom of Naples. |
| | | The Grampion Hills— | In the N. of Macedon. |
| | | The Cheviot Hills— | In the E. of Macedon. |
| | | Malvern Hills— | Between Thessaly and Macedon. |
| | | The Peake— | In Scotl. viz. S. of the River Dee. |
| Asia | To be seen | Snowden— | Between Scotland and England. |
| | | Plinlimmon— | In England, viz. Worcestershire. |
| | | Knock Patrick— | In England, viz. Derbyshire. |
| | | Stremboli [a Vulcano] | In Wales, viz. Caernarvonshire. |
| | | Ætna [a Vulcano] | In Wales, viz. Cardiganshire. |
| | | | In Irel. viz. in the C. of Limerick. |
| | | | In a little Island W. of Naples. |
| | | | In the Island of Sicily. |
| | | | |
| | | | |
| | | | |
| | | | |
| | | Imaus— | In Tartary. |
| | | Caucasus— | Between } Tartary. |
| | | Sardonyx— | } Mogul's Empire. |
| | | Guaco— | |
| | | Taurus— | On the N. of Penin. intra Gangem. |
| | | Adam's Pike— | In Peninsula India intra Gangem. |
| | | | Reaching from E. to W. of all Asia. |
| | | | In the Island of Ceylon. |

Remark-

| | | | | |
|-------------------------|---------|----------------------------|------------|---|
| Remarkable Mountains in | Africa | Montes Libyci— | To be seen | between <i>Zaara</i> and <i>Egypt</i> . |
| | | <i>Atlas</i> — | | in the W. of <i>Barbary</i> . |
| | | <i>Bafili</i> — | | in the N. of the <i>Abssyne</i> Emp. |
| | | <i>Amara</i> — | | Under the Eq. in the same Em. |
| | America | Montes <i>Luna</i> — | | Between <i>Abssyne</i> Empire, |
| | | <i>Tenerife</i> — | | <i>Monomotapa</i> . |
| | | The <i>Apalachin</i> Hills | | In the Island of <i>Tenerife</i> . |
| | | The <i>Andes</i> . | | Between <i>Florida</i> . |
| | | | | <i>Terra Canadensis</i> . |
| | | | | in S. Amer, runn. from S. to N. |

§. 7. Of OCEANS.

| | | | | | | | | | |
|-----------------|------------------|----------|----------|----------|-----------|---------------|-------------|---------------|----------------|
| Eur | Asia | Africa | Amer. | Ocean | Enclosing | Europe on the | Asia on the | Africa on the | America on the |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| The Hyperborean | The vast Western | | | | | North. | West. | | |
| | | | | | | | | | |
| Tartarian | China— | Indian— | Persian— | Arabick— | | North. | East. | South. | |
| | | | | | | | | | |
| Oriental | Ethiopick | Atlantic | | | | East. | South. | West. | |
| | | | | | | | | | |
| Vaft Eastern | The Pacific | | | | | East. | West. | | |
| | | | | | | | | | |

§. 8. Of SEAS.

| | | | | | | |
|--------|----------|-------------------|------|-------------------|--------|-----------|
| Europe | Enclosed | Baltick Sea— | with | Swedenland— | on the | W. |
| | | German Sea— | | Poland in part | | E. |
| | | Irish Sea— | | Germany in part | | S. |
| | | Mediterranean Sea | | Scandinavia— | | E. |
| | | Euxine Sea— | | Britain— | | W. |
| | | | | Ireland— | | E. |
| | | | with | Europe— | on the | N. |
| | | | | Barbary— | | S. |
| | | | with | part of Europe on | the | N. and W. |
| | | | | part of Asia | | S. and E. |

The Seas in the other three Parts of the World, are different Parts of the Ocean [except *Mare Caspium* in *Asia*] variously nam'd according as they lie adjacent to different Countries.

§. 9. Of GULES.

| | | | |
|-----------|-----------------------|------------|--|
| Europe | Sinus Botnicus — | Bending up | Northward } into Swedeland. |
| | Sinus Finnicus — | | Eastward } |
| | Sinus Adriaticus — | | N. W. between { Italy. |
| | Gulf of Lions — | | N. into the S. of France. |
| Asia | Gulf of Tarentum | Bending up | N. W. into the S. of Italy. |
| | Gulf of Lepanto — | | E. N. E. between { Greece. |
| | Persian Gulf — | | N. W. between { Morea. |
| In Africa | Gulf of Bengal — | Bending up | N. betw. { Persia. |
| | is the Arabian Gulf — | | N. betw. { Arabia. |
| | | | N. betw. { Penins. India intra |
| | | | N. betw. { Penins. India extra } Gangem. |
| America | Gulf of Mexico — | Bending up | N. W. between { Asia. |
| | Button's Bay — | | N. W. between { Africa. |
| | Baffin's Bay — | | W. between { Florida. |
| | | | S. W. between { Terra Firma. |
| | | | S. W. between { Terra Canadensis. |
| | | | N. W. into Terra Arctica. |

§. 10. Of STRAITS.

| | | | |
|-----------|--------------------------|---------|--------------------------------------|
| Europe | Straits of Dover — | Joining | The Ger. Ocean to the Eng. Channel. |
| | Straits of the Sound | | The Danish to the Baltick Sea. |
| | Straits of Gibraltar | | The Medit. to the Western Ocean. |
| | Straits of Caffa | | Palus Maotis to Pontus Euxinus. |
| | Thracian Bosphorus — | | Pontus Euxinus to the Propontis. |
| | The Hellespont — | | Propontis to the Archipelagus. |
| Asia | Veer of Missina — | Joining | One part of the Mediter. to another. |
| | Boke of Corsica — | | One part of the Mediter. to another. |
| In Africa | Straits of the Sund. | Joining | The Indian and Eastern Ocean. |
| | Straits of Ormus — | | The Persian Gulf to the S. Ocean. |
| America | In Africa is Babelmandel | Joining | The Red Sea to the E. Ocean. |
| | Hudson's Straits — | | Button's Bay to the E. Ocean. |
| | Fretum Davis — | | Baffin's Bay to the E. Ocean. |
| | Magellanick Straits — | | The Vast E. and W. Ocean. |

These are the most remarkable Rivers in the World, as also their old Names, and how they run ; which Rivers will be found very necessary for the better understanding of the *Second Part of this Treatise*, wherein we design to view all remarkable Countries in their *Situation, Extent, Division, and Subdivisions*, and more-especially those of *Europe*. But, since most of those Rivers above-mention'd, belonging to the Continent of *Europe*, do consist of several considerable Branches very necessary to be known ; we shall rehearse such Rivers, and annex to each of them their principal Branches, all which may be readily found by Travelling from the Mouth of the Rivers towards their Heads. Therefore

| | | | | |

These

These are all the remarkable Branches of the chief Rivers on the Continent of *Europe*. And thus we are come to a Period, not only of this Section, but also of the First part of this Treatise; having now perform'd those five Things at first propos'd, which was to entertain the Reader with some *Geographical Definitions, Problems, Theorems, and Paradoxes*; as also a Transient Survey of the whole Surface of the Terraqueous Globe; as it consists of *Land and Water*. And so much for a *General View* thereof. Now followeth,

Modern Geography.

PART II.

Comprehending a

PARTICULAR VIEW OF THE *Terraqueous GLOBE.*

Y a *Particular View* of the Terraqueous Globe, we understand a clear and exact Prospect of all remarkable Countries on the Face of the whole Earth, according as they are represented by particular Geographical Maps; as also a true and compendious Narrative of the chief Observables relating either to them or their Inhabitants: All which may be chiefly reduc'd to these following Heads; *viz.* their

| | | |
|---------------------|-------------------------|----------------------|
| <i>Situation,</i> | <i>Air,</i> | <i>Universities,</i> |
| <i>Extent,</i> | <i>Soil,</i> | <i>Manners,</i> |

This vast Continent of Scandinavia comprehending (as aforesaid) three distinct Kingdoms, viz. those of Sweden, Denmark and Norway. Of each of these separately, and in their Order. Therefore,

§. I. SWEDEN.

Name.] Sweden [formerly Suecia, part of Ancient Scandinavia; and now bounded on the East by Moscovia, on the West and North by Norway; on the South by the Sound and part of the Baltick] is term'd by the Italians, Suezia; by the Spaniards, Suedia; by the French, Suede; by the Germans, Schweden; and by the English, Sweden or Swedeland; so called from its ancient Inhabitants the Sueones, Suevi or Suethidi, with the Addition of Land for Termination.

Air.] The Air of this Country is generally very Cold, but (if not too nigh some Lake or Marsh) very pure and wholesome; yea, so healthful to breathe in, that many of its Inhabitants do frequently live

to an hundred Years, especially they who abstain from excessive drinking, a thing too much practis'd by many of them. The *Antipodes* to this People, or the opposite Place of the Globe of *Swedeland*, is that part of the vast Pacifick Ocean, comprehended between the 192d and 212th Degrees of Longitude, with 55.30 and 70 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 9th, 10th, 11th, and 12th Northern Climates) is not very fruitful, but yet, where less fertile in Corn, that disadvantage is recompens'd with tolerable Pasturage: However, it produceth as much Grain as sufficiently serveth its Inhabitants: Its numerous Lakes are very well stor'd with various kinds of Fishes. Its Mountains are generally covered over with Trees, and several of them lin'd with considerable Mines of Tin, Brass, Iron and Copper, especially the two last, and that beyond any other Country in *Europe*; besides in *Westmania* is a Mine of Silver. The longest Day in the Northmost part of this Country is about two Months (the *Sun* being so long without setting when near the Summer Solstice.) The shortest in the Southmost is about 6 Hours $\frac{1}{2}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Metals, Ox-hides, Goat-skins, Buck-skins, and costly Furs, Pine-trees, Fir-trees, Oaks, Tallow, Tar, Honey, and such like.

Rarities.] The chief *Rarities* of this Country may be reckon'd these following, *viz.* (1.) Two publick *Clocks* of admirable Workmanship; one belonging to the Cathedral Church of *Upsal*; the other to that of St. *Laurence* in *Lunden*, especially the latter, which (suppos'd to be the Work of *Gasper Bartholinus*) shews not only the Day, Hour and Minute, but also all the remarkable Motions of the *Cœlestial Bodies*, with all Festivals, both fix'd and moveable, and several other pleasant Curiosities. (2.) A few Leagues from *Gottenburg* is a dreadful *Cataract*, with a considerable Current, which runs a long way out of the Country, and, coming at last to a hideous Precipice, rusheth down from thence into a low Pit, with a mighty force and terrible noise; and, whereas the Natives usually bring down their Floats of Timber by that Current; such is the height of the afore-said Precipice, and so deep is the Pit into which the Water falls, that large Masts, when hurried down by the impetuous Stream from that Precipice into the Pit, do frequently dive so far under Water, that 'tis a considerable time before they rise up to the Surface thereof again; some of 'em being 20 Minutes, others 40, and some upwards of a whole Hour under Water. If it be alledg'd that the Masts may probably stick fast into the Mud for some time; to take off that Objection, the Pit into which they fall has been often sounded with a Line of
many

many hundred Fathoms long, but never could they reach the bottom. (3.) Towards the Southern part of *Gothland* is a remarkable Slimy Lake which singes such things as are put into it. (4.) In several parts of *Sweden* is found a certain Stone, which, being of a Yellow Colour, intermixt with several Streaks of White, (as if compos'd of Gold and Silver) affords both Sulphur, Vitriol, Alum, and Minium. (5.) Some write of a Lake in *Lapland*, which hath as many Islands in it, as there are Days in the Year.

Archbishops.] Archbishops belonging to *Sweden*, are Two, viz. those of

Upsal

Riga.

Bishops.] Bishops in this Kingdom are eight, viz. those of

Gottenburg,
Srengues,

Wexiöc,
Lunden,

Lindköping,
Scaren,

Abo.
Wiburg,

Universities.] Universities establish'd here, are Two, viz. those of

Upsal,

Abo.

Manners.] The *Swedes* (for the most part) are Men of big and strong Bodies; Men, whose very Constitution doth fit them to be Soldiers. This Nation has been noted in the World for several Warlike Achievements, and is still able to endure the Fatigues of a Military Life; yet their Military Affairs in former times were but very indifferently ordered, their chiefest Force consisting in the Boors, till *Gustavus* and his Successors, with the Assistance of some *Scotch* and *German* Officers, introduc'd good Discipline among the common Soldiers. Their Gentry are much given to Hospitality, very affable and civil to Strangers, and many of them become considerable Proficients in several Arts and Sciences. The Commons are generally esteem'd good Merchants, but look'd upon by all, as too much addicted to Laziness in point of improving their Country, by not cutting down many unnecessary Forests, and improving their Ground to better advantage.

Language.] The *Swedes* speak a Dialect of the *Teutonic*, which is somewhat different from that us'd in *Denmark* and *Upper Germany*. Persons of Quality understand and speak the *High German* Language in its Native Purity. The *Finlanders* have a peculiar Gibberish of their own. For a Specimen of the *Swedish* Tongue, we shall here subjoin the Lord's Prayer in that Language, intending to observe the same Method

thod in treating of all other Languages in Europe. Their *Pater Noster* runs thus, *Fadher war som est ihmlem; helghat warde tiett namyn, till komme titt ricke, skee tin wilie sa comi himmelen, sa ock pa jordeme. wart dagliha brodiffoz i dagh; och forlat ofz wara skuld, sa som ock wforlate them ofz skyldighe aro; Och in leedh ofz ickei frestelse utham frels ofzifa ondo, Amen.*

Government.] The Kingdom of *Swedeland* having suffered various turns of Fortune, being frequently disturb'd by the adjacent Nations, at last got rid of them all, and, becoming terrible to others, spread it self over a considerable part of its Neighbour's Territories. At present 'tis subject unto, and govern'd by its own Monarch, who, since the last Age, is not only Hereditary, but by the late turn of Affairs in his Country, hath also attained unto, and now exerciseth such a Power over the Subject, that the same is really astonishing to any considerable Person, who looks back unto the State of that Kingdom, only a few Years ago. He is indeed a powerful Prince both by Sea and Land, (especially the latter) and always keeps in pay a great number of Forces; and that with a very small Charge to himself. For the common Soldiers and Seamen are maintained by the Boors, and Officers (for the most part) are put in Possession of some Farms of the Crown-Lands, whose Revenues serve for their pay; his Guards only are the greatest and most immediate Charge unto him, they being paid out of his Treasury. He is stil'd King of the *Swedes, Goths and Vandals*: Grand Prince of *Finland*, Duke of *Estonia* and *Carelia*, and Lord of *Ingria*, &c. The different Orders in this Realm are Six, viz. *Princes of the Blood*, the *Nobility*, *Clergy*, *Soldiery*, *Merchantry*, and *Commonalty*. These, by their Representatives being assembled in Parliament, make four different Houses, viz. 1. That of the *Nobility*, where the Grand *Marshal* presides. 2. That of the *Clergy*, where the *Archbishop* of *Upsal* presides. 3. That of the *Burgesses*, where one of the *Consuls* of *Stockholm* presides. And lastly, That of the *Knights of the Shire*, where one of their own Number elected by themselves presides. Chief Courts establish'd in this Kingdom, are these Five, viz. (1.) That commonly called the *King's Chamber*, design'd for the Decision of all Cases happening between the Nobility, Senators, or any of the publick Officers; and here the *King* is (at least, ought to fit as) President. (2.) The *Court Martial*, in which all Matters relating to War are determin'd; and here the Grand *Marshal* of the Army is President. (3.) The *Court of Chancery*, in which Edicts, Mandates, Commissions, and such like, are made out in the *King's* Name; and here the *Chancellor* of the Kingdom is President. (4.) The *Court of Admiralty* in which all Business relating to Maritime Affairs are transacted; and here the *High Admiral* is President. Lastly, The *Court of Exchequer*, in which all Matters concern-

ing the publick Revenue are manag'd, and here the *Grand Treasurer* is President.

Arms.] The King of *Sweden* bears quarterly, In the First and Fourth, *Azure*, three Crowns, *Or*, two in Chief, and one in Base, for *Swedeland*. In the second and third, Barry, *Argent* and *Azure*, a Lion, *Or*, Crown'd *Gules*, for *Finland*. Over all quarterly, in the first and fourth, *Sable*, a Lion, *Or*, Crown'd, arm'd and languid, *Gules*, for the Palatinate of the *Rhine*. In the second and third, Lozenges, Bendwise of twenty one pieces, *Argent* and *Azure*, for *Bavaria*. For the Crest, a Crown Royal, adorn'd with eight Flowers, and clos'd by as many Demi-circles, terminating in a Mond, *Or*. The Supporters are two Lions, *Or*, Crown'd of the same. And his *Motto* in these Words, *Dominus Protector meus*.

Religion.] *Lutheranism* is the establish'd Religion of this Country, being universally profess'd by all Orders and Degrees of Men, (except in *Livonia*, where is a considerable number of *Papists* intermixt ; and *Lapland*, many of whose Inhabitants are meer Heathens, usually worshipping the Sun, Fire, Serpents, and the like) and that ever since the Days of the Reformation, which was happily effected in this Kingdom by *Gustavus* the First, upon his Accession to the *Swedish* Crown, since which time their Religion hath not been disturb'd from abroad but once, and since that Disturbance never distracted at home by Non-Conformity ; for Persons of all Ranks, adhering to the Tenets of *Luther*, give constant Attendance on Divine Service, and join in the same manner of Worship. Which Uniformity in Religion some are pleas'd to impute to that effectual Method, commonly believ'd to be here taken, and lately propos'd in *England*, to deter all *Romish* Priests from entring *Sweden*, [*eorum* sc. *Castratio*] and sowing the Seeds of Dissention among them. *Christianity* was first planted in this Country, A. C. 829 ; and that by the care and diligence of *Ansgarius* (a Monk of *Corvey*, and afterwards Archbishop of *Breme*) sent thither for that end by the Emperour *Lewis* the Pious.

§. 2. DENMARK.

Name. **D**enmark [formerly *Cimbrica Chersonesus*, a part of Ancient *Scandinavia* ; and now bounded on the East, by part of the *Baltick* ; on the West, by part of the *German* Ocean ; on the North, by the *Sound* ; and on the South, by part of *Germany*] is term'd by the *Italians*, *Dania* ; by the *Spaniards*, *Dinmarca* ; by the *French*

French, Denemark; by the High Germans, Denremark; and by the English, Denmark; so called from the Bounds and Marches of its Inhabitants the Danes; whose Country, bordering on the Ancient Batavi and Saxons, was thereupon call'd Dane-march, which Name in process of time was turn'd into that of Denmark.

Air.] The *Air* of this Country is much the same with that in the Southern part of *Swedeland*, it being extremely Cold, but in most places very wholesome. The opposite place of the Globe to *Denmark* is that part of the Pacifick Ocean lying between 189 and 193 Degrees of Longitude, with 54 and 57.30 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 10th and 11th North Climates) is very good for Grain and Pasturage. Here is a bundance of Fish, especially Herrings, as also many wild Fowls, and and most kinds of wild Beasts. The longest Day in the Northmost part is 17 Hours $\frac{1}{2}$, the shortest in the Southmost is 8 Hours $\frac{1}{2}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Fish, Tallow, Furniture for Ships, Armour, Ox-hides, Buck-skins, Fir-wood, and Wainscot, &c.

Barities.] Near to *Sleswick* (Southward) are yet to be seen the Remains of that famous *Wall and Trench*, made above 880 Years ago by *Gotricius* (then King of *Denmark*) to hinder the Incursions of the *Saxons*, resembling somewhat the *Pict's Wall* in *Great-Britain*. Between *Flensburg* and *Sleswick* is a small Village, which goes by the Name of *Anglen*, remarkable in this, that from the said Village, and Country adjacent, came our Ancestors, the Ancient *Angles* into *Great-Britain*. In *Gottorp* is an admirable *Globe* of Copper, 10 Foot $\frac{1}{2}$ Diameter, so contriv'd by one of the Dukes of *Holstein*, that (by certain Wheels turn'd about by Water) it represents exactly the Motions of the *Cœlestial Bodies*. As also another of six Foot Diameter, fram'd by *Tycho Brahe* that famous *Danish Astronomer*, now to be seen with a lively Representation of the *Tycho-Brahick System* mechanically contriv'd, and several curious *Astronomical Instruments* in the *Round Tower* at *Copenhagen*: Which Tower it self is likewise observable for its manner of Ascent, being so contriv'd that a Coach may drive up to the Top thereof. But, whereas the chief Curiosities of *Denmark* may be justly reckon'd those treasured up in the *Museum Regium* at *Copenhagen*; and having had lately an Occasion to view the same, I humbly presume it will not be altogether unacceptable to the Reader to give some account thereof.

This excellent Repository consists of 8 different Apartments, and those well stockt with what deserves the Observation of an inquisitive

Traveller. To run over the Contents of each Apartment, would require a Volume: I shall therefore restrict my self to such *Curiosities* as are most observable; and those I might fitly reduce to the two Classes, *viz.* *Natural* and *Artificial*. Of *Natural Curiosities*, there is indeed in this *Museum* as good a Collection of all sorts, as in most publick Repositories in *Europe*; there being to be seen in it all remarkable *Animals, Birds, Fishes, Plants, Minerals, &c.* brought thither from most parts of the known World. But my present design is not to descend to Particulars here, since the Reader will find an Account of such *Curiosities*, as he travels thro' the various Countries from whence they came, and to whom they Originally belong: Suffice it therefore in this Place to take notice only of the *Artificial Rarities* of this *Museum*, the most remarkable of which are these following, *viz.* (1.) The *Veins* and *Arteries* of the human Body curiously represented by *Iron Ware*, all of 'em appearing in their Natural Situation, Bigness and Colour. (2.) An *Artificial* Humane Skeleton, of *Ivory*, admirably well done by a certain *Danish* Mechanick, its Right-hand grasps a large Sythe, the left holds a Sand-Glass, and upon the out-side of the Case containing this Curiosity is a Commendatory Copy of Verses compos'd by the celebrated *Anatomist Thomas Bartholinus*. (3.) A lively History of our Saviour's Passion cut out in *Ivory*. (4.) An exact Model of a Ship with her Masts and Sails, all of *Ivory*. (5.) An *Ivory* Clock actually a going. (6.) A Cabinet of *Ivory* and *Ebony*; very beautiful to look upon, and admirably well contriv'd within; and remarkable for being the work of a *Danish* Mechanick Stone-blind. (7.) A well polish'd Table of Marble, in which is a natural Representation of a *Crucifix*. (8.) Several other large Marble Tables curiously adorn'd with inlaid precious Stones naturally representing Birds of divers Sorts. (9.) A pretty turn'd wooden Cup, which consists of no fewer than an hundred Cups put into one another; each of which is so thin, that they'll hardly admit of a slight touch of one's Hand without harm. (10.) Several Tankards, Cups, Boxes, and other Vessels of Beach-Tree, neatly made and adorn'd with Variety of curious Figures by a Peasant of *Norway*; and all with no other Tool than an ordinary Knife. (11.) Two curious drinking Vessels, one of Gold, the other of Silver, in form of a sounding Horn. That of Gold weighs 102 Ounces $\frac{1}{2}$, is in length 2 Foot 9 Inches, and contains about two English Pints and an half. This Horn was found in the Diocess of *Ripen*, *Anno* 1639; has in raised work on its out-side such a number of Animals, with Men in strange Postures and divers *Hieroglyphick* Figures as sufficiently evince it to be of a *Pagan* Extraction, and to have been us'd by the Heathens in their Religious Performances. The other of Silver weighs almost four Pounds, and is term'd *Cornu Oldenburgicum*, of which a certain Chronologer *Hamelmanus* gives a strange Relation, pretending that 'twas presented to *Otho I.* (one of
the

the Dukes of Oldenburg) by a *Ghost* that appeared to him in a Wood as he was a Hunting: But, in the Judgment of the best Criticks, 'twas made by *Christian I.* of Denmark. (12.) Many *Roman Urns*, together with a *Stilus Romanus Æneus*, which is four or five Inches long, and about the bigness of an ordinary Goose Quill; it's sharp at one end, and the other is fitted to scratch out what has been falsely written. (13.) *Machina Planetarum*; an excellent Modern Engine; by turning the Handle of which, one may readily see at any time, either past, present, or to come, the true State of the *Celestial Motions* according to the *Copernick System*; the *Longitude* and *Latitude* of each Planet; their *Apogæum* and *Perigæum*; and true Place in the Heavens; with several other pleasant Curiosities. (14.) *Machina Eclipsium*, another Modern Engine, so contriv'd, that, by turning it round, one may see both the *Year* and *Day*, and *Quantity*, of a *Solar* or *Lunar Eclipse* for any time desir'd, either past or to come. Both these curious Engines were projected and completed by the present Professor of Mathematicks at *Copenhagen*, the Ingenious *Olaus Rømer*. (15.) *Machina Ingens Copernicana*, a lively Representation of the *Copernick System*, being a pretty Mechanical Engine, mov'd by Clock-work, which, having the Sun immoveable in the Centre, shews the true Motion of the Earth both Diurnal and Annual; as also the Moon's Motion about the Earth in 29 Days and 12 Hours, with her various *Phases*, and the respective Motion of each of the other Planets. (16.) Many *Prisms*, *Microscopes*, *Barometers* and *Burning Glasses*, particularly one of a prodigious Bigness being 32 Inches Diameter. (17.) A curious *Cylinder* of well polish'd Metal, by which some Colours on a Table, that appear monstrously confus'd to the naked Eye, do clearly represent the true Effigies of *Frederick I.* of Denmark, with his Queen *Sophiana Amalia*. (18.) Various sorts of *Arms* and *Habits* of a great many Nations; with a curious Collection of Pictures done by some of the best Masters. (19.) Some *Indian* and *Egyptian Idols* of Wood, Stone and Ivory; with a few of *Porcelline Earth*, and one of *Brass* from *Egypt* in form of a Hog. (20.) Some Pages of writing on *Palm-Tree-Leaves* from the Coast of *Malabar*, being done by the Natives of that Country, with an Iron Stile. Lastly, in this *Museum* is a great number of *Medals* both Modern and Ancient. The Modern are all *Danish*, beginning with *Christian I.* and descending to the present Times. The Ancient are all *Roman* (except 5 *Greek*) and those either of Gold, Silver or Brass. Of Gold are some of *J. Cæsar*, *Augustus*, *Tiberius*, *Caligula*, *Nero*, *Vespasian*, *Domitian*, *Nerva*, *Trajan*, *Adrian*, *Antoninus Pius*, *Septimius Severus*, and some others. Of Silver are divers of the foregoing Emperours, and those that follow, viz. *Galba*, *Otho*, *Vitellius*, *Titus Vespasian*, *Antoninus Philosophus*, *Aurelius Verus*, *Aurelius Commodus*, *L. Septimius Severus*, and most of the following Emperours down to *Aurelius Victorinus*. Of Brass are Medals of all the Emperours above-mentioned, and several others besides.

Archbishops.] As for *Archbishops* in this Kingdom, there's only one, viz. that of

Copenhagen.

Bishops.] *Bishops* in this Kingdom are those of

Sleswick, Arhusen, Alburg, Ripen, Wiburg.

Universities.] *Universities* in this Kingdom are those of

Copenhagen.

Kiel.

Manners.] The *Danes* (a very warlike People of old, having constrained many of the Northern Nations to submit to the force of their Arms at sometime or other) are now almost of the same Temper with their Neighbours the *Swedes* and *Germans*; but that they are generally esteem'd a People more given to Pride and Cunning, than either of the former. So extravagantly vain are they of their own Performances, and so much addicted of late to fulsome Flattery of their Princes, that upon almost every Undertaking of their King and Country do they use to strike *Medals*; and such as express the Action done in a most *Hyperbolic* manner, tho' sometimes the Matter in it self is of so small Importance, that no Nation of *Europe*, (but the *Danish*) would hardly deem it worthy of a place in their Weekly *Gazette*; much less the Honour of a *Medal*. The *Danes* are indeed Industrious and Frugal enough, but the Trade of their Country is at present very Low, Merchandizing being much discourag'd by the Severity of the Civil Government. They are also considerable Lovers of Learning, but generally greater Lovers of Excess, whether in Drinking or Eating, especially the former; and that ever since the Juice of the Grape was recommended to them by the *High-Germans*, whom they now equal (if not exceed) in all manner of Carousing.

Language.] The Modern Language of Denmark, is originally a Dialect of the *Teutonic*. The Court, Gentry, and chief Burghers commonly use the *High German* in ordinary Discourse, and *French* when they talk with Strangers. How the *Danish* Tongue differs from the *High German*, and the Modern Language in *Swedeland* will best appear from their *Pater Noster*, which runs thus, *Fader vor du som est himmelen; helligt vorde dit naffa tilkomme dit rige vorderdin ville saa paa forden, som hender i himmelen. Gift osz i dagh vort daglige brod; oc forlad osz vor skyld, som vi forladi vore skylather; oc laed osz ickudi fristelse; Men freli osz osv fra ont. Amen.*

Govern

Government.] This Kingdom was formerly Elective (altho' they usually advanc'd the next Heir to the Crown) until the Year 1629. that *Frederick* the III. having bravely repuls'd the *Swedes*, besieging the Capital City, *Copenhagen*, it was then rendred Hereditary to his Family. The Nobility here had hitherto a considerable Stroke until these our own Days, that this Kingdom is so strangely *Frenchified* in Point of Government, that the *Danish* and *French* Monarchies are now almost of the same Mould. The King assumes to himself the Power of disposing of all Heirs and Heiresses of any Note, as 'tis practis'd in *France*. The *Danish* Law is highly to be priz'd, in that it's short and perspicuous, surpassing the like of all other Nations in that Respect. It's wholly founded upon Equity, and compris'd in one *Quarto* Volume in the *Danish* Tongue, and that so plain, that any Man may understand and plead his own Cause without the Aid of either Counsel or Attorney, and no Suit is to hang in Suspense beyond one Year and a Month. This is indeed a mighty Advantage, and a singular Property of the *Danish* Law upon one Hand; but the same is attended with a vast Inconvenience on the other; for the first and principal Article thereof runs thus, That the King hath the Privilege reserv'd to himself to explain, nay to alter and change the same as he shall think good. Chief Courts for Administration of Justice, both in Civil and Criminal Affairs, are Four, viz. *Byfought's*, *Heredsfought's*, *Lanstag*. and *High-right*. The first is peculiar for deciding Matters which happen in Cities and Towns. The second for those of the Country. The third is the High-Court of the Province, to which Appeals are made from the two former. And the fourth is the Supream of all the rest, held commonly at *Copenhagen*, and consisting of the Principal Nobility, in which Court the King himself sometimes sits in Person. Besides these, there is the Court of Admiralty for Maritime Affairs; as also Rent-chamber (resembling our Court of Exchequer) for managing all Matters relating to the Publick Revenue.

Arms.] The King of *Denmark* bears Party of Three, and Coupè of two which makes twelve Quarters. In the first, Or, Seme of Hearts Gules, three Lions-Passant-guardant Azure, crown'd, Languid and Arm'd of the first, for *Denmark*. 2. Gules, a Lion Rampant, Or, crown'd and arm'd of the first, in his Paws a Battle-Ax Argent, hilt-ed of the second, for *Norway*. 3. Gules, a Lion Passant-guardant, Or, on nine Hearts of the same in Fesse, for *Gothland*. 4. Gules, a Dragon crown'd, Or, for *Schonen*. 5. Azure, three Crowns, Or, for *Sweden*. 6. Gules, a Paschal Lamb, Argent, supporting a Flag of the same, mark'd with a Cross Gules, for *Futland*. 7. Or, Two Lions Passant-guardant, Azure, for *Sleswick*. 8. Gules, a Fish crown'd Argent, for *Ice-land*. Over these eight Quarters, a great Cross Argent, (which is the

ancient Devise of the Kingdom) on the Centre of which are plac'd the Arms of *Dithmarch*, viz. *Gules*, a Cavalier Arm'd *Argent*. 9. *Gules*, a Nettle-leaf open and charg'd in the Middle with a little Escutcheon, the whole *Argent*, for *Holstein*. 10. *Gules*, a Cygnet *Argent*, gorg'd with a Crown, *Or*, for *Stormash*. 11. *Gules*, two Fesses, *Or*, for *Delmenhorst*. 12. *Gules*, a Cross Pattree-fitchree *Argent*, for *Oldenburgh*. The Shield surrounded with the Collar of the Order of the Elephant. The Crest is a Crown, *Or*, flower'd, rais'd with eight Diadems, terminating in a Mond of the same. For the Motto are these Words, *Pietas & Justitia coronant*.

Religion.] The Errors and Practices of the *Roman* Church being grown at length so intolerable, that an Universal Reformation became expedient, this Kingdom, among the other Northern Crowns, threw off that insupportable Yoke, and cordially embrac'd the Doctrine of *Luther*, which, being allowed of by *Frederick* the First, about the middle of the last Century, was so firmly and universally establish'd in *Denmark*, that in all the *Danish* Dominions there is no other Religion but *Lutheranism* profess'd, except some *French* Refugees, who are allow'd a Church at *Copenhagen*; and a few Popish Families, who were lately permitted to perform their Worship in a Chappel at *Gluckstat*. The *Danish* Clergy do still retain the Practice of *Confession*, which all Persons are oblig'd unto before they participate of the Blessed Sacrament of the Lord's Supper; they likewise retain Crucifixes, and several Ceremonies of the *Roman* Church. Christianity was fully establish'd in this Country about the middle of the XII. Century, and that by the Means of Pope *Adrian* the IV. (an *Englishman*) who before his Assumption of the Popedom, was term'd *Nicholaus Breakspear*.

§. 3. NORWAY.

Name. *Norway*, (formerly *Norvegia*, a part of ancient *Scandinavia*, and now bounded on the East by *Sweden*; on the West, North, and South, by part of the main Ocean) is term'd by the *Italians*, *Neruegia*; by the *Spaniards*, *Noruega*; by the *French*, *Norwege*; by the *Germans*, *Norwegen*; and by the *English*, *Norway*; so call'd from its Northern Situation (*Nort* being for *North*, and *Weg*, *Way*,) seeing it is the way to and from the North in respect of the rest of *Europe*.

Air.] The *Air* of this Country is so extreemly Cold, especially towards the North parts of the Kingdom, that 'tis but thinly inhabited, and that by the meanest of People. The opposite place of the Globe to *Norway*, is part of the Pacifick Ocean between 186.20 and 212. and 230 and 71 Degrees of Longitude, with 60 and 70 Degrees of South Latitude.

Dist.]

Soil.] By reason of the excessive Coldness of the Country (it lying in the 11th, 12th, and 13th North Climate) the *Soil* is very barren, not having force enough to produce the very Necessaries of Life, the common People being forc'd to use dry Fish instead of Bread. In short, this Country is over-spread either with vast Forests, barren Mountains, or formidable Rocks. In the Northmost parts of it, the longest Day is above two Months, the *Sun* not setting for that time; the shortest in the Southmost about six Hours $\frac{1}{2}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Stock-fish, Rich Furs, Train-Oil, Pitch, Masts, Cables, Deal-boards, and the like, which the Inhabitants exchange for Corn, Wine, Fruits, Beer, and other Necessaries of Life.

Barthles.] Near to *Drontheim* is a remarkable Lake, whose Waters never freeze even in the dead of Winter, notwithstanding the excessive Cold at that Season. (2.) Upon the Coast of *Norway*, near the Isle of *Hittezen* in the Latitude of 68, is that remarkable and dangerous Whirlpool, commonly call'd *Maelfroom*, and by Navigators the *Navel* of the Sea. Which Whirl-pool is, in all probability, occasioned by some mighty Subterranean *Hiatus*, and proves fatal to Ships that approach too nigh, providing it be in the time of Flood: For then the Sea, upwards of two Leagues round, makes such a terrible *Vortex*, that the Force and Indraught of the Water, together with the Noise and Tumbling of the Waves upon one another, is rather to be admir'd than exprest. But, as in the time of Flood, the Water is drawn in with a mighty Force; so during the Tide of Ebb does it throw out the Sea, with such a Violence, that the heaviest Bodies then cast into it can't sink, but are tossed back again by the impetuous Stream which rusheth out with incredible Force. And during that time are abundance of Fishes, caught by Fishermen who watch the Opportunity; for, being forc'd up to the Surface of the Water, they can't well dive again, so violent is the rising Current. (3.) In several parts of *Norway* were discovered, some Years ago, divers Silver Mines, particularly two, whereof one was term'd *Benedicta Divina*, (vulgarly *Segen Gottes*) and the other *Bona Spei*, but both of 'em were quickly exhausted; however, in the former of these, *Anno* 1630. was found a Mass of Silver, valued at Three Thousand Two Hundred and Seventy Two Imperial Dollars. And in the other was taken out a Mass of Silver, valued at Five Thousand such Dollars. Both which Masses, and some others of pure Silver from these *Norwegian* Mines, are now to be seen in the *Museum Regium* at *Copenhagen*.

Arch-

Archbishops.] *Archbishops* in this Kingdom, only one,
viz. that of

Drontheim.

Bishops.] *Bishops* in this Kingdom are those of

Anslo,

Bergen,

Staffanger.

Universities.] *Universities* in this Kingdom. None.

Manners.] The *Norwegians* (who, being notorious Pyrates of old, became very formidable to several of the Northern Nations) are now look'd upon as a very mean, simple and ignorant sort of People; a People, however, that's very hardy, much given to Toiling and Labour, very just in their Dealing, and abundantly Civil (after their own Manner) to the few Strangers who come among them. In the Northmost parts of the Kingdom they have no Towns, but generally live in Tents, and travel in great Companies from one place to another in Hunting.

Language.] The *Language* now spoken in this Country, (especially in all the civilized Parts thereof) is little different from that us'd in the Kingdom of *Denmark*, a Specimen of which is already given in the foregoing *Paragraph*.

Government.] This Kingdom was formerly a distinct Body by it self, and independent of any other but (being incorporated with *Denmark*, Anno 1387.) is now subject to his *Danish* Majesty, who, besides particular Governours in places of greatest Importance, doth ordinarily keep a Vice-Roy there for the better managing of the whole; his place of Residence is commonly at *Bergen*, and his Power is extraordinary great.

Arms.] See *Denmark*.

Religion.] The establish'd Religion in *Normay*, is the same as in *Denmark*, only that in the Northmost parts of the Kingdom, the knowledge of Christianity (which was at first planted in this Country much about the same time with the two other Northern Crowns) is so decay'd, that on the Borders of *Lapland* they differ but little from meer Heathens.

MOS.

M O S C O V I A.

Name. *M*oscovia or *Russia* [containing much of *Sarmatia Europæa*, with a part of *Sarmatia Asiatica*, and now bounded on the East by *Tartary*, on the West by *Sweden*, on the North by the vast Northern Ocean, and on the South by *Little Tartary*, *Georgia*, and the *Caspian Sea*] is term'd by the *Italians*, *Moscovia*; by the *Spaniards*, *Muscovia*; by the *French*, *Moscovie* or *Russie Blanche*; by the *Germans*, *Muscau*, and by the *English*, *Moscovia* or *Moscovy*, so call'd from its chief Province of that Name, whose Denomination is deriv'd from *Moschi* or *Mosci*, an ancient People first Inhabiting that part of the Country. The Name of *Russia* is generally agreed upon to come from another ancient People of that Country, call'd *Rossi* or *Russi*.

Air. The *Air* of this Country is very Cold, particularly towards the North, where Snow and Ice are usual for three Quarters of the Year; but in the Southmost Provinces they have very scorching Heats in the Summer for the space of six Weeks. The opposite place of the Globe to *Moscovia*, is that part of the vast Pacifick Ocean, between 206 and 246 Degrees of Longitude, with 49 and 70 Degrees of South Latitude.

Soil. The *Soil* of this Country (it lying in the 8, 9, 10, 11, 12, &c. Northern Climate) is very different, according to the different Situation of its Parts. Here are many Plains, but generally full of Marshes. Towards the North are vast Forests; and even where the Ground is clear'd of Wood 'tis (for the most part) very Barren, and so extremely Cold, that what they sow doth seldom come to due Perfection. In the South-west Parts towards *Poland*, the Soil is tolerably good, the Ground there producing several sorts of Grain in great abundance; and 'tis reported by many, that their Corn is ready for reaping about two Months after it is sown. The longest Day in the Northmost part of this Country is above two Months. The *Sun* not setting for that time when near the Summer Solstice; the shortest in the Southmost is about 9 Hours, and the Nights proportionably.

Commodities. The chief *Commodities* of this Country are Furs, Sables, Martins, Wax, Honey, Tallow, Train-Oil, Caviere, Hemp, Flax, Slad, Iron, &c.

Barities. As one of the chief *Rarities* of this Country, we may reckon that strange sort of *Melon*, found in or near to *Asiracan*, *Casan* and *Samara*. Some of the Natives term it *Boranetz*, (i. e. The Little Lamb)

Lamb) others *Zoophyton*, which signifies the *Animal Plant*. The first Title would seem most proper, because in Figure it resembles a Lamb, and such is its vegetable Heat, that (according to the vulgar manner of Expression) it consumes and eats up all the Grass, or rather Herbs, within its reach. As the Fruit doth ripen, the Stalk decays, and is covered with a Substance exactly the same with Wool that's short and curling. A part of the Skin of this remarkable Plant, [vulgarly reckon'd a Plant, but disown'd by our Modern Botanists,] is to be seen in the King of Denmark's publick Repository of natural Rarities at *Copenhagen*; the inside of which Skin being dress'd, as Tan-ners usually do the fleshy side of Lamb-skins without taking off the Wool, no Man can distinguish between the Skin of the *Bor-
netz*, and that of an ordinary Lamb. Whereupon, many of the *Moscovites* use the Skin of this rare Vegetable (if we may allow it to be such) instead of Furs for Lining of their Vests. As another remarkable thing of this Country, we may here add, that stately Church in *Moscow*, call'd *Jerusalem*, which seem'd to *John Basilides*. I. (then *Czar*) such a stately Pile of Building, that he ordered the Eyes of the Architect to be put out, that he might never contrive (at least behold) its Fellow.

Ecclesiasticks in *Moscovia* are one Patriarch, Four Metropolitans, Seven Archbishopricks, and several Bishops.

The Patriarch is he of *Moscow*, residing in the same City.

| | | |

|---------------------------------|---|--|

[**Bishops.**] As to the exact Number and Names of Bish-
opricks in this Country, the same is but uncertain at best.

Universities.) Here we can hardly expect the Seats of the Muses, where the Liberal Arts and Sciences have been so long banisht, and the studying of them inhibited by publick Authority.

Man=

Manners.] The *Muscovites* (Men of a vigorous and healthful Constitution) are generally reckon'd a rude, deceitful and ignorant sort of People; and much addicted to excessive Drinking, as also unlawful and beastly Pleasures. And so fond of ignorance have they hitherto been, that 'twas look'd upon as (almost) a piacular Crime for any of them to apply himself to search after Knowledge. But things are now mightily alter'd in this Point, and that by the Encouragement of his present Czarish Majesty, who gives leave to his Nobility to acquire the Liberal Arts and Sciences, particularly the Mathematicks; and to acquaint themselves with Foreign Countries and Languages. And, that the Learned Languages (*Greek and Latin*) may be no longer strangers in this Country, he hath already erected publick Schools in *Moscow* for the teaching of them. By which means, it is to be hop'd, that the Brutish Temper and Stupidity of this People may be much reform'd in some time. And, whereas the present Emperour hath already visited some of the best Nations of *Europe*, purposely to improve himself in Warlike Affairs, both by Sea and Land, (especially the former) and, since this Undertaking is so uncommon, that the *Moscovitish* Story can't afford a Parallel; 'tis also to be hop'd, that the Effects thereof will be equally astonishing, and that in humbling (if not crushing) both *Turks* and *Tartars*; his disturbing Neighbours, and professed Enemies to the Cross of Christ. With such big hopes as these were many thinking Men in *Europe* firmly possess'd for some Years by gone: But the Czar's late Attempt upon his Christian Neighbour the *Swede*, and the Unchristian Circumstances of that Attempt, have very much dash'd all hopes of that Nature.

Language.] The *Language* us'd in this Country is a Dialect of the *Sclavonian*, but so corrupted and blended with other Languages, that 'tis hardly understood by those who speak the pure *Sclavonian*, which nevertheless is still us'd by the *Russians* in their Divine Service. The *Pater-noster* (which I find only in a corrupt Dialect of their Tongue) runs thus, *Aisantiidhen joko oledh tainahissa, Pyhetta olkon siun wakekuta; si olkohon siun thasosi kwem tainahissa ayn man palla. Meidhen jokopai wen leipa anna mehillen tanapaiwana, ja anna meidem syndia: Kwin moe annama meidem vastachan rickoillen; ja ala sata meita kin sauxen mutta paafta mieta paafta.*

Government.] This great Body is under its own Prince, who assumeth the Title of *Czar*, (which in the *Russian* Language signifies *Emperor*) yet more commonly he's term'd the *Great Duke*. He's an Hereditary Monarch, and his Government truly Despotical. The Lives and Fortunes of his Subjects are wholly at his Disposal; and the great *Knez* or Lord within his Dominions, doth acknowledge himself

himself his *Galop* or *Slave*. As he is a Prince of uncontrollable Power, so also he's possess'd of vastly extended Dominions, from whence (tho' much of 'em be very barren) he draws prodigious Revenues; and those not only that accrue from publick Taxes, but likewise from his Monopoly of Sables, and farming out of publick *Inns*, *Taverns*, and *Ale-houses*, [he himself being *Brewer General*] which rises to a very high Sum, especially in a Country where the People are extremely addicted to drinking. The *Czar* not only exerciseth an uncontrollable Power over his slavish Subjects, but also pretends to a kind of *Omniscience* among them, and hath so succeeded in this bold Pretence, that the main Body of the People doth really believe that their Great Duke knoweth all things. To support which Opinion, The *Moscovitch* Emperors have industriously endeavour'd to keep their People in gross Ignorance, and for that end have hitherto banish'd out of their Dominions the Liberal Arts and Sciences, and forbid the studying of them under the severest Penalties. But the present *Czar* by his Proceedings (already hinted at) would seem to rectifie that gross Abuse. He suffers none of his Nobles to retire from Court without his special Permission, and seldom, or never, to visit Foreign Countries, till these our own Days, no, nor so much as to talk with Foreigners at Home. The Publick Affairs are chiefly manag'd by his Great Council, (call'd *Dumny Boyaren*) consisting of the Principal Noblemen of the Empire. Here also are divers other *Councils*, or rather *Chambers* and *Courts* of Judicature, to which belong their respective Business, and each of these hath its peculiar President; they're in Number six, whereof the first is appointed for Ambassadors and Foreign Negotiations. The second for managing of Military Affairs. The third for the publick Revenues of the Empire. The fourth for encouraging of Trade and Merchandizing. And the two others for hearing and determining of all Causes, both Civil and Criminal. One laudable Custom obtains in *Moscovia* (and perhaps the only one that's worthy of Imitation in other Countries) which is, That the *Moscovitch* Emperors seldom, or never, make Foreign Matches; but use to chuse for themselves a Consort from among the Daughters of their own Nobility.

Arms.] The *Arms* of *Moscovia* are, *Or*, an Eagle display'd *Sable*, bearing on its Breast a Shield *Gules*, charg'd with a Cavalier *Argent* fighting a Dragon; on and between the Heads of the Eagle are three Crowns for *Moscoa*, *Cazan*, and *Astracan*. According to others, the *Arms* are *Sable*, a Portal open of two Leaves, and as many Degrees, *Or*.

Religion.] The *Moscovites* boast that they profess Christianity, according to the Doctrine of the *Greek Church* in its ancient Purity, but indeed they have mixt with the same a great many ridiculous Ceremonies and foolish Superstitions of their own. They render
Divine

Divine Worship to the Virgin *Mary*, and other Saints, as also to Crosses, and never commence any thing of Moment, unless they first sign themselves with the Sign of the Cross. In Baptism they use Exorcism, and always Confession to the Priest before they receive the Sacrament of the Lord's Supper. All above Seven Years of Age receive that Sacrament in both kinds, and they give it in one kind to Children under that Age. They usually administer the same (as also extream Unction) to Persons past all hopes of Recovery; but they neither adore the Sacrament, nor believe the strange Doctrine of Transubstantiation. They observe fifteen great Festivals, besides a great many Days dedicated to particular Saints. Sermons they never use, but only read some Portion of Holy Scripture, with St. *Basil's* Liturgy, and divers Homilies of St. *Chrysostome*. The Christian Faith was first planted in this Country towards the latter part of the Tenth Century, and that by the Preaching of some *Greeks* sent thither by the then *Patriarch* of *Constantinople*.

[Pame.]

Name.] FRANCE [formerly *Gallia* from its ancient Inhabitants the *Gauls*, otherwise the *Celte*: and now bounded on the East by *Germany*; on the West by the Bay of *Biscay*; on the North by the *English Channel* and *Flanders*; on the South by *Spain* and part of the *Mediterranean Sea*] is term'd by the *Italians* and *Spaniards* *Franchia*; by its Natives *la France*, by the *Germans* *Frankreich*; and by the *English* *France*; so called (as most Authors agree) from the *Franks*, a *German Nation*, inhabiting that part of *Germany*, still call'd *Franconia*; who invading *Gaul*, and by degrees subduing a great part of it, gave it a new Name from its new Masters, who (in the Opinion of some Judicious Writers) had theirs from certain *Franchises* granted them by the *Roman Emperors* beyond what the Neighbouring Nations enjoyed; or (according to others) from the *German Word*, *Fraen* and *Ansen*, the former signifying *Free*, and the other an *Herog*.

Air.] The *Air* of this Country is very Temperate, Pleasant, and Healthful, being in a good Medium between the great Excess of Heat and Cold, which ordinarily attends those Countries of a more Northern and Southern Situation; yet so healthful is it, that this Kingdom is generally observ'd to be less subject to Plagues and Sickness, than most other Nations of *Europe*, and the Air about *Montpelier*, in particular, is universally esteem'd Medicinal for Consumptions. The opposite place of the Globe to *France* is that part of the vast *Pacifick Ocean*, between 175 and 187 Degrees of Longitude, with 42 and 51 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 6, 7, and 8. North Climate) is extraordinary fruitful, particularly in Corn, Wine, Fruits, Hemp, &c. The Fields being here both large and open, are generally intermingled with Vines and Corn; as also bordered and interlin'd with variety of Fruits: Here are many vast Forests, and these well stor'd with most sorts of wild Beasts fit for Hunting; several Mountains, and these cover'd over with numerous Flocks, and some of them lin'd with rich and valuable Mines; here also are divers excellent Pits of Coals, and Quarries of Stones. The longest Day in the Northmost part of this Country, is about 16 Hours $\frac{1}{4}$; the shortest in the Southmost, is 9 Hours $\frac{1}{4}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Salt, Fish, Corn, Wine, Almonds, Coral, Canvas, Oade, Linen, Paper, Wood, Skins, Alamodes, Lustring, and rich flower'd Silks, Verdigris, Cremor Tartaris, &c.

Marittes.]

Barthles.] Among the chief *Rarities of France*, we may reckon some remarkable remains of the *Roman Antiquities* as yet to be seen in that Country. And they are reducible to these following Heads, viz. (1.) *Triumphal Arches*, particularly that in the City of *Rheims*, as yet entire, compos'd of three Arches, and adorn'd with many Figures and Trophies, but uncertain for whom erected. There are also the Ruins of several others near *Autun* in *Burgundy*; one at *Saintes* in *Guienne*; another almost entire at the City of *Orange*, erected by *Caius Marius* and *Lucretius Catulus*, upon the Victory obtain'd over the *Cimbri* and *Teutones*; (where are likewise the Ruins of a *Roman Circus*.) To these we may add that stately Bridge, twelve Miles off *Nismes*, consisting of three Stories of Arches one above another, the last of which was an *Aqueduct*. (2.) *Amphitheatres*; as the Ruins of a stately one at *Chalons* in *Burgundy*; another at *Perigueux* in *Guienne*; another at *Tholouse* in *Languedoc*; another at *Arles* in *Provence*; another at *Vienne* in *Dauphine*; but the chief of all is that at *Nismes*, of an extraordinary bigness, and as yet adorn'd with several Pillars and divers *Roman Eagles*, as also the Fable of *Romulus* and *Remus* sucking the She-wolf. (3.) The Remains of some *Heathen Temples*; particularly those of *Templum Jani* (now call'd the *Jenetoye*), at *Autun* in *Burgundy*; those of the Goddess *Venus* at *Perigueux* in *Guienne*; and that of *Diana* near *Nismes* in *Languedoc*. (4.) The Ruins of some Ancient *Aqueducts*, as those near *Contance* in *Burgundy*; those at *Dole* in *Bretaigne*; some at *Autun* in *Burgundy*; and those at *Tholouse* in *Languedoc*. (5.) Remarkable Pillars, particularly those ancient Columns and Pyramids near *Autun* in *Burgundy*; but more especially is that famous *Roman Obelisk* of Oriental Granite at *Arles* in *Provence*, which is much admired by the Curious, being fifty two Foot high, seven Foot Diameter at the Base, and and yet all but one Stone. Among the Monuments of Antiquity, we may mention the large Passage cut through the Middle of a Rock about two Leagues from *Briançon* in *Dauphine*, which, being a stupendious piece of Work, gives occasion to various Conjectures, some Persons imputing it to *Julius Caesar*, and others rather to *Hannibal*. To these we may add that large and round Buckler of Massy Silver fish'd out of the *Rhone* near *Avignon*, 1665, being twenty Inches in Diameter, and weighing twenty one Pounds; 'tis 1900 Years old, and is charg'd with *Scipio Africanus* half Mantled grasping his Pike, and *Roman Officers* attending with the *Spaniards* supplicating for a fair Virgin; the same being consecrated to that Virtuous General upon his restoring a beautiful Captive to *Allucius*, Prince of *Celtiberia*, who had espous'd her.

These being the Principal Remains of Reverend Antiquity observable in this Country; next to such Curiosities, we may subjoin some

some Rarities of *Nature*, the most noted of which are these following, (1.) *Waters of remarkable Qualities*; particularly those nigh to *Dax* or *d'Acque* in *Gascoigne*, so reputed of old for Bathing, that from them the whole Province of *Aquitaine* did derive its Name. As also the Mineral Waters of *Bourbon* much resorted unto, even in time of the *Romans*, together with the famous Fountain near to *Grenoble*, which appeareth as if covered with Flames and boileth up in great Bubbles, and yet is never Hot. Likewise another boiling Fountain about a League from *Montpellier*, much observed by Travellers; and finally, that Oily Spring near *Gabian*, in the Road *Orleanois*, and that at *Clermont* in *Auvergne*, whose Waters are of a Putrifying Nature; and likewise another nigh to the City of *Mans*, which maketh Silver look exactly like Gold. (2.) *Observable Mountains*, particularly those nigh to *Rhode* in *Guienne*, call'd the Mountains of *Cansac*, which burn whenever it Rains. (3.) *Some hideous Subterranean Holes or Passages*, as that in the Forest of *S. Aubin du Cormier* in *Bretaign*, thro' which flows a mighty Torrent of Water; and another near *Niont* in *Dauphine*, from which proceedeth a violent Wind. These are the chief Rarities in *France*, both Natural and Artificial, especially the latter. As for Artificial ones of a modern Date, this Country affordeth several, particularly that famous Canal of *Languedoc*, and splendid Palace of *Versailles*, with divers magnificent Buildings, (especially Churches) but these are either too well known to need, or too numerous to admit of any particular Relation here.

Archbishops.] The *Archbishops* of *France* are these following, viz.

| | | | |
|-----------------|----------------------------|---|---|
| <i>Lions</i> | } whose Arch- bishop is | { | Count and Primate of <i>France</i> . |
| <i>Sens</i> | | | Primate of <i>France</i> and <i>Germany</i> . |
| <i>Paris</i> | | | Duke and Peer of the Realm. |
| <i>Reims S.</i> | | | Duke and Peer, and Legate of the Holy See |
| <i>Rouen</i> | | | Primate of <i>Normandy</i> . |

As also those,

| | | | |
|----------------|------------------|------------------|------------------|
| <i>Tours,</i> | <i>Bordeaux,</i> | <i>Narbonne,</i> | <i>Vienne,</i> |
| <i>Burges,</i> | <i>Auch,</i> | <i>Arles,</i> | <i>Bezancon,</i> |
| <i>Alby,</i> | <i>Tholouse,</i> | <i>Aix,</i> | <i>Embrun.</i> |

Bishops.] The respective Suffragans of these *Archbishops* are as follow.

| | | | | | | | | |
|---------------|---|----------------|--------------|---|----------------|---------------|---|-----------------|
| <i>Lions.</i> | { | <i>Autun</i> | <i>Sens.</i> | { | <i>Trois</i> | <i>Paris.</i> | { | <i>Chartres</i> |
| | | <i>Langres</i> | | | <i>Auxerre</i> | | | <i>Orleans.</i> |
| | | <i>Macon</i> | | | <i>Nevers</i> | | | <i>Meaux.</i> |
| | | <i>Challou</i> | | | | | | |

| | | | | | |

Universities.] Universities belonging to this Kingdom, are establish'd at these Cities following.

| | | | |
|-----------|--------------|-----------------|------------|
| Paris,, | Angiers, | Reims, | Perpignan, |
| Bordeaux, | Caen, | Valence, | Donay, |
| Poitiers, | Montpellier, | Aix, | Dole, |
| Orleans, | Cahors, | Avignon, | Friburge, |
| Bourges | Nantes, | Pont à maulson, | Orange. |

Manners.]

Manners.] The *French* are generally a Civil, Quick and Active sort of People; but extremely given to talking, especially those of the Female Sex, who nevertheless are not only very pleasing in discourse, but also of a graceful and winning Deportment. This People is thus characteriz'd by some; That they are *Airy, Amorous*, full of *Action*, compleat Masters of the Art of *Disimulation*, and above all things *Contentious*, being so universally given to Law-suits, and that even amongst nearest Relations, that Lawyers, Judges, and other Officers of Justice, are observ'd to be the richest Body of the Kingdom, excepting the Churchmen. Many of this Country, in matters of Learning, are bless'd with a clear Conception, and ready Expression; and of late they have advanc'd the Republick of Letters to a very considerable height; this Age having produc'd several of that Nation, (and even some of the Female Sex) who are now famous through all the Learned World for their singular Parts.

Language.] The *French Language* (compos'd chiefly of the *Latin*, together with several *German* and *Gothick* Words intermixt) being lately much refin'd by the Royal Academy at *Paris*, is so much admir'd for its elegancy and sweetness, that it hath wonderfully spread it self abroad in the World, and is now become the chief Tongue that's commonly us'd in most Princes Courts of *Europe*. *Pater-Noster* in the same runs thus, *Nôtre pere qui es aux Cieux, Ton Nom soit Sanctifié; Ton Regne vienne; Ta Volente soit fait en la Terre, comme au Ciel; Donne nous aujourdhuy nôtre pain quotidien; Pardonne nous nos offenses, comme nous pardonnons à ceux qui nous ont offensés; Et ne nous indui, point en tentation; mais delivre nous du mal. Amen.*

Government.] This Kingdom, being formerly a part of the *Roman* Empire, was in process of time over-run by *Franks, Goths* and *Burgundians*, especially the first, by whom was rais'd a Monarchy, which continuing in the Succession of Kings of three several Races, (*viz.* the *Merovingian, Carbovinian* and *Capetine*, is now as great as any in *Christendom*; and at present subject to one Sovereign [entitl'd the *Most Christian King, and eldest Son of the Church*] whose Government is Monarchinal and Crown Hereditary in his Heirs Male, all Females being excluded by the *Salique Law*. There were anciently in this Kingdom many potent *Dukes, Earls, and Lords*, who generally claim'd, and currently exercised, great Authority in *France*, but, by the Endeavours and Policy of some grand Ministers of State, the Power and Jurisdiction of the Nobility was so strangely impair'd, that now they appear as so many *Cyphers* in the Nation. The Assembly of the three Estates (*viz.* the *Clergy, Nobility* and *Citizens*) was likewise in great Veneration of old, and the Regal Authority it self was thereby very much limited; but that Assembly

not

not having been conven'd since *Anno 1614*, their Authority is now suppress'd Finally, the Parliament of *Paris* was likewise a Convention of mighty Power and many Privileges, and it often us'd heretofore to oppose the Designs of the Court; but that Assembly has been taught other things of late, and its Wings are now so strangely clipt, that it dares not appear in the least, against any Proposal which is once hatch'd at *Versailles*. So that the *French Monarchy* is now screw'd up to such a pitch, that it differeth but little, or nothing, from any of the most absolute Empires in the World: And its present Monarch, for despotick Power, may now vie even with the Emperors of *Moscovia*, *China*, or *Turkey*. The whole Kingdom being divided into 12 Governments; over each of them is set a Governour, styl'd the King's *Lieutenant-General* or *Super-Intendent*, having the like Power as the Lords Lieutenants of *England* formerly had in their several Counties. For the better Management of the publick Affairs and Administration of Justice in all parts of this Kingdom, here are establish'd a great many Courts of Judicature, particularly these following, *viz.* *Parliaments*; *Chambers of Accounts*; *Courts of Aids*; *Presidial Courts*; *Generalities*; *Elections*, &c. I. *Parliaments* (the highest and supream Courts of the Nation) were fifteen in Number, reckoning the late Conquests, and held at the Cities of *Paris*, *Tholouse*, *Rouen*, *Grenoble*, *Bordeaux*, *Dijon*, *Aix*, *Vannes*, *Pau*, *Mets*, *Besancon*, *Tournay*, *Perpignan*, *Arras*, and *Brisac*. These Parliaments, (according to their respective Business) are divided into several Chambers, especially that of *Paris*, which hath no less than Ten, *viz.* (1.) The *Grand Chamber*, where the Peers of the Realm, being accus'd of any Crime, are usually Try'd. (2.) The *Tournelle Civile*; where they take cognizance of such Civil Causes as exceed a thousand *Livres* in Value. (3.) The *Tournelle Criminelle*; where Appeals from Inferiour Courts in Criminal Matters are heard and discuss'd. Besides these three, there are five Chambers of *Inquest*; where Depositions of Witnesses are set down, and Causes thereupon determin'd; being almost the same with our Bill and Answer in *Chancery* and *Exchequer*. And lastly, There are two Chambers of *Request*; where Causes of Privileg'd Persons are heard and discuss'd. II. *Chambers of Accounts*; where Accounts of the Treasury are examin'd, and Homage Vassalage due from the Royal Feifs are receiv'd, Treaties of Peace, and Grants made by the King, and such like are recorded. These Chambers are 12 in Number, and held at the Cities of *Paris*, *Rouen*, *Dijon*, *Nantes*, *Montpellier*, *Grenoble*, *Aix*, *Pau*, *Blois*, *Lisle*, *Aire*, and *Dole*. III. *Courts of Aids*, where all Causes relating to the King's Revenue (particularly *Aids*, *Tailles*, *Gabelles*) are determin'd, and that without any appeal to a higher Judicatory. The Courts are in Number eight, and held at the eight Cities of *Paris*, *Montpellier*, *Rouen*, *Clermont*, *Monferrand*, *Bordeaux*,
Aix,

Aix, Grenoble, and Dijon. IV. *Presidial Courts* (compos'd of several Judges) where Civil Causes in Matters of smaller Importance, as also Appeals made from Subaltern Justices in Villages, are heard and determin'd. V. *Generalities*, whose Office (they being the Treasurers General of *France*) is to take care of assessing the Taxes proportionably in their respective Districts, according to the Sum propos'd by the King and Council to be levied. These Courts are 23 in Number (each consisting of twenty three Persons) and these conveniently situated in several parts of the Kingdom. They do also judge Matters relating to the Crown-Land, the King's Revenue, and such like. Lastly, *Elections*; which are small Courts subordinate to the Generalities, and their Office is to cast up how much every Parish in their respective Division must raise of the Sum propos'd by the Generality, and accordingly they issue out their Orders to every Parish, whereupon one of the Inhabitants being chosen Collector, he proportions every one's *Quota*; and collecting the same, returns it to the Generalities, and they again to the publick *Exchequer*. Besides these, there are a vast number of inferiour Courts for smaller Matters, whether Civil or Criminal: And a great many publick Officers or *Provosts, Seneschals, Bailiffs*, as also *Intendants de la Justice, Police, and Finance, &c.* But our intended Brevity will not admit of a farther Relation.

Arms.] The King of *France* for *Arms* bears *Azure* three Flower de Luces *Or*, two in chief, and one in base; the Escutcheon is environed with the Collars of the Orders of *S. Michael* and the *Holy Ghost*. For Crest, an Helmet *Or*, entirely open, thereupon a Crown clos'd, after the manner of an Imperial Crown with eight inarched Rays, topped with a double Flower de Luce. The Supporters are two *Angels* habited as *Levites*; the whole under a Pavillion Royal, *feme* of *France*, lin'd *Ermines*, with these Words, *Ex omnibus Floribus elegi mihi Lilium. Lilia neque laborant neque nent.*

Religion.] The only establish'd Religion in *France* is that of the Church of *Rome*; for all the Decisions of the Council of *Trent* in Matters of Faith are there receiv'd; but those that relate to Points of Discipline, and infringe the Rights of the Crown, with the Liberties of the *Gallican Church*, are rejected. The Protestants (commonly call'd *Huguenots*) were formerly allow'd the publick Profession of their Religion by several Edicts granted by the *French Kings*: particularly that of *Nantes*, An 1598. by *Henry IV.* and confirm'd by all his Successors ever since. But the present King, by his Declaration of *October, 1685.* abolish'd the said Edict, and inhibited the Exercise of the reform'd Religion, enjoining the Profession of the *Roman*, and that under the severest Penalties. Whereupon followed the

the Destruction of their Churches, and a violent Persecution which forced great Numbers to leave the Kingdom, and seek for shelter in Foreign Countries. As to the *Romanists* themselves, there are great Divisions among them at present, notwithstanding of their so much boasted Unity: For besides the hot Disputes between the *Molinists* and *Jansenists* about *Predestination* and *Grace* (in which the pretended Infallible Judge at *Rome* dares not interpose his Decisive Authority for fear of disoblighing one or the other Party) we find that the Sect of *Quietism* has lately crept in among them; as appears from the late Book of the Archbishop of *Cambray* concerning the *Internal Life*, which has been censured by the Archbishop of *Paris*, and the Bishops of *Meaux* and *Chartres*, and complain'd of by the *French* King in his Letter to the Pope, and at last condemn'd, tho' the Author proffer'd to maintain his Doctrine before the *Papal* Chair, if permitted to go to *Rome*. The Christian Faith was first planted in this Country by some of *St. Peter's* Disciples (as is most probably thought) sent thither at his first coming to *Rome*.

S E C T. IV.

Concerning *Germany*.

§. 7. *The*

§. 7. *The Circle of Franconia.*

Divided into { South ————— } Chief Town { *Nuremburg.*
 { North ————— } { *Goburg.*

More particularly,

It contains { The Territ. of *Nuremburg* } Chief Town { Idem on a branch of the *Maine*
 { Marq. of { *Onspach* ————— } Idem, 23 m. W. of *Nuremburg*
 { *Culenbach* ————— } Idem } from E. to W.
 { Bishopr. of { *Bamberg* ————— } Idem }
 { *Wartsburg* -- } Idem, 34 m. S. of *Nuremburg.*
 { *Aichstat* -- } Idem

Besides these are

The State of the great Master of the *Teutonick* Order, chief Town
Margensheim, 57 Miles W. of *Nuremburg*.

As also several Counties, but chiefly those of

Reineck --———— } Chief Town { Idem ————— } from N. to S. in the W.
Wertheim ————— } Idem ————— } part of this Circle.
Holach --———— } { *Oringen* ————— }
Papenheim --———— } Idem 12 m. W. of the Bishopr. of *Aichstat*.
Schwartzenberg -- } Idem 32 m. N. W. of *Nuremburg*.
Castel --———— } Idem 23 m. S. W. of *Bamberg*.

§. 8. *The Circle of Suabia.*

Divided into { East _____ } Chief Town { *Ausburg.*
 into { West _____ } { *Stugart.*

More particularly,

| | | | | | |
|------------------------------------|----------------------------------|--|-------------|--|--|
| Suabia comprehends the | { D. of <i>Wirtzburg</i> ----- } | | Chief Towns | { are { <i>Stugart</i> } Nigh or upon { <i>Tubingen</i> } the Neckar. | |
| | Bishopr. of | { <i>Constance</i> | | Idem upon the Lake <i>Constance</i> . | |
| | | { <i>Ausburg</i> ----- } | | Idem upon the <i>Lech</i> . | |
| | Marq. of | { <i>Baden</i> ----- } | | Idem 38 m. W. from <i>Stugart</i> . | |
| | | { <i>Burgaw</i> ----- } | | Idem 10 m. W. from <i>Ausburg</i> . | |
| | | { <i>Ortnaw</i> ----- } | | <i>Offenburg</i> 20 m. S. from <i>Baden</i> | |
| | Princip. of | { <i>Farstenburg</i> | | Idem 36 m. N. W. fr. <i>Constance</i> | |
| | | { <i>Hoenzellern</i> ----- } | | Idem 2 m. S. from <i>Tubingen</i> . | |
| | Count. of | { <i>Otting</i> ----- } | | Idem 38 m. N. W. fr. <i>Ausburg</i> . | |
| | | { <i>Reckbery</i> ----- } | | <i>Gemuna</i> 43 m. W. from <i>Otting</i> | |
| | | { <i>Koniseck</i> ----- } | | Idem 18 m. N. from <i>Constance</i> . | |
| | Baron of | { <i>Walburg</i> ----- } | | Id. on <i>Wald</i> . 30 m. N. E. fr. <i>Const.</i> | |
| | | { <i>Limpurg</i> ----- } | | Idem 37 m. W. from <i>Otting</i> . | |
| | | { <i>Fustingen</i> ----- } | | Idem 28 m. S. E. from <i>Stugard</i> | |
| Territ. of | { <i>Fuggers</i> ----- } | <i>Babenhausen</i> 30 m. S. W. fr. <i>Aus.</i> | | | |
| | { <i>Ulm</i> ----- } | Idem 38 m. W. from <i>Ausburg</i> | | | |
| { Abbacy of <i>Kempton</i> ----- } | | Idem 50 m. S. W. fr. <i>Ausburg</i> . | | | |

To the Circle of *Suabia* we add *Alsatia*, chief Town is *Strasburg*.

It's divided into { *Higher*, Southward.
 { *Lower*, Northward.

Higher contains the Towns of { *Friburg* ----- } From E. to W.
 { *Brisach* ----- }
 { *Colmar* ----- }

Lower contains the Towns of { *Strasburg* ----- } S. to N.
 { *Hagenaw* ----- }
 { *Zabern*, Westward }

§. 9. *The*

§. 9. *The Circle of Bavaria.*

Divided into { North ——— } Chief Town { *Leuchtenberge.*
 { South, ——— } { *Munich or München.*

More particularly,

North contains *Nortgow*, or the Palatinate of *Bavaria*,

Comprehending { Landtg. of *Leuchtenberg* } Chief Town { *Idem* } N. to S. W.
 { Territor. { *Sultzback* } { *Idem* }
 of { *Amberg—* } { *Idem* }
 { Abbacy of *Waltheusen* } { *Idem* } N. to S.
 { County of *Chambe—* } { *Idem* }

South contains { D. and Elect { *Higher, Southw.* } Ch. F. { *Munich or Munch.*
 of *Bavaria* { *Lower, Northw.* } { *Ratisb. or Regensp.*
 { Archbishoprick of *Salzburg--* } { *Idem, Southward.*

Besides these are several other Dominions, as particularly

{ The Dutchy of *Newburg*, [Chief Town, *Idem*] 10 Miles S. of the
 Bishoprick of *Aichstat* in *Franconia*.
 { The Bishopr. of { *Passaw—* } F. { *Idem*, 68. m. E. of *Ratisbonne*.
 { *Freisingen* } U { *Idem*, 10 m. N. of *Munich*.

§. 10. *The Circle of Austria.*

Divided into { *Lower, Eastward* ——— } Chief Town { *Vienna.*
 { *Higher, Westward* ——— }

More particularly,

| | | | | | | | | | | | | |
|-----------------|--------------|----------------------------|--------|----------------|------------------|----------------|------------------------------|---|------------------|---|----------------|-----------------|
| Lower contains | { | Arch. D. of <i>Austria</i> | { East | { | <i>Vienna</i> | { | <i>Vienna</i> , chief of the | | | | | |
| | | | West | | <i>Linz</i> | | whole | | | | | |
| | | D. of | { | | <i>Stiria</i> | | { higher, W. | { | <i>Fudenburg</i> | { | <i>Fudenb.</i> | |
| | | | | | | | lower, E. | | <i>Gratz</i> — | | { | <i>Clagenf.</i> |
| | | | | | <i>Carinthia</i> | | { higher, W | | <i>Willach</i> — | | | |
| | lower, E. | <i>Clagenfu.</i> | { | <i>Laubach</i> | | | | | | | | |
| <i>Carniola</i> | { higher, N. | <i>Laubach</i> — | | | { | <i>Laubach</i> | | | | | | |
| | lower, S. | <i>Loes</i> — | | | | | | | | | | |

Chief Towns

Higher, contains the { *County of Tyrol* ——— } *Inspruck* ——— } from N.
 { *Bishopr. of Brixen.* ——— } *Idem* ——— } to S.

Besides these, are some other petty Sovereignties, especially these two following;

The D. of { *Goritia* ——— } in *Carniola* { 40 Miles W. } of *Laubach*.
 { *Cilly* ——— } { 36 Miles E. }

Under this Circle is ordinarily comprehended *Bohemia*, containing

| | | | | | | | | | | | |

Chief Towns

After the 10 Circles of *Germany*, followeth *Switzerland*, comprehending 13 Cantons, with several Confederate Cities and Prefectures.

(1.) The Thirteen Cantons are those of

| | | | |
|----------------|-------------------|-----------------|---------------------|
| <i>Zurich</i> | <i>Switz,</i> | <i>Glaris,</i> | <i>Solothurn,</i> |
| <i>Bern,</i> | <i>Underwald,</i> | <i>Basil,</i> | <i>Schafhausen,</i> |
| <i>Lucern,</i> | <i>Zug,</i> | <i>Friburg,</i> | <i>Appenzel.</i> |
| <i>Uri,</i> | | | |

These

These Cantons are set down according to their Votes in the general Diets; each of them hath a capital City of its own Name, except *Uri* (chief Town of *Altorf*) and *Underwald* (chief Town *Stant*) and are reduc'd to three Classes.

| | | | |
|------|----------------------|---|---------------|
| Viz. | West comprehending | { <i>Bafil</i> ————— <i>Solotburn</i> ————— <i>Bern</i> ————— <i>Friburg</i> ————— } | from N. to S. |

(2.) The chief Confederates of the *Switzers* are the { *Grifons*, ch. T. *Coire* } W. of { *County of Tirol*.
 { *City of Geneva* } the { *Lake of Geneva*.

(3.) The chief Prefectures of the *Switzers* are the { *Baden* —————
Bremgarten ————— } on the { W. }
 { *Melligen* ————— } { N.W. } of *Zurich*.
Sargans, N. of the *Grifons*.

To the *German* Empire we might here annex the Kingdom of *Hungary*, it being now almost intirely under the Emperour; but of it when we come to *Turkey* in *Europe*.

THIS great Body being divided (as aforesaid) into ten *Circles*; and the first of these (viz. *Belgium* or the *Netherlands*) being most observable upon several Accounts, we shall take a particular View of the same, as it consists of *Holland* and *Flanders*, and then treat of all the rest conjunctly, under the General Title of *Upper Germany*. Therefore,

§. I. HOLLAND.

Name.] **H**olland [of old *Batavia* or part of ancient *Belgium*, and now bounded on the East by *Upper Germany*; on the West and North, by part of the *German Ocean*; and on the South, by *Flanders*] is term'd by the Italians and Spaniards, *Hollandia*; so call'd (as many imagine) from *Hol* and *Land*, two Teutonick Words, signifying a low or hollow part of Land: But others chuse rather to derive the Name from *Oeland* (an Island in the Baltick Sea) whose Inhabitants, being great Pirates, and frequently ranging these Seas, at last did seize upon, and settle themselves in this part of the Continent.

Air.] The *Air* of this Country is generally Thick and Moist, by reason of the frequent Fogs which arise from the many Lakes and Canals with which this Country abounds. And to this Moistness of the Air it is, that we may impute the Cause of the frequency of Agues to which the Inhabitants are so subject. The opposite place of the Globe of *Holland* is that part of the vast Pacifick Ocean, between 184 and 188 Degrees of Longitude, with 51 and 54 Degrees of South Latitude.

Soil.] This Country lying very low, and in the tenth North Climate; its *Soil* is naturally wet and fenny, but the industrious Inhabitants do so drain it by a vast Multitude of Artificial Canals, that the Ground is made very fit both for Pasture and Tillage, especially the former, they imploying the greatest part of their Land in Grazing vast Herds of Kine. The length of the Days and Nights is the same as in *England*, South of the *Humber*.

Commodities.] Although the *Commodities* of this Country, proceeding from its natural Growth, (may, strictly speaking) be reckon'd only *Butter* and *Cheese*, yet by reason of the many useful Manufactures which this People encourage at Home, (the very Materials of which are brought from other Nations) and that wonderful

derful Trade which they manage abroad in most parts of the known World, we may reckon it as a publick Warehouse of the richest and best Commodities of all Nations.

Rarities.] The chief Remarkables in *Holland* are these following viz. (1.) The vast Multitude of Artificial *Sluces* and *Canals*, being a Work of prodigious Expence and great Convenience both for Traffick and Travelling. (2.) The first Book that ever was printed in *Europe*, to wit a Copy of *Tully's Offices* carefully preserv'd, and now to be seen at *Harlem*, where that useful Art of Printing was at first invented, or at least improv'd. (3.) The *Curious Fountains* (especially that call'd the *Basin of Venus*) and the two great *Cascades* or Water-falls in the pleasant Gardens belonging to *Loo*. (4.) The *brazen Font* in *St. Peter's Church* in *Zutphen*, remarkable for its admirable Workmanship. (5.) The two *brazen Dishes* in the Village of *Lofdun*, in which were baptiz'd (*Anno 1276.*) by *Don William*, Suffragan Bishop of *Treves*, 365 Children, [whereof 182 were said to be Males, and as many Females, and the odd one an Hermaphrodite] all born at one Birth by the Countess of *Heneberg*, Daughter to *Florent the IV.* Earl of *Holland*. One of which Children (at least an Abortive given out for one of them, the whole Matter of Fact being call'd in question) is to be seen in the *Museum Regium* at *Copenhagen*. (6.) The remarkable *Stone Quarry* near *Maestricht*, which looks like a vast Subterraneous Palace, it reaching under a large Hill, supported by some thousands of square Pillars [commonly 20 Foot high,] between which are spacious Walks, and many private Retirements of great Use in time of War, they serving as a sure Refuge to the neighbouring Country People, who commonly resort thither with their Goods alarm'd by an approaching Enemy. (7.) The Room where the Synod of *Dort* was held *Anno 1619.* with the Seats as they then stood, is shewn to Strangers as another Curiosity of this Country. (8.) The *Stadt-House* of *Amsterdam* is such a stately Edifice, founded upon some thousands of large Piles drove into the Ground, that the same deserves the particular View of every curious Traveller.

(9) The brazen Statue of the famous *Desid. Erasmus* in the City of *Rotterdam* is likewise observable, with the little obscure House where that great and eminent Man was born; which is signify'd to Strangers by a Distich over its Door in *Latin*, *Dutch* and *Spanish*. Lastly, among the principal *Rarities* of *Holland* we may reckon that noted piece of Antiquity the *Burg* in *Leyden*, with the many rare Curiosities in the famous University there; the most remarkable of which are these following. (1.) The Horn and Skin of a *Rhinoceros*. (2.) The Head and Back of another, with the *Vertebra* of its Neck. (3.) The prodigious Oyster-shell weighing one hundred and thirty Pounds. (4.) Two

(4.) Two humane Skins, one a Man's, the other a Woman's, purely tann'd and prepar'd like Leather, with a pair of Shooes made of such Leather. (5.) Another humane Skin dress'd as Parchment. (6.) The Effigies of a Peasant of *Prussia*, who swallowed a Knife of ten Inches Length, and is said to have lived eight Years after the same was cut out of his Stomach. (7.) A Shirt made of the Entrails of a Man. (8.) A curious Shield made of a Sea-Tortoise-shell. (9.) The Stomach and Bladder of a wonderful shape taken out of a monstrous Fish brought from *Sheveling*. (10.) Two *Egyptian* Mummies, being the Bodies of two Princes, of great Antiquity. (11.) Two Subterranean *Roman* Lamps, with divers *Roman* and *Egyptian* Urns, of great Antiquity. (12.) The Limbs of several Sea-Monsters. (13.) All the Muscles and Tendons of the humane Body curiously set up by Professor *Stalpert Vander Wiel*. (14.) A Wooden Effigies of the celebrated *Egyptian* God *Osiris*, new almost consum'd with Age. (15.) Another of Brass, with three *Egyptian* Idols of Stone. (16.) An Image of *Isis* giving suck to her Son *Or*. (17.) Another Effigies of *Isis* upon a little *Egyptian* Coffer, containing the Heart of an *Egyptian* Prince embalm'd. (18.) A piece of Rhubarb that grew in form of a Dog's Head. (19.) A Cup made of a double Brain-pan. (20.) A Loaf of Bread putrefy'd. (21.) The monstrous Skeleton of a Man with crooked Hands and Legs.

Archbishopricks.] Here is but one Archbishoprick in this Country, (viz. *Utrecht*) and that only Titulary.

Bishopricks.] Under the Archbishoprick of *Utrecht* are five Titular Suffragans, viz.

| | | | |
|-------|---------------------|-------------------|--------------------|
| Those | { <i>Deventer,</i> | <i>Harlem,</i> | <i>Middleburg.</i> |
| of | { <i>Groningen,</i> | <i>Leuwarden,</i> | |

Universities.] Universities in this Country are those of

| | |
|-------------------|--------------------|
| <i>Leyden,</i> | <i>Groningen,</i> |
| <i>Utrecht,</i> | <i>Harderwick.</i> |
| <i>Franecker.</i> | |

Manners.] The Natives of this Country are reckon'd none of the politest sort of People either in Thought or Behaviour, especially the latter; in which they so little endeavour to follow the various Modes, and nice Punctilio's of Ceremony in Use among their Neighbours the *French*, that they chuse rather to run to the other extrem. The chief Quality of this People, (besides the singular Neatness of their Houses) is that wonderful Genius to a laudable Industry, wherewith they seem to be Universally inspir'd;

Persons of all Ages, Sexes and Stations, being some way or other usefully employ'd. So industrious are the *Dutch* both at home and abroad, that *Holland* may be fitly resembled to a large *Bee-hive*, whereof the City of *Amsterdam* we'll reckon the Entry; where the Multitude of Ships, that one sees daily going out and in, doth lively represent the swarm of Bees thronging out and in at the Door of the Hive, when busie at work in a Hot Summer's Day. By which industrious Hands, in carrying on several profitable Manufactures at home, and managing a prodigious Trade abroad, they have of late advanc'd themselves to such a height of Power and Treasure, as to become even terrible to crown'd Heads.

Language.] The Language here spoken is the *Low-Dutch* (a Dialect of the German) having several corrupted French and Latin Words intermixt; a Language that hath nothing to recommend it to Strangers. How it differs from the *High-German*, will best appear by their *Pater-Noster*, which runs thus; *Onse Vader die in de hemelen* [Zeit] *Uwen Naem werde geheylight. Uw' koninckrijcke kome. Uwen wille geschiede gelick in den hemel* [al so] *oock op den aerden. Ons dagelicks broot geef ont haden. Ende vergeeft ons onse schulden gelick oock wy vergeven onse schuldenaren. Ende en leyt ons niet in versoerkinge maer vertoest ons van den boosen. Amen.*

Government.] The Seven Provinces of *Holland* being under a Democratical Government, are (as it were) several Common-wealths; each Province being a distinct State, yea, and every City, having an independent Power within it self to judge of all Causes, whether Civil or Criminal, and to inflict even Capital Punishments: But all, joining together, make up one Republick the most considerable in the World; which Republick is govern'd by the *Assembly* of the *States-General*, consisting of seven Voices, each Province having One. To this Assembly (whose place of Meeting is ordinarily at the *Hague*) belongeth the Power of making War or Peace; receiving and dispatching of Ambassadors; inspecting into the Condition of Frontier Towns, and assigning what Sums of Money must be levied for the publick Service. Matters are not determin'd here in this Assembly by Plurality of Voices, but all the Provinces must come to an unanimous Consent; and each representative, returning to his respective Province, must propose the Matter in a Provincial Assembly, consisting of Deputies from all Cities of that Province; which Deputies must also return, and receive the Consent of their Principals; otherwise nothing can be concluded. In this Assembly of the *States-General*, the seven Provinces have still given their Voices in order following; viz. *Guelders* and *Zutphen* first, (because *Guelders* is the eldest, and her Plenipotentiaries did first propose the Union)

Union) then *Holland*; 3dly, *Zeland*; 4thly, *Utrecht*; 5thly, *Friesland*, 6thly, *Over-Yssel*; and lastly, *Groningen*. Assistant to the Assembly is the *Council of State*, (compos'd of twelve Persons, whereof *Guelderland* sends 2; *Holland* 3; *Zeland* 2; *Utrecht* 2; *Friesland* 1; *Over-Yssel* 1; and *Groningen*, 1;) whose Business is to deliberate previously upon those Matters which are to be brought before the States-General; as also to state the Expence for the succeeding Year, and to propose Ways and Means how to levy the same Subservient to this Council is the *Chamber of Accounts* (compos'd of two Deputies from each Province) whose Office it is to examine the publick Accounts, and dispose of the Finances. And, whensoever the States do order the fitting out a Fleet; the Care of the same, and ordering of all Marine Affairs do rely upon the Council of the *Admiralty*; to which are Subordinate five Colleges in the three Maritime Provinces; viz. *Holland*, *Zeland*, and *Friesland*, who take care to execute all Orders of that Council, accordingly as they are sent to them from time to time.

Arms.] The Ensigns Armorial of the seven united Provinces or States of *Holland* are, Or, a Lion Gule, holding with one Paw a Cutleas, and with the other a Bundle of seven Arrows closely bound together, in allusion to the seven Confederate Provinces, with the following Motto, *Concordiâ res parvæ crescunt*.

Religion.] No Country in *Europe* can boast of more Religions, and yet perhaps no part of *Christendom* may be truly said to be less Religious than this is. Here indeed we may see all Sects and Parties in the open Profession of their respective Tenets (all Professions being tolerated for Trading sake) and yet that which the Apostle *S. James* (Chap. i. v. 27.) calls the *pure and undefiled Religion before God and the Father*, is as little (if not less) known here than in any Christian Country whatsoever. That publickly profess'd and generally receiv'd is the *reformed Religion* according to the Tenets of *Judicious Calvin*. Christianity was first planted in this Country about the same time with the *Upper Germany*; of which afterwards.

§. 2. FLANDERS.

Name.] *Flanders* [the ancient *Gallica Belgica*: And now bounded on the East by part of *Upper Germany*; on the West by part of the *German Ocean*: on the North by *Holland*; and on the South by *France*] is term'd by the *Italians*, *Flandra*; by the *Spaniards*, *Flandre*; by the *French*, *Flandres*; by the *Germans*, *Flandern*; and by the *English*, *Flanders*, so call'd (as some imagin) from *Flandebert*,

Nephew to *Clodian* the 2d King of *France*, who flourish'd about the beginning of the fifth Century. But others are willing rather to derive it from *Flandrina*, Wife to *Liderick* the 2d, who was Prince of *Buc*, and Grand Forester of *Flanders*; and govern'd it according to the Orders of *Charlemaigne* and *Debonnaire*.

Air.] The *Air* of these various Provinces is generally esteem'd indifferently healthful, yet the Moistness of the Soil doth frequently occasion thick Fogs in the Winter, which would prove very prejudicial to the Inhabitants, did not dry Easterly Winds from the main Continent purifie the *Air*, and occasion hard Frosts for several Months. The opposite Place of the Globe to *Flanders*, is that part of the vast Pacifick Ocean between 183 and 187 Degrees of Longitude, with 49 and 52 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 9th Northern Climate) is not the same in all Parts, being in some considerably better than others, but yet good in all; so fertile is it in Grain, Roots, and many sorts of Fruits, that 'tis hardly to be parallell'd by any Spot of Ground in the same Climate. In the Counties of *Heynault* and *Namur*, as likewise in the Bishoprick of *Liege*, are found some Mines of Iron and Lead, with Quarries of Marble, and several Pits of excellent Coal. The Length of the Days and Nights is the same, as in the North of *France* and South of *England*.

Commodities.] The chief Commodities of this Country, being the Product of their Manufactures, are Tapestries, Worsted Stuffs, Linen-Cloth, Wrought-Silks, Camblets, Lace, &c.

Barities.] Near to *St. Omers* is a large Lake in which are divers floating Islands, most of them inhabited, and moveable by Ropes ty'd to strong Poles fixt fast in the Ground; and in one of them is a Church with a Monastery of the Order of *St. Bernard*. (2.) At *Tongres* (10 Miles North-West from *Liege*) are to be seen some Monuments of ancient Temples, and other Buildings, erected by the *Romans*. (3.) In the stately Cathedral of *Antwerp* (dedicated to the Blessed Virgin) are no less than 66 different Chapels. (4.) At *Ghent* is a Tower call'd *Belfart*, in which hangs a Bell nam'd *Roland*, which weighs 11000 Pound. (5.) Remarkable is the Sounding Gallery in *Brussels*, which repeats an Eccho 15 times; and *Span* or *Span* (a Village in the Bishoprick of *Liege*) is famous all the World over, for its curious Springs of Medicinal Waters.

Archbishopricks.] Archbishopricks in this Country are those of

Malines.

Cambray.

Bishopricks.] Bishopricks in this Country are those of

Liege,

Bois le Duc,

Antwerp,

Arras,

Ghent,

Tournay,

Bruges,

S. Omer's.

Ypres,

Namur.

Ruremond,

Universities.] Universities in this Country are those of

Louvaine,

Douay,

Liege.

Manners.] The Inhabitants of these various Provinces being (for the most part) a mixture of *Spanish*, *French* and *Dutch*; their Character in general will be best learn'd by considering the respective Characters of these three Nations (which may be seen in their proper Places) and comparing them one with another.

Language.] The Language vulgarly us'd in *Flanders* is that call'd the *Walloon*, (except those Provinces which border on *Holland*, where the *Dutch* prevails) which is a corrupt *French*, with an Intermixture of several *Dutch*, and many *Spanish* Words. How it differeth from the pure *French*, will best appear by their *Pater-oster*, which runs thus: *Nos peer qui êt au Cieux: sanctifie soi te Nom, ad-veen ton Rejam; ta Volonte je fait en terre commes es Cieux; Donne nay ajorhuy no pain quotidien: Et pardonne no det comme non pardonnon à nos detteux; Et ne no indu en tentation; mais delivre nos des maux. Anse soit il. Amen.*

Government.] This Country (*viz.* all those Provinces belonging to the *Spaniards* before the late War, and since restor'd by the Peace of *Ryswick*) doth acknowledge his Catholick Majesty as supream Lord, who us'd hitherto to rule the same by his Substitute styl'd *Governour General* of the *Netherlands*: For whose Assistance were allow'd three Councils, *viz.* (1.) The *Council of State*, in which were transacted the weightiest of the Publick Affairs; such as those that relate to Peace and War, Leagues and Alliances. (2.) The *Privy Council*, which determined the Limits of Provinces, published Edicts, and decided Matters brought thither by appeal from other Courts of Judicature. (3) The

Council of Finances, to which belong'd the Care and Management of the Publick Revenue and Taxes, supervising the Accounts of Receivers; and proportioning the Expence and Charge of the War. As for Levying of Money, and Enacting of new Laws, that was the Business of the Convention of the Estates (consisting of the Nobility, principal Persons of the Clergy, and Deputies of the chief Cities) who ordinarily assembled at *Bruxels*, when call'd by the Governour General. For the better maintaining the Peace through all the Provinces, and taking due Care of the Standing Forces, each Province had its particular Governour appointed in Subordination to the Governour General. And, for an Universal Administration of Justice, every Province had its peculiar Provost, whose Power in Criminal Matters was reckon'd very great. This was the settled form of *Civil Government* in these Provinces, and thus have they been rul'd for many Years; but what mighty Alterations are lately made, and how publick Affairs are now manag'd in them, since the Accession of the D. of *Anjou* to the Crown of *Spain*, I need not say.

Arms.] See *Spain*.

Religion.] The Religion predominant in all the Provinces of the *Netherlands*, before the dawning of that happy day of our Reformation, was intirely the Doctrine of the *Roman Church*. — But the Errors and Absurdities of that Doctrine being openly expos'd to the World by our wise Reformers; the King of *Spain* (to hinder a farther Progress in that Matter) set up the most severe and barbarous Court of Inquisition, which occasion'd no small Disturbance, and at last a bloody War, that ended in a total Alienation of the seven united Provinces, the other ten still remaining in the Profession of the *Romish Religion* (as at this Day) and that in its grossest Errors. *Christianity* was planted in this Country about the same time with the united Provinces.

3. UPPER GERMANY.

Name.] **U**pper Germany [containing only a part of ancient *Germany*, as also a little of *Gaul* and *Illyricum*, with some of old *Italy*: And now bounded on the East by *Poland*; on the West by *France*; on the North by *Denmark*, with a part of the *Baltique Sea*; and on the South by *Italy*] is term'd by the Italians *Alta Allemagna*; by the Spaniards *Alemania alta*; by the French *Haute Allemagne*; by the Germans *Ober teutschland*; and by the English *Germany*: Why so call'd is much controverted by our modern Criticks, some German Authors being willing to derive its Etymology from words in their own Language, as *Gaar mennen*, i. e. *very much Men*. Others from Gere fig-

signifying to *Gather*, because the *Germans* seem'd to be an *Assemblage* of many Nations; others from *Gar* and *Man*, to denote that they were a *Warlike* People. Some (tho' with little ground) would fain allow it an Hebrew Derivation. But the most probable Opinion of all is, that the Inhabitants of this Country were called *Germani* by the *Romans*, either because they were a *sincere* and honest sort of People, or thereby to denote that they were *Brothers* to their Neighbours the *Gauls*.

Air.] The *Air* of this Country differeth considerably according to the Situation of the various Parts of this large Continent. Towards the North, it's generally very Cold, but in the Southmost Provinces, it's of the same Temper as in those Places of *France* which lie under the same Parallels. The opposite Place of the Globe to *Germany*, is that part of the vast Pacifick Ocean betwixt 186 and 198 Degrees of Longitude, with 45 and 55 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 8th, 9th, 10th, and 11th North Climate) is very different according to the Situation of its different Parts. In the Southern Circles, as also those in the middle Part of the Continent, particularly the *Upper* and *Lower Rhine*, there is hardly any Country in the World can excel them for plenty of Fruits, Corn and Wine: But towards the North, namely the two *Saxonies* and *Westphalia*, the Soil is not near so fertile, especially in Wine (Grapes never coming to full Perfection there;) however, as for Corn and Pasturage, they are abundantly furnish'd with them; and the whole Country in the main is tolerably pleasant, healthful and profitable, abounding not only with all things necessary, but also with many of the Comforts of human Life. The longest Day in the Northmost part is about 17 Hours, $\frac{1}{2}$. The shortest in the Southmost, 8 Hours $\frac{1}{2}$. and the Nights proportionably.

Commodities.] The chief Commodities of this Country are Corn, Metals, Allom, Salt, Wine, Flesh, Linen, Quicksilver, Armour, and Iron-works, &c.

Rarities.] What things do mostly Merit the Epithet of *Rare* and *Curious* in this vast Country, are reducible to these following Heads; viz. (1.) Some very observable Springs; as *That* near *Geesbach* in *Alsace*, whose Top is covered with a foul fat oily Substance, ordinarily us'd by the Peasants thereabouts, as common Wheel Grease: Another near *Paderborn* in *Westphalia*, call'd *Methorn*, which hath three Streams very different from one another, both in Colour, Taste and Qualities; and a third in the Diocess of *Paderborn*, observable in that it loseth it self twice every 24 Hours, returning always back at the Interval of 6 Hours, and that with such Violence as to drive three

Mills not far from its Source. Here are also many *Salt Springs*; particularly that near *Lunenburg*, in the D. of *Lunenburg*, another at *Hall* in Upper *Saxony*, and a third at *Saltzweil* in the Marquisate of *Brandenburg*. To these we may add a vast multitude of Springs whose Waters are highly priz'd both for Purging and Bathing, especially the latter; as particularly those at *Stugars* in *Wirtemberg*; those at *Aix la Chapelle* in *Westphalia*, and those in the Marquisate of *Baden*, from whence the whole Country derives its Name. (2.) Some strange kind of *Lakes*; particularly that in *Carniola* call'd the *Zirchnitzer Sea*, in length about two *German Miles*, and one broad; observable for its many subterraneous Caves and Passages, in which both the Water and Fishes of the Lake do yearly retire in the Month of *June*, and return again about *September*. As also another in *Suabia*; the Nature of whose Waters is such, that they actually singe Fishing-nets, when sunk to the bottom. (3) Remarkable Caves, particularly that near *Blackenburg* in Lower *Saxony*, commonly call'd *Buman's Hole*; of which none have yet found the End, tho' many have travell'd a vast way into it, on purpose to come at the same. Another call'd *Grotto Propetschio*, with many other subterraneous Caves in *Carniola*, near the *Zirchnitzer-Sea* above-mention'd. And finally that near *Hamelen* (about 30 Miles from *Hanover*) at whose Mouth stands a Monument expressing the Loss of 130 Children, who were swallowed up alive in that very place above 400 Years ago. But, according to a certain Tradition in *Transylvania*, those Children were transported thither, there being many Persons in that Country, who, to this very Day, do own themselves for their Posterity. (4.) Stately Edifices, especially some famous Cathedrals, as particularly those of *Strasburg* and *Magdeburg*, (in the latter of which are 49 Altars) as also that of *Ulm*, remarkable for its curious Organ, so much talk'd of, it being 93 Foot high, and 28 broad; being likewise furnish'd with 16 pair of Bellows, and having Pipes of such a prodigious Bigness, that the largest of them is 13 Inches Diameter. (5.) Some observable Rocks and Stones, particularly those two Rocks nigh to *Blackenburg*, (above-mention'd) which naturally represent two Monks in their proper Habits, and that as exactly as if design'd for such; and near to *Blackenburg* are several Stones dug out of the Ground, having on them the Representation of divers Animals, especially Fishes in a neighbouring Lake; and sometime, the Resemblance of a Man. In another Lake, in the Earldom of *Mansfield*, are Stones exactly shap'd like Frogs and various sorts of Fishes. Add to these the remarkable Stones commonly found upon Mount *Calenberg* (about two *German Miles* from *Vienna*) having the lively Impression of Trees and Leaves of Trees upon them. As also a Quarry in those Parts, out of which are dug some Stones equally transparent with refin'd Sugar-candy. (6.) Many choice Cabinets of Reliques, especially that in the Palace of *Inspruck*, with another at *Dresden*; but the chief of all is that in the Emperor's Palace at *Vienna*, whole

whose Curiosities are so vastly numerous, that a bare Catalogue of them makes a compleat Volume in Folio. (7.) At *Mentz* is a Modern Curiosity, which is carefully kept, and commonly shewn to Strangers, viz. a *Leaf of Parchment*, on which are fairly written twelve different sorts of Hands, with variety of Miniatures and Draughts curiously done with a Pen, and that by one *Thomas Schurviker*, who was born without Hands, and perform'd the same with his Feet. As for the famous *Tun of Heidelberg* (being 31 Foot long and 21 high, before 'twas destroy'd by the *French* in the late War) the same was so well known that I should hardly have said any thing of it. Lastly, To these Remarkables in *Germany* we may here add the *Dominican's Chapel* in the City of *Bern*, tho' be'nging to *Switzerland*, in which is still to be seen an Artificial Hole, or a narrow Passage between that Chapel and one of the *Dominican's Cells*, which Hole is still shewn to Strangers, as a lasting Monument of one of the greatest Cheats that was ever yet discover'd in the Church of *Rome*: I mean that notorious pretended Miracle which the *Dominicans* impos'd upon the World towards the beginning of the 15th Century, to confirm their part of that Controversy which was hotly toss'd between them and the *Franciscans* concerning the *Immaculate Conception* of the Blessed Virgin. The Passage is so well known, that I should hardly descend to Particulars, even supposing this were a proper Place for such a Narrative.

Archbishopricks.] Archbishopricks in this Country are those of

Mentz,
Triers,
Cologne,
Magdeburg,

Saltzburg,

| Triers, | Tubingen, | Dillinghen, | Olmutz, |
| Liege, | Rostock, | Jena, | Kiel, |
| Heidelberg, | Wittenberg, | Lewenghen, | Gratz. |

Manners.] The *High Germans* are generally reputed a very solid and honest sort of People. The trading part of 'em are found to be extremely fair in their Dealings, and ambitious to keep up the so much renowned *Sincerity* of their Forefathers. Those who betake themselves either to *Mars* or *Minerva* (especially the former) prove commonly very worthy Disciples. This People hath likewise a mighty Genius for mechanical sort of Learning; and several of them are famous for some singular Inventions, particularly *that* of the fatal Instrument the *Gun*, accidentally discovered by one *Bartholdus Swart* a Frier, when making a Chymical Experiment with a Crucible set over the Fire, having Salt-petre and Sulphur, and other such-like Ingredients, intermixt. They are also said to have found out that most useful Art of *Printing*; but the *Hollanders* do eagerly deny them the Honour of that Invention, ascribing the same to one *Laurence Coster* of *Harlem*; and, upon strict Enquiry, it appears that the *Germans* had indeed the first hint of this Art from *Holland*; and that they only improv'd and perfected the same at *Mentz*. The most noted, of the many mechanical Operations of this People of late, is that curious Watch of the Emperor *Charles* the Fifth, set in the Jewel of his Ring; as also that Clock of the Elector of *Saxony's*, fixt in the Pommel of his Saddle. As for the Iron Fly and Wooden Eagle of *Regiomontanus*, they are so well known, that it's superfluous even to name them; only this I may add, that the first Invention and Contrivance of the latter (tho' commonly attributed to *Regiomontanus* as well as the former) is deny'd him by *A. Gellus*, who ascribes the Honour of that curious piece of Mechanism to the Ingenuity of *Archytas*.

Language.] The Language here us'd, is that call'd the *High-Dutch*, a Language very ancient, and generally esteem'd both Noble and Manly in the Pronunciation; more becoming a General than a Courtier. None of the Western *European* Tongues hath less Affinity with the Latin than it has. The Maternal Languages of several Kingdoms, and different States in *Europe*, are Originally from the *Germans*. It's now divided into a great many Dialects, very different from one another.

The

The purest of which is generally esteem'd that spoken of in *Misnia*. *Pater-noster* in the *High German* runs thus: *Unser Vatter der du bist in himmel, geheyliget werde dei Nahim. Zakomm uns dein Riich; dein wille geschene uferden, wie im himmel. Unser tuglich brodt gibbuns heut: unde Vergebuns, unser sculdt, als wir vergonen unserm sculdigern und suchr uns nicht in Versuchung; sonder erl-se uns vom ubel. Amen.*

Government.] This great Body comprehends above three hundred different Sovereignties, but all (or most of them) are Homagers to one Head, own'd as Supream; *viz.* The Emperor of *Germany*. The Empire is elective, and govern'd by Dyets, almost like the General Estates of *France*. The standing Law of the Empire (which bindeth all the several States as the various Members of one Body) is the *Civil* or *Roman*, mix'd with the *Canon*; to which add the ancient Customs of the *Germans*, and the various Statutes of the Dyets made from time to time. The several States have their peculiar Laws obligatory within themselves. The whole Empire being divided into ten Circles, each of 'em (excepting *Belgium*, or the Circle of *Burgundy*, which now is allow'd no Vote in the Dyet) hath one or more Directors who preside at their Assemblies, *viz.* For *Westphalia*, the Bishop of *Munster* and Duke of *Newberg* are Directors. For *Lower Saxony* are the Marquess of *Brandenburg* (now King of *Prussia*) and Duke of *Brunswick* by turns. For *Upper Saxony* is the Elector of *Saxony* now King of *Poland*. For the *Lower Rhine* is the Archbishop of *Mentz*. For the *Upper Rhine* are the Elector *Palatine* and Bishop of *Worms*. For *Franconia*, are the Bishop of *Bamburg*, and Marquis of *Culembach*. For *Swabia*, are the Duke of *Wirttemberg*, and Bishop of *Constance*. For *Bavaria*, are the Elector of *Bavaria*, and Archbishop of *Saltzburg*. And lastly, *Austria*, its Director is the Arch-duke of *Austria*, or his Imperial Majesty. Two or three Circles may meet when one of them is attack'd from without, or in any Confusion within. The General Dyets consist of three Bodies, *viz.* *Electoral Princes*, other *Princes*, and *Imperial Cities*. But more particularly; in this great Body we may reduce all Sovereignties to these Five; namely,

The Emperor,
The Electors.

The Ecclesiastick Princes,
The Secular Princes,

The Free Cities.

1. The Emperour, who (being of the House of *Austria*) doth claim three sorts of Dominion, *viz.* that of *Austria* as Hereditary; *Bohemia* as his Right; and *Hungary* by Election. In his Life-time he causeth his own Son or Brother, or (failing of these) one of his nearest Kinsmen to be crown'd King of *Hungary*; afterwards King of *Bohemia*; and then (if the Electors are willing) he is chosen King of the *Romans*; whereby he is Successor Presumptive to the Empire. The Power

Power of the Emperor is much impair'd by several Capitulations betwixt him and the Princes of the Empire. It's true, that only he can confer Honours, create Princes, enfranchise Cities, institute Universities, and such like: Yet as to the Legislative Power, and that of Levying Taxes upon the whole Empire, *that* is wholly lodg'd in the General Dyet conjunctly with him, and, by a late Capitulation, he is not to enter into Alliance, or make War with any Foreign Prince without Consent of the Electors. However, if we consider only his own Hereditary Dominions, he is a powerful Prince; and, to support the Grandeur of the Imperial Dignity, he is serv'd by the greatest Princes of the Empire; is address'd unto by the August Title of *Cæsar*; and the Ambassadors of all crown'd Heads, and Free States in *Europe*, give place to those sent by him, at what Foreign Court soever it be.

II. *Electors*, who are now nine in Number, *viz.* these following: (1.) The Archbishop of *Mentz*, who is Great Chancellor of the Empire in *Germany*; sits on the Emperor's Right-hand in the Dyet, and did formerly Crown the King of *Bohemia*. (2.) The Archbishop of *Triers* or *Trevers*, who is Great Chancellor of the Empire in *France*; claims the first Vote in Electing the Emperor; and sits over against him in the Dyet. (3.) The Archbishop of *Cologne*, who is Great Chancellor of the Empire in *Italy*; claims the first Vote in chusing the King of the *Romans*; sets the Crown on his Head; and sits next the Emperor. (4.) The King of *Bohemia* (who hath only a Seat in the Election) is Cup-bearer, and in the publick Procession walks next the Emperor or King of the *Romans*. (5.) The Duke of *Bavaria*, who is Great Steward; and in time of the publick Procession carrieth the Globe before the Emperor. (6.) The Duke of *Saxony*, who is Great Marshal of the Empire; and at the publick Procession carrieth the naked Sword before the Emperor. (7.) The Marquis of *Brandenburg*, now King of *Prussia* who is Great Chamberlain, and at the publick Procession carrieth the Scepter before the Emperor. (8.) The Prince Palatine of the *Rhine*, who is Great Treasurer; and in the Procession at Coronations scattereth Medals among the People. (9.) The ninth Elector is Duke of *Brunswick*, *Lunenbourg*, *Hanover*, *George Lewis*, and King of *Great Britain*, &c. Son of *Ernestus Augustus*, who was added to the Electoral College in the Year 1693. These Princes have much greater Authority, and enjoy more ample Privileges than the other Princes of the Empire. To them belongeth not only a Right of Electing the Emperor and King of the *Romans* (as aforesaid) but also some allow them even a Deposing Power. When the Emperor calls a Dyet, he is oblig'd to ask their Advice; and during an Interreign, two of them (*viz.* the Electors of *Saxony* and *Bavaria*) have Power to govern the Empire; the Jurisdiction of the former extending over the Northern, and *that* of the other over the Southern Circles of the Empire.

III. *Eccle-*

III. *Ecclesiastick Princes*, who (besides the first three Electors) are chiefly these following, *viz.* Archbishop of *Salzburg* [Great Master of the *Teutonic Order*] the Bishop of *Liege*, *Munster*, *Spire*, *Worms*, *Wurtzburg*, *Strasburg*, *Osnabrug*, *Bamberg*, *Paderborn*, &c. and many Abbots and Abbesses, who are absolute over the Temporality of their Benefices. The Election to their various Dignities belongs wholly to their several Chapters, and they govern the People in subjection to them as Sovereign Princes, without any Cognizance of a higher Power.

IV. *Secular Princes*, who are chiefly the Dukes of *Lunenbourg*, *Wirtemberg*, *Mecklenburg*, *Sax Lauenburg*, &c. Marquess of *Baden*, *Culembach*, &c. The Landgrave of *Hess*, Princes of *East-Friesland*, *Nassau Anhalt*, &c. Counts of *Solms*, *Aversburg*, &c. and many other Dukes, Marquesses and Landgraves; as also some Earls and Barons who exercise a Sovereign Power over those in their own Dominions.

V. *Free Cities*, which are either *Imperial* or *Hans Towns*. *Imperial Cities* are those which bear the Eagle of the Empire in their Arms, and have right to send their Deputies to the Dyet of the Empire. *Hans-Towns* are those, which about the End of the 13th Century, entred into a firm League of mutually assisting one another in time of Distress; as also in carrying on such a regular Commerce as might universally tend to their Advantage, and the publick good of the Empire. Which Society encreased to the Number of eighty Cities, who enjoy'd great Privileges, and exercis'd a peculiar Jurisdiction among themselves. For the better Administration of which, they were divided into four Circles, distinguish'd by the Names of four principal Cities, in which were establish'd their Courts of Judicature; *viz.* *Lubeck*, *Cologne*, *Brunswick*, and *Dantzick*. But this Society hath been on the declining hand almost two hundred Years, and is now become very inconsiderable.

Chief Courts in *Germany*, for hearing and determining the Great Causes of the Empire, are two, *viz.* The *Imperial Chamber* (and *Chamber of Vienna*. (1.) The *Imperial Chamber* (consisting of fifty Judges, call'd *Assessors*, whereof the Emperor appointeth the President, and four of the Principal Officers; each of the Electors chusing one; and the rest being nsminated by the other Princes and States of the Empire, whose Business is to determine all Disputes which arise from time to time between the Princes; as also other Causes brought thither by Appeal from Inferior Courts. The Seat of this Judicature was formerly at *Spire*, but now at *Wetzlar* in *Hesse*. (2.) The *Chamber of Vienna*, whose Office it is also to decide all Causes brought to it by Appeals from Inferiour Courts, and claims the same Authority with the Chamber of *Spire*. The Seat of this Court is the Emperor's Palace, and either he himself, or his Deputy, sits as chief, being assisted by a competent number of Judges, whereof several are Professors of the Pro-

testant

zestant Religion. In both these Courts the Emperour (as Sovereign Judge, and President) pronounceth Sentence when there in Person; and in his Absence those deputed by him, who representing himself, are allow'd to carry the Imperial Scepter as a Mark of their Dignity. In particular Courts they follow the Laws of the Empire, which consist in many ancient Constitutions; the *Golden Bull*; the Pacification of *Passaw*; as also the Treaties of *Westphalia* in the *Saxon* Law establish'd by *Charlemain*; and the *Roman* by the Emperour *Fuslinian*; which last they observe whensoever the *Saxon* has not been receiv'd. All Princes, States, and Members of the Empire have (and actually Exercise) a Sovereign Power, within their own Territories; except in some particular Cases, wherein People may Appeal either to the Imperial Chamber of *Spires*, or that at *Vienna*, commonly call'd the *Aulick Council*.

After the Government of *Germany*, we may add that of *Switzerland* and *Geneva*.

I. *Switzerland* (a large Commonwealth, consisting of several little ones, *viz.* Thirteen Cantons, every one of them being absolute within their own Jurisdiction) is under a *Popular Government* in the main; yet not strictly so in respect of every particular Canton, those of *Bern*, *Zurich*, and *Lucern*, being more properly under an *Aristocracy* than any other; since the Authority of the Gentry doth most prevail in them. However, the whole Body of the State, consider'd as one Complex Republick, consisteth of three distinct Parts, *viz.* The *Switzers* themselves, distributed as (aforesaid) into Thirteen Cantons. *Secondly*, Those States Confederate with them for their common Liberty and Protection. And *Thirdly*, The Prefecture, subjected to them, whether by Gift, Purchase, or Chance. (1.) The Body of the Cantons is govern'd by each Canton, having its particular Magistrate of their own chusing; by whom (with a standing Council, consisting of Persons elected out of the People) all particular Controversies of the Canton are heard and determin'd. But, when any publick Cause occurs, which relates to all the Cantons, then each of them sends its Commissioner to the general Dyet, (which ordinarily meets at *Baden*) where every Canton hath one Vote, and Matters are determin'd by the major part. (2.) *Confederate States*; the chief of which (besides *Geneva*) are the *Grisons*, an adjacent Commonwealth, govern'd in like manner as the *Switzers*. Of all the Allies of the *Switzers*, there's none more Potent than these. They entred first into a League one with another, *Anno* 1471. and afterwards with the *Switzers* in 1491. Their Country lies among inaccessible Mountains, and hideous Precipices, and they divide

vide themselves into six Parts, viz. The Grey League. The League of the House of God. The League of the *Ten jurisdictions*. The *Valtelline*. And lastly, The Countries of *Chiavanna* and *Bornio*. Some believ'd they deriv'd the Title of *Grisons* from the Custom of wearing Grey Scarfs, when first they entred into the League together. (3.) *Prefectures of the Switzers*, particularly those Countries and Cities of *Baden* and *Sargans*, with many other Towns and Villages situated nigh unto, or among the *Alps*.

II. *Geneva*, being a Free Republick, is govern'd by its own Magistrates, and is in Confederacy with the Cantons of *Switzerland*, whom it resembles very much in the Constitution of its Government. The Sovereignty of the State is lodg'd in a Council of two Hundred, out of which a lesser Council consisting of twenty five is chosen (both which being for Life, serve for Checks one to another) and finally out of these twenty five, are elected four Principal Officers, whom they call the *Syndicks*, who have the sole Management of the Common-wealth; except it be in some great Matter, as making of Peace or War; Offensive or Defensive Leagues; hearing Appeals, and such like General Concerns, which is the Business of the Great Council to consider and determine.

Arms.] The Emperor of Germany for *Armorial Ensigns* bears Quarterly, 1. Barwise, *Argent* and *Gules* of eight Pieces, for *Hungary*. 2. *Argent*, a Lyon, *Gules*, the Tail moved, and passed in Saltier, Crowned, Languid, and Armed, *Or*, for *Bohemia*. 3. *Gules*; a Fesse *Argent*, for *Austria*. Party and bendwise, *Argent* and *Azure*, a border *Gules*, for *Ancient Burgundy*. 4. Quarterly in the first and last *Gules* a Castle triple towered, *Or*, purfled *Sable*, for *Castile*. In the second and third *Argent*, a Lyon purple for *Leon*. The Shield crested with an Imperial Crown, closed and raised in shape of a Mitre, having betwixt the two Points a Diadem surmounted with a Globe and Cross, *Or*. This Shield, environed with a Collar of the Order of the Golden Fleece, is plac'd on the Breast of an Eagle displayed *Sable* in a Field, *Or*, Diadem, membred and beaked *Gules*, holding a naked Sword in the right Talon, and a Scepter in the left. The two Heads signifie the *Eastern* and *Western* Empire; and for the Motto are these Words, *Uno avulso non deficit alter*. But the Emperours's peculiar Device is, *Pax & salus Europa*.

Religion.] The Laws of the Empire give free Toleration to the publick Exercise of three Religions, viz. the *Lutheran*, *Calvinist*, and *Popish*, and in some Places all three Parties celebrate Divine Worship in one and the same Church, at different times of the Day; as among others, at *Manheim* in the *Palatinate*, before it

was

was ruin'd by the *French*. The Reformation of Religion was begun here by *Martin Luther* about 1517. and embrac'd by the Elector of *Saxony*, *Brandenburg*, Prince *Palatine* of the *Rhine*, *Landgrave* of *Hesse*, the Duke of *Brunswick*, and most of the Free Cities. Whereupon followed continual Wars and Troubles about Religion and the Lands of the Church, 'till the Year 1525. when a Peace was concluded at *Passaw*; where the *Protestant* Religion was secured, 'till Matters could be better settled at the next ensuing Dyet. At length the Religious Peace in *Germany* was establish'd at the Dyet at *Ausburg* in 1555; where 'twas provided that neither Party should annoy one another, upon the Account of Religion; and that such of the Church Lands and Revenues, as the *Protestants* had possess'd themselves of, before the Peace at *Passaw*, should from thenceforth remain in their Possession. The *Protestant* Religion was likewise establish'd by the *Westphalian* Treaty in the Year 1648. And much in this Posture did things continue till of late, that the *French* King broke in upon the Empire, and took so many Towns and Cities of it: In all which he dispossest the *Protestants* of their Rights, and establish'd the Exercise of the *Roman* Religion. And this he hath endeavour'd to confirm by the last Treaty at *Ryswick*, where his Plenipotentiaries, in Conjunction with the Emperor's, prevail'd to insert into the said Treaty a Clause, whereby 'tis agreed, That the *Roman* Catholick Religion shall remain within the Places restor'd by *France* to the Emperor and Empire, in the same Condition as 'tis exercis'd at present. And, though the *Protestants* long contested, and at last sign'd the Treaty, with a Protestation, that the Clause in dispute should not be drawn into Precedent for the future; yet there's too great Reason to fear that the Popish Party hath gain'd a considerable Advantage in this Point. The various Parts of this Country receiv'd the Light of the blessed Gospel at various times, and that by the preaching of various Apostles, especially *St. Thomas* Surnamed *Didymus*, one of the Twelve.

Name.] **P**oland [a considerable Part of Ancient *Sarmatia Europea*; and now bounded on the East by *Little Tartary*, and part of *Moscovia*; on the West by *Upper Germany*; on the North by part of *Moscovia*, *Livonia*, and the *Baltick Sea*; and on the South by *Hungary*, *Transilvania* and *Moldavia*] is term'd by the *Italians* and *Spaniards*, *Polonia*; by the *French* *Pologne*; by the *Germans* *Polen*; and by the *English* *Poland*: So call'd (according to the best Conjectures) from *Polus* or *Pole*, which in the *Sclavonic* Language signifies a *Plain* or *Champaigne* Country fit for Hunting, there being none of old more esteem'd for *that* than it was.

Air.] The *Air* of this Country is of a different Nature, according to the Nature and Situation of the different Parts of the Kingdom; for in the Provinces towards the North West it's very cold, yet withall very pure and wholefome, but towards the North-East, particularly *Lithuania*, it's not only cold, but also very gross and unwholefome; which chiefly rises from the vast number of Lakes in that part of the Country, whose standing Waters send up infectious Vapours, which intermixing with the Air, do easily corrupt the whole Mass thereof. The opposite Place of the Globe to *Poland* is that part of the vast *Pacifick Ocean* lying between 194 and 212 Degrees of Longitude, with 47 and 59 Degrees of South Latitude.

Soil.] The Nature of the Air having still a great influence on the *Soil*; the North-West Provinces of this Kingdom (it lying in the 9th, 10th and 11th North-Climate) are abundantly fertile, affording many sorts of Grain and Fruits, not only enough for the Inhabitants, but also to supply the wants of their Neighbours. In the middle part of this Kingdom are some Mountains, and those well stor'd with several Mines of Silver, Copper, Iron and Lead. The Provinces towards the North and North-East are very barren in Fruits and Corn, being full of Woods, Lakes and Rivers. The longest Day in the Northmost Parts of this Kingdom is 17 Hours $\frac{1}{2}$, the shortest in the Southmost is 8 Hours $\frac{1}{2}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Wax, Linen, Boards, Masts for Ships, Pitch, rich Furs, Salt, Amber, Pot-ashes, Soap, Corn, Butter, Cheese, Rosin, Flax, Cordage, Brimstone, &c.

Wartres.] In the Cathedral of *Gnesna* is kept an inestimable Treasure of Gold, Silver and enamell'd Vessels, given by divers Kings of *Poland*, and Prelates of that See. Under the Mountains adjacent to

Kion

Kiow are divers Grottos, wherein are preserv'd a great number of humane Bodies, still intire, although buried many Years ago, being neither so black nor hard as the *Egyptian* Mumies; among these are two Princes, array'd in the same Habit they usually wore when alive, who are shewn to Travellers by the *Russian* Monks. The place where those Bodies are preserved is a dry sandy Ground, much of the same Nature with the Catacombs at *Rome*. In the Southern parts of *Poland* are divers Mountains, out of which is dug Salt in large Masses, as Stones out of a Quarry; and out of others they dig natural Earthen Cups, which, being exposed for some time in the open Air, become as hard as a Stone. In the Deserts of *Podolia* is a Lake, whose Waters condense into solid Salt, and that purely by the Heat of the Sun. Near to *Cracow* are the Mines of *Sal Gemme*, which, being 200 Fathoms deep, do constantly employ above 1000 Men, and yield a vast Revenue to the King. Near to *Culm*, in the D. of *Prussia*, is a Fountain which constantly sends forth a mighty sulphureous Steam, and yet its Waters are never hot.

Archbishopsricks.] *Archbishopsricks* in this Kingdom are Two, viz. those of

Gnesna, and *Leopol.*

Bishopsricks.] *Bishopsricks* in this Kingdom are these following.

| | | | |
|--------------------|------------------|---------------------|---------------------|
| <i>Cracow</i> , | <i>Posna</i> , | <i>Ploczow</i> , | <i>Fausenberg</i> , |
| <i>Culm</i> , | <i>Vilna</i> , | <i>Colmenssee</i> , | <i>Prumslaw</i> , |
| <i>Camimiec</i> . | <i>Window</i> , | <i>Letzko</i> , | <i>Kiow</i> . |
| <i>Kranoslaw</i> , | <i>Mednick</i> , | | |

Universities.] *Universities* in this Kingdom are those of

Cracow, *Koninsberg*, *Posna*, and *Vilna*.

Manners.] The *Polanders* are generally Men of handsome, tall and well proportion'd Bodies. Men of a good and durable Complexion, and of so strong and vigorous Constitutions, that many of 'em prove the best of Soldiers, being able to endure all the Fatigues of a Military Life. The Nobility and Gentry mightily affect the greatest Pomp and Grandeur they can, whether in Diet, Apparel or Equipage. Many of 'em are of such a generous Temper, that we may rather reckon them Profuse than Liberal. The Art of Dissimulation is of no great vogue among them, most of the better sort being of a fair and downright Conversation. They expect a great deal of Respect, and, where that is given, they never fail to make a suitable Return. They are

generally reckon'd very affable and courteous to Strangers, extremely jealous of their Liberties and Privileges, but most Tyrannical towards the meaner sort of their own People, treating the Peasants no better than meer Slaves; and in some Places they exercise a Power of Life and Death upon their Domestick Servants: Which absolute Power, and severe Usage of the Nobles towards the Commonalty, together with the many Feuds between one another, have produc'd not only many lamentable Disorders in this Kingdom, but also occasion'd the final Revolt of the *Cossacks*. One remarkable Quality of this People is their singular Care in Instructing of Youth in the *Latin* Tongue, which Persons of most Ranks do usually speak very fluently; yea, and even many of the Female Sex are also good Proficients therein.

Language.] The *Poles*, being originally descended from the *Slavi*, do still speak a Dialect of the *Sclavonian* Tongue; but the Poverty and Barrenness of their Language has oblig'd them to borrow many Words from the *Germans*, especially Terms of Art. It is hard for Strangers to learn the same to Perfection, the Pronunciation being extremely harsh, by reason of the vast multitude of Consonants they use. The *Lithuanians* have a particular Language of their own, which mightily abounds with corrupted *Latin* Words. In *Livonia* they have a Language peculiar to themselves, which is a Dialect of the *Lithuanian*; however, the *German* Tongue doth mostly prevail in several Cities, and the *Russian* in others. *Pater-noster* in the *Polish* Tongue runs thus: *Oycza nasz kt ry testes wiebieszcz swierzszie imie twoie : Pryzdx krol swo towie, badz woln twa jake won bie, tak y waziemi. Chleba naszego pows reduie day nam dz fzaiy. Vedpasc nam naszweihy, jackoymy odposzozamy naszym winowayzom. Inie wwonx nas nas na pokuszenie : a le nas zabw ode zlego. Amen.*

Government.] The large Body of *Poland* is subject unto, and govern'd by its own King, who is Elective, and that by the Clergy and Nobility alone, the Commons having no hand in it. The *Poles* in electing their King, ever since the Days of *Jagello* a *Lithuanian* (who united *Lithuania* to *Poland*) have commonly observ'd this Maxim, viz. not to chuse a King from among their own Nobility, but rather out of some Foreign Princely Family; thereby to preserve the better an Equality among the Nobles, and prevent Domestick Broils. However, of all Foreign Princes, they industriously avoid the House of *Austria*, lest a King from thence should find out ways to treat them in the same manner, as that House has already done the *Hungarians* and *Bohemians*. The *Polish* Government is term'd Monarchical, but (if rightly consider'd) we may reckon it rather a *Real Aristocracy*; the Nobility in their Elections having so limited the

the King's Power, that without the Consent of the States General he may neither make War nor Peace, nor do any thing of Importance that concerns the Publick. Considering the true Nature and Constitution of this Government, we may easily imagine that 'tis frequently liable to Inter-Reigns, whether by *Death*, *Deposition* or *Resignation*; as also intestine Broils and Commotions (witness the late Election) when the Parties electing jar in their Choice. During an Inter-Reign, or when the King is absent from his Kingdom (as sometimes in the Field against the *Turks*) the Archbishop of *Gnesna* doth ordinarily officiate as King; but, if no Archbishop of *Gnesna*, then the Bishop of *Ploczke* exerciseth that Power; and, in case that See be also vacant, then the Bishop of *Pozna* undertakes the same. The whole State is commonly consider'd as divided into two principal Parts, *viz.* the Kingdom of Poland, and Grand Dutchy of Lithuania. The great Wheels of Government in both of these are the Senate and General Dyet. The Senate is compos'd of Archbishops, Bishops, Palatines, Principal Castellans, and chief Officers of the Kingdom. The General Dyet consists of the same Members, together with Delegates from each Province and City, both of the Kingdom and Dutchy; which Dyet is either *Ordinary*, as when summoned (according to Law) once every two Years; or *Extraordinary*, as when call'd by the King upon some emergent Occasion. The calling of this Dyet is always perform'd by the Chancellor's Letters, term'd *Litera Instructionis* to the Palatins, acquainting them with what the King designs to propose to them, and the time he would have them come to Court. Having receiv'd the King's Proposal, each of them hath full Liberty to examine the same in its own Nature and Consequences, and to return their Thoughts about it with all the Freedom they can desire. The King's Letters are likewise sent to the Gentry of each Palatinate, to chuse a Nuncio to be their Representative in the Dyet; in which Election the Candidate must be unanimously pitch'd upon; for, if the Suffrage of only one private Gentleman be wanting, the Election is void, and the Province is depriv'd of its Vote in the approaching Dyet. The Elections being over, and the various Senators and Nuncios come to Court, the King attir'd in his Royal Robes, and attended by the Chancellor, renews the Proposal in their Publick Assembly. The Proposal having been duly weigh'd by each of them aforehand, they come to a speedy Resolution in the Matter, either *Pro* or *Con*. As the aforesaid Election of the various Nuncios requires an unanimous Assent in all Persons electing, or else the Election is void; even so the thing propos'd by the King, in the General Dyet, must be assented unto by all, otherwise the Proposal was made in vain; for, if they differ, (which frequently happens) then the Dyet breaks up without doing any thing, and each Member returns to his own

Home. Subordinate to the Senate and Dyet are a great many Courts of Judicature, whether Ecclesiastical, Civil or Military, for determining all Causes in the various parts of the Kingdom, which Courts are much the same with the like subordinate Judicatories in other civiliz'd Countries of *Europe*, particularly those here in *England*.

Arms.] The *Arms* of the Crown of *Poland* are Quarterly. In the first and fourth *Gules*, and Eagle *Argent*, crown'd and arm'd, Or, for *Poland*. In the second and third *Gules*, a Cavalier arm'd Cap-a-pee *Argent*, in the Dexter, a naked Sword of the same; in the Sinister, a Shield *Azure*, charg'd with a double bear'd Cross, Or, mounted on a Courser of the second, barbed of the third, and neil'd of the fourth, for *Lithuania*. For the Crest, a Crown, heighten'd with eight Flurets, and clos'd with four Demi-circles, ending in a Monde, Or, which is Crest of *Poland*. For the Motto are these Words, *Habent sua fidera Reges*.

Religion.] The Inhabitants of this Country are (for the most part) Professors of the Doctrine of the Church of *Rome*; yet, all Religions being tolerated, here are many of the Greek Church, as also *Armenians*, *Lutherans*, *Socinians*, *Calvinists*, *Jews*, *Quakers*, &c. Those of the Church of *Rome* are dispers'd over all parts of the Kingdom, but most numerous in the Province of *Cujavia* and *Warsavia*; the *Lutherans* are mostly to be found in *Prussia*; the *Armenians* in *Russia*, and all the rest appear in great Numbers thro' the various parts of *Lithuania*. Besides, in *Samogitia* is a sort of People, who differ little or nothing from meer Heathens. The Reformation of Religion began in this Country, *Anno* 1535, but did not meet with due Encouragement. The Christian Faith was planted in the various parts of *Poland* at several times, and by several Persons; it being establish'd in *Poland*, properly so called, *Anno* 963. in the time of their Prince *Miecislus*, Son of *Memomislus*. In *Livonia*, *Anno* 1200. by the preaching of one *Meinardus*. In *Lithuania*, not until the Year 1386. at the Admission of *Jagello* to the Crown of *Poland*, and then done (as some affirm) by *Thomas Waldensis*, an *Englishman*. In *Samogitia* and *Volhinnia*, at the same time with *Livonia*. In the rest, at other times, and upon other occasions.

| | New Caftile | Madrid | | |
| | Leon -- | Idem S. of Afturia. | | |

Of all thefe in Order.

§. 1. Bifcay, a Lordfhip.

Contains { Ipuſco -- } E. { Tholoſe -- } E. to W.
 { Biſcay properly ſo call'd } { Bilboa -- }
 { Alava -- } W. { Vittoria Southward.

§. 2. Afturia,

§. 2. *Asturia*. a Principality.

Contains { *Asturia de Oviedo*--- } Chief { *Oviedo*, Westward.
 { *Asturia de Santillana* } Town { *Santillana*, Eastward.

§. 3. *Gallicia*, a Kingdom.

Contains the { Archbishoppr. of *Compostella* } Chief Town { *Idem* } S. W. to
 { Bishopr. of { *Mondonedo* --- } *Idem* } N. E.
 { { *Lugo* --- } *Idem* } N. E. to S.
 { { *Orense* --- } *Idem* } W. upon
 { Territory of *Tuy* --- } *Idem* } the *Minh.*

§. 4. *Portugal*, a Kingdom.

Contains { The Provin. of { *Entre Minho Douro*--- } Chief Town { *Braga* } W.
 { { *Tralos Montes* --- } *Miranda* } to E
 { { *Beria* --- } *Coimbra*---
 { { *Estremadura* --- } *Lisbone*--- } N.
 { { *Entre Tago Guadiano* } *Evora*--- } to S.
 { The Kingdom of *Algarve* --- } *Tavira*--- }

§. 5. *Andalusia*, a Province.

Contains the { Bishoprick of { *Faen*--- } Chief Town { *Idem* } E. to S. W. upon the
 { { *Cordova* } *Idem* } *Guadalquivir*, or
 { Archbishoppr. of *Seville* } *Idem* } nigh to it.
 { Bishoprick of *Granada*--- } *Idem* }
 { D. of *Medina Sidonia*--- } *Idem*, Southward.

§. 6. *Granada*, a Kingdom.

Cont. the { Bishoprick of { *Almeria*--- } Chief Town { *Idem*, Southward upon the
 { { *Guadix*--- } *Idem* } Sea-Coast,
 { Archbishoppr. of *Granada* } *Idem* } E. to S. W.
 { Bishoprick of *Malaga*--- } *Idem* }

§. 7. *Murcia*,

§. 7. Murcia, a Kingdom.

Cont. { Murcia, properly so call'd } F. { Murcia } E. to W. (Coast.
 Territory { Loria- — } Idem } Idem, Southward upon the Sea-
 of { Carthagena } Ch.

§. 8. Valencia, a Kingdom.

Contains the { Millares } Chief Town { Villa Hermosa } N. to S.
 Provinces { Xucar- — } { Valencia — }
 of { Segura- — } { Origuella — }

§. 9. Catalonia, a Principality.

Cont. the Territ. of { Puigcerda — } Chief Town { Idem }
 { Le sen d'Urgel- — } { Idem } N. E. to S. W. upon
 { Balaguer — } { Idem } the Ebro.
 { Lerida — } { Idem }
 { Tortosa — } { Idem }
 { Girona — } { Idem }
 { Barcelona — } { Idem } E. to W. nigh unto, or
 { Villa Franca de Panades- } { Idem } upon the Sea-Coast.
 { Terragona- — } { Idem }

To these add the Country of Roussillon (Chief Town Perpignan)
 S. of Narbonne in Lower Languedoc.

§. 10. Arragon, a Kingdom.

Contains the { Bishoprick of { Jaca — } Chief Town { Idem — } N. W. to S. E.
 { Huesca — } { Idem — }
 { Balbastro — } { Idem — }
 { Archbishoprick of Sara- } { Idem, upon the Ebro. }
 { gossa, or Caragoca — }
 { Bishoprick of { Tarazona — } { Idem — } N. to S.
 { Alborazin- — } { Idem — }
 { Tervel- — } { Idem — }

§. 11. Navarre, a Kingdom.

| | | | | | | |

| | | | | | |
| | | | | | |
| | | | { C. T. in S. are | { <i>Salamanca</i> <i>Alva</i> --- <i>Ciudad Rodriga</i> . S. W. (of <i>Salamanca</i>). | { N. to S. E. |

THIS large Continent being now subject to two distinct Sovereigns, viz. His Catholick Majesty, and the King of *Portugal*, I shall separately consider these two Sovereignties. Therefore,

S P A I N.

Name.] **S**PAIN [formerly *Iberia*, *Hesperia*, by some *Spania*; and now bounded on the *East* by part of the *Mediterranean* Sea; on the *West* by *Portugal* and part of the vast *Atlantick* Ocean; on the *North* by the Bay of *Biscay*; and the *South* by the Streights of *Gibraltar*] is term'd by the *Italians*, *Spagna*; by its Natives *Espana*, by the *French*, *Espagne*; by the *Germans*, *Spanien*; and by the *English*, *Spain*; so called (as some say) from a certain King nam'd *Hispanus*; others from *σπανία*. (*raritas vel penuria*) because of its Scarcity of Inhabitants. But the most received Opinion is, That it came from *Hispalis* (now *Seville*) the chief City of the whole Country in former Times.

Air.] The *Air* of this Country is generally very pure and calm, being seldom infested with Mists and Vapours; but in the Summer so extremely hot, especially in the Southmost Provinces, that 'tis both dangerous and inconvenient for the Inhabitants to stir abroad about Noon, from the middle of *May* to the last of *August*. The opposite place of the Globe to *Spain* is that part of *Zelandia nova* (or some of the ill known Continent) lying between 172 and 183 Degrees of Longitude, with 35.30 and 44 Degrees of South Latitude.

Doll.]

Soil.] The *Soil* of this Country (lying in the 6th and 7th North Climate) is in many Places very *Dry* and *Barren*, several of the *Inland Provinces* being either overgrown with *Woods*, or cumbred with sandy and rocky *Mountains*, and others (whose *Soil* is naturally fertile) are for the most part wholly neglected, lying waste and uncultivated for many Years, and that by reason of the Fewness (or rather) the detestable Laziness of its Inhabitants. But this Defect of Corn, and other Grain (which ariseth partly from the *Nature* of the *Country*, but more from the *Temper* of the *People*) is sufficiently supplied by various sorts of excellent *Fruits* and *Wines*, which with little Art and Labour are here produc'd in great Plenty. The longest Day in the Northmost part of this *Country* is about 15 Hours $\frac{1}{4}$; the shortest in the South is 9 Hours $\frac{1}{4}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are *Wines*, *Oil*, *Sugar*, *Metals*, *Rice*, *Silk*, *Liquorish*, *Honey*, *Flax*, *Saffron*, *Aniseed*, *Raisins*, *Almonds*, *Oranges*, *Lemons*, *Cork*, *Soap*, *Anchovies*, *Sumach*, *Wool*, *Lambs Skins*, *Tobacco*, &c.

Barities.] Nigh to the City of *Cadiz*, is an old ruinous Building (now converted into a Watch-Tower, which some would fain persuade themselves to be the Remains of *Hercules's Pillars*, so much talk'd of by the Ancients. (2.) In the City *Granada* is the large sumptuous Palace of the *Moorish Kings*, whose inside is beautified with *Jasper* and *Porphyry*, and adorn'd with divers *Arabick* and *Mosack* Inscriptions. (3.) At *Terragona* in *Catalonia*, are to be seen the Ruins of an ancient *Circus*, in the Street call'd *la Placa de la Fuente*; and, at *Segovia* in *Old Castile*, are the Remains of a noble *Aqueduct*, built by the Emperor *Trajan*, and supported by 177 Arches in double Rows, reaching from one Hill to another. (4.) Without the Walls of *Toledo* was an ancient large Theatre, some part whereof is yet standing. Here also is an admirable Modern *Aqueduct*, contriv'd by *Jannetus Turrianus* (a Frenchman) according to the Order of *Philip II*. (5.) At *Orense* in *Gallicia* are several Springs of Medicinal hot Waters, wonderfully esteem'd of by the ablest Physicians. (6.) At the City of *Toledo* is a Fountain, whose Waters near the Bottom are of an Acid Taste, but towards the Surface extremely Sweet. (7.) Near *Guadalaxara* in *New Castile*, is a Lake which never fails to send forth dreadful Howlings before a Storm. (8.) The Cathedral Church of *Murcia* (containing above 400 Chappels) is remarkable for its curious Steeple, which is so built, that a chariot may easily ascend to the Top thereof. (9.) Many talk of a Ship of Stone, with Masts, Sails and Tackling, to be seen in the Port of *Mongia* in *Gallicia*. As to the River *Guadiana*, its

its diving under Ground, (from whence 'twas formerly call'd *Anas*) the same is so notorious, that we need say nothing of it.

Archbishopsricks.] *Archbishopsricks* in this Kingdom are those of

| | | | |
|---------------------|------------------|-------------------|----------------|
| <i>Compostella,</i> | <i>Granada,</i> | <i>Tarragona,</i> | <i>Burgos,</i> |
| <i>Seville,</i> | <i>Valencia,</i> | <i>Saragossa,</i> | <i>Toledo.</i> |

Bishopsricks.] *Bishopsricks* in this Kingdom are those of

| | | | |
|-------------------|--------------------|--------------------|---------------------|
| <i>Oviedo,</i> | <i>Malaga,</i> | <i>Jacca,</i> | <i>Segovia,</i> |
| <i>Lugo,</i> | <i>Carthagera,</i> | <i>Balatro,</i> | <i>Cuenca,</i> |
| <i>Mondonedo,</i> | <i>Segorve,</i> | <i>Tercere,</i> | <i>Ciudad Real,</i> |
| <i>Corunna,</i> | <i>Origuella,</i> | <i>Albarazin</i> | <i>Siguenza,</i> |
| <i>Tuy,</i> | <i>Barcelona,</i> | <i>Pampelona,</i> | <i>Leon,</i> |
| <i>Orense,</i> | <i>Tortosa,</i> | <i>Valladolid,</i> | <i>Salamanca,</i> |
| <i>Cordova,</i> | <i>Lerida,</i> | <i>Calahorra,</i> | <i>Toro,</i> |
| <i>Cadiz,</i> | <i>Solsona,</i> | <i>Placentia,</i> | <i>Astorga,</i> |
| <i>Jaen,</i> | <i>Vich,</i> | <i>Coria,</i> | <i>Palencia,</i> |
| <i>Guadix,</i> | <i>Tarazona,</i> | <i>Avila,</i> | <i>Zamora.</i> |
| <i>Almeria,</i> | <i>Huesca,</i> | | |

Universities.] *Universities* in this Kingdom are those of

| | | | |
|---------------------|----------------------|-------------------|-------------------|
| <i>Sevil,</i> | <i>Alcala de He-</i> | <i>Huesca,</i> | <i>Guadix,</i> |
| <i>Granada,</i> | <i>nares</i> | <i>Saragossa,</i> | <i>Barcelona,</i> |
| <i>Compostella,</i> | <i>Siguenza,</i> | <i>Tudela,</i> | <i>Murcia,</i> |
| <i>Toledo,</i> | <i>Valencia,</i> | <i>Ossuna,</i> | <i>Tarragona,</i> |
| <i>Valladolid,</i> | <i>Lerida,</i> | <i>Ona,</i> | <i>Baeza.</i> |
| <i>Salamanca,</i> | | | |

Manners.] The truest Character of the *Spaniards*, I any where find, is that of Dr. Heylyn's, which in the main runs thus: The *Spaniards* (says he) are a sort of People of a Swarthy Complexion. Black Hair, and of good Proportion; of a Majestick Gate and Deportment, grave and serious in their Carriages, in Offices of Piety very Devout, not to say Superstitious; Obedient and Faithful to their King, patient in Adversity, very temperate in Eating and Drinking; not prone to alter their Resolutions nor Apparel; in War too deliberate; Arts they esteem dishonourable, universally given to Laziness, much addicted to Women, unreasonably Jealous of their Wives, and by Nature extremely Proud.

Language.] Of all the living Tongues deriv'd from the *Latin*, the *Spanish* comes nearest to the Original, tho' no Country has been more harra's'd by the Irruption of barbarous Nations than it has. Yet they have borrow'd several Words from the *Goths* and *Moors*, especially the latter. The best *Spanish* is generally esteem'd that spoken in *New Castile*; and in *Valencia* and *Catalonia* 'tis most corrupted. Their *Pater-noster* runs thus; *Padre nuestro. que estas en los Cielos, Sanctificade sea tu Nombre; Vengata nos tu Regno; hagase tu Voluntad, assien la tierra, como en le Cielo. El pan nuestro de cadadia da nes looy; y perdona nos nuestras deudas, assi como nos otros perdonamos a' neustros deudores, y no nos dexes caer ententation; mas libra nos del mal. Amen.*

Government.] This great Body did formerly comprehend no less than fourteen different Kingdoms, which being at length reduc'd to three, viz. Those of *Arragon*, *Castile*, and *Portugal*, the two former were united, Anno 1474. by the Marriage of Ferdinand of *Arragon* with *Isabel*, Heirefs of *Castile*; and *Portugal* afterwards added by Conquest, Anno 1578. But It revolting (of which afterwards) the whole Continent of *Spain*, excluding *Portugal*, is at present subject-ed to one Sovereign, term'd his *Catholick Majesty*, whose Government is Monarchical and Crown Hereditary. The *Dominions* of which Prince are so far extended, that the Sun never sets upon them all; and, as his Territories are very numerous, so also are the Titles which he commonly assumeth, being stil'd King of *Castile*, *Leon*, *Arragon*, *Sicily*, *Naples*, *Jerusalem*, *Portugal*, *Navarre*, *Granada*, *Toledo*, *Valencia*, *Gallicia*, *Majorca*, *Seville*, *Sardinia*, *Cordova*, *Corfica*, *Murcia*, *Faen*, *Algarve*, *Algezire*, *Gibraltar*; the *Canaries*, *East & West Indies*; Archduke of *Austria*; Duke of *Burgundy*, *Brabant* and *Milan*; Count of *Flanders*, *Tirol* and *Barcelona*; Lord of *Biscay* and *Mechlin*, &c. The numerous Cities and Provinces of *Spain* are rul'd by particular Governours appointed by his *Catholick Majesty*, as also the Dutchy of *Milan*, the Kingdom of *Naples*, *Sicily*, *Sardinia*, &c. and the various Parts of his vast Possessions in the *East* and *West Indies* are govern'd by their respective *Vice-Roys*, who are generally very severe in exacting of the Subject what possibly they can during their short Regency, which is commonly limited to three Years; the King appointing others in their room, that he may gratifie as many of his *Grandees* as may be with all Conveniency, there being still a great Number of them at Court, as Candidates for a Government. For the better Management of publick Affairs in all the *Spanish Dominions*, there are establish'd in this Kingdom no less than fifteen different Councils, viz. that called the Council of State. (2.) The Council Royal, or that of *Castile*. (3.) That of War. (4.) The Council of *Arragon*. (5.) That of Italy. (6.) The Council of the *Indies*. (7.) That of the Orders. (8.) The Council of the Treasury. (9.) That

(9.) *That of the Chamber.* (10.) *The Council of the Croisade.* (11.) *That of Discharges.* (12.) *The Council of Inquisition.* (13.) *That of Navarre.* (14.) *The Council of Conscience.* And lastly, *that call'd The Council of Policy.*

Arms.] The King of *Spain* bears Quarterly; the First Quarter counter quarter'd; in the First and Fourth *Gules*, a Castle tripple tower'd, *Azure*, each with three Battlements, *Or*, pursled *Sable*, for *Castile*. In the second and third *Argent*, a Lion passant *Gules* Crown'd, Langued, and Arm'd, *Or*, for *Leon*. In the second greater Quarter *Or*, Four Pallets, *Gules*, for *Arragon*. Party, *Or*, four Pallets also *Gules*, betwixt two Flanches *Argent*, charg'd with as many Eagles *Sable*, member'd, beak'd, and crown'd *Azure*, for *Sicily*. These two great Quarters grafted in Base *Argent*, a Pomegranate *Verte*, stalk'd and leav'd of the same, open'd and seeded *Gules*, for *Granada*. Over all *Argent*, Five Escutcheons *Azure*, plac'd cross-wise, each charg'd with as many Bæants in Saltier, of the first of *Portugal*. The Shield bordered, *Gules*, with Seven Towers, *Or*, for *Algrave*. In the third Quarter, *Gules*, a Fesse *Argent*, for *Austria*, Coupie and supported by Ancient *Burgundy*, which is Bendy of Six Pieces, *Or*, and *Azure*, border'd *Gules*. In the Fourth great Quarter *Azure*, Seme of Flower-de-Luces, *Or*, with a border *Compony Argent and Gules*, for Modern *Burgundy*; coupie, *Or*, supported *Sable*, a Lion, *Or*, for *Brabant*. These two great Quarters charg'd with an Escutcheon, *Or*, a Lion *Sable* and langued *Gules*, for *Flanders*. Partly, *Or*, an Eagle *Sable*, for *Antwerp*, the Capital City of the Marquisate of the Holy Empire. For Crest, a Crown, *Or*, rais'd with Eight Diadems or Semi-circles terminating in a *Mond*, *Or*. The Collar of the Order of the Golden Fleece encompasses the Shield, on the sides of which stand the two Pillars of *Hercules*, on each side with this Motto, *Plus ultra*.

Religion.] The *Spaniards* are very punctual Followers of, and close Adherers to the *Church of Rome*, and that in her grossest Errors and Corruptions, taking up their Religion on the Pope's Authority; and are therein so tenacious, that the King suffers none to live in his Dominions, who profess not their Belief of the Doctrine of the *Roman Church*. For whose Care (or rather Bigotry) in this Matter, the Pope hath conferr'd upon him the Title of his *Catholick Majesty*. All other Professions are expell'd by that *Antichristian Tyranny* of the bloody *Inquisition*, at first advis'd and set up by *Pedro Gonsales de Mendoza*, Archbishop of *Toledo*, and that against such converted *Jews* and *Moors* as return'd again to their *Superstition*; but of late it hath been chiefly return'd upon those (and others) of the *Protestant Communion*. So industrious are the Ecclesiasticks in this Country to keep up the whole Body of the People in the thickest Mist of Ignorance,

M

and

and so little is this Nation inclin'd of themselves to make any Enquiries after Knowledge; that considering these Things upon one Hand, and the Terror of the Inquisition on the other in case of such Enquiries, (especially if they have the least tendency to Innovation in Points of Faith) we cannot reasonably expect a Reformation of Religion in this Country, unless the Hand of Providence shall interpose in a wonderful manner. Christianity was planted here (according to the old *Spanish* Tradition) by St. *James* the Apostle, within Four Years after the Crucifixion of our Blessed Redeemer.

P O R T U G A L.

Name.] Portugal [containing a great part of old *Lusitania*, with some of ancient *Gallicia* and *Bætica*; and now bounded on the East by *Spain*, on the North by *Gallicia*; on the West and South by part of the vast *Atlantick* Ocean] is term'd by the *Italians*, *Porto-Gallo*; by the *Spaniards*, *French*, *Germans*, and *English*, *Portugal*; so called by some from *Porto* and *Gale*, (the first a Haven-Town, and the other a small Village at the Mouth of the *Douro*) but by others from *Portus Gallorum*, that Haven (now *O Porto*) being the Place where the *Gauls* usually landed, when most of the Sea-port Towns in *Spain* were in the Hands of the *Moors*.

Air.] The Air of this Country is much more temperate, especially in the Maritime Places, than in those Provinces of *Spain*, which lie under the same Parallel, it being frequently qualified by Westerly Winds, and cool Breezes from the Sea. The opposite Place of the Globe to *Portugal*, is that part of the vast *Pacifick* Ocean, between 172 and 174 Degrees of Longitude, with 36 and 42 Degrees of South Latitude.

Soil.] The Soil of this Country (it lying in the 5th and 6th North Climate) is none of the best for Grain, it being very Dry and Mountainous, but yet very plentiful of *Grapes*, *Oranges*, *Citrons*, *Almonds*, *Pomegranates*, *Olives*, and such like. The longest Day in the Northmost Parts of this Kingdom is about 15 Hours, the shortest in the Southmost is about 9 Hours $\frac{1}{2}$, and the Nights proportionably.

Commodities.] The chief Commodities of this Country, are *Wine*, *Honey*, *Oil*, *Allom*, *White Marble*, *Salt*, as also Variety of Fruits, as *Oranges*, *Almonds*, *Citrons*, *Pomegranates*, &c.

Rarities.] In a Lake on the Top of the Hill *Stella* in *Portugal*, are found Pieces of Ships, though it be distant from the Sea more than Twelve Leagues. Near to *Roja*, is a Lake observable for its hideous rumbling Noise, which is ordinarily heard before a Storm, and that at the Distance of five or six Leagues. About eight Leagues from *Coimbra* is a remarkable Fountain, which swallows up, or draws in whatsoever thing only toucheth the Surface of its Waters; an Experiment of which is frequently made with the Trunks of Trees. The Town of *Bethlem* (nigh to *Lisbon*) is noted for the sumptuous Tombs of the Kings of *Portugal*.

Archbishopricks.] *Archbishopsricks* in this Kingdom are those of

Lisbon,

Braga,

Evora.

Bishopricks.] *Bishopsricks* in this Kingdom are those of

Miranda,

Coimbra,

Elvas,

Leira,

Lamego,

Portalegre,

O Porto,

Viseu,

Faro.

Universities.] *Universities* in this Kingdom are those of

Lisbon,

Evora,

Coimbra.

Manners.] The *Portuguese* (formerly much noted for their Skill in Navigation, and vast Discoveries which the World owes to them) are wonderfully degenerated from their Fore-fathers, being now a People whom some are pleas'd to characterize thus: That take one of their own Neighbours (a Native *Spaniard*) and strip him of all his good Qualities (which may be quickly done) that Person then remaining will make a compleat *Portuguese*. They are generally esteem'd a People very Treacherous to one another, but more especially to Strangers; extraordinary cunning in their Dealings, mightily addicted to Covetousness and Usury; barbarously cruel where they have the upper Hand; and the meaner sort are universally given to Thieving. Besides all these, some will also have this People to be very *Malicious*, which they say is the Remnant of the *Jewish* Blood intermixt with that of the *Portuguese* Nation.

Language.] The *Language* us'd in this Kingdom is a Compound of *French* and *Spanish*, especially the latter. The Difference between it and the true *Spanish*, will best appear by the *Pater Noster* in that Tongue, which runs thus: *Padre nosso que estas nos Cees, Santificado*

*Seia o teu nome: Venha a nos o teu reyno: Seia feita a tua vontade, assi nos
 eos, como na terra. O paonosso de cadatia dano lo oie n'estodia. E perdoa
 nos senhor as nossas dividas, assi como nos perdoamos a os nossos devedores.
 E nao nos dexes cabir em tentatio, mas libra nos do mal. Amen.*

Government.] This Kingdom, after many Revolutions of Fortune, was unjustly seiz'd upon by *Philip II.* of *Spain*, and detain'd by him and his two Successors from the Dukes of *Braganza*, the lawful Heir, till the Year 1640. that the *Portuguese*, being unable to bear up any longer under the Tyrannical Sovereignty of the *Spaniards*, threw off that intolerable Yoke, and set the Crown upon the Head of *John VI.* Duke of *Braganza*, (afterwards *John IV.* surnam'd the *Fortunate*) notwithstanding all that *Philip* could do to the contrary. Which Enterprize of theirs was happily brought about by the Assistance of some *French* Forces sent into this Country: And 'tis very remarkable how close this their Design of Revolting was carry'd on, though known to above 300 Persons at once, and in Agitation for the space of a whole Year. Ever since which Revolt of *Portugal*, it hath continued an Independant Kingdom, subject unto, and govern'd by its own King (being of the Family of *Braganza*) whole Government is truly Monarchical, and Crown Hereditary.

Arms.] He bears *Argent*, five Escutcheons *Azure*, plac'd cross-wise, each charg'd with as many Besants of the first, plac'd in *Saltier*, and pointed *Sable*, for *Portugal*. The Shield border'd *Gules*, charg'd with seven Towers *Or*, three in Chief, and two in each Flanch; the Crest is a Crown *Or*. Under the two Flanches, and the Base of the Shield, appear at the ends of two Crosses, the first Flower-de-luc'd *Verte*, which is for the Order of *Avis*; and the second *Pattee Gules*, which is for the Order of *Christ*. The *Motto* is very changeable, each King assuming a new one, but frequently these Words, *Pro Rege & Grege*.

Religion.] What was said of *Religion* in *Spain*, the same almost may be affirm'd of that in this Kingdom; the Tenets of the Church of *Rome* being here universally embrac'd by the *Portuguese*, only with this Difference, that they tolerate *Jews*, and allow several Strangers the publick Exercise of their Religion, particularly the *English* Factory at *Lisbon*. This Country receiv'd the Blessed Gospel much about the same time with *Spain*.

Name.] ITALY [known of old by the Names of *Hesperia*, *Sarturnia*, *Latium*, *Aufonia*, *Oenotria* and *Fanacula*; and now bounded on all sides by the *Mediterranean Sea*, except the North-West, where it joins to part of *France* and *Germany*] is term'd by its Natives and *Spaniards*, *Italia*; by the *French*, *Italie*; by the *Germans*, *Italien*; and by the *English*, *Italy*; so call'd (as most Authors conjecture) from *Italus* an ancient King of the *Siculi*, who leaving their Island, came into this Country, and possessing themselves of the middle part thereof, call'd the whole *Italia*, from the Name of their Prince.

Air.] The Air of this Country is generally Pure, Temperate and Healthful to breathe in, except the *Land of the Church*, where 'tis ordinarily reckon'd more gross and unwholsome, as also the Southern Parts of *Naples*, where, for several Months in the Summer, 'tis scorching hot, being of the like Quality with the Air of those Provinces in *Spain*, which lie under the same Parallels of Latitude. The opposite Place of the Globe to *Italy*, is that part of the vast *Pacifick Ocean*, lying between 187 and 199 Degrees of Longitude, with 39 and 46 Degrees 30 Min. of South Latitude.

Soil.] The Soil of this Country (it lying in the 6th and 7th North Climate) is very fertile, generally yielding in great abundance the choicest of Corn, Wines, and Fruit. Its Woods are (for the most part) continually green, and well stor'd with the best of wild and tame Beasts. Its Mountains do afford several kinds of Metal, particularly those in *Tuscany* and *Naples*, which are said to yield some rich Mines of Silver and Gold. Here's also a great Quantity of true Alabaster, and the purest of Marble. In short, this Country is generally esteem'd the Garden of *Europe*; and so stately and magnificent are its numerous Cities, that I cannot omit the following Epithets commonly bestow'd on divers of them; as *Rome*, the Sacred; *Naples*, the Noble; *Florence*, the Fair; *Venice*, the Rich; *Genoa*, the Stately; *Milan*, the Great; *Ravenna*, the Ancient; *Padua*, the Learned; *Bononia*, the Fat; *Leghorn*, the Merchandizing; *Verona*, the Charming; *Luca*, the Jolly; and *Casal*, the Strong.

Commodities.] The chief Commodities of this Country are Wines, Corn, Rice, Silks, Velvets, Taffaties, Sattins, Grograms, Fustians, Gold-wire, Allom, Armour, Glasses, and such like.

Rarities.] To reckon up all those things in *Italy*, that truly deserve the Epithet of Rare and Curious, would far surpass our design'd Brevity; I shall therefore confine my self to one sort of Rarities, namely, The most noted Remains or Monuments of Reverend Antiquity, which

which in Effect are most worthy of our regard, they being very useful in giving some Light to several Parts of the *Roman* History. In viewing of which Antiquities, I shall reduce them all to three Classes; viz. Those that are to be seen in the City of *Rome* it self. 2dly, In the Kingdom of *Naples*. And lastly, In all other Parts of *Italy* besides.

The most remarkable Monuments of Antiquity in *Rome* it self, are these following. (1.) *Amphitheatres*, particularly that, call'd the *Old Amphitheatre* (now term'd the *Coliseo*, because of a *Colossean* Statue that stood therein) begun by *Vespasian*, and finish'd by *Domitian*. (2.) *Triumphal Arches*, as that of *Constantine* the Great, (nigh to the *Old Amphitheatre*) erected to him in the Memory of his Victory obtain'd over the Tyrant *Maxentius*, with this Inscription, *Liberatori Ur̄is, Fundatori Pacis*. That of *T. Vespasian* (the ancientest of all the *Triumphal Arches* in *Rome*) erected to him upon his taking the City, and spoiling the Temple of *Jerusalem*. That of *Septimius Severus*, to be seen nigh the Church of *St. Martinus*. Add to these, the *Triumphal Bridge*, whose Ruins are still visible nigh *Pont Angelo*, so much reputed of old, that by a Decree of the Senate, none of the meaner sort of People were suffer'd to tread upon the same. (3.) *Therma* or *Baths*; as those of the Emperor *Antoninus Pius*, which were of a prodigious Bigness, according to that of *Ammianus Marcellinus*, who (speaking of 'em) says, *Lavacra in modum Provinciarum exstructa*. Those of *Alexander Severus*, the goodly Ruins whereof are to be seen nigh the Church of *St. Eustachio*: And lastly, the Ruins of *Therma Constantiniana*, still visible in *Monte Cavallo*, formerly *Mons Queralius*. (4.) Several remarkable *Pillars*, particularly, that call'd *Colonna d' Antonino*, erected by *M. Aurelius Antoninus*, the Emperor, in Honour of his Father, *Antoninus Pius*, and still to be seen in the *Corso*, being as yet 175 Foot high. That call'd *Colonna Trajana*, set up in Honour of *Trajan*, and now to be found in *Monte Cavallo*. That call'd *Colonna Rostrata* (still extant in the Capitol) erected in Honour of *Julius*, and deckt with Stems of Ships, upon his Victory over the *Carthaginians*, the same being the first Naval Victory obtain'd by the *Romans*. To these we may add the two great *Obelisks* (one before *Porto del Popolo*, and the other before the Church of *St. John de Lateran*) formerly belonging to, and now the chief Remainers of the famous *Circus Maximus*, which was begun by *Tarquinius Priscus*, augmented by *J. Caesar* and *Augustus*, and at last adorned with Pillars and Statues by *Trajan* and *Heliogabalus*. We may also add those *Three Pillars* of admirable Structure (now to be seen in *Campo Vaccino*) which formerly belong'd to the Temple of *Jupiter Stator*, built by *Romulus*, upon his Victory over the *Sabines*; together with six others on the side of the Hill mounting up to the Capitol, three of which belong'd once to the Temple of *Concord*, built by *Camillus*: And the other

other three to the Temple of *Jupiter Tonans*, built by *Augustus* upon a narrow escape from a Thunderbolt. And finally, In the rank of Pillars we may place the famous *Milliarium* (still reserv'd in the Capitol) which is a little Pillar of Stone with a round brazen Ball on its Top, erected, at first, by *Augustus Caesar* in *Foro Romano*, from whence the *Romans* reckon'd their Miles to all parts of *Italy*. Other noted Pieces of Antiquity in *Rome*. and not reducible to any of the former Classes, are chiefly these; (1.) The stately Ruins of *Palazzo Maggiore*, or the great Palace of the *Roman Emperors*, once extended over the greatest Part of the *Palatine Hill*. (2.) The Ruins of *Templum Pacis* (which are nigh the Church of *St. Francesca Romana* in *Campo Vaccino*) built by *Titus Vespasian*, who adorn'd the same with some of the Spoils of the Temple of *Jerusalem*. (2.) The *Rotunda*, or *Pantheon*, built by *Agrippa*, and dedicated to all Gods, many of whose Statues are still extant in the Palace of *Justiniani*, reserved there as a *Palladium* of that Family. (4.) The *Mausoleum Augusti*, near *St. Rock's Church*, but now extremely decay'd. And, Lastly, The very Plate of *Brass* on which the Laws of the Ten Tables were written, is still to be seen in the Capitol.

Remarkable Monuments of Antiquity in the Kingdom of *Naples*, are these following; (1.) The Grotte of *Pausilipus*; being a large Cart-way about a Mile long, cut under Ground, quite through a Mountain, near the City of *Naples*, and made (as some imagine) by *Lucullus*; but according to others, *Cacceius Nerva*. (2.) Some Remains of a fair Amphitheatre, and *Cicero's Academy*, nigh *Puzzuolo*; as also the Arches and Ruins of that prodigious Bridge (being three Miles long) built by *Caligula* between *Puzzuolo* and *Baie*; to which Building *Suetonius*, the Historian, seems to allude, when he taxeth that Emperor with his *Substructiones insane*. (3.) The Foundation of *Baie* it self, and some Arches with the Pavement of the very Streets, all visible under Water in a clear Sun shiny-day. (4.) The *Elisian Fields*; so famous among the Poets, and extremely beholden to 'em for their Fame; being only an ordinary Plat of Ground still to be seen nigh the Place where the City of *Baie* stood. (5.) The *Biscina Mirabilis*; which is a vast subterranean Building nigh the *Elisian Fields*; design'd to keep fresh Water for the *Roman Gallies*, who us'd to harbour thereabouts. (6.) The Ruins of *Nero's Palace*, with the Tomb of *Agrippina* his Mother, nigh to the aforesaid *Piscina*; as also the Baths of *Cicero* and *Tritola*; and the *Lacus Avernus*, so noted of old for its infectious Air. (7.) The Grotte, or the famous *Sibylla Cumæa*; nigh to the Place where *Cumæa* stood; as also the sulphurous Grotte del Cane, nigh to the Grotte of *Pausilipus* above-mention'd. Lastly, The obscure Tomb of that well-known Poet, *P. Virgilus Maro*, in the Gardens of *S. Severino*, nigh to the Entrance of the Grotte of *Pausilipus*. To all these we may here subjoin that
noted

noted and most remarkable Prodigy of Nature, the terrible *Volcano Vesuvius*, about 7 Miles from the City of *Naples*.

Remarkable Monuments of Antiquity in all other Parts of *Italy*, are chiefly these; (1.) The *Via Appia*, a prodigious long Causeway of five days Journey, reaching from *Rome* to *Brundisium*, and made at the sole Charges of *Appius Claudius* during his Consulate. (2.) *Via Flaminia*, another Causeway of the same length, reaching from *Rome* to *Rimini*; and made by the Consul *Flaminius*, who employ'd the Soldiers therein during the time of Peace. (3.) *Via Æmilia*, reaching from *Rimini* to *Bologna*, and pav'd by *Æmilius Lepidus*, Colleague of *Flaminius*. (4.) The old Temple and House of *Sibella Tyburtina*, to be seen at *Tivoli*, a Town about fifteen Miles from *Rome*. (5.) An ancient Triumphal Arch yet standing near *Fano*, a Town in the Dutchy of *Urbine*. (6.) The very Stone upon which *Julius Caesar* stood, when he made an Oration to his Men, perswading them to pass the *Rubicon*, and advance straight to *Rome*. The same to be seen upon a Pedestal in the Market-place of *Rimini*. (7.) A rare Amphitheatre in *Verona*, erected at first by the Consul *Flaminius*, and repair'd since by the Citizens, and now the int'rest of any in *Europe*; as also another intire at *Pola* in *Istria*, being of two Orders of *Tuscan* Pillars plac'd one above another. (8.) The Ruins of an Amphitheatre in *Padua*, part of whose Court (being of an Oval Form) doth still retain the Name of *Arena*. (9.) Many stately Tombs of famous Men; particularly that of *Antenor's* in *Padua*; *St. Peter's* in *Rome*; with that of *St. Ambrose* in *Milan*, and many others, together with vast Multitudes of Statues both of Brass and Marble in most parts of *Italy*.

These are the most remarkable Remains of the *Roman* Antiquities now extant throughout all this Country. As for *Modern Curiosities*, and other sorts of *Rarities* (which are obvious to the Eye of every ordinary Traveller) a bare Catalogue of 'em would swell up to a considerable Volume. 'Twere endless to discourse of magnificent Buildings (particularly Churches) ancient Inscriptions, rare Water-works, and many bold Pieces of Painting and Statuary, to be seen almost in every corner of *Italy*. Every one is apt to talk of the bending Tower at *Pisa*, the whispering Chamber of *Caparola*, the renown'd House of *Loretto*, with the rich Treasury of *S. Mark* in *Venice*; not to mention the famous *Vatican Palace* and Library, with the glorious and splendid Furniture of the *Roman Churches*. To these I may add the several Magazines, or large Collections of all sorts of *Rarities*, kept in several Parts of *Italy*; particularly those in *Villa Ludovisia*, belonging to Prince *Ludovisia*; as also those in the famous Gallery of *Canonico Secali* in *Milan*: But above all, are divers Rooms and Cabinets of exotick Curiosities and precious Stones, (among which is the famous Diamond that weighs 138 Carats) all belonging to the Great Duke of *Tuscany*, and much admir'd and talk'd of in all Parts of the Civiliz'd World.

Eccle-

Ecclesiasticks of the highest Order in this Country, are his Holiness the Pope, and the Patriarchs of Venice and Aquileia.

Archbishopricks.] Next to these are the Archbishopricks of

| | | | |
|-------------|-----------|--------------|---------------|
| Milan, | Fermo, | Benevento, | Franzi, |
| Turin, | Ravenna, | Thieti, | Tarento, |
| Tarentaise, | Naples, | Lanciano, | Brindisi, |
| Bologne, | Capua, | Manfredonia, | Otranto, |
| Genoa, | Salerno, | Bari, | Rossano, |
| Florence, | Amalfi, | Cirenza, | Consenza, |
| Pisa, | Sorrento, | Nazareth, or | San Severino, |
| Urbino, | Conza, | Barletta, | Reggio. |

The respective Suffragans of these Ecclesiasticks are as followeth.

Bishopricks.] § 1. Immediately subject to the Pope, are the Bishops of

| | | | |

| Mon-Pulcian, | Aversa, | Melfi, | Marsica, |
| Feramo, | Cassano, | San-Marco, | Montellone. |
| Basingano, | | | |

§ 2. Suffragans to the Patriarch of *Venice*, are only those of

Torzell,

Chiozza.

§ 3. To the Patriarch of *Aquileia*, are those of

*Trevifo,
Feltri,
Belluno,
Concorde,*

*Trieste,
Cabo d' Istria,
Pola,
Parenzo,*

*Petin,
Citta Nuova,
Padua,*

*Vicenza,
Verona,
Como.*

§ 4. To the Archbishop of *Milan*, are those of

*Cremona,
Novara,
Lodi,
Alexandria,*

*Tortona,
Vigbenano,
Bergamo,
Brescia,*

*Vercelles,
Alba,
Aët,
Casal,*

*Acqui,
Savona,
Vintemiglia.*

§ 5. To the Archbishop of *Turin*, are those of

Torée,

Mondovi,

Fossano.

§ 6. To the Archbishop of *Tarentise*, are those of

Aofto,

Sion.

§ 7. To the Archbishop of *Bologne*, are those of

*Parma,
Placenza,*

*Rheggio,
Modena,*

*Carpi,
Crema,*

*Borgo,
S. Domino.*

§ 8. To the Archbishop of *Genoa*, are those of

*Albegna,
Noli,*

*Brugnato,
Bobbio,*

*Mariana,
Accia,*

Nebio.

§ 9. To the Archbishop of *Florence*, are those of

*Pistoia,
Fiepoli,*

*Colle,
Volterra,*

*Borgo san Sepulchro,
Citta di Sole.*

§ 10. To the Archbishop of *Pisa*, are those of

Scana,

Piombino,

Mont-Alcino,

Alazzo,

Chiusi.

Chiusi,
Grossette,

Massa,
Pienza,

Livorno,
Luca,

Sagona,
Aleria.

§. 11. To the Archbishop of *Urbine*, are those of

Senigaglia,
Fossombrona,

Engubio,
Cagli,

Pesaro,
S. Leon.

§. 12. To the Archbishop of *Fermo*, are those of

San-Severino,
Tolentin,

Macerati,

Montali,
Ripa Transona.

§. 13. To the Archbishop of *Ravenna*, are those of

Rovigo,
Comachio,
Faenza,

Bitinoro,
Forli,
Cosena,

Sarsina,
Rimini,
Imola,

Cervia.
Fanestrig.

§. 14. To the Archbishop of *Naples*, are those of

Nola,

Pozzuolo,

Cerra,

Ischia.

§. 15. To the Archbishop of *Capua*, are those of

Tiano,
Calvi,
Caserta,

Caiazzo,
Carniola,
Isernia,

Sessa,
Venafro,
Aquin,

Mont-cassin,
Fondi,
Gaieta.

§. 16. To the Archbishop of *Salerno*, are those of

Campagna,
Capaccio,

Policastro,
Nusco,

Sarno,
Marsico nuovo,

Nocera di pagani,
Acerno.

§. 17. To the Archbishop of *Amalfi*, are those of

Litteri,

Capri,

Minori.

§. 18. To the Archbishop of *Conza*, are those of

Vico,

Massa,

Castel a Mare di Stabbia.

§. 19. To the Archbishop of *Sorrento*, are those of

Muro,
Cangiano,

Satriano,

Cedogna,
Bisaccia.

§. 20. To the Archbishop of *Benevento*, are those of

| | | | |
|-------------------------|----------------------|---------------------|--------------------|
| <i>Ascoli,</i> | <i>Monte Marano,</i> | <i>Bovino,</i> | <i>Tremoli,</i> |
| <i>Fiorenzuola</i> | <i>Avellino,</i> | <i>Toribolenza,</i> | <i>Lesina,</i> |
| <i>Telesì,</i> | <i>Fricenti,</i> | <i>Dragonara,</i> | <i>Guardia,</i> |
| <i>S. Agatha di Go-</i> | <i>Ariano,</i> | <i>Volturata,</i> | <i>D'Alfieres.</i> |
| <i>thi,</i> | <i>Boiano,</i> | <i>Larina,</i> | |

§. 21. To the Archbishoprick of *Thieti*, are those of

| | | |
|-----------------------|-------------------------|-----------------|
| <i>Ortona di Mare</i> | <i>Civita di Penna,</i> | <i>Sermona,</i> |
| <i>Campti,</i> | | <i>Cali,</i> |

§. 22. To the Archbishop of *Lanciano*, are none.

§. 23. To the Archbishoprick of *Manfredonia*, are those of

| | | |
|---------------|----------------|--------------------|
| <i>Troia,</i> | <i>Vieste,</i> | <i>San-Severo.</i> |
|---------------|----------------|--------------------|

§. 24. To the Archbishop of *Bari*, are those of

| | | |
|--------------------|--------------------|-------------------|
| <i>Canosa,</i> | <i>Conversano,</i> | <i>Bitteto,</i> |
| <i>Giovenazzo,</i> | <i>Polignano,</i> | <i>Labiello,</i> |
| <i>Bitonto,</i> | | <i>Monervino,</i> |
| <i>Ruvo,</i> | | <i>Molfetta.</i> |

§. 25. To the Archbishop of *Cirenza*, are those of

| | | |
|------------------|-----------------|-------------------|
| <i>Malerano,</i> | <i>Tursi,</i> | <i>Grovina,</i> |
| <i>Venosa,</i> | <i>Potenza,</i> | <i>Tricarico.</i> |

§. 26. To the Archbishop of *Nazareth*, are none.

§. 27. To the Archbishop of *Frani*, are those of

| | | |
|---------------|----------------|------------------|
| <i>Salpi,</i> | <i>Andria,</i> | <i>Biseglia.</i> |
|---------------|----------------|------------------|

§. 28. To the Archbishop of *Tarento*, are those of

| | |
|-----------------|-----------------------|
| <i>Montula,</i> | <i>Castellanetta.</i> |
|-----------------|-----------------------|

§. 29. To the Archbishop of *Brindisi*, are those of

| | |
|----------------|--------------|
| <i>Ostuni,</i> | <i>Oria.</i> |
|----------------|--------------|

§. 30. To

§. 30. To the Archbishop of *Otranto*, are those of

| | | |
|------------------|----------------|---------------------------|
| <i>Galipoli,</i> | <i>Castro,</i> | <i>Alessano</i> |
| <i>Leeche,</i> | <i>Nardo,</i> | <i>S. Maria de Leuca;</i> |
| <i>Ugento,</i> | | |

§. 31. To the Archbishop of *Rossano*, none.

§. 32. To the Archbishop of *Consenza*, are those of

| | |
|------------------|-------------------|
| <i>Montalto,</i> | <i>Mortorano.</i> |
|------------------|-------------------|

§. 33. To the Archbishop of *Sanseverino*, are those of

| | | |
|--------------------|-------------------|-----------------|
| <i>Balcastro,</i> | <i>Strongoli,</i> | <i>Cariati,</i> |
| <i>Umbriatico,</i> | <i>Isola.</i> | <i>Cerenza.</i> |

§. 34. To the Archbishop of *Reggio*, are those of

| | | | |
|------------------|-----------------|-------------------|-----------------|
| <i>Amantea,</i> | <i>Cortona,</i> | <i>Squillace,</i> | <i>Bova,</i> |
| <i>Nicastro,</i> | <i>Oppido,</i> | <i>Nicotera,</i> | <i>Taverna.</i> |
| <i>Tropea,</i> | <i>Gieraci,</i> | | |

Universities.] *Universities* in this Country are those establish'd at the Cities following,

| | | | |
|-----------------|------------------|-----------------|----------------|
| <i>Rome,</i> | <i>Florence.</i> | <i>Mantua,</i> | <i>Venice,</i> |
| <i>Bononia,</i> | <i>Pisa,</i> | <i>Pavia,</i> | <i>Padua,</i> |
| <i>Ferrara,</i> | <i>Sienna,</i> | <i>Naples,</i> | <i>Verona,</i> |
| <i>Perusia,</i> | <i>Milan,</i> | <i>Salerno,</i> | <i>Parma,</i> |

Manners.] The Natives of this Country (once the Triumphant Lords and Conquerors of the World) are now less given to the Art of War, and Military Exploits, than most other Nations of *Europe*. However the *Modern Italians* are generally reputed a *Grave, Respectful* and *Ingenious* sort of People; especially in those things to which they chiefly apply themselves now-a-days, viz. *Statuary Works, Architecture*, and the *Art of Painting*. They are also reckon'd Obedient to their Superiors, Courteous to Inferiors, Civil to Equals, and very Affable to Strangers. They're likewise in Apparel very modest; in Furniture of Houses sumptuous; and at their Tables extraordinary neat and decent. But these good Qualities of this People are mightily stain'd by many notorious Vices which reign among them, particularly those of *Revenge* and *Lust, Jealousie* and *Swearing*; to all of which they're so excessively,

cessively given, that even a modest Narrative would seem incredible. As for the *Female Sex*, a vulgar saying goes of 'em, that they're *Magpies* at the Doors, *Saints* in the Church, *Goats* in the Garden, *Devils* in the House, *Angels* in the Streets, and *Sirens* at the Windows.

Language.] The present *Language* of *Italy* is a *Dialect* of the *Latin*, which was the ancient *Language* of this Country: Almost every Province and City hath its peculiar *Idiom*, but that of *Tuscany* is reckon'd the purest and best polish'd of all others, and is that which Persons of Quality and Learning usually speak. *Pater-noster* in *Italian* runs thus: *Padre nostro, che sei ne Cielo, sia sanctificato il tuo nome: Venga il tuo Regno; sia fatta la tua volonta, si come in cielo, cosi ancora in terra. Dacci hogi il nostro pane cotidiano; e remetticci nostri debiti, si come encor ne igli remettiano ai nostri debitori. E now ci indurre in tentationi, ma liberaci dal male. Amen.*

Government.] The *Government* of *Italy* can't be duly consider'd without looking back unto the chief Divisions of that Country above-mention'd; there being so many different Sovereignties therein, independent on one another, and not subjected to one Head. The whole being therefore divided into *Upper*, *Middle* and *Lower*, according to the aforesaid Analysis.

I. The *Upper* (or *Lombardy*) being again divided into one Principality, Five Dutchies, two Republicks, and one Bishoprick. That one Principality, viz. *Piedmont*, is under the Duke of *Savoy*. The five Dutchies, viz. those of *Montferrat*, *Milan*, *Parma*, *Modena*, and *Mantua*, are under several Sovereigns: For *Montferrat* is partly under the *French King*, and partly under the Dukes of *Savoy* and *Mantua*. *Milan* is under the King of *Spain*, for which he is dependent on the Emperor. *Parma* is mostly under its own Duke, who is feudatory to the Pope, paying yearly 10000 Crowns. *Modena* is under its own Duke, who is dependent on the Emperor. And *Mantua* is mostly under its own Duke, who is feudatory to the Emperor. The two Republicks being those of *Venice* and *Genoa*, (of whom particularly afterwards) are govern'd by their Senate and Magistrates. The one Bishoprick, being that of *Trent*, is subject to the House of *Austria*.

II. The *Middle Part* being divided into the Land of the Church, the Dukedom of *Tuscany*, and the Republick of *Luca* and *St. Marino*. The Land of the Church (or *St. Peter's Patrimony*) is for the most part in the Hands of the Pope, and rul'd by several Governours set over its various Divisions, who are generally not a little severe upon the Subjects. His Holiness, the Pope, (by vertue of the Jurisdiction of the *Roman See*) is both Temporal and Spiritual Sovereign thereof, and is com-

commonly stil'd by *Roman Catholicks*, the chief *Ecclesiastick* of all *Christendom*; the *Patriarch* of *Rome*, and the *West*; the *Primate* and *Supream Governour* of *Italy*; the *Metropolitan* of those *Bishops Suffragan* to the *See of Rome*, and *Bishop* of the most famous *St. John of Lateran*. The *Dukedom* of *Tuscany* is for the most part, under its own *Duke*, except the *Towns* of *Siena*, (for which he is *Tributary* to *Spain*) and *Orbitelle*, which belongeth to the *Spaniard*. This *Duke* is esteem'd the richest and most powerful of all the *Italian Princes*; but his manner of *Government* is generally reckon'd too pressing and uneasy to the *Subject*. The *Towns* and *Republicks* of *Luca* and *St. Marino* are govern'd by their own *Magistrates* as free *States*: But of them afterwards.

III. The lower Part of *Italy*, being the *Kingdom* of *Naples*, is subject to the *Spaniards*, for which he is *Homager* to the *Pope*, and accordingly sends his *Holiness*, yearly, a white *Horse* and 7000 *Ducats* by way of *Acknowledgment*. It is govern'd by a *Vice-Roy*, appointed and sent thither by his *Catholick Majesty*, who is usually one of the chief *Grandeess* of *Spain*, and is commonly renew'd every third Year. These *Vice-Roys* (as in most other of the *Spanish Governments*) during their short *Regency*, do industriously endeavour to lose no time in filling their own *Coffers*, and that by most grievous *Exactions* on the poor *Subject*. So severe indeed are the *Spaniards* upon the *Neapolitans*, that the *King's Officers* are commonly said to suck in the *Dutchy* of *Milan*, and to Fleece the *Island* of *Sicily*, but to Flea off the very *Skin* in the *Kingdom* of *Naples*; so that the *People* of this *Country* (which is one of the best in *Europe*) are most miserably harass'd by these hungry and rapacious *Vultures*. Besides these *Princes* in *Italy* above-mention'd, there are several others, who are under the *Protection* of some higher *Power*, particularly that of the *Emperor*, the *Pope*, or the *King* of *Spain*.

To the *Government* of *Italy*, we may add the four following *Republicks*, viz. those of

Venice,

Genoa,

Luca,

S. Marino.

I. *Venice*. This *Republick* is under an *Aristocratical Government*, the *Sovereignty* of the *State* being lodg'd in the *Nobility*, or certain number of *Families* enroll'd in the *Golden Book*, call'd the *Register* of the *Venetian Nobles*. Their chief *Officer* is the *Duke*, or *Doge*, whose *Authority* is a meer *Chimera*, and he no better than a *Sovereign Shadow*, *Precedency* being all he can justly claim above the other *Magi-*

strates.

frates. Here are establish'd five principal Councils, viz. (1.) That term'd the *Grand Council*, comprehending the whole Body of the Nobility, by whom are elected all Magistrates, and enacted all Laws which they judge convenient for the publick Good. (2.) That term'd the *Pregadi*, (commonly call'd the *Senate of Venice*) consisting of above an hundred Persons, who determine Matters of the highest Importance, as those relating to Peace or War, Leagues and Alliances. (3.) The *College* consisting of twenty four Lords, whose Office is to give Audience to Ambassadors, and to report their Demands to the Senate, which alone hath Power to return Answers. (4.) The *Council of Ten* (consisting of Ten Noblemen) whose Office it is to hear and decide all Criminal Matters: This Court (whose Jurisdiction is extraordinary great) is yearly renew'd, and three of these Noblemen, call'd the *Capi*, or *Inquisitors of State*, are chosen Monthly; to which Triumvirate is assign'd such a Power in judging of Criminals, that their definite Sentence reacheth the chiefest Nobleman of the State, as well as the meanest Artificer, if they are unanimous in their Voices; otherwise all the Ten are consulted with.

II. *Genoa* is under an Aristocratical Government, very like to that of *Venice*; for its Principal Magistrate hath the Name or Title of *Duke*, (but continueth only for two Years) to whom there are Assistant eight Principal Officers, who with the Duke are called the *Seignior*, which, in Matters of the greatest Importance, is also subordinate to the Grand Council, consisting of 400 Persons, all Gentlemen of the City; which Council, with the Seignior, do constitute the whole Body of the Commonwealth. This State is much more famous for what it hath been, than for what it is, being now on the decaying Hand. At present it's subject unto several Sovereigns, various Places within its Territories belonging to the Dukes of *Savoy* and *Tuscany*, some free, and others lately taken by the *French*.

III. *Luca* (being a small free Commonwealth, enclos'd within the Territories of the Grand Duke of *Tuscany*) is under the Government of one Principal Magistrate, call'd the *Gonfalonier*, changeable every second Month, assisted by nine Counsellors, nam'd *Anziani*, whom they also change every six Months, during which time they live in the Palace or Common-Hall; and Superior to them is the *Grand Council*, which consists of about 240 Noblemen, who, being equally divided into two Bodies, take their turns every half Year. This State is under the Protection of the Emperor of *Germany*, and payeth him yearly Homage accordingly.

IV. *St.*

IV. *St. Marino*, a little, (but flourishing) Republick in the Dukedom of *Urbine*, which still maintains its Privileges, and is govern'd by its own Magistrates, who are under the Protection of the Pope. The whole Territory of this small Commonwealth, is but one Mountain about three Miles long, and ten round, consisting of about 5000 Inhabitants, who boast of their State being a Free Republick about 1000 Years.

Arms.] It being too tedious to express the Ensigns Armorial of all the Sovereign Princes and States in this Country, and too superficial to mention those of one only; we shall therefore (as a due Medium) nominate the chief Sovereignities of *Italy* (*viz.* the *Pope-dome*, the Dukedom of *Tuscany*, and the Republicks of *Venice* and *Genoa*) and affix to each of these their peculiar Arms. Therefore, (1.) The Pope (as Sovereign Prince over the Land of the Church or Papal Dominions) bears for his Escutcheon, *Gules*, consisting of a long Cape, or Head-piece, *Or*, surmounted with a Cross pearl'd and garnish'd with three Royal Crowns, together with the two Keys of *St. Peter* placed in *Saltier*, (2.) The Arms of *Tuscany* are, *Or*, Five Roundles, *Gules*, two, two, and one, and one in chief *Azure*, charged with three Flower de Lucies, *Or*. (3.) Those of *Venice* are *Azure*, a Lion winged, Sejant, *Or*, holding under one of his Paws, a Book covered *Argent*. Lastly, Those of *Genoa* are, *Argent*, a Cross *Gules*, with a Crown clos'd by reason of the Island of *Corfica* belonging to it, which bears the Title of Kingdom, and for Supporters are two Griffins, *Or*.

Religion.] The *Italians* (as to their Religion) are Zealous Professors of the Doctrine of the *Roman Church*, even in her grossest Errors and Superstitions; and that either out of Fear of the *Barbarous* Inquisition; or in Reference to their Ghostly Father, the Pope: Or chiefly, by being industriously kept in woful Ignorance of the *Protestant* Doctrine, of which they are taught many false and monstrous things. The *Jews* are here tolerated the Publick Exercise of their Religion; and at *Rome* there's a weekly Sermon for their Conversion, at which one of each Family is bound to be present. The Christian Faith was first preach'd here by *St. Peter*, who went thither in, or about the beginning of the Reign of the Emperor *Claudius*, as is generally testified by some ancient Writers of good Account. But, whereas this Country is the Seat of the pretended Infallible Head of the Church no Place can be more proper to discourse of the Doctrine of that Church, than this is. And, whereas the Tenets of the *Romish Church* (whereby she differs from all other

Christian Churches, especially those of the Reformation (are such, as She, by her pretended General Councils [particularly that of Trent] has superadded to the Christian Faith; and endeavour'd to impose the belief of 'em, as so many New Articles of Faith, upon the rest of the Christian World: The best Summary of her Doctrine, as a true and unquestionable Body of Popery, may be fitly reckon'd that noted Creed of Pope Pius IV. the various Articles of which are these following.

- Art. I. *I believe in one God the Father Almighty, maker of Heaven and Earth, and of all things visible and invisible.*
- II. *And in one Lord Jesus Christ, the only begotten Son of God, begotten of his Father before all Worlds, God of God, Light of Light, very God of very God, begotten not made, being of one Substance with the Father, by whom all things were made.*
- III. *Who for us Men, and for our Salvation came down from Heaven, and was incarnate by the Holy Ghost of the Virgin Mary, and was made Man.*
- IV. *And was crucified also for us under Pontius Pilate, suffered and was buried.*
- V. *And the third Day rose again according to the Scriptures.*
- VI. *And ascended into Heaven, and sitteth on the right-hand of the Father.*
- VII. *And he shall come again with Glory to judge both the quick and the dead: whose Kingdom shall have no end.*
- VIII. *And I believe in the Holy Ghost, the Lord and Giver of Life, who proceedeth from the Father and the Son, who with the Father and the Son together is worshipped and glorified, who spake by the Prophets.*
- IX. *And I believe one Catholick and Apostolick Church.*
- X. *I acknowledge one Baptism for the remission of Sins.*
- XI. *And I look for the Resurrection of the Dead.*
- XII. *And the Life of the World to come. Amen.*
- XIII. *I most firmly admit and embrace Apostolical and Ecclesiastical Traditions, and all other Observations and Constitutions of the same Church.*

XIV. I

- XIV. I do admit the Holy Scriptures in the same Sense that holy Mother-Church doth, whose Business it is to judge of the true Sense and Interpretation of them; and I will interpret them according to the unanimous consent of the Fathers.
- XV. I do profess and believe that there are seven Sacraments of the Law, truly and properly so call'd, instituted by Jesus Christ our Lord, and necessary to the Salvation of Mankind, though not all of them to every one, viz. Baptism, Confirmation, Eucharist, Penance, extreme Unction, Orders, and Marriage, and that they do confer Grace; and that of these, Baptism, Confirmation and Orders, may not be repeated without Sacrilege. I do also receive and admit the received and approved Rights of the Catholick Church in her solemn Administration of the abovesaid Sacraments.
- XVI. I do embrace and receive all and every thing that hath been defined and declared by the holy Council of Trent concerning Original Sin and Justification.
- XVII. I do also profess, that in the Mass there is offered unto God a true, proper and propitiatory Sacrifice for the quick and the dead; and that in the most holy Sacrament of the Eucharist there is truly, really and substantially the Body and Blood, together with the Soul and Divinity of our Lord Jesus Christ; and that there is a Conversion made of the whole Substance of the Bread into the Body, and of the whole Substance of the Wine into the Blood; which Conversion the Catholick Church calls Transubstantiation.
- XVIII. I confess that under one kind only, whole and entire Christ and a true Sacrament is taken and received.
- XIX. I do firmly believe that there is a Purgatory, and that the Souls kept Prisoners there do receive help by the Suffrages of the Faithful,
- XX. I do likewise believe, that the Saints reigning together with Christ are to be worshiped and prayed unto; and that they do offer Prayers unto God for us, and that their Relicks are to be had in Veneration.
- XXI. I do most firmly assert, that the Images of Christ, of the Blessed Virgin the Mother of God, and of other Saints, ought to be had and retained, and that due Honour and Veneration ought to be given them.

XXII. *I do affirm, that the Power of Indulgences was left by Christ in the Church, and that the Use of them is very beneficial to Christian People.*

XXIII. *I do acknowledge the Holy, Catholick and Apostolick Roman Church, to be the Mother and Mistress of all Churches; and I do promise and swear true Obedience to the Bishop of Rome, the Successor of St. Peter, the Prince of the Apostles, and Vicar of Jesus Christ.*

XXIV. *I do undoubtedly receive and profess all other things which have been delivered, defined, and declared by the sacred Canons and Oecumenical Councils, and especially by the holy Synod of Trent; and all things contrary thereunto, and all Heresies condemned, rejected, and anathematized by the Church, I do likewise condemn, reject, and anathematize.*

 all round the Pe-
 ninsula.

THIS vast Complex Body, comprehending these various Countries above-mention'd, and the most remarkable of 'em being *Hungary*, *Greece*, and little *Hungary*; we shall first treat of these three separately, and then conjunctly of all the rest, under the General Title of the *Danubian Provinces*. Therefore,

§. I. HUNGARY.

Name.] **H***ungary* (which for Method's sake, we still continue under the General Head of *European Turkey*, tho' almost entirely under the Emperor of *Germany*) contains a part of *Pannonia*, with some of ancient *Germany* and *Dacia*; is now bounded on the East by *Transilvania*; on the West by *Austria*; on the North by *Polonia Propria*; on the South by *Sclavonia*; and term'd by the *Italians*, *Ungharia*; by the *Spaniards*, *Hungria*; by the *French*, *Hungrie*; by the *Germans*, *Ungern*; and by the *English*, *Hungary*; so call'd from the ancient Inhabitants, the *Hunni* or *Hunns*.

Tr.] The *Air* of this Country is generally esteem'd very unwholesome to breath in; which is chiefly occasion'd from much Morish Ground, and many Lakes, wherewith this Country abounds. The opposite Place of the Globe to *Hungary* is that part of the vast Pacifick Ocean, between 218 and 233 Degrees of Longitude, with 45 and 50 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 7th and 8th North Climate) is very fruitful in Corn and Roots, and various sorts of pleasant Fruit, affording also excellent Pasturage; and several of its Mountains produce some valuable Mines of Copper, Iron, Quick-silver, Antimony and Salt. Yea, so noted is this Country for Mines, that no less than seven remarkable Towns go by the Name of *Mine Towns*, the chief of which is *Chemnitz*, whose Mine hath been wrought in about 900 Years. The Length of the Days and Nights in *Hungary* is much the same as in the Southern Circles of *Germany*.

Commodities.] This being an Inland Country, and thereby having not settl'd Trade with Foreign Parts, we may reckon the Product of the Soil the chief Commodities with which the Inhabitants deal with their Neighbours.

Batties.] Here are many natural Baths, especially those at *Buda*, which are reckon'd the noblest in *Europe*, not only for their variety of hot Springs, but also the magnificency of their Buildings. There are likewise

likewise two hot Bagnios near *Transchin*, upon the Confines of *Moravia*; and others at *Schemnitz* in *Upper Hungary*. Besides which there are Waters in several Parts of this Country of a petrifying Nature, and others that corrode Iron to such a degree, that they'll consume a Horse-thoos in 24 Hours. Near *Esperies* in *Upper Hungary*, are two deadly Fountains, whose Waters send forth such an infectious Stream, that it kills either Beast or Bird approaching the same; for the preventing of which, they are wall'd round, and kept always cover'd.

Archbishopricks.] *Archbishopricks* in this Country are those of

Gran,

Colocza.

Bishopricks.] *Bishopricks* in this Country, are those of

*Angria,
Meytracht,*

*Quinque Ecclesia,
Raab,*

*Vesprin,
Great Waradin.*

Universities.] What *Universities* are establish'd in this Country, since the re-taking it from the Infidels is uncertain.

Manners.] The *Hungarians* (more addicted to *Mars* than *Minerva*) are generally look'd upon as good Soldiers, being Men, for the most part, of a strong and well proportion'd Body, valiant and daring in their Undertakings, but reputed cruel and insulting when Conquerors.

Language.] The *Hungarians* have a peculiar Language of their own, which hath little or no Affinity with those of the Neighbouring Nations, save only the *Sclavonic*, from which it hath borrow'd several Words, and which is also spoken in some Parts of this Country, as the *German* in other. *Pater Noster* in the *Hungarian* Tongue runs thus, *My atyanc ki vagy az menniekben, szentelteſſac mega te neved jojon el az te ofragod; legvon megate akaratos, mint az menyben, ugy ite ez foldonois; az mimindennapi kenyirunket ad meg nekunc ma: es boczasd meg mine cunc az mi vet kinket, mikeppem miis megboczatuno azocknac, az kic mi ellenunc vet keztenec: es ne vigi minket az kiseretthe, de szabaditz meg minket az gonoszol. Amen.*

Government.] This Kingdom being almost wholly recover'd from the *Ottoman* Slavery by the late successful Progress of the Imperial Arms, is now dependent on the Jurisdiction of the Emperor, who is stil'd King thereof. The Assembly of the States consists of the Clergy, Barons, Noblemen and Free Citizens, who usually meet once every three Years; which Assembly hath Power to Elect a *Palatin*, who by

the Constitution of the Realm) ought to be a Native of *Hungary*; and to him belongs the Management of all Military Concerns, as also the Administration of Justice in Affairs both Civil and Criminal.

Arms.] See *Germany*.

Religion.] The prevailing Religion in this Country, is that of the Church of *Rome*, especially since the late Conquests made by the Imperial Arms. Next to it is the Doctrine of *Luther* and *Calvin*, which is zealously maintain'd by great multitudes of People, and many of 'em are Persons of considerable Note. Besides these are to be found most Sorts and Sects of Christians, as also many *Jews*, and *Mahometans* not a few. This Kingdom receiv'd the Knowledge of the Blessed Gospel in the beginning of the Eleventh Century, and that by the industrious Preaching of *Albert*, Archbishop of *Prague*.

§ 2. G R E E C E.

Name.] *Greece* [formerly *Gracia* and *Hellis*; and now bounded on the East by the *Archipelago*, or *Ægean Sea*; on the North by the *Danubian Provinces*; on the West and South by part of the *Mediterranean Sea*] is term'd by the *Italians* and *Spaniards*, *Gracia*; by the *French*, *la Grœce*; by the *Germans*, *Griechenland*; and by the *English*, *Greece*: Why so call'd, is variously conjectur'd by our Modern Criticks; but the most receiv'd Opinion is, that the Name derives its Original from an Ancient Prince of that Country, call'd *Græcus*.

Air.] The Air of this Country being generally Pure and Temperate, is reckon'd very pleasant and healthful to breathe in. The opposite Place of the Globe to *Greece*, is that part of the vast *Pacifick Ocean* between 201 and 205 Degrees of Longitude, with 37 Degrees 30 Min. and 40 Degrees of South Latitude.

Soil.] The Soil of this Country (it lying under the 6th North Climate) is not only very fit for Pasture, (there being much fertile *Champaign Ground*) but also it affords good store of Grain, when duly manured; and abounds with excellent Grapes, and other delicious Fruits. The longest Day in the Northmost Part of *Greece*, is about 15 Hours; the shortest in the Southmost, 9 Hours $\frac{1}{2}$, and the Nights proportionably.

Com.

Commodities.] The chief *Commodities* of this Country, are reckon'd Raw Silks, Pernocochi, Oil, Turkey-Leather, Cake-Soap, Honey, Wax, &c.

Rarities.] At *Castri* (a little Village on the South of *M. Parnassus*, now *Liacura*, by the *Turks*) are some Inscriptions, which evince it to have been the ancient *Delphi*, so famous all the World over for the *Oracle of Apollo*. (2.) On the aforesaid Mountain is a pleasant Spring, which having several Marble Steps descending to it, and many Niches made in the Rock for Statues, give occasion to think that this was the renown'd *Fons Castalius*, or *Caballinus*, which inspir'd (as People then imagin'd) the ancient Poets. (3.) In *Livadia* (the ancient *Achaia*) is a hideous Cavern in a Hill, which was very famous of old for the Oracles of *Trophonius*. (4.) Between the large Lake of *Livadia* and the *Eubæan Sea* (whose shortest distance is four Miles) are upwards of forty wonderful Subterraneous Passages hewn out of the firm Rock, and that quite under a huge Mountain, to let the Water have a Vent, otherwise the Lake being surrounded with Hills, and constantly supply'd by several Rivulets from these Hills, would still overflow the adjacent Country. (5.) On *M. Oneius*, in the Isthmus of *Corinth*, are the Remains of the *Isthmian Theatre*, being the Place where the *Isthmian Games* were formerly celebrated. (6.) Here are also some *Vestigia* of that Wall built by the *Lacedæmonians*, from one Sea to the other, for securing the Peninsula from the Incursions of the Enemy. (7.) Thro' most Parts of *Greece*, are still extant the Ruins of many Heathen Temples; especially that of the Goddess *Ceres* at *Eleusis* (about Four Hours from *Athens*) a part of whose Statue is yet to be seen. And at *Salonichi* are several stately Christian Churches (particularly those of *S. Sophia*, *Gabriel*, and the Virgin *Mary*) now converted into *Mahometan Mosques*, the last of which is a noble Structure, environ'd on each side with twelve Pillars of *Jasper Stone*, and as many Crosses upon their Chapters remaining as yet undefaced by the *Turks*. But the Chief Rarities of *Greece* may be reckon'd those various Monuments of Antiquity to be seen at *Athens*: The Chief of which are these following, (1.) The *Acropolis*, or Citadel, the most ancient and eminent Part of the City. (2.) The Foundation of the Walls round the City, suppos'd to be those erected by *Theseus*, who enlarg'd the same. (3.) The Temple of *Minerva* (now a *Turkish Mosque*) as intire, as yet, as the *Rotunda* at *Rome*, and is one of the most beautiful Pieces of Antiquity that's extant this Day in the World. (4.) The *Panagia Spiliotissa*, or Church of our Lady of the Grotto. (5.) Some magnificent Pillars, particularly those commonly reckon'd the Remains of *Adrian's Palace*, of which there were formerly six Rows,

and 20 in each Row, but now only 17 stand upright, and are 52 Foot high, and 17 in Circumference at the Base. Here likewise is a Gate and an Aqueduct of the said Emperor. (6.) The *Stadium* or Place where the Citizens us'd to run Races, encounter wild Beasts, and celebrated the famous Games, term'd *Panathenea*. (7.) The *Hill Musæum* (now call'd *To Seggio* by the Inhabitants) so nam'd from the Poet *Museus*, the Disciple of *Orpheus*, who was wont there to recite his Verses. (8.) Some Remains, conjeatur'd to be those of the *Areopagus* and *Odeum*, or Theatre of Musick. (9.) The Ruins of many *Temples*, especially that of *Augustus*, whose Front is still intire, consisting of four Dorick Pillars; as also those of *Theseus*, *Hercules*, *Jupiter Olympius*, *Castor* and *Pollux*, &c. (10.) The *Tower of Andronicus* *Cyrrhastes*, or Temple of the Eight Winds still intire. (11.) The *Phanari*, or *Lanthorn* of *Demosthenes*, being a little Edifice of White Marble, in Form of a *Lanthorn* which is also intire. For a particular Description of all these Rarities both at *Athens*, and other Parts of *Greece*, with many remarkable Inscriptions, both in *Greek* and *Latin*, Vid. *Wheeler's Travels*.

Archbishopricks.] *Archbishopricks* in this Country, are chiefly those of

| | | |
|-------------------|---------------------------|--------------------|
| <i>Amphipoli,</i> | <i>Malvasia,</i> | <i>Saloniki,</i> |
| <i>Larissa,</i> | <i>Patras,</i> | <i>Adrianople,</i> |
| <i>Tarsa,</i> | <i>Napoli di Romania,</i> | <i>Janna.</i> |
| <i>Athens,</i> | <i>Corinth,</i> | |

Bishopricks.] *Bishopricks* in this Country, are chiefly those of

| | | | |
|-------------------|-----------------------|-----------------|------------------|
| <i>Scotusa,</i> | <i>Mistra,</i> | <i>Glykeon,</i> | <i>Granitza,</i> |
| <i>Modon,</i> | <i>Argiro Castro,</i> | <i>Salona,</i> | <i>Thalanta,</i> |
| <i>Caminitza,</i> | <i>Delvino,</i> | <i>Livadia,</i> | <i>Amphissa.</i> |
| <i>Argos,</i> | <i>Butrinto,</i> | | |

Universities.] No *Universities* in this Country, tho' once the Seat of the *Muses*; but in lieu of them are 24 *Monasteries* of *Caioyets* or *Greek Monks*, of the Order of *St. Basil*, who live in a Collegiate manner on the famous *M. Athos*, (now term'd *Ὅρος Ἁγίου*, or the Holy Mountain) where the younger sort are instructed in the Holy Scriptures, and the various Rites of the *Greek Church*; and out of these Collegets, are usually chosen those *Bishops* who are subject to the *Patriarch* of *Constantinople*.

Manners.] The *Greeks* (most famous of old, both for Arms and Arts, and every thing else that's truly Valuable) are so wonderfully degenerated from their Forefathers, that instead of those excellent Quali-

Qualities which did shine in 'em, particularly, *Knowledge, Prudence, and Valour*; there's nothing now to be seen among 'em, but the very Reverse or Contrary of these, and that in the highest degree. Such is the *Pressure* of the *Ottoman Yoke*, under which they groan at present, that their *Spirits* are quite sunk within 'em, and their very Aspect doth plainly declare a disconsolate and dejected *Mind*. However, the *unthinking Part* of 'em do so little consider their present *Slavish Subjection*, that there's no People more *Jovial* and *Merrily-dispos'd*, being so much given to *Singing* and *Dancing*, that 'tis now become a Proverbial Saying, *As merry as a Greek*. The Trading Part of 'em are generally very Cunning, and so inclin'd to over-reach (if they can) in their *Dealings*, that *Strangers* do not only meet with much more Candour among the *Turks*; but if one *Turk* seem in the least to discredit another's Word or Promise, his Reply is still at hand, *I hope you don't take me for a Christian*: Such is that *Blot*, which these Imprudent Professors of *Christianity* have cast upon our most Holy Religion, in the Eyes of its numerous and implacable Adversaries.

[Language.] The *Languages* here in use, are the *Turkish* and *Vulgar Greek* (the first being peculiar to the *Turks*, and the other to the *Christians*) a Specimen of the former shall be given in the last *Paragraph* of this Section. As for the other, I can't omit to mention the mighty Difference there is betwixt it and the ancient *Greek*, not only in respect of the many *Turkish* Words now intermixt, but also in the very Pronunciation of those which yet remain unaltered; as I particularly observ'd by conversing with several of the *Greek* Clergy in the Island of *Cyprus*, and elsewhere; and being present at some of their publick Prayers. Yea, the Knowledge of the ancient *Greek* in its former Purity, is not only lost among the vulgar sort of People, but also almost extinguish'd even among those of the highest Rank. few or none of their Ecclesiasticks themselves pretending to be Masters of it. And at *Athens* (once so renown'd for Learning and Eloquence) their Tongue is now more corrupt and barbarous, than in any other Part of *Greece*. *Pater Noster* in the best Dialect of the modern *Greek* runs thus: *Pater hemas, opios ise ees tos Ouranous bagia sibito to Onoma sou, na erti he basilia sou, to thelema sou na ginetex itzon en te Ge, os is ton Ouranon: To psomi hemas dose hemas simeron, Ka si chorase hemos ta crimata bemon itzon, ka hemas si-chora somen ekinous opou, mas adikounka men ternes hemas is to piraismo, alla sosen hemas apo to kako. Amen.*

[Government.] So many brave and valiant Generals did *Greece* formerly breed, that *Strangers* usually resorted thither to learn the Art of War; and such were the *Military Achievements* of this People, both at home and abroad, and so far did the force of their Arms extend, that under their *Great Alexander* was erected the third Potent

Monar-

Monarchy of the *World*. But alas ! Such hath been the sad *Catastrophe* of *Affairs* in this *Country*, and so low and lamentable is its Condition at present, that nothing of its former *Glory* and *Grandeur* is now to be seen. For its poor and miserable *Natives* are now strangely codd and dispirited ; its (once) numerous and flourishing *Cities*, are now depopulated, and meer heaps of *Ruins* ; its large and fertile *Provinces* are now laid waste, and lie uncultivated. And lately the whole, and still a great part of the *Country*, doth now groan under the heavy *Burden* of the *Turkish* Yoke ; and its various *Divisions* are rul'd by their respective *Sangiacks* in Subordination to the *Grand Seignor*.

Arms.] See the last Paragraph of this Section.

Religion.] The establish'd *Religion* in this *Country*, is that of *Mahometanism* ; but Christianity (for its number of Professors) doth far more prevail. The chief Tenets of the *Mahometan Religion* may be seen § 4. of this *Section* (to which I remit the *Reader*.) As for Christianity, 'tis profess'd in this *Country*, according to the *Doctrine* of the *Greek Church*, the Principal Points of which, as it differs from the *Western Christian Churches* (whether *Protestant* or *Roman*) are these following, viz. (1.) The *Greeks* deny the Procession of the Holy Ghost from the Son, asserting, that he proceedeth only from the Father thro' the Son. (2.) They also deny the *Doctrine* of *Purgatory*, yet usually pray for the Dead. (3.) They believe that the Souls of the Faithful departed this Life, are not admitted unto the *Beatifick Vision* till after the *Resurrection*. (4.) They celebrate the *Blessed Sacrament* of the *Eucharist* in both Kinds, but make the *Communicant* take three Morsels of *Leaven'd Bread*, and three sips of *Wine*, in Honour of the *Three Persons* of the *Adorable Trinity*. (5.) They admit Children to participate of the *Sacrament* of the *Lord's Supper*, when only seven Years of Age, because then it is (say they) that they begin to sin. (6.) They allow not of *Extream Unction* and *Confirmation*, and disapprove of fourth Marriages. (7.) They admit none into Holy Orders but such as are married, and inhibit all second Marriages, being once in Orders. (8.) They reject all carved Images, but admit of *Pictures*, wherewith they adorn their *Churches*. Lastly, They observe four *Lents* in the Year, and esteem it unlawful to Fast upon *Saturdays*. In their publick *Worship* they use four *Liturgies*, viz. That commonly call'd *St. James's*, *St. Chrysostom's*, *St. Basil's*, and *St. Gregory the Great's*, together with Lessons out of the *Lives* of their Saints, which makes their *Service* to be of such a tedious indiscreet Length, that it commonly lasts five or six Hours together. The *Fasts* and *Festivals* yearly observ'd in the *Greek Church* are very numerous ; and were it not for 'em, 'tis probable that *Christianity* had been quite extirpated out of this *Country* long 'ere now : For by Means of the Solemnities

Solemnities (which yet are celebrated with a multitude of ridiculous and superstitious Ceremonies) they still preserve a Face of Religion under a Patriarch [who resides at Constantinople] and several Archbishops and Bishops, particularly those abovemention'd. But did we view those Ecclesiasticks in their Intellectuals, as also the lamentable State of all Persons committed to their Charge, we should find both Priest and People labouring under such gross and woful Ignorance, that we could not refrain from wishing, that the Western Churches of Christendom [by their Divisions, Impieties, and Abuse of Knowledge] may not provoke the Almighty at last to plague 'em likewise with the same Darkness and Desolation. This Country was water'd with the Blessed Gospel in the very Infancy of Christianity, and that by the powerful Preaching of St. Paul, the Apostle of the Gentiles.

§ 3. Little Tartary.

Name.] Little Tartary [anciently *Taurica Chersonesus*, or *Tartaria Precopensis*, being the Lesser Scythia, and a part of Old *Sarmatia*, and now bounded on the East by *Georgia* and the River *Tanais*; on the West by *Podolia*; on the North by Part of *Moscovia*; and on the South by the *Black Sea*] is term'd by the *Italians*, *Tartaria Minor*; by the *Spaniards*, *Tartaria Menor*; by the *French*, *La Petite Tartarie*; by the *Germans*, *Kleine Tartary*; and by the *English*, *Little Tartary*; so call'd to distinguish it from *Great Tartary* in *Asia*; as also *Crim-Tartary* from *Crim*, the principal City of the Country.

Air.] The Air of this Country is generally granted to be of a very temperate Nature, but yet unhealthful to breathe in. The opposite Place of the Globe to *Little Tartary*, is that part of *Terra Australis incognita*. Between 213 and 225 Degrees of Longitude, with 45 and 49 Degrees of South Latitude.

Soil.] The Soil of this Country (it lying in the 8th North Climate) is very different in different Parts, some Places abounding with Grain and Fruits, and others pester'd with undrainable Marshes, and barren Mountains. The length of the Days and Nights here, is the same as in the Northern Parts of *France*.

Commodities.] The Commodities of this Country are reckon'd Slaves, Leather, Chalcal Skins, and several sorts of Furs, which they exchange with the adjacent *Turks* for other Commodities they want.

Rarities.] Some Travellers relate of this wild and barbarous part of the World, that few, or no ravenous Beasts are found therein.

And others tell us, That many of its Fens and Marshes abound mightily with Salt, which is naturally there produc'd in prodigious Quantities.

Archbishopsricks.] *Archbishopsricks* in this Country. None.

Bishopsricks.] *Bishopsricks* in this Country, are those of

Cassa,

Gothia.

Universities.] *Universities* in this Country. None.

Manners.] The *Crim Tartars* are generally Men of vigorous and robust Bodies, able to endure all the Hardships of a Military Life; and many of 'em (being endu'd with Courage and Vigour of Mind, conform to their Strength of Body) prove the best of Soldiers. They are reputed to be very just in their Dealings with one another, but far otherwise with Strangers. Many of 'em are much addicted to Pillage, and they usually feed upon Horse-flesh.

Language.] The Language of the *Crim-Tartars* is the *Scythian*, or pure *Tartaresque*, which hath such a Resemblance to the *Turkish*, as the *Spanish* to the *Italians*; these *Tartars* and *Turks* understanding one another, as those of *Italy* and *Spain*. The *Arabick* is here learn'd at School, as in most Parts of *Turky*. *Pater Noster* in the *Tartaresque*, runs thus; *Atscha wyzom Chybokta sen algusch, ludor senug adonkel suom, chauluchong bel sun senung arkchneq, aleigier da ukarhtawer visum gundaluch ot mak chu musen vougou kai visum jasuchen, den bisdacha hajelberin bisum jasoch namafin, datcha koima visu sumanacha, illa garta visenu, gemandam. Amen.*

Government.] This Country is govern'd by its own Prince, commonly term'd the *Cham* of *Tartary*, who is under the Protection of the Great *Turk*, whose Sovereignty he acknowledgeth by the usual Ceremony of receiving a Standard. The *Grand Seigneur* actually possesseth some part of this Country, and maintains one *Beglierbeg*, and two *Sangiacks*, in the Places of greatest Importance: As also, he detains as Hostage, the apparent Successor of the *Cham*, who is ordinarily either his Son or Brother. To all which, the *Tartars* readily yield upon the Account of an ancient Compact; whereby the *Turkish* Empire is said to descend to 'em, whenever the Heirs-male of the *Ottoman* Line shall fail.

Arms.] The *Cham* of *Tartary* bears for his Ensigns Armorial, Or, three Griffins Sable, arm'd Gules.

Religi-

Religion.] The *Crim-Tartars* (for the most part) are zealous Professors of the *Mahometan* Doctrine, except some who continue still *Pagan*; and intermix'd with them are many *Christians*, especially *Greeks* and *Armenians*, besides a considerable Number of *Roman Catholics*. When this Country was first water'd with the Blessed Gospel, is not very certain.

§ 4. *Danubian Provinces.*

Name.] THE remaining Part of *Turkey in Europe* [bounded on the East by *Pontus Euxinus* and the *Propontis*; on the West by *Hungary*; on the North by *Poland*; and on the South by *Greece*] is here consider'd under the assum'd Title of *Danubian Provinces*. This we chuse to do upon the Account of their Situation, being near unto, or upon the Banks of the *Danube*. But since each of these Provinces requires a peculiar *Etymology*, take the same as followeth; (1.) *Transilvania* (the ancient *Dacia Mediterranea*) so call'd by the *Romans*, *Quasi trans sylvas*, it being formerly encompass'd with vast mighty Forests. (2.) *Valachia*, part of old *Dacia*) corruptedly so call'd for *Flaccia*, which Title came from one *Flaccus*, an ancient General, who made that part of the Country a *Roman Colony*. (3.) *Moldavia* (the Seat of the ancient *Getæ*) so call'd from a little River of the same Name. (4.) *Romania* (the chiefest part of old *Thrace*) so call'd from *Roma Nova*, viz. *Constantinople*. (5.) *Bulgaria*, or rather *Wolgaria* (the old *Mæsia Inferior*) so call'd from *Volga*, it being formerly subdu'd and possess'd by a People which came from the Banks of that River. (6.) *Servia* (of old *Mæsia Superior*) why so call'd, is not very certain. (7.) *Bosnia* (part of the ancient *Pannonia*) so call'd from a River of the same Name. (8.) *Sclavonia* (another Part of *Pannonia*) so call'd from its ancient Inhabitants, the *Sclavi*. (9.) *Croatia* (heretofore known by the Name of *Liburnia*) so call'd from its Inhabitants, the *Croates*. Lastly, *Dalmatia*, much of the ancient *Illyricum*; but as for the *Etymology* of that Name, 'tis not yet agreed upon among Criticks.

Air.] The *Air* of these various Provinces doth mightily vary, according to their Situation, and Nature of the Soil. The opposite Place of the Globe to them, is that part of the vast *Pacifick Ocean*, between 220 and 235 Degrees of Longitude, with 42 and 48 Degrees of *South Latitude*.

Soil.] The *Soil* of these various Provinces (they lying in the 7th and 8th *North Climate*) cannot reasonably be expected to be the same
in

in all. *Croatia* is Cold and Mountainous, yet producing all *Necessaries* for the Life of Man. *Servia* much more Pleasant and Fertile. *Bulgavia* Unpleasant and Barren, being full of Deserts, and ill inhabited. *Moldavia* more Temperate and Fertile, but the greatest part of it uncultivated. *Romania* affords great Quantity of Corn and Fruits, and several of its Mountains produce some *Mines of Silver, Lead, and Alum*. The longest Day in the *Northmost* part is about 16 Hours; the shortest in the *Southmost* is 9 Hours, and the Nights proportionably.

Commodities.] Most of these Provinces being inland, barren Countries (except *Romania*) and therefore little frequented by Strangers, the Number of their *Commodities* can't be very great; save only those exported from *Stamboal*, which are chiefly *Grogams, Camblets, Mohair, Carpets, Anniseeds, Cottons, Galls*, and most other rich *Turkish Commodities*.

Rarities.] In one of the Mines of *Transilvania*, viz. that of *Rimili Dominurdz*, are found sometimes large Lumps of *Virgin Gold*, fit for the *Mint*, without any purifying. (2.) Other parts of this Country afford such vast Quantities of *Stone Salt*, as to supply all the *Neighbouring Nations* with that useful Mineral. (3.) Near to *Enguedine*, in the same *Principality* (the antient *Annium*) are several Monuments of *Antiquity*, especially the Remains of a large Military Way, or long Causeway made by one *Annius*, a Captain of a *Roman Cohort*. (4.) At *Spalatro* in *Dalmatia*, are the Ruins of *Dioclesian's Palace*, in which he took up his Residence when he retir'd from the Empire. (5.) Here is also an intire Temple consecrated to *Jupiter*, which is of an *Octogonal Form*, and adorn'd with several stately Pillars of *Porphyry*. (6.) At *Zara* in the same Province are many Ruins of *Roman Architecture*, and several *Heathen Altars*, still to be seen. But what mostly deserves our Regard, are those Monuments of *Antiquity*, as yet extant, in or near to *Constantinople*, the chief of which are these following, viz. (1.) The *Hippodrome* (now call'd *Atmidan*, a Word of like Signification) in which remains some stately *Hieroglyphical Pillars*, particularly, one of *Egyptian Granite*, 50 Foot long, and yet but one Stone; and another of *Brass*, only 14 Foot high, and in Form of three Serpents wreath'd together up to the Top, where their Heads separate, and look three different ways. (2.) South of the *Hippodrome*, is that Column commonly call'd the *Historical Pillar*, curiously carv'd from Top to Bottom, expressing variety of *Warlike Actions*. (3.) West of the *Hippodrome* is another Column of *Porphyry*, brought hither from *Rome* by *Constantine the Great*, which having suffer'd much Damage by Fire, is now call'd the *Burnt Pillar*. (4.) Nigh the Mouth of the *Black Sea* is a Pillar of the *Corinthian Order*, about 10 Foot high, with an imperfect *Inscription* on its Base, vulgarly call'd *Pompey's Pillar*, which hath

hath been probably erected for a *Sea-mark* by Day, as the *Lanthorn* at *Phanari* is by Night. (5.) From the *Black Sea* to the City of *Constantinople*, reacheth that noble *Aqueduct*, made by the Emperor *Valentinian* (whose Name it retaineth) and repair'd by *Solyman the Great*. To these we may add that noble Pile of Building *Sancta Sophia*, formerly a *Christian Temple*, but now a *Mahometan Mosque*; for a particular Description of which, with the other Remarkables above-mention'd, see *Sandys, Wheeler, Spon*, with other modern Travellers.

Archbishopsricks.] Here is one Patriarchate, viz. that of *Constantinople*, as also several *Archbishopsricks*, especially those of

Chalcedon,
Trajanopoli,

Sophia,
Antivari.

Ragusa, or Ragusi.

Bishopsricks.] Chief *Bishopsricks* in these Provinces, are those of

Pofoga,
Belgrade,

Zagrabé,
Scardona,

Navenza,
Cattaro.

Universities.] *Universities* in these Provinces, none.

Manners.] These various *Provinces* are inhabited by various sorts of People, particularly the *Slavonians*, who are generally Men of a robust and strong *Constitution*, and very fit to be *Soldiers*. Next, the *Croats*, who are esteem'd to be Persons so *Valiant* and *Faithful*, that they are entertain'd by many *German Princes* as their *Guards*. Lastly, The *Servians* and *Bulgarians*, who are reckon'd very *Cruel*, and universally given to *Robbery*. But as for the natural *Turks*, they are thus characteriz'd, viz. Men of a swarthy *Complexion*, robust *Bodies*, of a good *Stature*, and proportionably compacted: Men, who, tho' generally addicted to some horrid Vices (not to be nam'd among *Christians*) are yet Persons of great *Integrity* in their *Dealings*, strict Observers of their *Word*; abundantly civil to *Strangers*, extraordinarily *charitable* after their own way; and so *zealous* Observers of the various *Duties* enjoin'd by their *Religion* (especially that of *Prayer*) that their Frequency in the same may justly reproach the general Practice of *Christians* now-a-days. In their ordinary Salutations they lay their Hand on their Bosoms, and a little incline their Bodies, but accosting a Person of Quality, they bow almost to the Ground, and kiss the Hem of his Garment. They account it an opprobrious Thing to uncover their Heads; and as they walk in the *Streets*, they prefer the left Hand before the right, as being thereby Master of his Cymitar with

with whom they walk. Walking up and down they never use, and much wonder at that Custom of Christians. Their chief Recreations are *Shooting with the Bow*, and *Throwing of Lances*, at both of which they're very dextrous.

Language.] The *Sclavonian* Language (being of a vast Extent) is us'd not only in all these Provinces, tho' with some Variation of Dialect, but also in a great Part of *Europe* besides; the purest Dialect of which Tongue is generally esteem'd that peculiar to *Dalmatia*. As for the *Turkish* (which is originally *Sclavonian*, and now the prevailing Language of these Provinces) *Pater Noster* in the same runs thus; *Babamuz hanghe guiglessen : Chudus olssum ssenungh adun ; Gelson ssenung memlechetun, Olsum ssenung istegunq ny esse guthaule gyrd, echame gumozi bergunon vere hize begun, kem bassa bize bo slygomozi, nyese bizde basiaruz borsetiglero mosi, hem yedma bize ge beneme, de chwrtule bzyjaramazdan. Amen.*

Government.] These various Countries consider'd under the Title of *Danubian Provinces*, do acknowledge Subjection to several Sovereigns, particularly as followeth; *Transilvania* is subject to its own Prince or *Waywode*, formerly Tributary to the *Turks*, but now under the Protection of the Emperor since the Year 1690. *Valachia* being subject to its *Waywode* (sometimes call'd *Hospodar*, signifying Chief General of the Militia) is Tributary to the *Turk*. *Moldavia* is subject to its *Waywode*, who is under the Protection of the Emperor since Anno 1688. *Romania*, *Bulgaria*, and *Servia*, are wholly under the *Turk*, and govern'd by their respective *Beglierbegs*. *Sclavonia* and *Bosnia* do own the Emperor. And, lastly, *Dalmatia*, is partly under the *Venetians*, and partly under the *Turk*. To the Government of these Provinces we may subjoin the *Republick of Ragusi*, whose Inhabitants are so afraid of losing their Rights and Liberty, that every Month they change their Rector or supreme Magistrate, and every Night the Governor of their Castle, who entereth into his Command blind-folded; and all Military Officers whatsoever, are not to keep the same Posts above six Weeks, lest, if long continu'd, they should either gradually, or treacherously, bereave 'em of their Privileges, or make the Republick it self a Prey either to the *Turks* or *Venetians*, whom they equally dread; however, it payeth Tribute to both of 'em at present, as also a certain Acknowledgment to the Emperor, his Catholick Majesty, and the *Pope*, by virtue of a mutual Compact ratified between 'em.

Arms.] The *Grand Seignior* as supreme Sovereign over all the *Turkish* Dominions, and absolute Emperor of the *Ottoman* Empire, bears *Verte*, a Crescent *Argent*, crested with a *Turbant*, charg'd with
three

three black Plumes of Herons Quills, with this Motto, *Donec totum impleat Orbem*. As for the ancient Arms of the *Eastern Emperors*, before the rise of the *Ottoman Family*, they were, *Mars*, a Cross *Sd* betwixt four Greek Beta's, of the second: The four Beta's signifying *Βασιλεὺς Βασιλέων, Βασιλεύων, Βασιλεύσι, i.e. Rex Regum, Regnans, Regibus*.

Religion.] The Inhabitants of these different Provinces, are very different in Point of Religion, but reducible to three Classes, *viz. Christians, Jews, and Mahometans*. The *Christians*, for the greatest part, adhere to the Tenets of the Greek Church (already mentioned, § 2.) some to the Church of *Rome*, and others profess the Reform'd Religion both according to the Doctrine of *Luther* and *Calvin*. The *Jews* (as in all other Countries) are zealous Maintainers of the *Mosaick Law*; and the *Mahometans* stick close to their *Alcoran*; by which they are taught the Acknowledgment of One God, and that *Mahomet* is his Great Prophet. It also commandeth Children to be Obedient to their Parents, and approveth of Love to our Neighbour. It enjoins Abstinence from Swines *Flesh* and *Blood*, and such Animals as die of themselves. It promiseth to *Mussulmen* (or true Believers) all manner of sensual Pleasures in a future State. It allows of an unavoidable Fatality in every Thing, and favours the Opinion of Tutelar Angels. But to be more particular. The Followers of *Mahomet* do readily grant, That the Writings both of the Prophets and Apostles were divinely inspir'd, but alledge, that they're so corrupted by *Jews* and *Christians*, that they can't be admitted for the Rule of Faith. They further believe and assert, That of all Reveal'd Institutions in the World, those in the *Alcoran* are only Divine and Perfect. That God is both Essentially, and Personally One; and that the Son of God was a mere Creature, yet without Sin, and miraculously born of a Virgin. That *Jesus Christ* was a great Prophet, and that having ended his Prophetical Office upon Earth, he acquainted his Followers of the coming of *Mahomet*. That *Christ* ascended into Heaven without suffering Death, another being substituted in his Place to die. That Man is not justified by Faith in *Christ*, but by Works enjoined in the *Mosaick Law* and the *Alcoran*. That Polygamy (according to the Example of the ancient Patriarchs) is still to be allow'd of; as also to divorce the Wife upon any Occasion. In short, *Mahometanism* is a Medley of *Paganism, Judaism, and Christianity*; by which Means, the grand Impostor (its Founder) did cunningly imagine to gain Profelytes of all Professions. But whereas the *Alcoran* is the *Turkish* Rule of Faith and Manners, let us more particularly consider its Precepts, and that chiefly as they relate to the Principal Heads thereof, *viz. Circumcision, Fasting, Prayer, Alms,*
Pil.

Pilgrimage, and Abstinence from Wine. (1.) *Circumcision*; of the various Sacraments in the *Old and New Testament*, they admit only of Circumcision. This they reckon absolutely necessary to every *Mussulman*, esteeming it impossible to obtain Salvation without it; whereupon they are very careful to perform the same, and do celebrate the Performance thereof with great Solemnity. (2.) *Fasting*, particularly that extraordinary Fast, or yearly Lent, call'd *Ramadan*, observ'd every 9th Month, and of a whole Month's Continuance; during which time, they neither Eat nor Drink 'till the *Sun* goes down; they also abstain from all worldly Business, and from smoking their beloved Tobacco, yea, even from innocent Recreations, and living reserv'd austere Lives, do spend most of the time in their *Mosques*, frequenting 'em both Day and Night. They believe that during this Month, the Gates of Heaven stand open, and that those of Hell are shut. (3.) *Prayer*: This Duty is of mighty Request among them, their Prophet having term'd the same the *Key of Paradise*, and the very Pillar of Religion, whereupon they are frequent and fervent at their Devotions. They're oblig'd to pray five times every Day, and never fail of that Number, let their worldly Business be never so urgent. (4.) *Alms*, Every *Turk* is bound to contribute the hundredth part of his Wealth towards the *Zagat* or *Alms*, for Maintenance of the Poor. Besides which, they frequently make large voluntary Contributions; yea, their Charity doth not only extend it self towards their Fellow-Rational Creatures, but even the Irrational, as Dogs, Horses, Camels, &c. whom they carefully maintain in a kind of publick Hospitals, when thro' Age they become useles to their Masters. (5.) *Pilgrimage*, viz. That to *Mecca*, which every *Mussulman* is bound to perform once in his Life-time, or, at least, to send Deputies for him. Thither they resort in vast Multitudes, being commonly 40 or 50000 in Number, over whom the *Sultan* appoints a Commander in Chief to redress Disorders that may happen on the Road. This Officer is follow'd by a Camel carrying the *Alcoran* cover'd with Cloth of Gold, which sanctified Animal upon his return, is adorn'd with Garlands of Flowers, and exempt from any further Labour during the remaining part of its Life. The *Turks* do likewise visit the City of *Jerusalem*, but that more out of Curiosity than Devotion. They have also a great Veneration for the Valley of *Jehosaphat*, believing it shall be the particular Place of the General Judgment. Lastly, *Abstinence from Wine* is likewise a Precept of the *Alcoran*. But of this they are less observant than of any of the former, for many of the richest sort of *Turks* are great Admirers of the Juice of the Grape, and will liberally taste of the same in their private Cabals. These various Provinces were at first instructed in the Christian Faith at different times, and upon different Occasions.

S E C T. IX.

Concerning the *European Islands*.

HAVING hitherto travell'd through the various Countries on the *Continent of Europe*, let us now leave the Continent, and set sail for its *Islands*. And whereas the Chief of such Islands, are those term'd the *Britannick*; let us first take a particular Survey of them, and then a more general View of all the rest. Therefore,

I. Of the *Britannick Islands*.

THESE Islands being always consider'd as divided into *Greater* [*viz.* those of *Great Britain* and *Ireland*] and *Lesser* (namely those many little Ones surrounding *Britain*) I shall begin with the former, comprehending in them three distinct Kingdoms, and one Principality. And since our manner of Travelling through the various Countries on the Continent of *Europe*, hath been still to proceed from *North* to *South*, I shall therefore continue the aforesaid Method in Surveying the Isle of *Great Britain*; having no other Regard to the Two Grand *Sovereignities* therein, than the bare Situation of them: Begin we therefore with the Northern Part of the Island, *viz.*

SCOTLAND.

These are the various Divisions of Scotland, according to the best Maps, and the manner how they are found. But since that Kingdom is ordinarily divided into Sheriffdoms, Stewarties, Bailiaries, and one Constabulary, we shall also consider it in that Respect; and seeing each of those Sheriffdoms and Stewarties, &c. comprehend either a part, or one, or more of the aforefaid Divisions, we shall here subjoin all the Sheriffdoms and Stewarties, &c. of the whole Kingdom, and annex to each of them their whole Content, whether more or less. Therefore,

| | | | |
|---------------------------------------|-------------|------------|--|
| Sheriffdoms of Scotland are, those of | Edinburgh | Containing | Middle Lothian. |
| | Barwick | | The Mers and Bailiary of Lauderdale. |
| | Peeblis | | Tweeddale. |
| | Shelkirk | | The Forest of Etorrick. |
| | Wigton | | The N. and W. Parts of Galloway. |
| | Renfrew | | The Barony of Renfrew. |
| | Lanerick | | Clydisdale. |
| | Dumbritton | | Lenox. |
| | Bute | | Isles of } Bute. |
| | Striveling | | Arran. |
| | Linlithgow | | Striveling, on both sides the River Forth. |
| | Clackmannan | | West Lothian. |
| | Kinross | | A little of the E. parts of Strivelingshire. |
| | Couper | | A little of the W. parts of Fife. |
| | Forfar | | The rest of Fife. |
| | Kinkardin | | Angus, with its Pertinents. |
| | Elgin | | Merns. |
| | Nairn | | The Eastern parts } of Murray. |
| | Weik | | The Western parts } |
| | Orkney | | Caithnefs. |
| | | | Isles of } Orkney. |
| | | | Shetland. |

Sheriffdoms of Scotland, are those of

| | | |
|--------------------------|------------|--|

Fife.
Angus.
Perth.

Bailiaries are {
Kyle ——— }
Carrick ——— }
Cunningham ——— }
Lauderdale ——— }
Contain {
Kyle.
Carrick.
Cunningham.
Lauderdale.

The one Constabulary is that of *Haddinton*, containing *East-Lothian*.

Name.] *Scotland* [the famous ancient *Caledonia*; and bounded on the East by part of the *German Ocean*; on the West and North by the *British Sea*; and on the South by *England*] is termed by the *Italians*, *Scotia*; by the *Spaniards*, *Escotia*; by the *French*, *Escoffe*; by the *Germans*, *Scotland*; by the *English*, and its own Natives, *Scotland*; so called, as some fondly imagine, from *Scota*, (Daughter to an *Egyptian Pharaoh*) but more probably from *Scoti*, *Schytti*, or *Scythi*, a People of *Germany* (over the Northern Parts of which the Name of *Scythia* did once prevail) who seized on a part of *Spain*, next to *Ireland*, and from thence came into the Western Parts of this Country.

Air.] The *Air* of this Country is generally very pure, and so extraordinary wholesome to breathe in, that several Persons in the Northmost Parts of that Kingdom do frequently arrive to greater Ages than is usual in other Nations of *Europe*. The opposite Place of the Globe to *Scotland*, is that part of the *Pacifick Ocean*, between 190 and 196 Degrees of Longitude, with 56 and 60 Degrees of South Latitude.

Soil.] Notwithstanding this Country is of a Situation considerably Northern (it lying in the 11th, 12th, and beginning of the 13th North Climate) yet it produceth all Necessaries, and many of the Comforts of Human Life. Its Seas are wonderfully stor'd with most Kinds of excellent Fish; its Rivers do mightily abound with the choicest of Salmors; its Plains do sufficiently produce most Kinds of Grain, Herbs and Fruits; and many of its Mountains are not only lin'd with valuable Mines, and the best of Coals, but also several of them are so cover'd over with numerous Flocks, that great Drovers of Cattle do yearly pass into the *North* of *England*. The longest Day in the North-most Part of this Country is about eighteen Hours and a half, the shortest in the South-most six Hours and a half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are, most sorts of Fish in great Abundance, much Linnen-Cloth and Tallow, vast Numbers of Cattle and Hides; as also excellent Honey, Lead, Oar, Iron, Train Oil, Coarse Cloths, Frizes, &c.

Rarities.] In *Clydsdale* are yet to be seen, for several Miles, the Remains of a large *Roman Causeway*, or Military-way, which commonly goes now by the Name of *Watling-street*. And in *Tiviotdale* are some *Vestigia* of *Roman* Encampments, and another Military-way, vulgarly term'd the *Rugged Causeway*. (2.) In the *Stewarty*

arty of *Strathern*, are visible Tracts of several Roman Camps, especially that at *Ardoch*. (3.) In *Sterlingshire* are divers Marks of the same Roman Wall (now commonly call'd *Grabani's Dyke*) which was extended over the *Isthmus*, between the Rivers of *Forth* and *Clyde*: Its Form, and Manner of Building, will best appear by a Draught thereof; for which, Vid. *Cambden's Britannia*, late Edition, p. 959. (4.) In *Sterlingshire* were likewise found some Inscriptions upon Stones relating to the Roman Wall; particularly Two; one whereof is now at *Calder*, and informs us, that the *Legio secunda Augusta*, built the said Wall upwards of three Miles; and another in the Earl *Marjbal's* House at *Dunnotyr*, which hints that a Party of the *Legio vicesima victrix*, continu'd it for three Miles more. As for the Inscriptions themselves, Vid. *Cambd.* p. 920, and 1101. (5.) Hard by the Tract of the aforesaid Wall in *Sterlingshire*, are yet to be seen two pretty Mounts, term'd by the Ancients, *Duni pacis*; as also the Remains of an ancient Building in form of a Pyramid (now call'd by the Vulgar *Arthur's Oven*) which many reckon to have been a Temple of the God *Terminus*. (6.) Near *Paisley* and *Renfrew* are the Vestigia of a large Roman Camp; the Fosses and Dykes about the *Pratorium* being still visible. Here is also to be seen a remarkable Spring which regularly ebbs and flows with the Sea. (7.) Nigh to the City of *Edinburgh* is a noted Spring, commonly call'd the *Oily-Well*. The Surface of its Waters being cover'd with a kind of Oyl or Bitumen, which is frequently us'd, with good Success, in curing Scabs, and Pains proceeding from Cold. (8.) Near the same City is another Fountain, which goes by the Name of the *Rowting-Well*, because it usually makes a Noise before a Storm. (9.) Near *Brechin* in *Angus*, where the *Danes* receiv'd a mighty Overthrow) is a high Stone, erected over their General's Grave, call'd *Camus-Cross*; with another about ten Miles distance, both of them having antique Letters and Figures upon 'em. (10.) At *Slains* in *Aberdeenshire*, is a remarkable petrefying Cave, commonly call'd the *Dropping-Cave*, where Water ouzing thro' a spongy porous Rock on the Top, doth quickly consolidate after it falls in Drops to the Bottom. (11.) Near *Kinross* in *Murray*, is to be seen an Obelisk of one Stone, set up as a Monument of a Fight between King *Malcolm*, Son of *Keneth*, and *Sueno* the *Dane*. (12.) On the Lord *Lowat's* Lands in *Stratherrick*, is a Lake which never freezeth all over before the Month of *February*; but after that Time, one Night's Frost will do it. There's also another, call'd *Lough-Monar* (belonging to the late Sir *George Mackenzy*) just of the same Nature with the former, and a third at *Glencanigh* in *Strathglass*, which never wants Ice upon the middle Part of it, even in the hottest Day of *Summer*. (13.) Towards the Northwest part of *Murray*, is the famous *Lough-Ness*, which never freezeth; but retaineth its natural

Heat, even in the extreameſt Cold of Winter; and in many Places this Lake hath been ſounded with a Line of 500 Fathoms, but no Bottom found. (14.) Nigh to *Lough-Neſs* is a large round Mountain (call'd *Meal-fuor vouny*) about two Miles of perpendicular Height from the Surface of the *Neſs*; upon the very Top of which Mountain is a Lake of cold freſh Water, often ſounded with Lines of many Fathoms, but never could they reach the Bottom. This Lake having no viſible Current running, either to it, or from it, is equally full all Seasons of the Year; and it never freezeth. (15.) On the Top of a Mountain in *Roſs* (call'd *Scurein-Lappich*) is a vaſt heap of large white Stones, moſt of them clear like Chryſtal; as alſo great plenty of Oyſter-Shells, and Shells of other Sea Animals, yet twenty Miles from any Sea. (16.) In *Lennox* is *Lough-Lomond*, which is every whit as famous among the vulgar, not only for its floating Iſland, but alſo as having Fiſh without Finns, and being frequently tempeſtuous in a Calm. (17.) In divers Parts of Scotland are ſome noted Mineral Springs, particularly thoſe at *Kingborn* and *Balgrigy* in *Eiſe*; as alſo *Aberdeen* and *Peterhead* in *Aberdeenſhire*; ſeveral of which come little ſhort of the Famous *Sparw-Water* in the Biſhoprick of *Leige*. (18.) In moſt Counties of this Kingdom, are many circular Stone-Monuments, (being a Company of prodigious long Stones ſet on end in the Ground, and that commonly in form of a Circle) which are probably conjectured to have been either Funeral Monuments, or Places of Publick Worſhip, in Times of the antient *Druides*, or both. Laſtly, South-Weſt of *Swinna* (one of the *Orcades*) are two dreadful Whirl-pools in the Sea, commonly term'd the *Wells* of *Swinna*, with another between *Yla* and *Jura* (two of the *Western Iſlands*) during the firſt three Hours of Flood; all of 'em are very terrible to Paſſengers, and probably occaſion'd by ſome ſubterranean Hiatus.

Archbiſhopricks.] Archbiſhopricks in this Kingdom are Two, viz. thoſe of

St. Andrews,

Glaſcow.

Biſhopricks.] Biſhopricks in this Kingdom are Twelve, viz. thoſe of

Edinburgh,
Dunkeld,
Aberdeen,

Murray,
Briſchen,
Dumblain,

Roſs,
Cathneſs,
Orkney,

Galloway,
Argile,
The Iſles.

Universities.] *Universities* of this Kingdom are Four, viz, those of

St. Andrews,
Aberdeen,

Edinburgh,
Glasgow.

Manners.] The *Scots* (for the most part) are an Active, Prudent and Religious sort of People. Many abominable Vices, too common in other Countries, are not so much as speculatively known among 'em. They generally abhor all kinds of Excess in Drinking, and effeminate Delicacy in Diet, chusing rather to improve the Mind, than pamper the Body. Many of 'em make as great Advances in all parts of ingenious and solid Learning, as any Nation in *Europe*. And as for their singular Fidelity (altho' slanderously spoken of by some) 'tis abundantly well known, and experienced abroad; for an undoubted Demonstration thereof is publicly given to the whole World, in that a neighbouring Prince, and his Predecessors (for almost 300 Years) did commit the immediate Care of their Royal Persons to them, without ever having the least Cause to repent, or real Ground to change.

Language.] The *Language* commonly spoken in the North and North-West of this Country, is a Dialect of the *Irish*, corruptly call'd *Erse* (a Specimen of which shall be given when we come to *Ireland*.) In all other Parts of the Kingdom they use the *English* Tongue; but that with considerable Difference of Pronunciation in different Counties, and all disagreeing with that in *England*; except the Town of *Inverness*, whose Inhabitants are the only People who come nearest to the true *English*, however the Gentry and Persons of good Education, usually speak *English* (tho' not with the same Accent as in *England*) yet according to its true Propriety, and their manner of Writing is much the same. The vulgar Language (commonly call'd *Broad Scotch*) is indeed a very corrupt sort of *English*, and hath a great Tincture of several foreign Tongues, particularly the *High-German*, *Low-Dutch*, and *French*, especially the last, a great many Words still in Use among the Commonalty, being originally from that Language. For a Specimen of which Tongue, *Pater Noster* in it runs thus: Ure Fader whilk art in Heven; ballued be thy Neme; thy Kingdom cumm, thy Wull be doon in Earth az its doon in Heven. Gee us this day ure daily Breed, and forgee us ure Sinns, az we forgee them that sinn against us; and leed us nat into temptation, batt deliver us frae evil. Ameen.

Government.] This Kingdom hath hitherto had the good Fortune to enjoy an Hereditary limited Monarchy; tho' many times the

immediate Heir, or next in Blood, hath been set aside, and another more remote hath mounted the Throne. Since its Union with *England*, both Kingdoms are under one King, who is stiled the *Monarch of Great Britain*. The Government of this Kingdom is chiefly managed by a Council of State, or Privy Council, consisting of those called properly *Officers of State*, and others of the Nobility and Gentry, whom the King pleaseth to appoint. The *Officers of State* are eight in number, viz. the Lord High Chancellor, Lord High Treasurer, Lord President of the Council, Lord Secretary of State, Lord Treasurer-Deputy, Lord Register, Lord Advocate, and Lord Justice Clerk. The Administration of Justice in Civil Affairs, is lodg'd in the *Lords of the Session*, who are 15 in Number, whereof One is President, and to these are join'd some Noblemen, under the Name of *extraordinary Lords of the Session*. This Court is esteem'd one of the most August and Learned Judicatories in *Europe*: From it there lies no Appeal but to the Parliament, which is now made up of the Peers, the Commissioners of Counties, and those of Free Boroughs. The King's Person is always represented in Parliament by some Nobleman, who bears the Title of *Lord High Commissioner*. The Distribution of Justice in Criminal Matters is committed to the Court of Justice, which is composed of the Lord Justice General, the Lord Justice Clerk, and five or six other Lords of the Session, who in this Bench are call'd Commissioners of Judicatory. Over and above these two Supreme Courts of Justice, there are a great many subordinate Judicatories, both for Civil and Criminal Affairs thro' the Kingdom, as Sheriff-Courts, Courts of Legality, and the like.

Arms.] The Royal Arms of this Kingdom, together with those of *England* and *Ireland* (as they compose the Ensigns Armorial of the Monarch of *Great Britain*) shall be particularly express'd when we come to *England*.

Religion.] The Inhabitants of this Country (excepting a few, who still adhere to the Church of *Rome*, and an inconsiderable Number of Quakers) are all of the Reform'd Religion, yet with considerable Variation among themselves in some private Opinions, and various Points of Church Discipline: However, the numerous Professors thereof are very sincere in their Principles, and do generally practise conformable to their Professions. No Christian Society in the World excels them for their exact Observation of the Sabbath-day; and few can equal them, for their singular Strictness and Impartiality, in punishing Scandals: But lamentable are their Distractions of late, in Matters relating to *Ecclesiastical Policy*; and how fatal such Heats and Divisions, both in this, and

and the neighbouring Kingdom, may prove at last, is, alas! but too well known to all thinking Persons among us. The smallest Privateer belonging either to *Brest*, or *St. Malos*, may easily Attack, Board, and Sink, the *Royal Britannia* her self, if she chance only to spring a Leak under Water, when her whole Crew are at Blows between Decks. The Christian Faith (according to the best Accounts) was planted in this Country, during the Reign of *Dioclesian*; for by Reason of that violept Persecution he raised in the Church, many Christians are said to have fled from the Continent into the Isle of *Great Britain*; and particularly (as an ancient Author expressly testifieth) into that Part thereof, *In quam Romana Arma nunquam penetrarunt*; which (without all doubt) is *Scotland*; especially the Northern Parts of that Country, they being still possess'd by the *Scots*, and never subject to the *Roman Power*. *St. Rule*, or *Regulus*, is said to have brought over with him the *Arm*, or (as some affirm) the *Leg* of *St. Andrew* the Apostle, and to have buried it in the Place where now the City of *St. Andrews* stands. These first Propagators of Christianity seem to have been a kind of Monks, who afterwards, by the Beneficence of the first Christian Kings of *Scotland*, came into the Seats and Possessions of the *Pagan Druides* (a sort of Religious Votaries to the Heathen Gods) and had their principal Residence, or rather Monasteries, in the Islands of *Man* and *Jona*, and passed under the Name of *Culdees*.

| | | Carmarthenshire ——— | | | Carmarthen ——— | |
| | | Pembrokeshire ——— | | | Pembroke ——— | |
| | | | | | | |
| 4. Those of | { | Radnorshire ——— | Chief Town | { | Radnor ——— | } N. to S. W. |
| | | Brecknockshire ——— | | | Brecknock ——— | |
| | | Glamorganshire ——— | | | Cardiff ——— | |
| | | | | | | |

Besides the Six Circuits of *England* (containing thirty eight Counties) and those Four of *Wales*, comprehending twelve; there remain as yet two Counties unmention'd, and which are not ordinarily reduc'd to any of these Circuits, viz. *Middlesex* and *Cheeshire*; the first because of its Vicinity to *London*, and the other as being a County-Palatine, having its own Judges and Counsellors peculiar to it self. These two Counties, with the thirty eight above-mention'd in *England*, and twelve in *Wales*, make fifty two in all. But since *England* and *Wales* are two distinct Sovereignities (one being a Kingdom, and the other a Principality) we shall separately treat of them both.

Therefore,

ENG-

E N G L A N D.

Name.] *E*ngland [the Ancient *Anglia*, which, with the rest of the Island, made up the renown'd *Britannia*, or *Albion*; and now bounded on the East by part of the *German Ocean*; on the West by *St. George's Channel*; on the North by *Scotland*; and on the South by the *English Channel*] is term'd by the *Italians*, *Inghilterra*; by the *Spaniards*, *Inglatierra*; by the *French*, *Angleterre*; by the *Germans*, *Engelland*; and by the *Natives*, *England*; which Name is deriv'd from the *Angles*, a People of *Lower Saxony*, who conquer'd the greatest part of this Country, and divided the same into seven different Kingdoms. But *Egbert* (descended from the *Angles*) having united this divided Nation, and being the first Monarch of *England*, after the *Saxon Heptarchy*, order'd (by special Edict, above 800 Years after the Incarnation) that the whole Kingdom should be term'd *Engle-land*, which Title, in process of Time, hath turn'd into the present Name of *England*.

Air.] The *Air* of this Country is far more Mild, Sweet and Temperate, than in any part of the Continent under the same Parallel. The Cold during the *Winter* is not so piercing, nor the Heat in the *Summer* so scorching, as to recommend (much less to enforce) the use of Stoves in the one, or Grotto's in the other. The opposite Place of the Globe to *England*, is that part of the *Pacifick Ocean*, between 200 and 210 Degrees of Longitude, with 50 and 56 Degrees of South Latitude.

Soil.] This Country (lying in the 9th, 10th, and 11th North Climate) is generally so fertile, and produceth such Plenty of Grain, Fruits, Roots, Herbs, &c. that the Excellency of its *Soil* is best declared by those transcendent Elogies deservedly bestow'd on her, both by Ancient and Modern Writers, who call *England* the *Granary of the Western World*, the *Seat of Ceres*, &c. that her Vallies are like *Eden*, her Hills like *Lebanon*, her Springs as *Pisgah*, and her Rivers as *Jordan*; that she's a *Paradise of Pleasure*, and the *Garden of God*. The longest Day in the Northmost Parts is about 17 Hours $\frac{1}{2}$, the shortest in the Southmost is almost 8 Hours; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Corn, Cattle, Tin, Copper, Lead, Iron, Timber, Coals, abundance of Wool, Cloth, Stuffs, Linnen, Hides, Tallow, Butter, Cheese, Beer, &c.

Naris

Rarities.] In most Counties of this Kingdom are still extant some noted Circular *Stone Monuments* (like those in *Scotland* above-mentioned, p. 198.) particularly, the Seventy seven Stones at *Saleeds* in *Cumberland*, commonly term'd *Long Meg* and her Daughters; those call'd *Roll-rich Stones* in *Oxfordshire*; those near *Ehisham* in *Northumberland*; those upon the River *Loder* in *Westmorland*; those near *Burrowbridge* in *Yorkshire*; those near *Exmore* in *Devonshire*; those at *Stanton Drew* in *Somersetshire*; and finally, the *Hurlers*, and those at *Biscaw-woun* in *Cornwal*, &c. But most observable of all is *Stone-henge* (the *Chorea Gigantum* of the Ancients) on *Salisbury Plain*; which Monuments are thought by some to consist of Natural Stones, by others of Stones artificially compounded of pure Sand, Lime, Vitriol, and other unctuous Matter. But if the Reader desire to see the various Conjectures of the Curious, concerning the Nature and Design of all such Monuments, together with the Draught of *Stone-henge* in particular, let him consult the late Edition of *Cambden's Britannia*, p. 23, 95, 108, 269. (2.) In many Parts of *England* are yet to be seen the *Vestigia*, and Remains of divers *Roman Military Ways*; the principal of which is that mention'd in *Leland's MS.* beginning at *Dover*, and passing thro' *Kent* to *London*, from thence to *St. Albans*, *Dunstable*, *Stratford*, *Toucester*, *Littlebourn*, *St. Gilbert's Hill* near *Shrewsbury*, then by *Stratton*, and so thro' the middle of *Wales* to *Cardigan*. (3.) In this Country are abundance of *Medicinal Waters*; whether for *Bathing*, as those especially in *Somersetshire* (call'd the *Baths*, καὶ ἑξοχὴν) or *Purging*; particularly those of the *Spaw* in *Yorkshire*; *Tunbridge* in *Kent*; *Ebisham* and *Dullege* in *Surrey*; *Northall*, *Acton* and *Islington* in *Middlesex*. Here also are many other very remarkable *Springs*; whereof some are mightily impregnated either with *Salt*, as that at *Durtwich* in *Worcestershire*; or *Sulphur*, as the famous Well at *Wiggin* in *Lancashire* (of which afterwards) or *Bituminous Matter*, as that at *Pitchford* in *Shropshire*. Others have a *Petresying Quality*, as particularly that near *Lutterworth* in *Leicestershire*; and the remarkable *Dropping-Well* in the *West-Riding* of *Yorkshire*. And finally, some ebb and flow, but that generally in a very irregular manner, as those of *Peak-Forest* in *Derbyshire*, and *Lay-well* near *Torbay*, whose Waters rise and fall several Times in an Hour. To these we may add that remarkable Fountain near *Richard's Castle* in *Herefordshire*, commonly call'd *Bone-Well*, which is always full of small Fish or Frog-bones (or such Resemblances) though frequently empty'd and clear'd of them. (4.) Many are the *Roman Altars* which from time to time are dug up in this Kingdom, especially the Northern Parts thereof. As for their particular Shapes, and remarkable Inscriptions, with the Places where now to be seen, *vid. Cambden's late Edition*, pag. 568, 570, 734, 782, 783, 826, 830, 844, and from 848 to 852, inclusively. (5.) In several Places

Places between *Carlisle* and *Newcastle*, are some Remains of the famous *Picti-Wall* (so much talk'd of by our *English* Historians) which did run thro' *Cumberland* and *Northumberland*, beginning at *Tinmouth-Bar*, and ending at *Solway-Frith*. (6.) Crossing the middle of *Wiltshire* from East to West, is a mighty Ditch, commonly term'd *Wansdike*, or *Wodensdike* (so call'd from the *Saxon* God *Woden*) and design'd, it seems, either as a Boundary to distinguish Territories, or as a Fence to guard against a neighbouring Enemy. There are also in *Cambridgeshire* plain Tracts of those large *Ditches*, thrown up by the *East-Angles*, to prevent the Incursions of the *Mercians*, who frequently ruin'd all before 'em. And nigh to the Town of *Cambridge*, are some *Vestigia* of two spacious *Camps*, one *Roman* at *Arborough* (a Mile North of *Cambridge*) and the other at *Gogmagog Hills*, on the other side of the Town. (7.) Near *Wiggin* in *Lancashire*, is the remarkable Well abovemention'd, which being empty'd, there presently breaks out a sulphurous Vapour, which makes the Water bubble up as if it boil'd, and a Candle being put thereto, it instantly takes Fire and burns like Brandy. During a Calm, the Flame will continue a whole Day, and by its Heat they can boil Eggs, Meat, &c. and yet the Water it self is cold. (8.) In *Whinfield Park* in *Westmorland*, is the *Three-Brother Tree*, so call'd, because there were 3 of 'em (the least whereof is this) which a good way from the Root is 13 Yards and a half in Circumference. (9.) At *Brosely*, *Bently* and *Pitchford*, with other Places adjacent in *Shropshire*, is found over most of the Coal-pits, a *Stratum* of blackish porous Stone, much impregnated with bituminous Matter; which Stone being pulverized and boil'd in Water, the bituminous Substance riseth to the Top, and being gather'd off, it comes to the Consistency of Pitch, and is us'd for such with good Effect. (10.) In *Derbyshire* is the famous *Peak*, and some hideous *Cavities*, as those call'd *Pool's-Hole*, *Elden-Hole*, and another which goes by the indecent Name of the *Devil's-Arse*. In the first of these is dropping Water of a petrefying Nature; and at a small Distance from it, a little clear Brook, remarkable for consisting of both hot and cold Water, so joyned in the same Stream, that a Man may at once put the Finger and Thumb of the same Hand, one in hot, and the other in cold. For a full and satisfactory Account of the *Peak*, and the many *Wonders* thereof, see (besides the last Edition of *Cambden*) such Authors as have particularly treated on that Subject, especially *Cotton*, and *Hobbs*, with the late Book of Dr. *Leigh*. (11.) Near *Whitby*, in the *North Riding* of *Yorkshire*, are found certain Stones resembling the Folds and Wreaths of a Serpent. And at *Huntley-Nabb* in the same Riding, are other Stones of several Sizes, and so exactly round, as if artificially made for Cannon-Balls, which being broken, do commonly contain divers stony Serpents, wreathed in Circles, but generally without Heads. (12.) Near *Alderley* in *Gloucestershire*, and on the

the Tops of Mountains not far from *Richmond*, with several other Parts of *England*, are Stones resembling Cockles, Oysters, and divers other Water-Animals, which if once living Creatures, or the ludicrous Fancy of Nature, is not now my Business to enquire. (13.) In *Mendippe-hills* in *Somersetshire*, is a prodigious Cave, call'd *Ocky-hole*, which being of a considerable length, in it are discover'd some Wells and Rivulets. (14.) At *Glassenbury* in *Somersetshire*, are several ancient Pyramids, mention'd by *William of Malmesbury*, with imperfect Inscriptions; but why, when, and by whom erected, is meerly conjectural. (15.) In the Cathedral of *Exeter*, is an Organ, which is reckon'd the largest of any in *England*, the greatest Pipe belonging to it being 15 Inches Diameter, which is more by two than the celebrated Organ of *Ulm*. (16.) In *Dover-Castle* is an old Table hung up, which imports, that *Julius Caesar* landed upon that part of the *English* Coast. (17.) Near to *Feversham* in *Kent*, and *Tilbury* in *Essex*, are vast artificial Pits, some of them narrow at the Top, but very large within; and thought to be divers of those out of which the ancient *Britains* commonly us'd to dig Chalk, to mix with their Grounds. (18.) About *Belvoir-Castle* in *Lincolnshire*, and *Shugbury* in *Warwickshire*, is found the *Astroites*, or *Star-stone*, resembling little Stars with five Rays. (19.) In *Shropshire* is that large Hill term'd *Caer-Caradock*, famous in formertimes for being the Scene of that memorable Action between *Ostorius* the Roman, and *Caratacus* the Britain, whereof *C. Tacitus* has given us a particular Account. (20.) Near to the City of *Winchester*, as also in the North of *Westmorland*, is a round Entrenchment, with a plain Piece of Ground in the middle, commonly term'd *King Arthur's round Table*, and much talk'd of by the Vulgar; but for their Original and Design we need go no farther than those Ages when *Tilting* was in vogue in *England*. Lastly, in the County of *Surrey* is the *English Amas*, or the *River Mole*, which loseth it self under Ground, and ariseth again at some considerable Distance; as doth also *Recall* in the North Riding of *Yorkshire*, *Cambden*, p. 155, and 754. To these Rarities above-mention'd, I might here add some stupendous Fabricks in this Kingdom, which may be fitly term'd *Arts Master-pieces*; but to descend to Particulars, would swell this Paragraph to a disproportionable Bigness.

Archbishopricks.] Archbishopricks in this Kingdom are Two, viz. those of

Canterbury and *York*.

The Archbishop of *Canterbury* hath the Precedency of *York*, and is stil'd *Primate* of all *England*, the other being also *Primate* of *England*, but not of all *England*. A Controversy hotly debated between these two Archiepiscopal Sees, but at last determin'd in favour of the former.

Bishops

Bishopricks.] *Bishopricks* in this Kingdom (including *Wales*) are those of

| | | |
|------------------------|----------------------|---------------------------------|
| <i>London,</i> | <i>Chichester,</i> | <i>Carlisle,</i> |
| <i>Durham,</i> | <i>Salisbury,</i> | <i>Exeter,</i> |
| <i>Winchester,</i> | <i>Worcester,</i> | <i>Chester,</i> |
| <i>Bath and Wells,</i> | <i>Lincoln,</i> | <i>Bristol,</i> |

| <i>Rocheſter,</i> | <i>Peterborough,</i> | <i>Hereford,</i> |
| <i>Ely,</i> | <i>Landaff,</i> | <i>Litchfield and Coventry.</i> |

In Point of Place, after the two Archbishops followeth the *Bishop* of *London*, next to him the *Bishop* of *Durham*; 3dly, the *Bishop* of *Winchester*, and then all the rest according to the Seniority of their Consecration.

Universities.] *Universities* of this Kingdom, are those famous Seats of the *Muses*, or two Eyes of *England*, term'd *Oxford* and *Cambridge*, which for magnificent Buildings, rich Endowments, ample Privileges, as also number of Students, Libraries and learned Men, are inferior to none, or rather, not to be parallell'd by any in the World. The Names of the respective Colleges and Halls in each of these Universities, (the most of which do surpass many of our foreign Universities) are as followeth,

| In <i>Oxford</i> are | | In <i>Cambridge</i> are |
|-----------------------|------------------------|-----------------------------------|
| <i>University,</i> | <i>Magdalen,</i> | <i>Peter-House,</i> |
| <i>Baliol,</i> | <i>Brazen Nose,</i> | <i>Clare-Hall,</i> |

Manners.] The *English* being originally a Mixture of divers Northern and Southern Nations, do still retain in their Humour, a just *Mean* betwixt those two Extreams ; for the dull *Saturnine Genius* of the one, and the hot *Mercurial Temper* of the other, meeting in their *Constitutions*, render 'em *Ingenious* and *Active*, yet *Solid* and *Persevering* ; which nourish'd under a suitable *Liberty*, inspires a *Courage* both generous and lasting. This happy Temperament of *Spirit*, wherewith this *People* is endu'd, doth eminently appear to the World, by that mighty *Inclination* they always had and still have both to *Arms* and *Arts*, and that wonderful *Progress* they have hitherto made in each of 'em : For the matchless *Valour* and *Bravery*, the singular *Prudence* and *Conduct* of the *English* Nation both by *Sea* and *Land*, is so universally known, and hath been so frequently manifested in most Parts of the World, that many Potent *States* and *Kingdoms* have felt the *Dint* of their *Sword*, and been constrained to yield to the *Force* of their *Arms*. They have also so effectually apply'd themselves to all sorts of *Ingenious Literature* since the happy Days of our Reformation, and are advanc'd to such a *Pitch* of true and solid *Learning* ; that they may justly claim a true *Title* to the *Empire* of *Humane Knowledge*. Finally, their manner of *Writing* (whether for *Solidity* of Matter, *Force* of Argument, or *Elegancy* of *Stile*) is indeed so transcendently excellent, that no Nation hath yet surpass'd the *English*, and none can justly pretend to equal them.

Language.] The *English Language* being a Mixture of the old *Saxon* and *Norman*, (one a Dialect of the *Teutonic*, and the other of the *French*) having also some *Tincture* of the ancient *British Roman*, and *Danish* Tongues, is much refin'd of late, and now deservedly reckon'd as *Copious*, *Expressive*, and *Manly* a *Tongue*, as any in *Europe*. Harangues in this *Language* are capable of all the delightful *Flowers* of *Rhetorick*, and lively *Strains* of the truest *Eloquence*, nothing inferior to the most fluent *Orations* pronounced of old by the best of the *Roman* Orators : In a Word, 'tis a *Language* that's rightly calculated for the *Masculine Genius* of those who own it. *Pater Noster* in the *English* Tongue runs thus : *Our Father, which art in Heaven, &c.*

Government.] The *Kingdom of England* is a famous Ancient and Hereditary *Monarchy* ; a *Monarchy* which can seldom admit of any *Interregnum*, and therefore is free from many Misfortunes, to which Elective *Kingdoms* are subject ; yea, such a *Monarchy* (in the Words of that worthy Gentleman, Dr. *Chamberlain*, Author of the *Present State of England*) as that by the necessary subordinate Concurrence of the *Lords* and *Commons* in making and repealing of Statutes or *Acts* of *Parliament*, it hath the main Advantages of an *Aristocracy* and *Democracy*,

mocracy, and yet free from the Disadvantages and Evils of either. In short, 'tis a Monarchy (continues the aforesaid Author) as by most admirable Temperament, affords very much to the Industry, Liberty and Happiness of the Subject, and reserves enough for the Majesty and Prerogative of any King, who will own his People as Subjects, not as Slaves. Chief Persons of this Realm, after the King and Princes of the Blood, are *the Great Officers of the Crown*, who are commonly reckon'd Nine in Number, viz. (1.) The *Lord High Steward of England*; an Officer indeed so great, and whose Power was esteem'd so exorbitant, that it hath been discontinu'd ever since the Days of *John of Gaunt*, Duke of *Lancaster* (his Son *Henry of Bullingbrook* being the last who had a State of Inheritance in that high Office) and is now confer'd by the King upon some of the chief Peers only, *pro illa vice*, as upon occasion of the Crowning of a new King, or the Arraignment of a Peer of the Realm for Treason, Felony, or such like. (2.) The *Lord High Chancellor*, whose Office is to keep the King's Great Seal, to moderate the Rigour of the Law in judging according to Equity, and not according to the Common Law. He also dispolet of all Ecclesiastical Benefices in the King's Gift, if valued under 20 *l.* a Year, in the King's Book. In case there be no Chancellor, then the Lord Keeper is the same in Authority, Power and Precedence, only different in Patent. (3.) The *Lord High Treasurer*, whose Office (as being *Præfectus Æarii*) is to take charge of all the King's Revenue kept in the Exchequer, as also to check all Officers employ'd in collecting the same, and such like. This Office is frequently executed by several Persons conjunctly in Commission (term'd *Lords of the Treasury*.) (4.) The *Lord President of the Council*, whose Office is to attend upon the King, and Summon the Council, to propose Business at the Council-Table, and Report the several Transactions of the Board. (5.) The *Lord Privy Seal*, whose Office is to pass all Charters and Grants of the King, and Pardons sign'd by the King, before they come to the Great Seal of *England*; as also divers other Matters of smaller Moment, which do not pass the Great Seal. But this Seal is never to be affix to any Grant without good Warrant under the King's Privy-Signet, nor even with such Warrant, if the Thing granted be against Law or Custom, until the King be first acquainted therewith. (6.) The *Lord Great Chamberlain of England*, whose Office is to bring the King's *Skirt, Coif, and Wearing Cloaths*, on the Coronation-Day; to put on the King's Apparel that Morning; to carry at the Coronation the *Coif, Gloves, and Linnen*, which are to be used by the King on that Occasion; likewise the *Sword and Scabbard*, as also the *Gold* (to be offer'd by the King) together with the *Robe Royal* and *Crown*; to Undress and Attire the King with his Royal Robes; to serve the King that Day with Water to wash his Hands

Hands before and after Dinner. (7.) The *Lord High Constable of England*, an Officer, whose Power is so great, that 'twas thought inconvenient to lodge the same in any Subject since the Year 1521. and is now conferr'd on some of the chiefest Peers, *pro re nata*; as upon occasion of *Coronations*, or *Solemn Trials* by Combat. (8.) The *Earl Marshal of England*, whose Office is to take Cognizance of all Matters of War and Arms; to determine Contracts concerning Deeds of Arms out of the Realm upon Land, and Matters touching Wars within the Realm, which the *Common-Law* cannot determine. (9.) The *Lord High Admiral of England*, whose Trust and Honour is so great, that this Office hath been usually given either to some of the King's younger Sons, near Kinsmen, or one of the chiefest Peers of the Realm: To him is committed the Management of all Maritime Affairs, the Government of the King's Navy; a decisive Power in all Causes *Maritime*, as well *Civil* as *Criminal*. He also commissions, *Vice-Admirals*, *Rear-Admirals*, *Sea-Captains*, &c. and enjoys a Number of Privileges; too many here to be mention'd. This Office is commonly executed by several Persons conjunctly in Commission, (term'd *Lords of the Admiralty*.)

After the *Officers of the Crown*, we might here subjoyn the various *Courts of Judicature* establish'd in this Kingdom, especially the *High Court of Parliament*, which is Supreme to all others, and to whom all last Appeals are made. I might here likewise mention all the *Subordinate Courts* of this Realm, particularly that of the *King's-Bench*, the *Court of Common-Pleas*, the *High Court of Chancery*, the *Exchequer*, and the *Court of the Dutchy of Lancaster*, &c. as also the *Ecclesiastical Courts* in Subordination to the Archbishop of *Canterbury*; as the *Court of Arches*, the *Court of Audience*, the *Prerogative Court*, the *Court of Faculties*, and that of *Peculiars*. But to declare the *Nature* and *Constitution*, the ample Privileges, and manner of Procedure in each of them, would far exceed the narrow Bounds of an Abstract. I shall not therefore descend to Particulars, only adding to this Paragraph, that, besides these various Courts abovemention'd, the King, consulting the Ease and Welfare of the Subject, administers Justice by his Itinerant Judges, and that in their yearly Circuits thro' the Kingdom; and for the better governing of, and keeping the King's Peace in particular *Counties*, *Hundreds*, *Cities*, *Boroughs* and *Villages* of this Realm, *Counties* have their respective Lord Lieutenants, Sheriffs, and Justices of the Peace; *Hundreds*, their Bailiffs, High-Constables, and Petty-Constables; *Cities*, their Mayor, Aldermen, Sheriffs, &c. *Boroughs* and *Towns* Incorporate, have either a Mayor, or two Bailiffs, or a Port-reeve, who in Power are the same with Mayor and Sheriffs; and during their Offices, are Justices of the Peace within their own Liberties. And lastly, *Villages* are in Subjection to the *Lord of the Mannor*, under whom is the *Constable* or *Head-*

borough, to keep the Peace, apprehend Offenders, and bring 'em before the Justice. Of such an admirable Constitution is the *English Government*, that no Nation whatsoever can justly pretend to such a Model, and no People in the World may live more happy if they please; so that it may be justly affirm'd of 'em, what the Poet saith in another Case, only with Change of Persons.

*O fortunatos nimium, sua si bona nōrint,
Anglicanos ! ———*

Arms.] The Ensigns Imperial of the Monarch of Great Britain, are in the first place, *Azure, Three Flower-de-Luces, Or*; the Royal Arms of France quartered with the Imperial Ensigns of England, which are *Gules, Three Lyons Passant Gardant in Pale, Or*. In the second place, within a double tressure Counter flower'd de lys Or, a *Lyon Rampant, Gules*, for the Royal Arms of Scotland. In the third place, *Azure, an Irish Harp, Or, stringed, Argent*, for the Royal Ensigns of Ireland. In the fourth place as in the first. These Ensigns Armorial are placed after a new manner since the late Revolution and Union, the Arms of England and Scotland being quarter'd together; and since King George's Accession to the Throne, are added the Arms of the House of Brunswick Lunenburgh, which are *Azure, an Horse, at full Liberty, Argent*, charg'd with Charlemaign's Crown, answerable to his being Arch-Treasurer of the Empire; all within the Garter, the chief Ensign of that most noble Order; upon the same, a rich Mantle of Cloth of Gold, doubled Ermin, adorned with an Imperial Crown, and surmounted for a Crest by a *Lyon Passant Gardant. Or, Crowned*, as the former, and an *Unicorn Argent Gorged with a Crown*, thereto a Chain affixt, passing between his Fore-legs, and reflex'd over his Back, Or, both standing upon a *Compartment*, placed underneath; and in the Table of that Compartment is express'd the King of Great Britain's Motto, which is, *Dieu & mon Droit*.

Religion.] The Inhabitants of this Country are (for the most part) of the true *Reformed Religion* publicly profess'd, and carefully taught in its choicest Purity. In reforming of which, they were not so hurry'd by popular Fury and Faction (as in other Nations) but proceeded in a more Prudent, Regular, and Christian Method; resolving to separate no farther from the Church of Rome, than she had separated from the Truth, embracing that excellent Advice of the Prophet, (*Jer. 6. 16.*) *Stand ye in the ways and see, and ask for the old Paths, where is the good way, and walk therein*. So that the *Reformed Church of England*, is a true Mean or middle Way betwixt those two Extreame, of *Superstition* and *Phanaticism*, both equally

equally to be avoided. The *Doctrine* of which Church thus refin'd is briefly summ'd up in the 39 *Articles*, and Book of *Homilies*; and her *Discipline* and *Worship* are to be seen in the *Liturgy*, and Book of *Canons*. All which being seriously weigh'd and consider'd by a judicious and impartial Mind, it may be found that this National Church is for certain, the exactest of all the Reformed Churches, and comes nearest to the Primitive Pattern of any in *Christendom*. For her *Doctrine* is intirely built upon the *Prophets* and *Apostles*. According to the Explication of the ancient Fathers, her Government (rightly consider'd) is truly *Apostolical*; her *Liturgy* is a notable Extract of the best of the Primitive Forms; her Ceremonies are few in Number, but such as tend to Decency and true Devotion. In a Word, the Church of England doth firmly hold and maintain the whole Body of the truly *Catholic Faith* (and none other) according to *Holy Scripture*, and the Four first *General Councils*; so that her Sons may truly say, (in the Words of an eminent Luminary of the ancient Church) *In ea regula incedimus quam Ecclesia ab Apostolis, Apostoli à Christo, & Christus à Deo accepit*. At present all Sects and Parties are tolerated; and it's truly as melancholy to consider, as 'tis hard to determine, whether our *Heats* and *Divisions* on one hand, or *open Profaneness* and *Irreligion* on the other, be most predominant. In the mean time, this is most certain, that they're both equally to be lamented; the necessary Consequence of them both being most dismal and dangerous in the End. But *that it may please the Almighty to grant to all Nations Unity, Peace and Concord; to bring into the way of Truth, all such as have erred and are deceived; to strengthen such as do stand; to comfort and help the Weak-hearted; to raise up them that fall; and finally, to beat down Satan under our Feet, is the daily and fervent Prayer of the Church of Christ; and the hearty Wish and Desire of every true Son thereof.* The *Christian Faith* is thought to have been planted in *England, tempore (ut scimus) summo Tiberii Caesaris*, according to ancient *Gildas*; but afterwards more universally receiv'd, *Anno 180*, it being then openly profess'd by publick Authority, under King *Lucius*; who is said to have been the first Christian King in the World; yet several doubt whether there was ever such a Man in the World. In general, this is certain, that Christianity was propagated here in the earliest Ages of the Church.

W A L E S.

Name.] **W**ALES [the Seat of the Ancient *Britains*, and bounded on the *East* by a part of *England*; on the *West*, *North*, and *South*, by *St. George's Channel*] is termed by the *Italians*, *Wallia*; by the *Spaniards*, *Gales*; by the *French*, *Galles*; by the *Germans*, *Walles*; and by the *English*, *Wales*; so called (as some imagine) from *Idwallo*, Son to *Cadwallader*, who retired into this Country with the remaining *Britains*. But others rather think, that as the *Britains* derive their Pedigree from the *Gauls*, so they also retain the Name, this Country being still termed by the *French*, *Galles*; which using *W* for *G* (according to the *Saxon* Custom) agrees pretty well with the present Title.

Air.] The *Air* of this Country is much the same as in those Counties of *England* which lie under the same Parallel of Latitude. The opposite Place of the Globe to *Wales*, is that part of the vast Pacific Ocean, between 190 and 200 Degrees of Longitude, with 56 and 60 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 9th North Climate) is generally very Mountainous, yet some of its Valleys are abundantly fertile, producing great plenty of Corn, and others are very fit for Pasturage. It's likewise well stored with large Quarries of Free-stone, as also several Mines of Lead-Oar and Coals. The longest Day in the Northmost Parts, is about 16 Hours $\frac{1}{2}$, the shortest in the Southmost 7 Hours $\frac{1}{4}$, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Cattle, Butter, Cheese, Welch-Frizes, Cottons, Bays, Herrings, Hides, Calves-Skins, Honey, Wax, and such like.

Rarities.] In several Parts of this Principality, especially *Denbighshire*, are still to be seen the Remains of that famous Wall, commonly call'd King *Offa's Dyke*, made by *Offa the Mercian*, as a Boundary between the *Saxons* and *Britains*. (2.) At a small Village, called *Newton* in *Glamorganshire*, is a remarkable Spring nigh the Sea, which ebbs and flows contrary to the Sea. (3.) In the same County, as also *Caermarthenshire*, are several Ancient Sepulchral Monuments, and divers noted Stone Pillars, with observable Inscriptions on them. (4.) In *Brecknockshire* are some other remarkable Pillars, particularly that called *Maen y Marynnion* (or the Maiden Stone) near the Town of *Brecknock*. Another at *Pentre Ysbythrog* in *Llan S. Aled* Parish. And

And a third in Form of a Cross, in *Vanor* Parish. (5.) In *Glamorganshire* are the Remains of *Caer Phylli Castle* (taken by some for the *Bullewain Silurum*) which are generally reckon'd the noblest Ruins of Ancient Architecture of any in *Britain*. (6.) In *Merionethshire* is *Kader Idris*, a Mountain remarkable for its prodigious Height, being commonly reckon'd the highest of any in *Britain*; as an Argument for which, 'tis urged by some, that the said Mountain affords variety of *Alpine Plants*. (7.) In *Caernarvanshire* is a perpendicular Rock of a great Height, thro' which the publick Road lies, and occasions no small Terror to many Travellers; for on one hand the lofty impending Rock threatens (as 'twere) every Minute to crush 'em to Pieces, and the prodigious Precipice below is so very hideous and full of danger, that one false step is of dismal Consequence. (8.) Near *Basingwerk* in *Flintshire* is that remarkable Fountain commonly called *Holy Well*, which sends forth so considerable a Stream, as to be able immediately almost to turn a Mill: But more observable for its pretended Sanctity of old (and that derived from the fabulous Story of *S. Winefrid*) as also the wonderful Virtues of its Waters; and those were chiefly owing to the Forgery of the Monks of *Basingwerk*. (9.) In *Pembrokeshire* is *Milford Haven*, which, for Largeness and Security can perhaps be out-done by none in *Europe*, it having 16 Creeks, 5 Bays, and 13 Roads: And may thereupon be deservedly reckon'd among the *Rarities* of this Country. Lastly, In *Monmouthshire* are many *Roman Altars* dug up with Variety of *Inscriptions* upon 'em: For which, and many others, *Vid. Camden's Britannia*, late Edition, from Page 613, to 620. as also from 623, to 628. with Page 593, 594, 600, 601, 605. But if the curious Reader would see the chief *Rarities* of *Wales* at one View; let him consult the aforesaid Author (Pag. 697.) where he will find the Remarkables of this Principality, represented in Sculpture; particularly these following, viz. a curious carved Pillar, called *Maen-y-Chwyar*, on *Mostyn Mountain* in *Flintshire*. Two remarkable Pillars at *Caer Phylli Castle* in *Glamorganshire*. An Alabaster Statue, found near *Porth-Shini-Kran* in *Monmouthshire*. And finally, some *Roman Armor* and *Medals*, with variety of *Coins*, both *Roman* and *British*, dug up at several Times in several Parts of *Wales*.

Archbishopricks.] Archbishopricks in this Principality. None.

Bishopricks.] Bishopricks, Four, viz. those of

Bangor,
S. Asaph,

Landaff,
S. David's,

} already mention'd.

Universities.] None.

Manners.] The *Welch* are a People generally reputed very faithful and loving to one another in a strange Country, as also to Strangers in their own. The Commons (for the most part) are extraordinary Simple and Ignorant, but their Gentry are esteem'd both Brave and Hospitable. They are universally inclin'd to a Cholerick Temper, and extravagantly value themselves on their Pedigrees and Families,

Language.] The *Welch* (being the Off-spring of the ancient Britains) do still retain their Primitive Language, which yet remains more free from a Mixture of *exotick Words* than any modern Tongue in Europe; a Language which hath nothing to recommend it to Strangers, it being both hard to pronounce, and unpleasant to the Ear, by reason of its vast Multitude of Consonants. Their *Pater-noster* runs thus: *Ein Tad yr hwn wyt yn y nefoedd, sanctiedier dy enw : Deued dy deyrmas ; bid dy ewyllys ar yddniar megis y mac yn neofodd dyre i ni hed dyw ein bara beunyddiol : a madden i ni ein dyledion, fel y maddewn ny i'n dyledwry : ac nar arwain ni brofe diageth, eithwr gwated in rhag drwg. Amen.*

Government.] This Principality was anciently govern'd by its own King or Kings (there being frequently one for South, and another for North Wales, and sometimes no less than five did claim a Regal Power) but was fully conquer'd, Anno 1282. by Edward I. who having then a Son brought forth by his Queen at Caernarven Castle in Wales, and finding the *Welch* extremely averse against a foreign Governor, proffer'd 'em the young Child (a Native of their own) to be their Lord and Master, to which they readily yielded, and accordingly swore Obedience to him; since which Time, the King of England's eldest Son is stil'd Prince of Wales, and all Writs in that Principality are issued out in his Name.

Arms.] The Arms of the Prince of Wales differ from those of England, only by the Addition of a Label of three Points. But the proper and peculiar Device, commonly (tho' corruptedly) called the Prince's Arms, is a Coronet beautified with three Ostritch Feathers, with this Inscription round, *Ich dien*, i. e. I serve; alluding to that of the Apostle, *The Heir while he is a Child, differeth not from a Servant.*

Religion.] The Inhabitants of this Country (at least the most intelligent of 'em) are of the Reform'd Religion, according to the Platform of the Church of England; but many of the meaner Sort are so grossly ignorant in Religious Matters, that they differ nothing from
meer

meer Heathens. For the remedying of which, the late incomparable Mr. *Gouge* was at no small Pains and Charge, in Preaching the Blessed Gospel to 'em, and procuring and distributing among 'em some considerable number of Bibles, and Books of Devotion, in their own Language. Which noble Design was afterwards reviv'd and further'd by the famous *Robert Boyle*, Esq; and several other well-disposed Persons (particularly that much lamented Eminent Divine, Dr. *Anthony Horneck*) and we're willing to hope, that the same will be kept still on Foot, and happily promoted by the Aid and Encouragement of some serious Christians amongst us. The Christian Faith is said to have been planted in this Country towards the End of the second Century.

Name.] THIS Island [surrounded by the British Ocean, and reckon'd the *Brittania Parva* of Ptolemy; mention'd also by other ancient Writers under the Names of *Ferna*, *Fuerna*, *Iris*, &c. and by modern Authors, *Hibernia*] is term'd by the *Italians*, *Irlando*; by the *Spaniards*, *Irlanda*; by the *French*, *Irlande*; by the *Germans*, *Yrland*; and by the *English*, *Ireland*; so call'd (as some imagine) *ab hiberno aere*, from the Winter-like Air: But rather (according to others) from *Erinland*, which in the *Irish* Tongue signifieth a *Western Land*, it being so in respect of *Great Britain*.

Air.] The *Air* of this Country is almost of the same Nature with that of those Parts of *Britain*, which lie under the same Parallel; only different in this, that in several Places of this Kingdom, 'tis of a more gross and impure Temper; by reason of the many Lakes and Marshes, which send up such a quantity of Vapours, and thereby so corrupt the whole Mass of the Air, as to occasion Fluxes, Rheums, and such like Distempers, to which the Inhabitants are frequently subject. The opposite Place of the Globe to *Ireland*, is that part of the Pacifick Ocean, lying between 180 and 200 Degrees of Longitude, with 53 and 56 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 9th and 10th North Climate) is abundantly fertile; but naturally more fit for Grass and Pasturage, than Tillage. Much of this Kingdom is still overgrown with Woods, or incumber'd with vast Bogs and unwholsome Marshes; yielding neither Profit nor Pleasure to the Inhabitants, but not near so much as formerly: There being a great deal of Wood cut down, and many large Marshes drain'd in this Age, and the Ground employ'd for various sorts of Grain, which it produceth in great Plenty. The longest Day in the Northmost Part of this Country is about 17 Hours and a half; the shortest in the Southmost, 7 Hours three Quarters, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Cattle, Hides, Tallow, Butter, Cheese, Honey, Wax, Salt, Hemp, Linen-Cloth, Pipe-Staves, Wool, Friezes, &c.

Rarities.] About eight Miles North East from *Colrain* in the County of *Antrim*, is that Miracle (whether of *Art* or *Nature*, I shall not dispute) commonly call'd *Giants Causeway*; which runs from the Bottom of a high Hill into the Sea, none can tell how far. Its Length, at *Low-water*, is about 600 Feet; the Breadth, where broadest, 240, and 120 in the narrowest; 'tis very unequal in Height, being in some Places 36 Feet from the Level of the Strand, and in others only 15. It consists of many thousands of Pillars, perpendicular to the Plain of the *Horizon*, and all of different Shapes and Sizes, but most of 'em Pentagonal or Hexagonal, yet all irregularly placed. A particular Draught and Description of this wonderful *Causeway*, with an Essay, proving the same to be rather the Work of Nature than Art, *Vid. Philosoph. Transact.* N. 212, and 222. (2.) In the Province of *Ulster* is the famous *Lough-Neagh*, hitherto noted for its rare petrefying Quality; but upon due Examination, 'tis found that the said Quality ought to be ascrib'd to the Soil of the Ground adjacent to the Lake, rather than to the Water of the Lake it self. (3.) In several Parts of this Kingdom are sometimes dug up Horns of a prodigious Bigness (one Pair lately found being ten Feet and ten Inches from the Tip of the right Horn to the Tip of the left) which gives Occasion to apprehend that the great *American Deer* (call'd the *Moose*) was formerly common in this Island. As for that excellent Quality of *Ireland*, in nourishing no venomous Creature; the same is so notoriously known, that I need say nothing of it.

Archbishopricks.] *Archbishopricks* in this Kingdom are Four, viz. those of *Armagh*, *Dublin*, *Cassil*, and *Tuam*. The Archbishop of *Armagh* being Primate of all *Ireland*.

Bishopricks.] *Bishopricks* in this Kingdom are those of

| | | |
|----------------------------|-------------------------------|----------------------------|
| <i>Meath,</i> | <i>Limerick, Ardsfert and</i> | <i>Clonsfert,</i> |
| <i>Kildare,</i> | <i>Aghado,</i> | <i>Elphin,</i> |
| <i>Offory,</i> | <i>Waterford,</i> | <i>Rapko,</i> |
| <i>Leighlin and Ferns,</i> | <i>Cork and Ross,</i> | <i>Derry,</i> |
| <i>Kilaloe,</i> | <i>Cloyne,</i> | <i>Kilmore and Ardagh,</i> |
| <i>Killake,</i> | <i>Clogher,</i> | <i>Drommore.</i> |
| | <i>Down and Conner,</i> | |

Universities.] Here is only one *University*, viz. that of *Dublin*.

Manners.] The *Irish* (according to the best Character I find of 'em, viz. that of Dr. *Heylin*) are a People, that's generally strong and

and nimble of Body, haughty of Spirit, careless of their Lives, patient in Cold and Hunger, implacable in Enmity, constant in Love, light of Belief, greedy of Glory. In a Word, if they are bad, you shall no where find worse; if they be good, you can hardly meet with better.

Language.] The *Language* here used by the Natives being the *Irish*, seems to be of a *British* Extraction, by comparing the same with the *Welsh*. The *English* and *Scots* here residing retain their own. *Pater-Noster* in the *Irish* Tongue, runs thus: *Air nathir ataigh air nin, nabz fer haminiti; tigiuk da riatiatche: deantur da hoilam hi-coil air nimh agis air thalambi. Air naran laidtkuil tabhair dhuin a' niombh; agis math duin dair shiaca ammil agis mathum ciddar sentchun-nim; agis na trilaic a'floch say anausen; ac sarfino ole. Amen.*

Government.] The *Government* of this Country is by one Supreme Officer, who is commonly term'd the *Lord Lieutenant*, or *Lord Deputy* of *Ireland*. No *Vice-Roy* in *Europe* is invest'd with greater Power, nor cometh nearer the Majesty of a King in his Train and State, than he. For his Assistance he's allow'd a *Privy-Council* to advise with upon all Occasions. As for the *Laws* of the Kingdom, (which are the standing Rule of all Civil Government) they owe their Beginning and Original to the *English* Parliament and Council, and must first pass the Great Seal of *England*. In absence of the *Lieutenant*, the Supreme Power is lodged in *Lords Justices*, who have the same Authority with a *Lieutenant*. The various Courts of Judicature, both for Civil and Criminal Affairs, and their manner of Proceeding in each of 'em, are much the same as here in *England*.

Arms.] See *England*, page 212.

Religion.] The Inhabitants of this Country are partly *Protestants*, partly *Papists*. The best civiliz'd Parts of the Kingdom are of the Reform'd Religion, according to the Platform of the Church of *England*. But the far greater Part of the old Native *Irish* do still adhere to Popish Superstitions, and are as credulous of many ridiculous *Legends* as in former Times. The Christian Faith was first preached in this Country by St. *Patrick* (*Anno* 435.) who is generally affirmed to be the Nephew of St. *Martin* of *Tours*.

Having thus travelled thro' Britain and Ireland [the Greater of the Britannick Islands] proceed we next to the Lesser, which in respect of Great Britain, are situated on the East, West, North and South.

| | { Isles of { Fersey ——— } | | { Alderney ——— } | | | |
| { Guernsey ——— } | | { Alderney ——— } | | | | |

The chief of which Lesser Islands being these following, viz.

The Orcades, The Shetland, The Hebrides, The Isle of { Man, Anglesey, Wight, The Isles of { Fersey, Guernsey, Alderney.

Somewhat of all these, and in their Order. Therefore,

§ 1. The *Orcades*, or *Orkney Islands*.

THE Number of these Islands is indeed very great, and of 'em 26 are actually inhabited; the rest being call'd *Holms*, are us'd only for Pasturage. Most of 'em are blest with a very pure and healthful Air to breathe in, but their Soil is very different, being in some extreemly dry and sandy, in others wet and marshy; however, they're indifferently fruitful in Oats and Barley, but destitute of Wheat, Rye, and Pease. Many useful Commodities are yearly exported from them to divers foreign Parts. In these Islands are several Foot-steps of the *Pictish* Nation, from whom *Pictland Frith* is commonly thought to derive its Name. The Inhabitants do still retain many *Gothick* and *Teutonick* Terms in their Language; and some ancient *German* Surnames (as yet in Use) do plainly evince their Extraction. Being as yet great Strangers to that Effeminacy of Living in the Southern Parts of *Britain*, they commonly arrive to very considerable Ages; and seldom it is, that they Die of the *Physician*. These Islands have been visited by the *Romans*, possess'd by the *Picts*, and subject to the *Danes*; but *Christian IV.* of *Denmark* having quitted all his Pretensions to 'em in favour of King *James VI.* upon the Marriage of that Prince with his Sister, they have ever since acknowledg'd Allegiance to the *Scottish* Crown, and are immediately govern'd by the Stewart of *Orkney*, or his Deputy.

§ 2. The *Shetland*.

UNDER the Name of *Shetland*, are commonly comprehended no less than 46 Islands, with 40 *Holms*, besides many Rocks. Of these Islands, about 26 are inhabited, the rest being used only for feeding of Cattle. They enjoy a very healthful Air, and the Inhabitants do generally arrive to a great Age. In several of 'em are some *Obelisks* still standing, with divers old Fabricks; made (as is commonly believ'd) by the *Picts*. The Gentry, who removed hither from the Continent, usually speak as in the North of *Scotland*; but the common sort of People (who are descended from the *Norwegians*) do still retain a corrupt Norse Tongue, call'd *Norn*. All these Islands belong now to the Crown of *Scotland*, and are reckon'd a part of the Stewarty of *Orkney*.

§ 3. The *Hebrides*.

THIS mighty Cluster of Islands (the *Ebudes* of *Ptolemy*, *Solinus*, and *Pliny*) are commonly term'd the *Western Isles*; from their Situation in respect of *Scotland*, to which Crown they belong. In Soil they're very different, but generally blest with a pure and healthful Air. They surpass 300 in Number, tho' reckon'd by some but 44. Their Inhabitants use the *Irish* Tongue, yet with Difference of Dialect from that in *Ireland*; and are much the same with the Highlanders on the Continent of *Scotland*, both in Habit, Customs, and manner of Living. The most remarkable of all these Islands are Two, viz. *Jona*, and *St. Kilda*. The former (now called *Columbkil*, nigh the Isle of *Mull*) is noted for being of old the Burying-place of the Kings of *Scotland*, and the chief Residence of the ancient *Culdees*. The other (term'd by the Islanders, *Hirt*; by *Buchanan*, *Hirta*; and afterwards *St. Kilda* or *Kilder*) is the remotest of all the *Hebrides*, and so observable for some Remarkables therein, and several uncommon Customs peculiar to its Inhabitants, that a Description thereof was of late thought worthy of a particular Treatise, intituled, *A Voyage to St. Kilda*, to which I remit the Reader.

§ 4. The *Isle of Man*.

THIS Island (called *Monoeda* by *Ptolemy*; and by *Pliny*, *Monabia*) enjoys a very cold and sharp Air, being expos'd on every side to the bleak piercing Winds from the Sea. Its Soil oweth much of its Fertility to the Care and Industry of the Husbandman. The Inhabitants (a Mixture of *English*, *Scots*, and *Irish*, commonly called *Manksmen*) have in general a very good Character. The ordinary sort of People retain much of the *Irish* in their Language and Way of Living; but those of better Rank strive to imitate the *English*. In this they're peculiarly happy, that all litigious Proceedings are banish'd from among 'em, all Differences being speedily determined by certain Judges, call'd *Deemsters*, and that without Writings or Fees: If the Case be found very intricate, then 'tis refer'd to 12 Men, whom they term'd the *Keys* of the Island. This Island belonged once to the *Scots*, and in it the Bishop of the *Isles* had his Cathedral; but now the whole, together with the Advowson of the Bishoprick, belongs to the Earls of *Derby*, who are commonly stil'd *Lords of Man*, tho' *Kings* in effect; they having all kind of Civil Power and Jurisdiction over the Inhabitants, but still under the Fief and Sovereignty of the Crown of *England*.

§ 5. Anglesey.

THIS Island (the celebrated *Mona* of the Romans, and ancient Seat of the *Druides*) is blest with a very fruitful Soil, producing most sorts of Grain (especially Wheat) in such Abundance, that the *Welch* commonly term it, *Môn mam Gymry*, i. e. *Môn*, the Nursery of Wales, because that Principality is frequently supply'd from thence in unseasonable Years. 'Tis commonly reckon'd as one of the Counties of North Wales, and acknowledgeth Subjection to the Crown of England.

§ 6. The Isle of Wight.

THIS Island (term'd by *Ptolemy*, *Οἰκίσσις*; and by the Romans, *Vecta*, *Vectis*, or *Vethestis*; enjoys a pure healthful Air; and is generally reckon'd a very pleasant and fruitful Spot of Ground. 'Twas once honour'd (as the Isle of Man) with the Title of Kingdom, for *Henry Beauchamp*, Earl of *Warwick*, was crown'd King of Wight by *Henry VI.* Anno 1445. but that Title died with himself about two Years after, and 'tis now reckon'd only a part of *Hampshire*, and is govern'd in like manner, as other of the Lesser Islands.

§ 7. Jersey, Guernsey, and Alderney.

THESE Islands, with *Sark* (another small adjacent Isle) are all of *William the Conqueror's* Inheritance, and Dukedom of *Normandy*, that now remains in the Possession of the *English* Crown. Their Soil is sufficiently rich, producing in great Abundance both Corn and Fruits, especially Apples, of which they make plenty of Cyder; and the Air is so healthful to breathe in, that the Inhabitants have little or no use for Physicians among 'em. They chiefly imploy themselves in Agriculture, and Knitting of Stockings; and during War with France, they are much given to Privateering. It's observable of *Guernsey*, that no venomous Creature can live in it; and that the Natives generally look younger by ten Years than they really are. The Islands being annex'd to the *English* Crown, Anno 1180. by *Henry I.* have (to their great Honour) continu'd firm in their Allegiance to *England* ever since that Time, notwithstanding of several Attempts made upon 'em by the *French*. And so much for the Lesser *Britannick* Islands. But if the Reader desires a larger

Account of 'em, let him consult the late Edition of *Cambden's Britannia*, from Pag. 1049, to 1116, inclusively.

Having thus particularly survey'd the *Britannick Islands*, both Greater and Lesser, proceed we now (according to our proposed Method) to the Second Part of this Section, which is to take a View of all other Islands belonging to *Europe*, whether they lie on the North, West, or South, of the main Continent. Therefore,

II. Of all the other *European Islands*.

European Islands be situated on the $\left\{ \begin{array}{l} \text{North} \\ \text{West} \\ \text{South} \end{array} \right\}$ of *Europe*.

On the $\left\{ \begin{array}{l} \text{North, are the Scandinavian Islands.} \\ \text{West, are } \left\{ \begin{array}{l} \text{The Isle of Ice-land.} \\ \text{The Britannick [of which already.]} \\ \text{The Azores.} \end{array} \right. \\ \text{South, are those in the Mediterranean Sea.} \end{array} \right.$

Of which in their Order.

§ 1. The *Scandinavian Islands*.

Such Islands are those belonging to $\left\{ \begin{array}{l} \text{Sweden.} \\ \text{Denmark.} \\ \text{Norway.} \end{array} \right.$

| | | | | |

| | | Hiteren ——— | | W. of Dronthem. ——— |
| | | Sanien ——— | | Adjacent |
| | | Suroy ——— | | Adjacent |
| | | | | Wardhus |
| | | | } N. to S. | |

Name.] THESE Islands are term'd *Scandinavians*, from the vast Peninsula of Scandia or Scandinavia, nigh unto whose Coasts those Islands do generally lye. The Peninsula it self (mention'd both by *Pliny* and *Solinus* under the same Name) is probably taken from the small Province of Sweden, call'd *Scania*, now more commonly *Schonen*. As for the chiefeft of the Scandinavian Islands, viz. Zealand [the ancient *Cadononia* of *Pomponius Mela*] our modern Danish Geographers would fain derive its Name from the great plenty of Corn it produceth; alledging that Zealand or Seeland, is only a corruption of Sedland or Seedland. But others with greater shew of Probability, will have its modern Denomination to denote only a plat of Ground or Island furrounded with the Sea.

Air.] The Schandinavian Islands being strangely scatter'd up and down the Baltique Sea, and the main Western Ocean, and those of a very different make (some being high and rocky, others low and plain) the Temperature of the Air can't be expected to be the same in all of 'em, especially as to Moisture and Driness. As touching Heat and Cold, it's much the same with the Air of those Places on the adjacent Continent that lie under the same Parallels of Latitude.

Soil.] The Soil of the Scandinavian Islands is wonderfully different, some of 'em being very Fertile, and others extreamly Barren. The Fertile Islands are those of Zealand, Gotbland, Bornholm, Funen, Falster, Laland, and the Ween. In all, or most of 'em, is good Plenty of Corn, not only enough for their Inhabitants, but also a considerable Quantity for Transportation. They likewise abound with good Pasturage, and breed vast Numbers of Cattle. The Length of the Days and Nights in the Scandinavian Islands, is the very same with those Parts of Scandinavia it self, that lie under the same Parallels of Latitude.

Commodities.] The chief *Commodities* exported from the best of those *Islands*, are Fish, Ox-Hides, Buck-Skins, and Corn, particularly *Wheat*, *Barley*, *Rye*, and *Oats*.

Rarities.] In the *Island Ween* are yet to be seen the Ruins of an ancient Observatory, erected by *Tycho Brache*, that famous *Danish Astronomer*; one part whereof being formerly an high *Tower*, was term'd *Uraniburg*; and the other a deep *Dungeon*, beset with *Looking-Glasses*, was named his *Stelliburg*. How neat this *Observatory* was, when intire, and how well stock'd with *Mathematical Instruments*, is now uncertain; but this, methinks, is pretty certain, that the *Island Ween* (with submission to better Judgments) was none of the fittest for *Astronomical Observations* of all sorts [such as the taking the exact time of the rising and setting of *Cælestial Bodies*, together with their *Amplitudes*] because the *Island* lies low, and is Land-lock'd on all Points of the *Compass* save three; being hemm'd in by the *Swedish* and *Danish* Coasts from S. to E. quite round to S. S. W. as I particularly took notice of, *Anno 1700*. (having then occasion to be upon the *Island*) besides the sensible *Land-Horizon* of the *Ween* is extremely uneven and rugged; the *North* and *Eastern* Parts thereof being some rising Hills in the Province of *Schonen*, and the *Western* Part is mostly overspread with Trees on the *Island Zealand*, from the remotest of whose Coasts the *Ween* is not distant above three Leagues. Nigh to the *Isle* of *Hitteren*, on the *Norwegian* Coast, is that dreadful Whirlpool, commonly called the *Navel* of the Sea: But of it already, when treating of *Norway*. As for the *Rarities* of the *Island Zealand* (particularly those in the *Museum Regium*, at *Copenhagen*) Vid. *Denmark*.

Archbishopricks, &c.] Vid. *Sweden*, *Denmark*, and *Norway*.

Manners.] The *Scandinavian Islands* that are actually inhabited, are generally peopled from the nearest part of the Continent, and are therefore stock'd either with *Swedes*, *Danes* or *Norwegians*. What the particular Genius of each of those Nations is, has been already declared, when treating of the various Kingdoms of *Scandinavia*, to which I remit the Reader.

Language.] What hath been just now said of the Inhabitants of the *Scandinavian Islands*, in reference to their Manners, the same may be affirmed of them with relation to their Language.

Government.] The *Scandinavian Islands* belonging to *Sweden*, *Denmark*, or *Norway*, do own Subjection either to his *Swedish* or *Danish*

nish Majesty; and the most considerable of 'em are accordingly ruled by particular Governors, either appointed in, or sent to 'em by the two Northern Courts of *Sweden* and *Denmark*.

Arms.] Vid. *Scandinavia*.

Religion.] Those of the *Scandinavian Islands* that are actually inhabited, being peopled (as aforesaid) either from *Sweden*, *Denmark* or *Norway*; and *Lutheranism* being the only establish'd Religion in those Kingdoms, the Inhabitants of those *Islands* may be generally reckon'd to profess the same Religion. The particular Time when each of 'em receiv'd the Light of the blessed Gospel is uncertain.

§ 2. The Isle of Ice-land.

Name.] THIS *Island* (taken by some for the much controverted *Thule* of the Ancients) is term'd by the *Italians*, *Islanda*; by the *Spaniards*, *Tierra elada*; by the *French*, *Islande*; by the *Germans*, *Island*; and by the *English*, *Ice-land*; so call'd, from the abundance of Ice wherewith 'tis environed for the greatest part of the Year.

Air.] By reason of the frozen Ocean surrounding this *Island*, and the great Quantity of Snow wherewith 'tis mostly covered, the Air must of necessity be very sharp and piercing, yet abundantly healthful to breathe in, especially to those who are accus'd with that cold Climate. The opposite Place of the Globe to *Ice-land*, is that part of the vast *Antarstick Ocean*, lying between 162 and 172 Degrees of Longitude, with 60 and 70 Degrees of South Latitude.

Soil.] Considering only the Situation of *Ice-land* (it lying in the 18th, 19th, 20th, and 21st North Climate) we may easily imagine the Soil is none of the best. In some Parts where the Ground is level, there are indeed several Meadows very good for Pasture, but elsewhere the *Island* is incumber'd either with vast Desarts, barren Mountains, or formidable Rocks. So destitute of Grain is it, that the poor Inhabitants grind and make Bread of dry'd Fish-bones. In the Northern Parts they have the Sun for one Month without Setting, and want him intirely another, according as he approacheth the two Tropicks.

Commodities.] From this cold and barren *Island* are yearly exported Fish, Whale-Oyl, Tallow, Hides, Brimstone, and white Foxes Skins, which the Natives barter with Strangers for Necessaries of Human Life.

Rarities.] Notwithstanding this *Island* doth lie in so cold a Climate, yet in it are divers hot and scalding Fountains, with *Hecla*, a terrible *Volcano*, which (tho' always cover'd with Snow up to the very Top) doth frequently vomit forth Fire and Sulphurous Matter in great abundance; and that sometimes with such a terrible roaring, that the loudest Claps of Thunder are hardly so formidable. In the Western Parts of the *Island* is a Lake of a petrefying Nature; and towards the Middle, another which commonly sends up such a pestilential Vapour, as frequently kills Birds that endeavour to fly over it. Some also write of Lakes on the Tops of Mountains, and those well stored with Salmon.

Archbishopricks, &c.] In this *Island* are two *Danish* Bishopricks, viz. those of *Schalholt* and *Hola*. Archbishopricks and Universities, none.

Manners.] The *Ice-landers* (being Persons of a middle Stature, but of great Strength) are generally reckon'd a very ignorant and superstitious sort of People. They commonly live to a great Age, and many value themselves not a little for their Strength of Body. Both Sexes are much the same in Habit, and their chief Employment is Fishing.

Language.] The *Danes* here residing do usually speak as in *Denmark*. As for the Natives, they still retain the old *Gothick* Tongue.

Government.] This *Island* being subject to the *Danish* Crown, is govern'd by a particular *Vice-Roy*, sent thither by the King of *Denmark*, whose Place of Residence is ordinarily in *Besteade Castle*.

Arms.] For Arms, Vid. *Denmark*, Page 71.

Religion.] The Inhabitants of this *Island*, who own Allegiance to the *Danish* Crown, are generally the same in Religion with that profess'd in *Denmark*; as for the unciviliz'd Natives, who commonly abscond in Dens and Caves, they still adhere to their ancient Idolatry, as in former Times. When Christianity was first introduced into this *Island*, is not very certain.

§ 3. The Azores.

| | | | | |
|----------------------------------|---|---------------|---|---|
| They are in Number 9, viz. | { | St. Michael — | } | Found from E. to W. Chief Town of all, is Angra in Tercera. |
| | | St. Maria — | | |
| | | Tercera — | | |
| | | Gratiosa — | | |
| | | St. George — | | |
| | | Pico — | | |
| | | Fyal — | | |
| | | Flores — | | |
| | | Cuervo — | } | |

Name.] THESE Islands (taken by some for the *Cathiterides* of *Ptolemy*) are term'd by the *Italians*, *Flandrice Isola*; by the *Spaniards*, *Los Azores*; by the *French*, *Les Azores*; by the *Germans*, *Flandersche Insulin*; and by the *English*, the *Azores*; so called by their Discoverers (the *Portuguese*) from the abundance of Hawks found in them. By others, they're term'd the *Terceres*, from the Island *Tercera*, being chief of all the rest.

Air.] The Air of these Islands inclining much to Heat, is tolerably good, and very agreeable to the *Portuguese*. The opposite Place of the Globe to the *Azores*, is that part of *Terra Australis Incognita*, lying between the 148 and 158 Degrees of Longitude, with 35 and 41 Degrees of South Latitude.

Soil.] These Islands are blest'd with a very fertile Soil, producing abundance of Grain, Wine, and Fruit, besides great plenty of Wood. The length of the Days and Nights in the *Azores*, is the same as in the middle Provinces of *Spain*, lying under the same Parallels of Latitude.

Commodities.] The chief Thing exported from these Islands, is Oad for Diers, and that in great abundance, together with variety of choice Singing-Birds.

Rarities.] Here are several Fountains of hot Water, and one in *Tercera* of a petrefying Nature. The Island *Tercera* is also remarkable for being the Place of the first Meridian, according to some modern Geographers. In the Island *Pico* is the *Pic* of *St. George*, (from whence the Isle derives its Name) which is a Mountain of a prodigious height, being commonly esteem'd almost as high as the famous *Pic* of *Teneriff*.

Archbishopricks, &c.] Here is one Bishoprick, viz. that of *Angra*, under the Archbishop of *Lisbon*.

Manners.] The Inhabitants of these *Islands* being *Portuguese*, are much the same in Manners with those on the Continent.

Language.] The *Portuguese* here residing do still retain and speak their own Language.

Government.] These *Islands* being inhabited and possessed by the *Portuguese*, are subject to the Crown of *Portugal*, and rul'd by a particular Governor sent thither from that Court, who ordinarily resides at *Angra* in *Tercera*.

Arms.]

Religion.] The Inhabitants of these *Islands* being *Portuguese* (as aforesaid) stick close to the *Roman* Religion, and that in its grossest Errors, as universally professed, and by Law establish'd, in the Kingdom of *Portugal*.

§ 4. *Mediterranean Islands.*

ON the South of *Europe* are the *Islands* of the *Mediterranean Sea*: The chief of which are these following.

| | | | | | | | |
|------|---|-------------------|------------|---|--------------------|---|--|
| viz. | { | <i>Majorca</i> — | Chief Town | { | <i>Idem</i> — | } | Lying E. of <i>Valencia</i> . |
| | | <i>Minorca</i> — | | | <i>Citadella</i> — | | |
| | | <i>Ivica</i> — | | { | <i>Idem</i> — | } | Lying S. of <i>Genova</i> . |
| | | <i>Corfica</i> — | | | <i>Bastia</i> — | | |
| | | <i>Sardinia</i> — | | { | <i>Cagliari</i> — | } | Lying S. W. of <i>Naples</i> . |
| | | <i>Sicily</i> — | | | <i>Palermo</i> — | | |
| | | <i>Malta</i> — | | { | <i>Idem</i> — | } | Lying S. of { <i>The Archipelago</i> . |
| | | <i>Candia</i> — | | | <i>Idem</i> — | | |
| | | <i>Cyprus</i> — | | | <i>Nicosia</i> — | | <i>Anatolia</i> . |

Of all which in Order, beginning with

Majorca, *Minorca*, and *Ivica*.

Name.] EACH of these *Islands* hath almost the same modern Appellation among the *Italians*, *Spaniards*, *French*, *Germans*, and *English*; and were all known of old by the Name of *Baleares*, which

which is deriv'd from Βάλλειν, signifying to *Dart* or *Throw*, because their Inhabitants were famous for their Dexterity in throwing Stones with a Sling.

Air.] The *Air* of these *Islands* is much more temperate to breathe in, than any where on the adjacent Continent, being daily fann'd by cool Breezes from the Sea. The opposite Place of the Globe to the *Baleares*, is that part of the Pacifick Ocean, between 183 and 188 Degrees of Longitude, with 35 and 40 Degrees of South Latitude.

Soil.] The two former of these *Islands* are somewhat Mountainous and Woody, but the last is more plain, and extremely fertile, both in Corn, Wine, and divers sorts of Fruits; It likewise so aboundeth with Salt, that divers neighbouring Countries are supply'd from thence.

Commodities.] From these *Islands* are exported to several Parts of *Europe*, Salt, Wine, Brandy, Coral, with variety of Fruits, &c.

Rarities.] On the Coasts of *Majorca* is found abundance of excellent Coral, for which the Inhabitants frequently fish with good Success. *Yvica* is said to nourish no noxious Animal, and yet *Formentera* (an adjacent *Island*, and one of the *Baleares*) is so infested with Serpents, that the same is uninhabited.

Archbishopricks.] In these *Islands* is one Bishoprick, viz. that of *Majorca* (under the Archbishop of *Terragon*) where is also a famous University.

Manners.] The Inhabitants of these *Islands* being *Spaniards*, are much the same in Manners with those on the Continent.

Language.] What was just now said of the *Spaniards* on these *Islands* in respect of *Manners*, the same may be affirm'd of 'em in point of *Language*.

Government.] These *Islands* being annex'd to the Crown of *Spain*, are ruled by one or more Governors, sent thither by his Catholick Majesty, and generally renew'd every third Year.

Arms.]

Religion.] The Inhabitants of these *Islands* being *Spaniards*, are all of the *Roman* Communion, and as bigotted Zealots for the Popish Doctrine,

Doctrine, as elsewhere on the Continent. They receiv'd the Light of the *Blessed Gospel* much about the same time with *Spain*.

CORSICA and SARDIGNIA.

Name.] **T**He former of these Islands (call'd first by the *Greeks*, *Tercepe*, and afterwards *Cyrne*, from *Cyrnus*, reckon'd by some a Son of *Hercules*) is now term'd *Corfica*, from *Corfa Bubulca*, a certain Woman of *Liguria*, who is said to have led a Colony out of that Country hither. And the other (according to the Opinion of its Inhabitants) is call'd *Sardignia*, from *Sardus*, another Son of *Hercules*, who, they say, was the first that settled a Colony therein, and gave it this Name in Memory of himself.

Air.] The *Air* of these Islands is universally reckon'd to be very unhealthful, especially that of *Corfica*, which is the Reason of its being so thinly inhabited. The opposite Place of the Globe to them, is that part of *Nova Zelandia*, or adjacent Ocean, between 192 and 197 Degrees of Longitude, with 37 and 43 Degrees of South Latitude.

Soil.] These Islands differ mightily in *Soil*, the former being (for the most part) very stony, full of Woods, and lying uncultivated; but the other very fertile, affording abundance of Corn, Wine, and Oil, &c. The length of the Days and Nights in these Islands, is the same as in the Middle and Southern Parts of *Spain*.

Commodities.] The chief *Commodities* exported from these Islands, are Corn, Wine, Oil, Salt, Iron, and several sorts of Fruits, especially Figs, Almonds, Chestnuts, &c.

Rarities.] In several parts of *Corfica* is found a Stone, (commonly call'd *Catochite*) which being handled, sticks to the Fingers like Glue. *Sardignia* is said to harbour no venomous Creature, no, nor any noxious Animal, save Foxes, and a little Creature nam'd *Solifuga*, which resembles a Frog. Those Animals call'd *Mafrones*, or *Mastriones*, are peculiar to this Island.

Archbishopricks.] *Archbishopricks*, are *Cagliari*, *Cassari*, and *Oristagni*, all in *Sardignia*.

Bishopricks.] *Bishopricks*, are those of *Nebbio*, *Ajazzo*, *Mariana*, *Alteria*, *Sagona*, and *Accia*, all in *Corfica* (whereof the four last are now ruin'd) together with *Villa d' Iglesja*, *Bosa*, and *Algheri*, in *Sardignia*.

Universities.] Here is only one *Univerſity*, viz. that of *Cagliari*.

Manners.] The Inhabitants of *Corſica* are reputed (for the generality of 'em) a cruel, rude and revengeful ſort of People; a People ſo given to Piracy in former times, that many think the Name of *Corſairs* is derived from them. As for the Inhabitants of *Sardignia*, they being moſtly *Spaniards*, are much the ſame with thoſe in *Spain*.

Language.] *Languages* here in uſe are the *Spaniſh* and *Italian*, the former in *Sardignia*, and the latter in *Corſica*, but mightily blended one with another.

Government.] The Iſle of *Corſica* being ſubject to the *Genoeſes*, is rul'd by a particular Governor (who hath for his Aſſiſtance, one Lieutenant, and ſeveral Commiſſaries) ſent thither by the Republick of *Genoa*, and renew'd once in two Years; and *Sardignia* (being in the Poſſeſſion of the *Spaniard*) is govern'd by a Vice-Roy, appointed by his Catholick Majeſty, and renew'd every third Year.

Arms.]

Religion.] The Inhabitants of both theſe Iſlands adhere to the *Roman* Church in her groſſeſt Errors, and receive, with an implicit Faith, whatever ſhe teaches; and correſpondent to their Principles is their Practice, eſpecially in *Sardignia*, where the People are ſo groſſly immoral, as uſually to dance and ſing prophane Songs in their Churches immediately after Divine Worſhip. The Chriſtian Faith was planted here much about the ſame time with the Northern Parts of *Italy*.

SICILY.

Name.] **T**His Iſland (of old *Sicania*, *Trinacria*, and *Triquetra*) is term'd by the *Italians* and *Spaniards*, *Sicilia*; by the *French*, *Sicile*; by the *Germans*, *Sicilien*; and by the *Engliſh*, *Sicily*. Its Name is deriv'd from *Siculi* (an ancient People in *Latium*) who being driven from their Country by the *Aborigines*, were forc'd to ſeek for new Habitations, and accordingly came over to *Sicania*, (headed, as ſome alledge, by one *Siculus*) which from them acquir'd a new Name, viz. that of *Sicily*.

Air.] No Iſland in theſe Parts of the World enjoys a purer and more healthful Air than this does. The oppoſite Place of the Globe to *Sicily*, is that part of *Nova Zelandia*, between 197 and 202 Degrees of Longitude; with 34 and 38 Degrees of South Latitude.

Soil.]

Soil.] Fully answerable to the Healthfulness of the *Air*, is the Fertility of the *Soil*, several of its Mountains being incredibly fruitful, even to the very Tops. The length of the Days and Nights here is the same as in the Southern Provinces of *Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island are Silks, Wine, Honey, Sugar, Wax, Oil, Saffron, and many Medicinal Drugs, &c.

Rarities.] Near to ancient *Syracuse*, are some Subterranean Cavities, where *Dionysius* the Tyrant shut up his Slaves. Over these Cavities was his Palace; and being anxious to over-hear what his Slaves spoke among themselves, here is still to be seen a Communication between the aforesaid Cavities and his Palace, cut out of the firm Rock, and resembling the interior Frame of a Man's Ear, which makes such a curious Echo, that the least Noise, yea, articulate Words and Sentences, when only whisper'd, are clearly heard. Here also is a large *Theatre* of the same Tyrant, cut out of the firm Rock. Known all the World over is that hideous *Volcano* of this Island, the famous Mount *Ætna* (now *M. Gibel*) whose sudden Conflagrations, and sulphurous Eruptions, are sometimes most terrible and destructive; witness those which hap'n'd in the Year 1669. and more lately, *Ann.* 1693. For a particular Description of this remarkable Mountain, and all other noted *Volcano's* in the World, *vid. Botton Leontini's Pyrologia Typographica.*

Archbishopricks.] In this Island are Three *Archbishopricks*, *viz.* those of

Palermo,

Messina,

Mont-Real.

Bishopricks.] Here likewise are seven *Bishopricks*, *viz.* those of

Syracuse,
Catana,

Cesaledi,
Pati,

St. Marco,
Gergenty,

Mazara.

Universities.] Here is only one *University*, *viz.* that of *Catana*.

Manners.] The *Sicilians* being mostly *Spaniards*, are much the same in *Manners* with those in *Spain*, only with this Difference, that they merit (according to some) a blacker Character than a Native *Spaniard*.

Language.] The ordinary *Language* of the *Sicilians* is *Spanish*, which is commonly us'd, not only by the *Spaniards*, but also Persons of all other Nations, residing in this Island.

Government.] This Island belonging to the *Spaniard* (for which he does Homage to the Pope) is rul'd by a particular Vice-Roy, appointed and sent thither by his Catholick Majesty, whose Government (as most other of the *Spanish* Vice-Roys) is Triennial, and Place of Residence *Palermo*.

Arms.] For Arms, *vid. Spain*, Pag. 145.

Religion.] The *Religion* here establish'd and publickly profess'd, is the same as in *Italy* and *Spain*. This Island receiv'd the Light of the Blessed Gospel in the earliest Ages of the Church.

M A L T A.

Name.] **T**His Island (known formerly by the same Name, or *Melita*) is term'd by the *French*, *Malte*; by the *High-Germans*, *Maltte*; by the *Italians*, *Spaniards*, and *English*, *Malta*; Why so call'd, is not fully agreed upon among Criticks; yet most affirm, that its Name of *Melita* came from *Mel*, upon the Account of a great Plenty of Honey in this Island.

Air.] The *Air* of this Island is extremely hot and stifling, the many high Rocks towards the Sea, obstructing the Benefit of cool Breezes from the surrounding Ocean. The opposite Place of the Globe to *Malta*, is that part of *Novæ Zelandia*, between 198 and 202 Degrees of Longitude, with 32 and 34 Degrees of South Latitude.

Soil.] This Island can lay no just Claim to an Excellency of *Soil*; it being extremely dry and barren, and much encumbered with Rocks. It affordeth little Corn or Wine, but is supply'd from *Sicily* of both. The length of Days and Nights in *Malta*, is the same as in the Southmost Part of *Spain*.

Commodities.] *Malta* being a Place no ways remarkable for Trade, its *Commodities* are very few; the chief Product of the Island being only Cummin-seed, Anni-seed, and Cotton-wool.

Rarities.] Worthy of Observation, is *St. John's Church*, with its rich and magnificent Vestry; as also the Observatory, Treasury and Palace

Palace of the Grand Master. The Inhabitants pretend that *Malta* hath entertain'd no venomous Creature since the Days of *St. Paul*, who (they say) blessed this Island, upon the shaking off the Viper from his Hand into the Fire.

Bishopricks.] Here are two *Bishopricks*, viz. those of *Malta*, and *Citta*, or *Civita Vecchia*. *Archbishopricks* and *Universities*, none.

Manners.] The Inhabitants of this Island (not reckoning the Slaves) are for the most part very civil and courteous to Strangers; and follow the Mode of the *Sicilians* in Habit. They also resemble the *Sicilians* in some of their worst Qualities, being extremely Jealous, Treacherous, and Cruel.

Language.] A corrupt *Arabick* doth here mightily prevail, being hitherto preserved by the frequent Supplies of *Turks* taken and brought in from time to time. But the Knights, and People of any Note, understand and speak several *European* Languages; particularly the *Italian*, which is authoriz'd by the Government, and us'd in Publick Writings.

Government.] This Island after many Turns of Fortune, was presented by the Emperor *Charles V.* to the Order of the Knights of *St. John of Hierusalem*, whose Place of Residence it hath hitherto been, since the Loss of *Rhodes*; and is now govern'd by the Patron of that Order, stil'd the *Grand Master* of the *Hospital* of *St. John of Hierusalem*, and Prince of *Malta*, *Gauls*, and *Gozza*. The Knights did formerly consist of eight different Languages or Nations (whereof the *English* was the Sixth) but now they are only Seven.

Arms.] For *Arms* the Great Master beareth a White Cross (commonly call'd the Cross of *Jerusalem*) with four Points.

Religion.] The Establish'd Religion in *Malta* is that of the Church of *Rome*, which is made essential to the Order; no Person of a different Persuasion being capable to enter therein. This Island receiv'd the Blessed Gospel in the Apostolick Times.

C A N D I A.

Name.] **T**HIS Island (the famous *Crete* of the Ancients) is term'd by the *French*, *Candie*; by the *Germans*, *Candien*; by the *Italians*, *Spaniards*, and *English*, *Candia*: So call'd from its chief Town *Candie*, built by the *Saracens*, who from their new Town gave the Island a new Name.

Air.]

Air.] The *Air* of this Island is generally reckon'd very Temperate and Healthful to breathe in ; but the South-Winds are sometimes so boisterous, that they much annoy the Inhabitants. The opposite Place of the Globe to *Candia*, is that part of the vast Pacifick Ocean, between 213 and 218 Degrees of Longitude, with 34 and 37 Degrees of South Latitude.

Soil.] This Island is blest with a very rich and fertile *Soil*, producing in great abundance, both Corn, Wine, Oil, and most sorts of excellent Fruits. The length of the Days and Nights in *Candia* is the same as in the Northmost Parts of *Barbary*; of which afterwards.

Commodities.] The chief *Commodities* of this Island, are Muscadel-Wine, Malmsey, Sugar, Sugar-Candy, Honey, Wax, Gum, Olives, Dates, Raisins, &c.

Rarities.] North of Mount *Psiloriti* (the famous *M. Ida*) is a remarkable *Grott* dug out of the firm Rock ; which divers of our Modern Travellers would fain persuade themselves to be some Remains of King *Minos's Labyrinth*, so much talk'd of by the Ancients.

Bishopricks, &c.] Before the *Turkish* Conquests of this Island there was one Archbishop, who had 9 Suffragans ; but since they changed their Masters, the number of such Ecclesiasticks is neither fixt nor certain.

Manners.] The Inhabitants of this Island were formerly given to Piracy, Debauchery, and Lying, especially the last ; and so noted were they for the same, that a notorious Lie was commonly term'd *Mendacium Cretense*. For this detestable Vice they were reproach'd by one of their own Poets, *Epimenides*, out of whose Writings the Apostle citeth these Words, *Κηρτες ἀει Ψεύσαι, Tit. 1. 12.* Their Experience in Maritime Affairs was indeed very great, and they're represented as a very considerable People among the Ancients for their Skill in Navigation. The present Inhabitants being *Turks* and *Greeks*, their respective Characters are already given, *Page* 180, 187.

Language.] Languages here in use are the vulgar *Greek* and *Turkish*, especially the former ; the number of *Greeks* on the Island being far greater than that of the *Turks*. For a Specimen of which Languages, *vid. pag.* 181, and 188.

Government.] This Island, after a bloody and tedious War of Twenty Four Years, between the *Turks* and *Venetians*, was at last

con-

constrain'd to submit to the *Ottoman Yolk*, Ann. 1669. under which it hath ever since groan'd, and is now govern'd by a *Turkish Sangiack*, whose Place of Residence is usually at *Candy*, the Capital City of the whole Island.

Arms.] See the *Danubian Provinces*, Pag. 188.

Religion.] *Christianity*, according to the *Greek Church*, is here profess'd by Toleration; but *Mahometanism* is the Religion establish'd by Authority. This Island receiv'd the Light of the Blessed Gospel in the Apostolick Age.

CYPRUS.

Name.] **T**HIS Island (known anciently by divers Names besides the present; particularly those of *Acamantis*, *Ama-thusa*, *Aspelia*, *Cypros*, *Serastris*, *Macaria* and *Ærofa*) is term'd by the *Italians*, *Isola di Cypro*; by the *Spaniards*, *Chypre*; by the *French*, *Cypre*; and by the *Germans* and *English*, *Cyprus*; so call'd (as most imagine) from *Κυπρός* [i. e. *Cyprus*] wherewith this Island did mightily abound in former times.

Air.] There being several Lakes, and some natural Salt-pits in *Cyprus*, from which abundance of noxious Vapours daily arise, these intermixing themselves with the Body of the Atmosphere, render the Air very gross and unhealthful to breathe in, especially during the sultry Heat of *Summer*. The opposite Place of the Globe to this Island is that Part of the *Pacifick Ocean*, between 217 and 223 Degrees of Longitude, with 33 and 35 Degrees of South Latitude.

Soil.] *Cyprus* was formerly bless'd with so rich and fruitful a Soil, that from its Fertility, and several Mines found therein, the *Greeks* bestowed upon this Island the desirable Epithet of *μυαδεα*, i. e. *Beata*. But now 'tis remarkable for neither of these, especially the former, being in most Parts extremely barren, tho' commonly represented otherwise. The length of the Days and Nights in *Cyprus* is the same as in the Northmost Parts of *Barbary* (of which afterwards) they both lying under the same Parallel of Latitude.

Commodities.] The chief *Commodities* of this Island are Silk, Cotton, Oil, Honey, Saffron, Rhubarb, Colliquintida, Scammony, Turpentine, black and white Allom, &c.

Rarities.] On the Eastern part of this Island stands the famous *Eamagousta*, remarkable at present for its modern Fortifications; and eterniz'd in Fame for the unfortunate Valour of the *Venetians*, *Anni*. 1571. under the Command of Signior *Bragadino*, against the furious Assaults of *Selymus II.* with his numerous Army, conducted by *Piuli* and *Mustapha*. (2.) Not far from the famous *Eamagousta*, are the Ruins of an ancient City; generally esteem'd to have been *that* call'd formerly *Salamina*, and afterwards *Constantia*; which was ransack'd by the *Jews*, in the time of the Emperor *Trajan*; and finally destroy'd by the *Saracens*, in the Reign of *Heraclius*. (3.) Nigh that Promontory, commonly call'd *the Cape of Cats* (but formerly *Curias*) are the Ruins of a Monastery of Greek Caloyers, which gave the Cape its Name, from a remarkable Custom to which these Monks were oblig'd, viz. Their keeping a certain number of Cats, for the hunting and destroying of many Serpents, that infested those Parts of the Island; to which Exercise those Creatures are said to have been so nicely bred, that at the first Sound of the Bell they would give over their Game, and immediately to the Convent. (4.) In the Maritime Villages of *Salines*, is a ruinous Greek Church, where Strangers are led into a little obscure Tomb, which the Modern *Greeks* affirm to be the Place of *Lazarus's* second Interment. (5.) Adjacent to *Salines* is a remarkable Lake, or natural Salt-pit, of a considerable Extent, whose Water congeals into solid white Salt, by the Power of the Sun-beams. Lastly, In this Island is a high Hill (the Ancient *Olympus of Cyprus*) called by the *Franks*, *The Mountain of the Holy Cross*; remarkable for nothing at present, save several Monasteries of Greek Caloyers, of the Order of *St. Basil*.

Archbishopsricks, &c.] Here is one Greek Archbishop, who commonly resideth nigh to *Nicosia*; and three Bishops, whose Places of Residence are *Paphos*, *Larnica*, and *Cerines*.

Manners.] This Island being inhabited by *Greeks* and *Mahometans*, especially the former, they being far superiour in number to the *Turks*, their respective Characters are already given (*Pag.* 180, and 187.) to which I remit the Reader.

Language.] Languages here in use are the *Turkish* and *Vulgar Greek*, especially the latter; but *Lingua Franca* is the Tongue they commonly speak with Strangers, it being understood and used by all trading People in the *Levant*.

Government.] This Island hath been subject at different times to a great many different Sovereigns, particularly the *Grecians*, *Egyptians*,
S Romans

Romans, once the *English* (when conquer'd by *Richard I.*) and lastly the *Venetians*, from whom 'twas wrested by the *Turks*, Anno 1571. under whose heavy Yoke it now groaneth, and ruled by its particular *Bassa*, who ordinarily resideth at *Nicosia*.

Arms.] See the *Danubian Provinces*, page 188.

Religion.] The Inhabitants of this Island being *Greeks* and *Turks*, (as aforesaid) the former profess Christianity, according to the Tenets of the *Greek Church* [which may be seen, page 182.] and the latter *Mahometanism*, according to their *Alcoran*; for the principal Articles of which, *vid.* page 189. As for the *Franks* here residing, they make Profession of the respective Religions of the Country from whence they came. This Island received the Light of the Blessed Gospel in the Apostolick Age.

Other observable Islands in the Mediterranean Sea, are

| | | | | | |
|----------|---|------------|---|---|-------------------------------------|
| Those of | { | Negropont | { | Idem, adjacent to the E. of Greece. | |
| | | Stalimene | | { Idem | In the Archipelago, from N. to S. |
| | | Tenedo | | { Idem | |

| | | Cephalonia | | { Argostoli | In the Ionian Sea, from S. to N. W. |
| | | Corfu | | { Idem | |

Somewhat of each of these, and in their Order. Therefore,

I. *Negropont* (formerly *Eubæa* and *Calcis*) is generally thought to have been annexed to the main Continent, and separated therefrom by an Earthquake. Its Soil is very fruitful, and *M. Caristo* is noted for excellent Marble, and the famous Stone *Amiantos* or *Asbestos*. The whole Island is subject at present to the *Turks*, and ruled by a particular *Bassa*, who has also the Command of *Achaia*, and is Admiral of the *Turkish* Fleet.

II. *Stalimene* (the ancient *Lemnos*, so famous among the Poets) is also subject to the *Great Turk*; and observable only for a kind of Medicinal Earth, called formerly *Terra Lemnia*, but now *Terra Sigillata*, because

because yearly gathered, and put up in little Sacks which are seal'd with the *Grand Seignior's* Seal, otherwise not vendible to the Merchant.

III. *Tenedo*, or *Tenedos*, an *Island* much noted of old, as being dedicated to *Apollo*, and the Place where the *Gracians* hid themselves when they feign'd to have lost all Hopes of taking *Troy*. It's now in Possession of the *Turks*, and remarkable for nothing at present, except its excellent *Muscadine Wine*.

IV. *Metelino*, [now scarcely observable for any Thing, save its ancient Name of *Lesbos*] which was the Birth-place of *Sappho*, the Inventress of *Sapphick Verse*. 'Twas for some Time under the *Venetians*, but now the *Turks*, to whom it pays yearly the Sum of 18000 *Piasters*.

V. *Scio*, alias *Chios*, is an *Island* of much Request among the *Turks*, for its great Plenty of *Mastick*, which is yearly gather'd by the *Sultan's Bostangis* or *Gardiners*, for the Use of the *Seraglio*. 'Twas lately taken by the *Venetians*, who possessed it but a short Time.

VI. *Sdelle* is also in the Hands of the *Turk*, and famous for nothing at present, save only its ancient (now corrupted) Name of *Delos*, and some stately Ruins of *Apollo's Temple*, still visible, with those of a large *Theatre*, and a *Marble Portico*.

VII. *Samo*. There's scarce any *Island* in the *Archipelago* more frequently mention'd by the Ancients, than this of *Samo*, formerly *Samos*. It went also by the Names of *Parthenia*, *Anthemosa*, *Melampylos*, *Dryusa*, *Cyparissa*, and several others. 'Tis now subject to the *Turk*, and hath Reason to boast of nothing so much, as having been the Birth place of the famous Philosopher *Pythagoras*.

VIII. *Lango*, formerly known by the Name of *Co*, *Coa*, or *Cos*, and remarkable of old for the Temple of *Æsculapius*, and being the Birth-place of the renowned *Hippocrates* and *Apelles*. It belonged to the *Knights of Rhodes*, but now to the *Turks*.

IX. *Rhodes*. This *Island* is famous all the World over, for that huge Brazen *Colossus* of the *Sun*, formerly here erected, and deservedly reckon'd one of the *World's Wonders*. The Inhabitants were likewise so famous for their Skill in *Navigation*, that for some Ages they were *Sovereigns* of these *Seas*, and made so just and excellent Laws in *Maritime Affairs*, as were afterwards esteem'd worthy of being incorporated in the *Roman Pandects*. This *Island* (after the Loss of

Jerusalem and *St. John d'Acre*) was taken from the *Saracens* by the *Hospitallers*, or *Knights of St. John*, Anno 1309. who continued Masters of it till 1522. when *Solyman II.* conquer'd it by the Treachery of *Amurath a Portuguese*. Since which Time it hath owned the *Grand Seignior* for its Sovereign, and is now ruled by a particular *Bassa*, sent thither from the *Ottoman Port*.

X. *Cerigo* (the *Cythera* of the Ancients) being a considerable Island, inhabited by *Greeks*, and subject to the *Republick of Venice*, is govern'd by a noble *Venetian*, in Quality of a *Proveitor*, who is renew'd every two Years. This Isle produceth some excellent *Wine*, but in no great Quantity. It's also stock'd with store of good *Venison*, and a Competency of *Corn* and *Oil*, sufficient for its Number of Inhabitants. The *Greeks* here residing, have the greater Veneration for this Place, upon the Account of a vulgar Opinion now current among them, which is, that *St. John the Divine* began here to write his *Apocalypse*.

XI. *Zant* (formerly *Zacynthus*) is another Island belonging to the *Venetians*, and one of the richest in the *Streights*, abounding with *Wine* and *Oil*, but mostly noted for *Currants*, of which there is such Plenty that many Ships are yearly freighted with them for divers Ports of *Europe*. And such Advantage is that *Currant-Trade* to the *Republick of Venice*, that the Profits redounding from thence, do serve (according to the Testimony of a late Traveller) to defray the Charges of the *Venetian Fleet*. In this Island are several remarkable Fountains, out of which there bubbles up a pitchy Substance in great Quantity. In the Monastery of *Sancta Maria de le Croce*, is the Tomb of *M. T. Cicero* and *Terentia* his Wife, with two several Inscriptions (one for him, and the other for her) found upon a Stone, which some time ago was dug out of the Ground, nigh the Place of the aforesaid Tomb. The Inhabitants (reckoning both *Greeks* and *Jews*) amount to about 20 or 25000, and are govern'd by a noble *Venetian*, sent thither with full Power from the Senate.

XII. *Cephalonia* (or old *Melana*, *Taphos*, or *Teleboa*) is likewise under the State of *Venice*, and chiefly abounds in dry Raisins (which the *Venetians* turn to good Advantage) and excellent *Wine*, especially *Red Muscadels*, which many call by the Name of *Luke-Sherry*. It hath its particular *Proveditor*, whose Government lasteth 32 Months. This Island was bestow'd upon the *Republick of Venice*, Anno 1224. by *Gaio*, then Lord thereof, but master'd by the *Turks*, in 1479. and possess'd by them till 1499. when driven thence by the *Venetians*, who re-peopled it with Christians, and afterwards fortifying the same against future Invasions, have hitherto continued Masters thereof.

Lastly

Lastly, *Corfu* (formerly *Corcyra*) is blest'd with a very healthful Air, and fruitful Soil for Wine and Oil, but not for Corn, of which the Inhabitants are supply'd from the *Continent*. It belongs to the Republick of *Venice*, and is deservedly term'd, *The Port of the Gulf, and Barrier of Italy*. The Government thereof is lodg'd in six noble *Venetians*, whose Power lasteth for the space of two Years. The first of these Noblemen hath the Title of *Bailly*. The second, of *Proveditor* and *Captain*. The third and fourth, of *Counsellors*. The fifth, of *Great Captain*. And the sixth, of *Castelan*, or Governor of the Castle *de la Campana* in the old Town. The *Greeks* are very numerous in this Island, and have a *Vicar-General*, whom they stile *Proto Papa*. In the Time of *Solyman II.* no less than 25000 *Turks* did land in *Corfu*, under the Command of the famous *Barbarossa*, yet such was the Conduct of the wise *Venetians*, that they forced him to make a shameful Retreat.

To speak more particularly of each of these *Islands*, and many others, reducible to the two Classes of *Cyclades* and *Sporades*, would far surpass our design'd Brevity. Conclude we therefore this tedious Section with the following Advertisement. That, whereas in treating of *Islands* (after we took leave of the Continent of *Europe*) I esteem'd it most methodical, to bring all those in the *Mediterranean Sea*, under the Title of *European Islands*; yet the Reader is hereby desir'd to take Notice, that all of 'em are not usually reckon'd as such; the *Isle of Malta* being generally accounted an *African*; and *Cyprus* with *Rhodes* among the *Asiatick*; as are also several others on the Coast of *Natolia*.

And so much for *Europe* and the *European Islands*. Now followeth,

CHAP. II.

Tartary comprehends five great Parts.

Name.] *Tartary* [the greatest Part whereof is reckon'd the *Scythia Asiatica* of the Ancients; and now bounded on the East by Part of the Main Ocean; on the West by *Muscovia*; on the North by the *Tartarian Ocean*; and on the South by *China* and *India*] is term'd by the *Italians* and *Spaniards*, *Tartaria*; by the *French*, *la Tartarie*; by the *Germans*, *Tartarigen*; and by the *English*, *Tartary*: so call'd from *Tartar* or *Tatar*, a River of that Country, which is said to empty it self into the vast Northern Ocean. But others chuse rather to derive the Name from *Tatar* or *Totar*, which in the *Syriack* Language signifying a *Remnant*, imagining that the *Tartars* are the Remainders of those *Israelites*, who were carried by *Salmanassar* into *Media*. It's term'd *Tartary the Great*, to distinguish is from the *Lesser* in *Europe*.

Air.] The *Air* of this Country is very different, by Reason of its vast Extent from *South* to *North*; the Southmost Parts thereof having the same Latitude with the middle Provinces of *Spain*, and the Northmost reaching beyond the Arctick Polar Circle. What its real Extent from *East* to *West* may be, is not certainly known as yet; only this we will affirm in general, that 'tis much less than commonly supposed, if the Account given us by a late judicious Missionary (who travelled from *Moscovy* to *China*, and mark'd the several Stages) shall be found afterwards to hold true. The opposite Place of the Globe to *Tartary*, is part of the vast Pacifick Ocean, as also the Countries of *Chili*, *Paraguay*, and *Terra Magellanica*.

Soil.] This vast Country toward the *North* (it lying in the 6th, 7th, 8th, 9th, 10th, 11th, 12th, &c. *North Climate*) is extremely barren, being every where encumber'd with unwholesome Marshes, and uninhabited Mountains; but in the Southern Parts, the *Soil* is indifferently good for Tillage and Grazing, especially the latter; and towards the East 'tis reported to be abundantly fertile in Corn, (where duly manur'd) and several Sorts of Herbs, especially *Rhubarb*. The longest Day in the Northmost Parts is about two Months, (tho' Sun not sitting for that Time when near the Summer Solstice)

the shortest in the Southmost is about Nine Hours and Three Quarters, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Sable, Martins, Silks, Camlets, Flax, Musk, Cinnamon, and vast Quantities of Rhubarb, &c.

Rarities.] In Lieu of the *Rarities* of this barbarous and little frequented Country, we may mention that prodigious Wall dividing *Tartary* from *China*, erected by the *Chineses*, to hinder the frequent IncurSIONS of their unwelcome Neighbours, the *Tartars*; 'twas commonly reckon'd 300 *German* Leagues in length, 30 Cubits high in most Places, and 12 in breadth. The Time of its building is computed to be about 200 Years before the Incarnation of our Blessed Saviour. By our latest Relations of the State and Nature of this Country, we find that some remarkable *Volcano's* are to be seen in the North and Eastern Parts thereof.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities*, in this Country, none.

Manners.] The *Tartars* are a People of a swarthy Complexion, strong Bodies, and middle Stature. The Generality of 'em are Persons of broad Faces, hollow Eyes, thin Beards, thick Lips, flat Noses, and ugly Countenances. In Behaviour they're very rude and barbarous; commonly devouring the Flesh of their Enemies, and drinking their Blood, so soon as they are in their Power. Their ordinary Food is Horse-flesh, which they greedily tear and eat up like so many ravenous Vultures. Their manner of living is commonly in Tents in the open Fields, which they remove from Place to Place, according to the Time of the Year, and Conveniency of Grazing. Many of 'em make excellent Soldiers, being not only willing and able to endure great Fatigues, but also very dexterous and daring in Time of Engagement. When they seem many times to fly before their Enemies, they'll unexpectedly send back a dreadful Shower of Arrows in the Faces of their Pursuers, and frequently turning about do give 'em a violent Charge, and all without the least Disorder. When their Great *Cham* dies, 'tis reported, That many of his chief Officers are immediately killed, and interr'd with him; that they may also attend him (as they imagine) in the other World, according to their respective Posts here.

Language.] The *Language* used by the *Asiatick Tartars*, is not much different from the *Tartaresque*, spoken by those of *Crim Tartary* (a Specimen of which is already given in *Europe*) and both have a great Affinity with the *Turkish*. G

Government.] The vast Body of *Tartary* is said to be subject to several Princes, who are wholly accountable (in their Government) to one Sovereign, who is commonly term'd the *Great Cham*, whose Government is most Tyrannical, and Crown Hereditary. The Lives and Goods of his People are altogether in his Power. His Subjects stile him the *Sun* and *Shadow* of the Immortal God, and render him a Kind of Adoration; never speaking unto him Face to Face, but falling down on their Knees with their Faces towards the Ground. He looks upon himself as the Monarch of the whole World; and from that vain Opinion, is reported to cause his Trumpets to sound every Day after Dinner; pretending thereby to give leave to all other Kings and Princes of the Earth to dine. For the better Management of publick Affairs, he's said to appoint two Councils, each consisting of 12 Persons (the wisest and best experienced of any that he can pitch upon) of which one doth constantly attend the Affairs of State, and the other *those* which relate to the War. Yet after all, there be many Things related of this mighty *Cham*, which (tho' hitherto current) are look'd upon by some judicious Persons, as Narratives that have a near Affinity unto the *Legenda Aurea* of the *Roman Church*.

Arms.] The most received Opinion about the *Arms* of the *Great Cham*, is, that (as Emperor of *Tartary*) he bears, Or, an Owl *Sable*. But what, as King of *China*, see the following Section.

Religion.] The Inhabitants of this Country are partly *Pagan*, partly *Mahometan*, and partly *Christian*. *Paganism* doth chiefly prevail in the Northmost Parts, the People being generally gross *Idolaters* in those Places. In the Southern Provinces they are (for the most part) Followers of *Mahomet's Doctrine*, especially since the Year 1246. And towards the *Caspian Sea*, are found a considerable Number of *Jews*, thought by some to be the Off-spring of the Ten Tribes, led away Captive by *Salmanasser*. Those of the Christian Religion (overgrown of late by *Nestorianism*) are scatter'd up and down in several Parts of this vast Country, but most numerous in *Cathay*, and the City of *Cambalu*. The Christian Faith was first planted in this Country (as is generally believ'd) by the Labours of St. *Andrew* and St. *Philip*, two of the Apostles.

Name.] CHINA (reckon'd by most Geographers the Country of the ancient *Sine*, mention'd by *Ptolemy*; and now bounded on the East by the *Chinese* Ocean, on the West by part of *India*, on the North by part of *Tartary*, and on the South by part of the *Oriental* Ocean) is term'd by the *French*, *la Chine*; and by the *Italians*, *Spaniards*, *Germans* and *English*, *China*; so called (according to the best Conjecture) from one of its ancient Monarchs, named *Cinna*, who is said to have liv'd above fifty Years before the Nativity of our Blessed Saviour. Many other Names it hath had since that Time; for when the Government falls from one Family to another, the first Prince of that Name is said to give a new Name to the whole Country; the latest of which modern Names, are *Tamin*, signifying the Kingdom of *Brightness*; and *Chuinque*, i. e. The Kingdom of the *Middle*;

Middle; the *Chineses* imagining, that the Earth is square, and that their Country is situated exactly in the Middle of it.

Air.] The *Air* of this Country is generally very temperate, save only towards the North, where 'tis sometimes intolerably cold, and that because of several Mountains of a prodigious Height, whose Tops are ordinarily cover'd with Snow. The opposite Place to *China* is the South part of *Brasil*, together with the East of *Paraguay*.

Soil.] This Country (it lying in the 4th, 5th, 6th North Climate) is for the most part of a very rich and fertile *Soil*, in so much that its Inhabitants in several Places are said to have two, and sometimes three Harvests in a Year. It abounds with Corn, Wine, and all kind of Fruits. Its Lakes and Rivers are very well furnish'd with Fish, and some afford various kinds of Pearls and Bezoar of great Value. Its Mountains are richly lin'd with several Mines of Gold and Silver. Its Plains are extraordinary fit for Pasturage, and its pleasant Forests are every where stored with all sorts of Venison. In a Word, the whole Country in general is esteem'd one of the best in the World. The longest Day in the Northmost Parts is about Fourteen Hours and Three Quarters, the shortest in the Southmost is about Ten Hours and Three Quarters, and the Nights proportionably.

Commodities.] The *Commodities* of this Country are Gold, Silver, Precious Stones, Quicksilver, Porcelane Dishes, Silks, Cottons, Rhu-barb, Sugar, Camphire, Musk, Ginger, *China*-wood, &c.

Rarities.] Peculiar to this Country is a short Tree, with a round Head, and very thick, which in respect of its Fruit may bear the Name of the *Tallow-Tree*; for at a certain Season of the Year 'tis full of Fruit, containing divers Kernels about the Bigness of a small Nut, which Kernels have all the Qualities of Tallow, being the very same, both as to Colour, Smell and Consistency, and by mixing a little Oil with 'em, make as good burning Candles, as *Europeans* usually make of pure Tallow it self. (2.) Here is a large Mountain full of terrible Caverns, in one of which is a Lake of such a Nature, that if a Stone be thrown into it, presently there's heard a hideous Noise as of a frightful Clap of Thunder, and sometimes there rises a gross Mist, which immediately dissolves into Water. (3.) In the City of *Pekin* is a prodigious big Bell, weighing 120000 Pound, surpassing the noted Bell of *Erfurd* in *Upper Saxony*, by 94600 Pound; in Dimension it's 11 Foot Diameter, and 12 high. (4.) In *Nanking* is another of 11 Foot high, and 7 in Diameter, and (weighing 50000 Pound, which also surpasseth the Bell of *Erfurd*, weighing only 25400 Pound, yet hitherto supposed the greatest in the World) by almost double its Weight. (5.) In

China

China are several *Volcano's* (particularly that Mountain call'd *Linc-fung*) which vomits out Fire and Ashes so furiously, as frequently to raise some hideous Tempests in the Air. (6.) Here are some Rivers whose Waters are cold at the Top, but warm beneath; as also several remarkable Fountains which send forth so hot a Stream, that People usually boil Meat over them. (7.) In this Country are several Lakes, remarkable for changing Copper into Iron, or making it just of the same Resemblance; as also for causing Storms when any Thing is thrown into them. (8.) In the Island *Hainan* there is said to be Water (uncertain whether in Lake, River or Fountain) of such a strange Quality, that it petrefies some sort of Fishes, when they unfortunately chance to enter into it. (9.) Many are those *Triumphal Arches* (to be seen in most of the noted Cities of this Empire) erected in Honour of such Persons as have either done some signal Pieces of Service to the State, or have been conspicuous in their Times for their singular Knowledge. (10.) In this Country are several remarkable *Bridges*, particularly that over a River called *Saffrany*, which reaches from one Mountain to another, being four hundred Cubits long, and five hundred high, and all but one Arch, whence 'tis called by Travellers, *Pons volans*. Here likewise is another of six hundred and sixty Perches in Length, and one and half broad, standing upon three hundred Pillars, without any Arches. Lastly, In *China* are many very observable *Plants*, *Animals* and *Fossils*, especially the last, among which is the *Asbestos*. But for a particular Account of them, vide *Kircherus's China Illustrata*.

[*Archbishopricks, &c.*] *Archbishopricks*, *Bishopricks*, or *Universities*, are hardly to be expected here; however this Country (according to the Testimony of Popish Missionaries) is furnish'd with some of these, *Pekin*, *Nanquin* and *Macao*, having each of 'em a particular Bishop, nominated by the K. of *Portugal*, and the other Provinces are under the Jurisdiction of three Apostolical Vicars. Under which Ecclesiastical Superiors, there are (by their Relations) above two hundred Churches or private Chapels dedicated to the True God.

[*Manners.*] The *Chinois* [Persons for the most Part of a fair Complexion, short Nos'd, black Ey'd, and of very thin Beards] are great Lovers of Sciences, and generally esteem'd a very ingenious sort of People. They're said to have had the Use of Printing, Gunpowder, and the Mariners Compass, long before any of them was known in *Europe*; but for want of due Improvement, these useful Inventions have not turn'd to near so good an Account among them as in *Europe*. Divers of 'em are indeed considerable Proficients in several Parts of the *Mathematicks*, especially *Arithmetick*, *Geometry*, and *Astronomy*; and so conceited are they of their own Knowledge in these

these Things, and so mean are their Thoughts of others, that 'tis generally reported of them, that (speaking of themselves) they commonly say, That they have *two Eyes*, the *Europeans one*, and the rest of the World none at all. They who wholly apply themselves to the Study of Sciences, and make such Proficiency in 'em, as to become Doctors to others, are distinguish'd by their long Nails, suffering 'em sometimes to grow as long as their Fingers, that being esteem'd a singular Characteristick of a profound Scholar, and a differencing Mark between them and Mechanicks.

[*Language.*] The *Language* of the *Chinois* is extremely difficult to be acquir'd by Strangers, and differs from all others, both as to its Nature, Pronunciation, and Way of Writing. (1.) Its *Nature*. They use no Alphabet, as *Europeans* do, and are astonish'd to hear that by 24 Letters we can express our Thoughts, and fill Libraries with Books. In Lieu of an Alphabet, they formerly used Hieroglyphicks, setting down the Images of Things for the Things themselves; but this being extremely tedious, and likewise defective (there being no such Resemblances of pure Abstracts) they then made Characters to signify Words, numbring them according to the Number of Words they needed to express their Ideas; which Characters arise to such a prodigious Multitude, that not only Strangers, but even the Natives themselves, find it a very difficult Matter to acquire an intimate Acquaintance with them all. (2.) Its *Pronunciation*. Although all the Original Terms of this Tongue are only Three Hundred and Thirty Three; yet such is their peculiar Way of pronouncing them, that the same Term admits of various and even contrary Significations, according to the various Accent in pronouncing it. And of these Accents there are Five applicable to every Term, which extremely augments the Difficulty of either speaking or understanding this Tongue to Perfection: Besides, the Pronunciation thereof is accompanied with such Variety of Motions of the Hand, that a mute Person can speak almost intelligibly by his Fingers. And as to the *Manner of Writing*, they differ from all other Nations; for whereas Christians write from the left Hand to the right, and the *Jews* from the right to the left, they usually make their Lines from the Top of the Page down to the Bottom.

[*Government.*] This great Kingdom was formerly under its own particular King or Emperor, but of late over-run and conquer'd by the *Tartars*, to whom it's at present subject, acknowledging due Allegiance to the *Great Cham*, whose Government is as despotical as any of the Oriental Monarchs; for he hath full Power over the Lives of his Subjects, the Princes of the Blood not excepted. His bare Word is the Law, and his Commands admit of no Delay nor Neglect. He is seldom

seldom seen, and never spoke with, but upon the Knees. Upon his Death-bed he may chuse his Successor out of what Family he pleases. For the better managing the great Affairs of this mighty Empire, he's assisted by two Sovereign Councils; one *Extraordinary*, compos'd of Princes of the Blood only; and the other *Ordinary*, which besides the Princes, doth consist of several Ministers of State, call'd *Colaos*. But over and above these two Councils, there are at *Pekin* six Sovereign Courts, whose Authority extend over all the Empire, and to each of them belong different Matters; viz. (1.) Is that Court call'd *Louou*, which presides over all the Mandarins, and confers upon, or takes from them their Offices. (2.) *Houou*, which looks after the Publick Treasury, and takes care of raising the Taxes. (3.) *Lipou*, which inspects into Ancient Customs; and to it is committed the Care of Religion, Sciences, and Foreign Affairs. (4.) *Pimpou*, which hath Charge of the Soldiery, and other Officers. (5.) *Himpou*, which inquires and passes Sentence in all Criminal Matters. Lastly, *Compon*, which looks after all Publick Buildings, as the Emperor's Palaces, and such like. In each of these Courts the Emperor hath one who may be term'd a *Private Censor*; it being his Business to observe all that passeth, and to acquaint him faithfully therewith, which makes all Persons very cautious in their Actions. Over each Province is appointed a Vice-Roy, and under him a great many Publick Officers. To shun Oppression of the Subject by these various Ministers, the Emperor, before the *Tartarian* Conquest, had a certain Number of secret Spies in every Province, to have a watchful Eye upon the Actions of every Publick Officer; and upon any visible Act of Injustice in discharge of his Office, they were to produce their Commission, and by Virtue thereof did seize such an Officer, tho' of the highest Station; but this is laid aside, those Persons having mightily abus'd their Power. Yet in Lieu thereof, they still retain one Custom, which is certainly very singular, viz. That every Vice Roy and Publick Officer is bound to take a Note of his own Miscarriages in the Management of Publick Affairs from Time to Time, and humbly acknowledging the same, is bound to send them in Writing to Court. Which Task is undoubtedly very irksome on one Hand, if duly perform'd; but yet more dangerous on the other, if wholly neglected. Very remarkable are Three Maxims of State, carefully observed by the *Chinese* Emperors, viz. 1st. Never to give any *Mandarin* a publick Office in his Native Province, lest being of a mean Descent, it might contribute to his Disparagement; or being well descended and beloved, he should thereby grow too powerful. 2d. To retain at Court the Children of the *Mandarins* employed in publick Offices, and that under pretence of giving them good Education, but it's, in effect, as Hostages, lest their Fathers should chance to forget their Duty to the Emperor.

Lastly,

Lastly, Never to sell any Publick Office, but to confer the same according to Persons Merits.

Arms.] The great *Cham*, as King of *China*, is said to bear for Ensigns Armorial, *Argent*, Three Black-moors Heads, plac'd in the Front, their Bust vested *Gules*; but (according to others) two Dragons.

Religion.] The prevailing Religion in *China*, is Paganism, or gross Idolatry; and in some Parts the Doctrine of *Mahomet* is entertain'd. Of the several Idols to whom the *Chineses* pay their Devotions, there are Two of chief Note, viz. One in Form of a Dragon, whom the Emperor with his Mandarins do religiously worship, prostrating themselves frequently before it, and burning Incense unto it. The other is call'd *Fo* or *Foe*, set up (as is conjectur'd) in favour of one of their own Nation, who is thought to have flourish'd about 1000 Years before our Blessed Saviour, and for his wonderful Parts and Actions was esteem'd worthy of being deify'd at his Death. They look'd upon him as the Saviour of the World, and that he was sent to teach the Way of Salvation, and make an Atonement for the Sins of Men. They mightily prize some Moral Precepts which they pretend he left, and which the *Bonzees* (or Priests) do frequently inculcate upon the Minds of the People. To this God are erected many Temples, and he is worshipped not only under the Shape of a Man, but in the Person of a real Man, who, they say, never dies; being upheld in that vain Opinion by the *Lamas* (or *Tartarian* Priests) who upon the Death of that Immortal Man, take due Care (as the *Egyptian* Priests did their *Apis*) to put one of their own Number in his Room, and that of the same Features and Proportion, or as near as possibly they can. The *Chineses* have a mighty Spur to be cautious in all their Actions, from an Opinion universally receiv'd among them, viz. That the Souls of their deceas'd Friends are always (at least frequently) present with them, and narrowly viewing their Deportment. If we may believe the Writings of some of the *French* Missionaries, *Christianity* hath obtained considerable footing of late in this Country, especially in the Province of *Nanking*, and that the present Emperor hath allow'd of the same by a Publick Edict throughout all the Empire. The first Plantation of Christianity in this Part of the World, was undertaken (according to common Belief) by *St. Thomas*, or some of his Disciples, which Opinion is confirm'd by an ancient Breviary of the *Indian* Churches, containing these Words, *Per D. Thomam Regnum Cælorum volavit & ascendit ad Sinas.*

| | | | | | | | |

THIS vast Complex Body, consider'd here under the Title of *India* : [*viz.* all between *Persia* and *China*] comprehends (as aforesaid) many distinct and considerable Kingdoms; but all reducible to the Three great Divisions above-mention'd, to wit, the *Mogul's Empire*, and the two *Peninsulas of India*, one within, and the other without the *Ganges*. Of all which separately and in their Order. Therefore,

§. 1. *The Mogul's Empire.*

Nome.] **T**His Country (bounded on the East by *China*, on the West by *Persia*; on the North by part of *Tartary*; and on the South by the Gulf of *Bengal*) is a great part of the Modern and Ancient *India*, remarkable in the History of *Alexander the Great*, and term'd *India* from the River *Indus*, but now the *Mogul's Empire*, as being subject unto that mighty Eastern Monarch, commonly known by the Name of the *Great Mogul*.

Air.] In the Northern Parts of this Empire, the *Air* is said to be extremely cold and piercing about the Time of the *Sun's* greatest Southern Declination; but in the Southern Provinces much more temperate. The opposite Place of the Globe to the *Mogul's Empire*, is that part of the vast *Pacifick Ocean* between 252 and 292 Degrees of Longitude, with 25 and 39 Degrees of South Latitude.

Soil.] The *Soil* of this vast Country (it lying in the 3d and 4th North Climate) is extraordinary barren in several Parts, being encumber'd with formidable, dry, sandy Mountains, but elsewhere very plentiful, especially in Cotton, Millet, Rice, and most sorts of Fruits. The Length of the Days and Nights in this Country is the same as in the Kingdom of *China*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country, are Aloes, Musk, Rhubarb, Wormseeds, Civets, Indigo, Laique, Borax, Opium, Amber, Myrabolans, Sal Armoniac, Silk, Cottons, Callicoes, Sattens, Taffaries, Carpets, Metals, Porcelline-Earth, and most sorts of Spices, &c.

Rarities.] In several Parts of the *Mogul's Empire*, particularly the Kingdom of *Cambaja*, are divers noted *Volcano's*, which usually smoke, and sometimes break out in terrible *Eruptions* of Fire and *Sulphurous Matter*. In and about the Imperial City of *Agra*, are the splendid *Sepulchres* of the *Royal Family* of the *Moguls*; particularly that glorious Monument of the Empress of *Cha-Géban*, erected nigh to the Grand Bazar, which is reported to be a very stately Structure, and of so vast a Bigness, that 20000 Artificers were employ'd in erecting of it for the space of 22 Years. But what mostly deserves our Regard, in the whole Kingdom of *Indostan*, is that rich and glorious Throne in the Palace of *Agra*, on which the *Great Mogul* doth usually appear during the Festival of his Birth-day, where he receives the Compliments and Presents of the *Grandees*, after the yearly

T

Cere-

Ceremony of weighing his Person is over. This stately Throne (so noted among Travellers in these Parts) is said to stand upon Feet and Bars over-laid with enamell'd Gold, and adorned with several large Diamonds, Rubies, and other precious Stones. The Canopy over the Throne is set thick with curious Diamonds, and surrounded with a Fringe of Pearl. Above the Canopy is the lively Effigies of a *Peacock*, whose Tail sparkles with blue Saphires, and other Stones of different Colours; his Body is of enamell'd Gold set with Jewels, and on his Breast is a large Ruby, from which hangs a Pearl as big as an ordinary Pear. On both sides of the Throne are two Umbrellas of curious red Velvet, richly embroider'd with Gold, and encompassed with a Fringe of Pearl; the very Sticks whereof are also covered with Pearls, Rubies and Diamonds. Over-against the Emperor's Seat is a choice Jewel, with a Hole bored thro' it, at which hangs a prodigious big Diamond, with many Rubies and Emeralds round about it. These, and several others not here mention'd, are the costly Ornaments of this *Indian Throne*, which (if all related of it be true) cannot be matched by any other Monarch upon the Face of the whole Earth.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities,
none.

Manners.] The Inhabitants of the various Parts of this vast Empire, have various Tempers and Customs. What those of the Inland Provinces are, is not very certain (our Intelligence of 'em being yet very slender) but the People of the Southern or Maritime Places of the *Mogul's Dominions*, are Persons (for the most part very tall of Stature, strong of Body, and in Complexion inclining somewhat to that of the *Negroes*: in Behaviour civil; in their Dealings pretty just; and many of the mechanical Sort prove wonderful Ingenious.

Language.] Both here, and in the two *Peninsulas* hereafter mentioned, are various *Languages*, and these again divided into different Dialects; but the *Arabick* is still used in their Religious Offices. Among the several *Languages* spoken in the *Mogul's Dominions*, the *Gazarate Tongue* is reckon'd the chief, and is mostly used in the Kingdoms of *Cambaya* and *Bengala*; but the *Persian* is said to be the *Language* of the Court.

Government.] This vast Body comprehends a great many Kingdoms, some of which are free, some subject to others, and most of 'em tributary to one Sovereign, namely, the *Great Mogul*, whose Government is most Tyrannical; for he hath both the *Purses* and *Persons* of his Subjects wholly at his Disposal, and is Lord of all,
being

being Heir of every Man's Estate. His Imperial Seat is ordinarily at *Agra*, which is a very rich and populous City, lying in the Province of the same Name, and *Metropolis* of the whole Empire. If he allows paternal Inheritance any where, the same is revokable at his Pleasure. His bare Will is the Law, and his Word a final Decision of all Controversies. The *Indian* Diadem is not entailed by Primogeniture on the Sons, but is either ravish'd by Force, or carry'd by Craft, of such who stand in Competition for it; he generally succeeding to the Throne, who hath mostly gain'd the Favour and Assistance of the *Omrabs* and *Nabobs*, with other Grandees at Court; and upon his Instalment therein, he commonly sacrificeth all his Rivals and nearest Relations, reckoning his Throne to be but tottering, unless its Foundations be laid in the Blood of such Persons. His Revenue is indeed so vast, that a bare Relation would seem incredible; but proportionably to the same, are his necessary ways of imploying it; for to awe the prodigious multitude of People within the vast Extent of his Dominions, he's oblig'd to keep in daily Pay, many Legions of Soldiers; otherways 'twere impossible to command the turbulent *Rajahs*, who (as it is) do frequently make Insurrections, and disturb his Government.

Arms.] The Ensigns Armorial of the *Great Mogul*, are said to be *Argent*, *Seme* with *Besants*, *Or*. As for particular Coats of Arms, peculiar to private Persons, as in *Europe*, here are none; no Man within the *Mogul's* Dominions being Hereditary, either to his Estate or Honours.

Religion.] The Inhabitants of this Country are mostly *Pagan*; and next to *Paganism*, the Religion of *Mahomet* prevails; it being chiefly embraced according to the Commentaries of *Mortis-Aly*. Of the *Pagans*, here are various Sects and Orders among 'em; particularly the *Banians*, the *Persees*, and *Faquirs*. (1.) The *Banians*, who believe a *μετεμύχωςις*, or Transmigration of Souls, and thereupon do usually build Hospitals for Beasts, and will upon no account deprive any Creature of Life, lest thereby they dislodge (as they imagine) the Soul of some departed Friend. But of all living Creatures, they have the greatest Veneration for the *Cow*, to whom they pay a solemn Address every Morning; and at a certain Time of the Year, they drink the Stale of that worshipful Animal; believing it hath a singular Quality to purifie all their Defilements. Beside their constant Abstinence from the Food of any Animal, they frequently refrain from all Eatables till Night. Of these *Banians* there are reckon'd in *India* about twenty four different *Casts* or *Sects*. (2.) *Persees* (the Posterity of the ancient *Persians*) who worship the Element of Fire; for which Reason they're also called *Gaures*,

i. e. Worshippers of Fire. Besides the Fire, they have a great Veneration for the *Cock*. To kill the one, or extinguish the other, is esteem'd by 'em a Crime unpardonable. Their High-Priest is call'd *Desboor*, and their ordinary Priests *Daroos* or *Harboods*. Lastly, The *Faquirs* (a kind of religious Monks) who live very austere Lives, being much given to Fasting, and several Acts of Mortification; and some (as a voluntary Penance) make solemn Vows of keeping their Hands clasp'd about their Heads; others hold one (and some both Arms) stretch'd out in the Air; and a thousand such ridiculous Postures, and all during Life. Which Vows once made, they sacredly observe, notwithstanding the Observation of 'em is attended with exquisite Pain. Most of the *Indians* believe, that the River *Ganges* hath a sanctifying Quality: whereupon they flock thither at certain Seasons in vast Multitudes, to plunge themselves therein. Dispersed thro' the *Mogul's* Dominions is a considerable Number of *Jews*; and upon the Sea-Coasts are many *European Christians*, all upon the Account of Traffick. These Parts of *India* which received the Blessed Gospel in former Times, were instructed therein (as is generally believed) by the Apostle St. *Thomas*.

§. 2. The Peninsula of India within the Ganges.

Name.] **T**His large Country [comprehending the several Kingdoms above-mention'd; and now bounded on the East by the Gulf of *Mexico*; and on the West by *Mare Arabicum*; on the North by part of the *Mogul's* Empire; and on the South by the *Indian Ocean*] was term'd *Peninsula India intra Gangem* by the Ancients, particularly the *Romans*, and that upon the account of its Situation; being within, or on this side the River *Ganges*, in respect of the Empire of *Persia*, or Western Parts of *Asia*.

Air.] The Air of this Country is generally very hot, yet in most of the Maritime Places. 'tis frequently qualified by cold Breezes from the Sea. The opposite Place of the Globe to this *Peninsula*, is that part of the *Pacifick Ocean*, between 212 and 227 Degrees of Longitude, with 17 and 25 Degrees of South Latitude.

Soil.] The Soil of this *Peninsula* is (for the most part) extraordinary fertile, producing all desirable Fruits, Roots, and Grain, besides vast Quantities of Medicinal Herbs. The longest Day in the Northmost Parts of this Country, is about 13 Hours and a half, the shortest in the Southmost is 11 Hours and a half, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country are Metals, Silk, Cottons, Pearls, Drugs, Dates, Cocoes, Rice, Ginger, Cinnamon, Pepper, Cassia, &c.

Rarities.] In several Places of the Kingdom of *Decan*, is a noted Tree, call'd by Travellers, the *Nure-Tree*, whose Nature is such, that every Morning 'tis full of stringy red Flowers, which in the Heat of the Day fall down in Showers to the Ground, and blossoming again in the Night, it daily appears in a new Livery. (2.) In the Island *Salsete*, adjacent to *Goa*, are vast Receptacles cut out of the main Rock, one above another, some of 'em being equal in bigness to a Village of 400 Houses, and adorn'd throughout with strange frightful Statues of Idols, representing Elephants, Tygers, Lyons, Amazons, &c. (3.) In the Island *Conorein*, near *Bombay* (belonging to the *Portugueze*) is a City of the same Name, having divers large Heathen Temples, and many other Apartments, all cut out of the firm Rock; which stupendous Work is attributed by some to *Alexander the Great*, but that without any shew of Probability. (4.) In another adjacent Island (belonging also to the *Portugueze*, and called *Elephanto*, from a huge artificial Elephant of Stone, bearing a young one upon its Back) is another Idolatrous Temple of a prodigious bigness cut out of the firm Rock. 'Tis supported by 42 Pillars, and open on all sides, except the East, where stands an Image with three Heads, adorn'd with strange Hieroglyphicks, and the Walls are set round with monstrous Giants, whereof some have no less than eight Heads. (5.) At a City in the Kingdom of *Decan*, known to Travellers by the Name of *Duungeness*, is another Heathen Temple, much the same with that above-mention'd.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities*, none.

Manners.] The Natives of the various Provinces of this *Peninsula*, are much the same in *Manners* with those in the Southern Parts, of the *Mogul's* Dominions already mention'd.

Language.] The chief of the *Indian* Tongues in this *Peninsula*, are Two, viz. the *Carabine*, mostly in use about *Goa*; and the *Gazarate*, which is spoken in *Bisnagar*, and in the Coasts of *Coromandel*.

Government.] In this *Peninsula* are a great many Princes, who assume to themselves the Title of Kings; the chief of 'em being those of *Calicut*, *Cochin*, *Cananor*, *Cranzanor*, *Travancor*, and *Tanor*; besides which, are several sorts of People, in various Parts of this Country, who acknowledge Subjection to none of these, nor to any other; nor can they accord among themselves, being commonly divided into various Parties, who pitifully harass one another; and those on the Coast of *Malabar* are much addicted to Pyracry.

Arms.] What are the true Ensigns Armorial of these *Indian* Princes, [or if any] is mostly conjectural; all we can find of 'em is, that some in *Decan* and *Cambaia* bear *Verte*, encompassed with a Collar of large precious Stones.

Religion.] The Inhabitants of this *Peninsula* are generally *Mahometans*, especially those who live near the Sea-Coasts; but People residing in the Inland Parts are gross Idolaters, worshipping not only the *Sun* and *Moon*, but also many Idols of most ugly and horrible Aspects; and in some Parts of *Decan*, they look upon the first Creature they meet with in the Morning, as the proper Object of their Worship for that Day, except it be a Crow, the very Sight of which will confine them to their Houses the whole Day. In most of the Sea-Port Towns and Places of Trade, are *Jews* in considerable Numbers, and many *European Christians*, especially those of our *English* Factories. Christianity was first planted in this Country much about the same Time with the *Mogul's* Empire; of which already.

§. 3. The Peninsula of India beyond the Ganges.

Name.] **T**His last Division of *India* [bounded on the East by *China*; on the West by the Gulf of *Bengal*; on the North by part of the *Mogul's* Empire; and on the South by some of the *Indian Ocean*] is term'd *Peninsula India extra Gangem*, or *India beyond the Ganges*, because of its Situation; in lying beyond that famous River, in respect of the other *Peninsula*, or the Western Parts of *Asia* in general.

Air.] The *Air* of this *Peninsula* is somewhat different, according to the Situation and Nature of the various Parts of that Country, yet generally esteem'd indifferent healthful, and temperate enough, considering the Latitude of those Places. The opposite Place of the Globe to this *Peninsula*, is that part of *Nova Zelandia*, between 192 and 212 Degrees of Longitude, with 1 to 24 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying under the 1st, 2d, and 3d North-Climate) is extraordinary fertile, producing in great Plenty all sorts of desirable Fruits and Grain; besides 'tis well stock'd with invaluable Mines, and great Quantity of precious Stones; yea, so vastly rich is this Country, that the Southmost Part thereof (viz. *Chersonese d'Or*) is esteem'd by many to be the Land of *Ophir*, to which King *Solomon* sent his Ships for Gold. The longest Day
in

in the Northmoſt Parts is about 13 Hours and an half ; the ſhorteſt in the Southmoſt, near about 12 Hours, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Silver, precious Stones, Silks, Porcelline Earth, Aloes, Musk, Rhu-barb, Alabaſter, &c.

Rarities.] Among the *Rarities* of this Country, we may reckon the Golden Houſe in the City of *Arracan*, being a large Hall in the King's Palace, whoſe Inſide is intirely overlaid with Gold, having a ſtately Canopy of maſſy Gold, from the Edges of which hang above 100 *Combalenghe*, or large Wedges of Gold, in form of Sugar-Loaves. Here alſo are ſeven Idols of maſſy Gold of the Height of an ordinary Man, whoſe Foreheads, Breſts, and Arms are adorn'd with Variety of precious Stones, as Rubies, Emeralds, Saphires and Diamonds. In this Hall are alſo kept the two famous *Canèques*, i. e. two Rubies of prodigious Value, about which the neighbouring Princes frequently contending, have drawn Seas of Blood from each others Subjects, and all from a vain Opinion, that the Poſſeſſion of thoſe Jewels carry along with 'em a juſt Claim of Dominion over the neighbouring Princes.

Archbiſhopricks, &c.] *Archbiſhopricks, Biſhopricks, Universities*, none.

Manners.] What was ſaid of the Natives of the other *Peninſula*, in point of *Manners*, the ſame may be affirm'd of thoſe inhabiting this. The various *Europeans* here reſiding, are much the ſame in Manners with the reſpective People of *Europe* from whence they came.

Language.] The chief of the *Indian Tongues* in this *Peninſula*, is that called the *Melaye*, moſtly uſed in *Malacca* ; but beſides the various *Indian Tongues*, both in the *Mogul's Empire*, and the two *Peninſulas*, the *Portugueſe Language* is commonly underſtood and ſpoken in all maritime Towns of Trade, it being the chief Language that's uſed in daily Commerce between the *Franks* and Natives of that Country.

Government.] In this *Peninſula* are a great many different States and Kingdoms, particularly that of *Pegu* (a very rich Kingdom) ſubject to its own Monarch, whoſe Sovereignty is acknowledged by divers other conſiderable States, as *Aſem*, *Aracan*, and *Tipra*, beſides the ancient *Brachmans*, and other People living on the Weſt of *China*, as the *Layes*, *Timocues*, *Gueyes*, and *Ciocangaes*, all tributary to him. Here alſo are the rich and flouriſhing Kingdoms of *Tunquin* and *Gochinchin*, eſpecially the former, whoſe King is eſteem'd a

mighty potent Prince, able to bring into the Field vast Multitudes of Men upon all Occasions. And *Lastly*, the King of *Siam* (to whom a great many Princes are tributary) is esteemed one of the richest and most potent Monarchs of all the East, and assumes (as some alledge) the Title of the *King of Heaven and Earth*; and yet, notwithstanding his mighty Force and Treasure, he is said to be tributary to the *Tartars*, and to pay them yearly a certain kind of Homage.

Arms.] We find no satisfactory Account of what Ensigns Armorial are born by these Eastern Princes; or if any at all.

Religion.] The Inhabitants of this *Peninsula* are generally great Idolaters. Those of *Siam* are said to maintain *Pythagoras's Metempsychosis*, and commonly adore the Four Elements. Wheresoever *Mahometanism* prevails, 'tis generally intermix'd with many *Pagan* Rites and Ceremonies, as particularly in *Cambodia*, on the River *Menan*, in which City are almost 300 stately Mosques, not only well furnish'd with excellent Bells (contrary to the *Turkish* Custom elsewhere) but also with a great many Idols of all sorts. In the Kingdom of *Pegu*, they have a great Opinion of the Sanctity of *Apes* and *Crocodiles*, believing those Persons very happy who are devoured by 'em. They observe yearly Five solemn Festivals (called in their Language *Sapans*) and distinguish'd by the Names of *Giachie*, *Cateano*, *Giaino*, *Segienou*, *Daiche* and *Donon*. Their Priests are called *Raulini*, and are divided into three Orders, distinguished by the Names of *Pungrini*, *Pangiani*, and *Xoxom*. They have also many Hermits, whom they divided into *Grep*i, *Manigrep*i, and *Taligrep*i, who are all in great Esteem among the People. *Christianity* was planted here much about the same time with the other *Peninsula* already mention'd.

Name.] PERSIA [known to the Ancients by the same Name, and some others, but of a much larger Extent than at present; being now bounded on the East by the *Mogul's Empire*, on the West by *Asiatic Turkey*; on the North by the *Caspian Sea*, and part of *Tartary*; and on the South by the *Persian Gulf*, and part of the main Ocean] is term'd by the *Italians* and *Spaniards*, *Persia*; by the *French*, *Perse*; by the *Germans*, *Persien*; and by the *English* *Persia*; so call'd (as many alledge) from one of its ancient Provinces, nam'd *Persis*, or (according to others) from *Perfes*, an illustrious Lord in the Country of *Elam*, who for his Merit is said to have obtain'd the Government of the People, and to have call'd both Country and Inhabitants after his Name. But finally, others do eagerly plead for an *Hebrew* Etymology, deriving the Name from the Word, פֶּרֶשׁ i. e. *Equites*. For 'tis reported of the Inhabitants of this Country, that before the Reign of *Cyrus the Great*, they seldom us'd to ride, or knew very little how to manage a Horse; and that such was their Dexterity afterwards in managing Horses, that this Country is said to assume its Name from that Animal. For the strengthening of which Opinion they farther observe, That the Title of *Persia* is not found in those Books of Holy Scriptures, which were written before the Time of *Cyrus*.

Mir.

Air.] The *Air* of this Country is very temperate, especially towards the North, beyond the vast Mountain of *Taurus*; but in the Southern Provinces, 'tis scorching hot for several Months. The opposite Place of the Globe to *Persia*, is part of *Mare del Zur*, between 225 and 248 Degrees of Longitude, with 25 and 40 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 3d and 4th North Climate) is very different; for in the Northern Parts, adjacent to *Tartary* and the *Caspian* Sea, the Ground is very barren, producing but little Corn, and few Fruits. But South of Mount *Taurus*, the Soil is said to be extraordinary fertile, the Country pleasant and plentiful of Corn, Fruits, Wines, &c. affording also some rich Mines of Gold and Silver. The longest Day in the Northmost Parts, is about 14 Hours and three Quarters, the shortest in the Southmost is 13 Hours and a Quarter, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are curious Silks, Carpets, Tissues, Manufactures of Gold, Silk and Silver, Seal Skins, Goat Skins, Alabaster, and all sorts of Metals, Myrrh, Fruits, &c.

Rarities.] This Country (among its chief *Rarities*) doth yet boast of the very Ruins of the once proud Palace of *Persepolis*, so famous of old, and now call'd by the Inhabitants *Chil-manor*, signifying Forty Pillars; which imports, that so many were standing some Ages ago; but at present there's only Nineteen remaining, together with the Ruins of about Eighty more. Those Pillars, yet standing, are of excellent Marble, and about fifteen Foot high; for a particular Draught of 'em, with the Copy of several Inscriptions in unknown Characters, *vid. Philos. Transf. No. 201, & 210.* (2.) In the City of *Ispahan* is a large Pillar sixty Feet high, consisting purely of the Skulls of Beasts, erected by *Shaw-Abas the Great* (upon a Sedition of his Nobles) who vow'd to rear up a Column of their Heads, as a Monument of their Obloquy to After-ages, if they persisted in Disobedience, but they surrendering upon Discretion, he order'd each of 'em to bring the decollated Head of some Beast, and lay at his Feet; which was accordingly done, and of them he made the afore-said Pillar in lieu of a Column of their own Heads, (3.) One of the Emperor's Gardens at *Ispahan* is so sweet and delicate a Place, that it commonly goes by the Name of *Hesse Bebest*, i. e. Paradise upon Earth; and the Royal Sepulchres of the *Persian* Monarchs are indeed so stately, that they deserve to be mention'd here. (4.) About 30 Miles North-East of *Gombroon*, is a most hideous Cave, which for its formidable

midable Aspect, is term'd *Hell's-Gate* by our *English* Travellers, who have pass'd that way. (5.) At *Genoe*, about twelve or fourteen Miles North of *Gombroon*, are some excellent Baths, esteemed very good against most Chronical Distempers, and much frequented for all inveterate Ulcers, Aches, and such like. (6.) Within five Leagues of *Damoan*, is a prodigious high Pike of the same Name, from whose Top (cover'd all over with Sulphur, which sparkles in the Night-time like Fire) one may clearly see the *Caspian* Sea, tho' an hundred and eighty Miles distant; and nigh to this sulphureous Pike are some famous Baths, where there's a great Resort of People at certain Times of the Year. *Lastly*, In several Parts of *Persia* are Mountains of curious black Marble, and Springs of the famous *Naphtha*, with Variety of other Minerals.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities, none.

Manners.] The *Persians* are a People (both of old, and as yet) much given to Astrology, many of them making it their chief Business to search after future Events by Astrological Calculations. They are naturally great Dissemblers, Flatterers, and Swearers; as also very proud, passionate and revengeful; excessive in their Luxury, Pastimes and Expences; much addicted to Tobacco Opium, and Coffee; yet withal, they are said to be, for the most part, very respectful to their Superiors, just and honest in their Dealings, and abundantly civil to Strangers: and most of those who betake themselves to Trades, prove very ingenious, in making curious Silks, Cloth of Gold, and such like.

Language.] The *Persian* Language (having a great Tincture of the *Arabick*) is reckon'd not only much more polite than the *Turkish*, but is also esteem'd the modish Language of *Asia*. It's divided into many particular Dialects, and the Characters they use, are mostly *Arabick*. As for pure *Arabick*, that's the School Language of the *Persians*, in which not only the Mysteries of the *Alcoran*, but also all their Sciences are written, and is learn'd by Grammar, as *Europeans* do *Latin*.

Government.] This large Country is wholly subjected to one Sovereign, namely, its own Emperor, commonly stil'd, *The Great Sophy of Persia*; whose Government is truly Despotical, and Crown Hereditary, the Will of the King being a Law to the People, and he Master of all their Lives and Estates; his numerous Subjects render him a kind of Adoration, and never speak of him but with the greatest Respect. As most of the *Asiatic* Princes affect very vain and exorbitant Titles, so does the *Persian* Monarch in particular, he being

ing generally stil'd — King of *Persia*, *Parthia*, *Media*, *Bactria*, *Choraxon*, *Condakor*, and *Heri*, of the *Ouz-beg Tartar*, of the Kingdoms of *Hyrcania*, *Draconia*, *Evergeta*, *Parmenia*, *Hydaspia*, and *Sogdiana*, of *Aria*, *Paropaniza*, *Drawgiana*, *Arachosia*, *Mergiana*, and *Caramania*, as far as stately *Indus* ; Sultan of *Ormuz*, *Larr*, *Arabia*, *Susiana*, *Chaldea*, *Mesopotamia*, *Georgia*, *Armenia*, *Circassia*, and *Van*, Lord of the Imperial Mountains of *Ararat*, *Taurus*, *Caucasus*, and *Periardo*, Commander of all Creatures from the Sea of *Choraxon* to the Gulf of *Persia* ; of true Descent from *Mortis-Aly* : Prince of the Four Rivers, *Euphrates*, *Tygris*, *Araxis*, and *Indus* : Governor of all the Sultans ; Emperor of *Mussulmen* ; Bud of Honour ; Mirror of Virtue, and Rose of Delight.

Arms.] Many and various are the Opinions concerning the King of *Persia's* Arms ; it being affirm'd by some, that he beareth the Sun Or, in a Field *Azure* : by others, a Crescent, as the *Turkish* Emperors, with this Difference, that it hath a Hand added to it. By others, Or, with a Dragon Gules : By others, Or, with a Buffalo's Head, *Sable*. But the most receiv'd Opinion is, that he beareth the Rising Sun on the Back of a Lion, with a Crescent.

Religion.] The Inhabitants of this Country are (for the most part) exact Observers of *Mahomet's* Doctrine, according to the Explication and Commentaries made by *Mortis-Aly*. They differ in many considerable Points from the *Turks*, and both Parties are subdivided into various Sects, between whom are toss'd many Controversies, with flaming Zeal on either side. The main Point in Debate between them, is, concerning the immediate Successors of *Mahomet*. The *Turks* reckoning them thus, *Mahomet*, *Aboubekir*, *Omar*, *Osman*, and *Mortis-Aly*. But the *Persians* will have their *Aly* to be the immediate Successor, and some esteem him equally with *Mahomet* himself, and call the People to Prayers with these Words, *Llala y lala Mortis Aly vell lula* ; for which the *Turks* abhor them, calling them *Rafadi* and *Cassars*, i. e. Schismaticks, and themselves *Sonni* and *Mussulmen*, which is, True Believers. They differ also in their Explication of the *Alcoran* ; besides, the *Persians* have contracted it into a lesser Volume than the *Arabians*, after *Gundet's* Reformation, preferring the *Immanian* Sect before the *Melchian*, *Anefsan*, *Benefan*, or *Xefagans*, broached by *Aboubekir*, *Omar*, and *Osman* ; from which Four are sprung above Seventy several sorts of religious Orders, as *Morabites*, *Abdals*, *Dervises*, *Papasi*, *Rafadi*, &c. Here are many *Nestorian* Christians, as also several *Jesuits*, and many *Jews*. The Christian Religion was first planted in this Country by the Apostle *St. Thomas*.

This

THIS vastly extended Body being divided (as aforesaid) into six great Parts, viz. *Natolia*, *Arabia*, *Syria*, *Diarbeck*, *Turcomania*, and *Georgia*; we shall particularly treat of the first Three, and that separately (they being mostly remarkable) and then take a general View of all the rest conjunctly, and that under the Title of the *Euphratian Provinces*. Therefore,

§. I. NATOLIA.

Name.] *N*atolia [formerly *Asia Minor*, in contra-distinction from *Asia the Greater*; and now bounded on the East by *Turcomania*; on the West by the *Archipelago*; on the North by the *Black-Sea*; and on the South by part of the *Mediterranean*] is termed by the *Italians* and *Spaniards*, *Natolia*; by the *French*, *Natolie*; by the *Germans*, *Natolien*; and by the *English*, *Natolia*, or *Anatolia*; so call'd at first by the *Grecians*, because of its Eastern Situation in respect of *Greece*, *Ἰνδὸς ἡ Ἀνατολὴς*.

Air.] The *Air* of this Country is very different, being in some Provinces very pure and healthful, in others extremely gross and pestilential. The opposite Place of the Globe to *Anatolia*, is that part of the *Pacifick Ocean*, between 217 and 232 Degrees of Longitude, with 34 and 38 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 5th and 6th North Climate) is extraordinary fertile, abounding with Oil and Wine, and most sorts of Grain and Fruits: But much of the Inland Provinces lie uncultivated, a Thing too common in most Countries subject to the *Mahometan Yoke*. The Length of the Days and Nights is the same here as in *Greece*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country are raw Silks, Goats-Hair, twisted Cotton, Cordovans of several Colours, Callicuts white and blue, Wool for Matresses, Tapestries, quilted Coverlets, Soap, Rhubarb, Galls, Valleneed, Scammony, Opium, &c.

Curiosities.] Not far from *Smyrna* (by the *Turks*, *Ismyr*) is a certain kind of Earth, commonly call'd by the *Franks*, *Soap-Earth*, which boileth up out of the Ground, and is always gather'd before Sun-rising, and that in such prodigious Quantity, that many Camels are daily employ'd in carrying Loads of it to divers Soap-Houses at some Distance, where being mix'd with Oil, and both boil'd together for several Days, it becomes at last an excellent sort of Soap.

(2.) Nigh

(2.) Nigh to *Smyrna* are the *Vestigia* of a *Roman Circus* and *Theatre*; and thereabouts is frequently found Variety of *Roman Medals*. (3.) About two easie Days Journey East from *Smyrna*, are some Remains of the ancient *Thyatira*, as appears from 10 or 12 remarkable Inscriptions still to be seen (for which see *Wheeler's Travels*, from pag. 230, to 236.) and therefore *Tyreth* (a small Village 20 Miles South-East of *Ephesus*) is falsly taken for it by the ignorant *Greeks*. (4.) At *Mylasa* (formerly *Melasso* in *Caria*) are noble Remains of Antiquity; particularly, a magnificent Temple of Marble, built in Honour of *Augustus Caesar*, and the Goddess of *Rome*, as appears from an Inscription on the Front, which is still intire. Here also is a stately Column, call'd the Pillar of *Menander*, with a little curious Temple, but uncertain for what, or by whom erected. (5.) At *Ephesus* (now call'd *Aja Salove* by the *Turks*) are yet to be seen some ancient Christian Churches, particularly that of *St. John*, the entirest of 'em all, and now converted into a *Mahometan Mosque*: As also the *Vestigia* of a *Roman Amphitheatre*, *Circus*, and *Aqueduct*, together with a large Heap of stately Ruins, generally reckon'd those of the once magnificent Temple of *Diana*, the great Goddess of the *Ephesians*. (6.) At *Laodicea* (by the *Turks*, *Eskebissar*, which is utterly forsaken of Men, and now the Habitation of wild Beasts) are still extant three *Theatres* of white Marble, and a stately *Circus*, all so intire as yet, that they would seem to be only of a modern Date. (7.) At *Sardis* (by the *Turks* *Sart*, or *Sards*, now a little, nasty, beggarly Village, tho' once the royal Seat of rich King *Cresus*) are the Remains of some stately ancient Architecture, with several imperfect Inscriptions. (8.) At *Pergamos* (which still retains the Name of *Pergamo*, and is observable for being the Place where Parchment was first invented) are the Ruins of the Palace of the *Atalick Kings*. Here is also the ancient Christian Church of *Santa Sophia*, now converted into a *Mahometan Mosque*. As for *Philadelphia*, the last of the famous Seven Churches of *Asia* (now call'd by the *Turks*, *Allach Scheyr*, i. e. *The City of God*) 'tis remarkable for nothing so much as the considerable Number of Christians dwelling in it, they amounting to Two thousand, and upwards.

[*Archbishopricks, &c.*] The State or Christianity being very deplorable through most Parts of the *Ottoman Dominions*, and not only the chief Ecclesiasticks of the Christian Churches (*viz.* Patriarchs, Archbishops and Bishops) but also their very Sees being frequently alter'd, according as their Tyrannical Master, the *Turk*, proposeth Advantage by such Alterations; and whereas a great many titular Bishops, yea, Archbishops, and some Patriarchs are often created; it is equally vain to expect, as impossible to give an exact List of all the Ecclesiastical Dignities in those Parts, whether real or nominal. Let it therefore suffice (once for all) to subjoin in this Place the most remarkable

markable of the Christian Ecclesiasticks thro' all Parts of the *Asiatick* and *African Turkey*; still referring the Reader to the same, as he travelleth thro' the various Parts of this vast Empire. These Ecclesiasticks being *Patriarchs*, *Archbishops*, and *Bishops*. The chief *Patriarchs* (besides him of *Constantinople*, already mentioned in *Europe*) are those of *Jerusalem*, *Alexandria*, and *Antioch*; as also two *Armenians* (one of which resideth at *Ecmeasan*, a Monastery in *Georgia*, and the other at *Sis* in *Aladulia*;) and lastly, one *Nestorian*, whose Place of Residence is commonly at *Mosul* in *Diarbeck*.

The chief *Archbishops* (together with the *European*) are those of

[*Universities.*] As for *Universities* in this Country, the *Turks* are such Enemies to Letters in general, that they not only despise all humane Literature, or acquired Knowledge, but the very Art of Printing (the most effectual Means of communicating Knowledge) is expressly inhibited by their Law; so that the Reader must not expect to find the Seats of the Muses among them. It's true, the *Jesuits*, and some other Orders of the *Roman Church* (where establish'd in these Countries) do usually instruct the Children of Christian Parents in some publick Halls erected for that purpose; but these small Nurseries of Learning are so inconsiderable, that they deserve not the Name of Colleges, much less the Title of Universities.

[*Manners.*] The Inhabitants of this large Country being chiefly *Turks* and *Greeks*, a particular Character of 'em both is already given

in Europe, when treating of Greece and the Danubian Provinces, to which I refer the Reader.

Language.] The prevailing Languages in this Country, are the Turkish and vulgar Greek, a Specimen of which is already given, when treating of Turkey in Europe.

Government.] This large Country being intirely subject to the heavy Burthen of the Ottoman Yoke, is govern'd by Four Beglerbegs, in Subordination to the Grand Seignior; the first of them resideth at Cotypeum, about thirty Leagues from Byrsa; the second at Cogni, formerly Iconium; the third at Amasia, in the Province of the same Name; and the last at Marat, the principal City of Aladulia.

Arms.] See Turkey in Europe, Page 188.

Religion.] The establish'd Religion of this Country, is that of Mahometanism, but Persons of all Professions being tolerated in these Parts, as elsewhere through the Turkish Dominions, here are great Multitudes of Christians (particularly Greeks) and those of all sorts, as Armenians, Jacobites, Maronites, Nestorians, Melchites, &c. and intermix'd with these is a considerable Number of Jews. Christianity was planted betimes in this Part of the World, and that by the Preaching and Writings of the inspir'd Apostles, especially St. John the Divine, here being the Seven famous Churches, to which he wrote, viz. those of Ephesus, Smyrna, Thyatira, Laodicea, Pergamus, Philadelphia, and Sardis.

§ 2. A R A B I A.

Name.] A R A B I A [known formerly by the same Name; and now bounded on the East by the Arabian Gulf, and part of Mare Arabicum; on the West by the Red Sea; on the North by Palestine and Syria propria; and on the South by part of the main Ocean] is term'd by the Italians and Spaniards, Arabia; by the French, Arabie; by the Germans, Arabien; and by the English, Arabia. Why so called is not fully agreed upon among Authors; but the Reason of the various Appellations of its three Parts [viz. Deserta, Petrea, and Felix] is most evident, they being so term'd from the Nature of their respective Soil.

Air.] The Air of the two Northern Arabia's is very hot during the Summer (the Heavens being seldom or never over-cast with Clouds) but in that towards the South 'tis much more temperate, being migh-
 U tily

tily qualified by refreshing Dews which fall almost every Night in great abundance. The opposite Place of the Globe to these Countries, is that part of the Pacifick Ocean between 227 and 257 Degrees of Longitude, with 12 and 31 Degrees of South Latitude.

Soil.] The very Name of these Three *Arabia's* (they lying in the 2d, 3d, and 4th North Climate) do sufficiently declare the Nature of their *Soil*; the Northern being extremely barren, one encumber'd with formidable *Rocks*, and the other overspread with vast Mountains of *Sand*, but the Southern (deservedly term'd *Fœlix*) is of an excellent Soil, being extraordinary fertile in many Places. The longest Day in the Northmost part of these Countries, is about 14 Hours; the shortest in the Southmost, 11 Hours and a quarter; and the Nights proportionably.

Commodities.] The chief *Commodities* of these Countries, especially *Arabia Fœlix*, are Coral, Pearl, Onyx-stones, Balm, Myrrh, Incense, Gums, Cassia, Manna, and several other Drugs and Spices.

Rarities.] In *Arabia Petraea* is the noted Mountain of *Sinai* (now call'd by the *Arabians*, *Gibol Mousa*, i. e. *The Mountain of Moses*) on which were many Chapels and Cells, possess'd by the *Greek* and *Latin Monks*, several of which are still remaining, with a Garden adjoining to each of 'em. At the Foot of the Mountain is a pleasant Convent, from whence there was formerly a way up to the Top by one Thousand four Hundred Steps, cut out of the firm Rock, at the Charge and Direction of the virtuous *Helena* (Mother of *Constantine* the Great) the Marks of which Steps are visible to this very Day. The Religious here residing, pretend to shew Pilgrims the very Place where *Moses* stay'd for Forty Days, during his Abode on the Mount; and where he receiv'd the Tables of the Law, and desired to see the Face of God. (2.) At *Medina* in *Arabia Fœlix*, is a stately Mosque, supported by four Hundred Pillars, and furnish'd with three Hundred Silver Lamps, and call'd by the *Turks*, *Mos a kiba*, or, *Most Holy*; because in it lies the Coffin of their Great Prophet (its hanging in the Air by two Loadstones being a mere Fable) cover'd over with Cloth of Gold, under a Canopy of Cloth of Silver curiously embroider'd, which the *Bassa* of *Egypt* is bound to renew yearly by the *Grand Signior's* Order. (3.) At *Mecca*, in the same *Arabia* (the Birth-place of *Mahomet*) is a *Turkish* Mosque, so glorious, that 'tis accounted by many, the stateliest of any in the World. Its lofty Roof being rais'd in fashion of a Dome, with two beautiful Towers of extraordinary Height and Architecture, make a splendid Shew at the first Appearance, and are all conspicuous at a great Distance. The Mosque is said to have above an Hundred Gates, with a Window over each of 'em; and within 'tis adorn'd with Tapestry and Gildings extraordinary rich. The Number of Pilgrims, who yearly

yearly visit this Place is almost incredible; every *Mussulman* being oblig'd by his Religion to come hither once in his Life-time, or to send a Deputy for him. (4.) The Country about *Zibit* in *Arabia Fœlix* (which many reckon to be the same with the ancient *Saba* or *Sabaa*, *Seba* or *Sheba*, mention'd in 1 *Kings* 10. and *Matth.* 12.) is still famous for the best *Frankincense* in the World, which grows hereabouts in great abundance; besides good Plenty of *Balsam*, *Myrrh*, *Cassia*, and *Manna*, with several other Drugs and Spices.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*; see *Natolia*.

Manners.] The *Arabs* (great Proficients of old in Mathematical Sciences) are now an ignorant, treacherous, and barbarous kind of People: The better and more innocent sort of 'em live in Tents, and employ their Time in feeding their Flocks, removing from Place to Place, according to the Conveniency of Grazing; but the greater part of 'em are idle Vagabonds, and so extremely given to Robbing, that most of the publick Roads in the *Asiatick Turkey* are pitifully pester'd with 'em, they travelling commonly in considerable Troops (headed by one of their Number, whom they own as Captain) and assaulting the Caravans as they pass and repass the Mountains. Those near *Muscat* in *Arabia Fœlix*, are absolutely the best of the whole Country, being generally characteriz'd a People of a very civil and honest Deportment towards all sorts of Persons.

Language.] The vulgar *Language* in the three *Arabia's*, is the *Arabesque*, or corrupt *Arabian*, which is not only used here, but (with variation of Dialect) is spoken over a great part of the Eastern Countries. As for the ancient, pure, and grammatical *Arabian*, 'tis now learn'd at School (as *Europeans* do *Greek* and *Latin*) and is chiefly us'd by the *Mahometans* in their religious Service.

Government.] The various Parts of this vast and spacious Country, acknowledge Subjection to various Sovereigns, and some to none at all. Divers sorts of People in these Countries are willingly subject unto, and rul'd by several *Beglerbegs* residing among them by the special Appointment of the *Grand Seignior*; others are govern'd by their own independent Kings or Princes, the chief of whom are those of *Eartach*, *Maffa* and *Amanzarisdin*; and some others do yield Obedience to certain Xeriffs or chief Governors (who are only Tributary to the Great *Turk*) the most honourable of them is he at *Mecca*, who is of the Posterity of *Mahomet*, but lately in Rebellion against his Master. Besides these, here are several sorts of People who live altogether freely, denying Subjection to any; the chief of whom are the *Bengebres*, *Beduins*,

and *Gordins*, who reside mostly in Mountains, and are much employ'd in Robbing, especially the *Beduins*, they usually travelling in great Numbers near *Mecca*, on purpose to assault the Pilgrims in their way thither, who are always necessitated to send valuable Presents to the Xeriff of that Place, that he may order some of his Troops to meet the various Caravans, and defend them against all Attempts.

Arms.] For *Arms*, see the Ensigns Armorial of the Grand Seignior, Page 188.

Religion.] Many of the wild *Arabs* know nothing of Religion, living like so many savage Beasts hunting after their Prey, and frequently devouring one another. But the more sober sort of 'em profess the Doctrine of *Mahomet*, that grand Impostor, and Native of their own Country: The principal Points of which Doctrine may be seen Page 189. to which I remit the Reader. This Country was formerly illuminated with the Light of the Blessed Gospel, having receiv'd the same in the Apostolick Age.

§ 3. SYRIA, [by the *Turks*] *Suristan*.

MODERN Syria comprehends Syria, properly so call'd. (2.) *Phœnicia* or *Phœnice*. (3.) *Palestine* or *Judea*. These Divisions of Syria (especially the first and last) being remarkable Countries, somewhat of each of them distinctly and in their Order. Therefore,

Syria, properly so call'd.

Name.] **T**HIS Country [known formerly by the same Name of Syria, but different in Extent, being now bounded on the East by *Diarbeck*; on the West by part of the *Mediterranean Sea*; on the North by some of *Natolia*; and on the South by *Arabia Deserta*] is term'd by the *Italians*, *Siria*; by the *Spaniards*, *Syria*; by the *French*, *Sourie*; by the *Germans*, *Syrien*; and by the *English*, *Syria*; but why so call'd, is much controverted among our modern Criticks, with little shew of Probability for the Truth of their various Opinions on either hand.

Air.] The Air of this Country is pure and serene, the Sky being seldom over-cast with Clouds, and in most Parts very healthful to breathe in; only in the Months of *June*, *July*, *August*, 'tis extraordinary hot, if it prove either calm, or a gentle Wind from the Desert; but (as a repeated Miracle of Providence) these Months are generally

nerally attended with cool westerly Breezes from the *Mediterranean*. The opposite Place of the Globe to *Syria*, is that part of the vast *Pacifick Ocean*, between 232 and 236 Degrees of Longitude, with 33 and 38 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in part of the 5th and 6th North Climate) is extraordinary fertile, where duly manur'd producing most sorts of Grain and Fruits in great abundance. Here are indeed several rocky and barren Mountains; yet no Country in the World can boast of more pleasant, large, and fertile Plains than this; Plains of such a fat and tender Soil, that the Peasants, in many Places, do till 'em up with wooden Calters; and that commonly by the Assistance of one Horse, or two Bullocks, to draw the Plough. But the Beauty and Excellency of this Country, is mightily eclips'd by various sad and melancholy Objects, that present themselves to the Eye of the Traveller, viz. Many Cities, Towns, and Villages, formerly well stock'd with Inhabitants, and compactly built, but now quite depopulated and laid in Ruins; as also many ancient *Christian* Churches, once very splendid and magnificent Structures, but now mere Heaps of Rubbish, and the ordinary Residence of wild Beasts.

———— *Quaque ipse miserrima vidi.*

The longest Day in the Northmost Part of this Country, is about 14 Hours and an half; the shortest in the Southmost is 9 Hours and 3 Quarters, and the Nights proportionably. Here it may not be improper to rectify a gross Mistake of our modern Geographers, who treating of *Syria*, make the River of *Aleppo* (as they call it) to fall into the *Euphrates*, and assert it to be navigable up to the City; whereas it hath no Communication with *Euphrates* at all, but is (almost) of a quite contrary Course to that in the Maps, and so far from being a navigable River, that 'tis little better than a mere Brook; or at best, but a very inconsiderable Rivulet, having its Rise a little way South-East from *Aleppo*, and gliding gently along by the City, loseth it self under Ground at a few Miles distance on the other side.

Commodities.] The chief *Commodities* of this Country, especially those of *Aleppo* (which is the second City in the *Turkish Empire*, and one of the greatest Trade of any in the *Levant*, being the Centre of Commerce between the *Mediterranean* and the *East-Indies*, as also the Seat of one of the most flourishing of all our *English* Factories abroad) are Silks, Camblets, Valaneed, Galnuts, Cotton, Mohairs, Soap, Galls, Jewels, Spices, and Drugs of all sorts, &c.

Rarities.] About six Days Journey S. S. E. from *Aleppo*, is the famous *Palmyra* or *Tadmor*, now wholly in Ruins; yet such Remains of many Porphyry Pillars, and remarkable Inscriptions are still extant, as sufficiently evince its former State and Magnificence. For a particular Draught and Description of it, *vide Phil. Transact.* N^o. 217, 218. (2.) About one Hour's riding from the aforesaid *Tadmor*, is a large Valley of Salt, which is more probably thought to be that mention'd 2 *Sam.* viii. 13. (where King *David* smote the *Syrians*) than the other about four Hours from *Aleppo*, tho' commonly taken for such. (3.) On the side of a Hill, nigh to *Aleppo*, is a Cave or Grotto, remarkable among the *Turks*, for being, as they say, the Residence of *Mortis Aly* for some Days; where is also the rough Impression of a Hand in the hard Rock, which they believe was made by him. (4.) Under one of the Gates of *Aleppo*, is a Place for which the *Turks* have a great Veneration, keeping Lamps continually burning in it, because (according to a receiv'd Tradition among 'em) the Prophet *Elisha* did live there for some Time. (5.) In the Wall of a Mosque in the Suburbs of *Aleppo*, is a Stone of 2 or 3 Foot square, which is wonderfully regarded by the more superstitious sort of Christians; because in it is a natural (but obscure) Resemblance of a Chalice, environ'd, as 'twere, with some faint Rays of Light. Such strange Apprehensions do the *Romanists* in these Parts entertain concerning this Stone, that for the Purchase of it vast Sums of Money have been proffer'd by them to the *Turks*; but as gross Superstition in the former did hatch the Proposal, so the same in the latter produc'd the Refusal; the *Turks* being inexorable when requested to sell or give that, which was once so sacred as to become the constituent part of a Mosque. (6.) Belonging to the *Jacobite* Patriarch in *Aleppo*, are Two fair MSS. of the Gospels, written on large Parchment Sheets in *Syrian* Characters (and these either Gold or Silver) with variety of curious Miniature. (7.) Between *Aleppo* and *Alexandretta* (or *Scanderoon*) are the goodly Ruins of several stately *Christian* Churches, with variety of Stone-Coffins lying above Ground in divers Places, and many Repositories for the Dead hewn out of the firm Rock; but no perfect *Inscriptions* to be seen, having actually made a particular Search for them my self some Years ago. (8.) In the large Plain of *Antioch* (being fifteen Leagues long, and three broad) is a stately Causeway crossing almost the Breadth of the Plain, and passing over several Arches [under which some pleasant Rivulets do gently glide] all which was begun and finish'd in six Months Time by the *Grand Vizier*, in the Reign of *Achmet*, and that for a speedy Passage of the *Grand Seignior's* Forces to suppress the frequent Revolts in the Eastern Parts of his Empire. (9.) In several Cavities of Rocks among *Byland-Mountains* (a few Hours from *Scanderoon*) is sometimes found good store of Rain-Water, compleatly petrefy'd by the

the excessive Heat of the Sun Beams. (10.) Nigh to the Factory Marine at *Scanderoon*, is a large, but unfinish'd Building, commonly call'd *Scanderberg's Castle*; being vulgarly suppos'd to have been erected by that valiant Prince of *Albania*, in the Career of his Fortune against the *Turks*; but 'tis more probably thought to be of an ancients Date, having thereon the Arms of *Godfrey of Bulloign*. Lastly, In the Eastmost part of *Scanderoon Bay*, is a ruinous old Building, known commonly by the Name of *Jonah's Pillar*, erected (as the modern *Greeks* alledge) in that very Place where the Whale did vomit him forth. It's indeed much (and not undeservedly) doubted, whether that Monument was erected there upon such an Occasion; but 'tis highly probable, that this individual Part of the Bay was the very Place of the Whale's Delivery, it being the nearest to *Nineveh* of any in the *Levant*. Which Conjecture, I humbly suppose, is some-what more reasonable than that of some dreaming Ancients, who vainly imagin'd that the monstrous Fish did more than surround one Quarter of the World in the space of Seventy two Hours at most; and that too when big with Child.

Archbishopsricks, &c.] *Archbishopsricks, Bishopsricks, Universities.*
See *Natolia*.

Manners.] The Inhabitants of this Country are mostly *Turks* and *Greeks* [whose respective Characters are already given in *Turkey of Europe*, Page 180 and 187.] as also many *Jews* and *Armenians*, with other Sorts of *Christians* intermixt, of whom the Reader may find some Account towards the latter Part of this Section, when we come to treat of *Palestine* and the *Euphratian Provinces*.

Language.] The chief Language of this Country is the *Turkish*, (for a Specimen of which vide p. 188.) the ancient *Syriac* being lost among 'em. The various *Europeans* here residing, do commonly use the *Lingua Franca*.

Government.] This Country being subject unto, and successively rul'd by the *Seleucids*, the *Romans*, the *Saracens*, the *Christians*, and *Sultans of Egypt*, was at last conquer'd by the *Turks* in the Time of *Selimus I.* Anno 1517. under whose heavy Yoke it hath ever since groan'd, and is at present govern'd by its particular *Bassa*, appointed by the *Grand Seignior*, whose Place of Residence is ordinarily at *Aleppo*; the principal City of this Province, and thought to be the *Aram Sobah*, mention'd in Holy Scripture. But the whole Country of *Syria* [according to its modern Extent] is subject to Three *Bassas*; the first commonly residing (as aforesaid) at *Aleppo*; the second at *Damascus* in *Phoenice*; and the third at *Tripoli* of *Syria*. Subordinate to each of these *Bassas*, both here and in other Parts of the *Ottoman Dominions*, are

are various *Cadis* or Judges, who hear and determine the several Causes, whether Civil or Criminal, which at any time happen between Man and Man. And here I can't omit one Particular (which as 'tis a mighty Disparagement to this People, so I wish 'twere peculiar to them) viz. their mercenary *Distribution of Justice*; for not always the Equity of the Cause, but the Liberality of the Party, does ordinarily determine the Matter; as some of our *English* Factories in these Parts of the World have experienc'd more than once.

[Arms.] See the Ensigns Armorial of the *Grand Seignior*, p. 183.

[Religion.] The establish'd Religion of this Country, is that of *Metanizm*; the essential Tenets of which are already set down (pag. 189.) to which I remit the Reader. But since one Thing enjoin'd by that Religion, is the most excellent and necessary Duty of Prayer, I can't omit one laudable Practice of this People in that Point; I mean not only their inimitable Frequency in performing this Duty (which is Five times a Day) but also their most commendable Fervency and Seriousness in the Performance of it. For whenever they set about the same, they address themselves to the Almighty with all profound Respect and Reverence imaginable, and in the humblest Posture they can; sometimes standing, often kneeling, and frequently prostrating themselves on the Ground, and kissing the same; and during the whole Performance, their very Countenance doth plainly declare the inward Fervour and Devotion of their Mind. Yea, so exact and punctual are they in observing the various Hours appointed for Prayer, and so serious and devout in performing that Duty, that the Generality of *us Christians* have too good Reason (in both these Respects) to say with the Poet, *Pudet hac opprobria nobis, &c.* The *Muezans* or *Marabounds* (being those Persons who call the People to Prayers) use commonly these Words, *Allah ekber, allah ekber, allah ekber; eschadou in la illab illallah; bi alle falla, bi alle falla, allah ekber, allah ekber, allah ekber, la illab illallah*, i. e. "God is great, God is great, God is great; give "Testimony that there is but one God: Come, yield your selves "up to his Mercy, and pray him to forgive you your Sins. God "is great, God is great, God is great, there is none other God but "God." Dispers'd over all this Country, and intermixt with the *Turks*, are many *Jews*, and various sorts of *Christians*, particularly *Greeks, Armenians, Maronites, &c.* but most lamentable is that State of those *Christians* at present, not only in respect of that woful Ignorance under which they universally labour, and the *Turkish* Slavery and Insolence to which they are expos'd; but also in point of those dismal Heats and Divisions, those numerous Factions and Parties now among 'em; for so bitterly inveterate are they against one another, and to such a Height do their Animosities frequently come, as to give
fresh

fresh Occasion to the common Enemy to harrafs them more and more. *Christianity* was planted very early in these Parts of the World ; most of this Country being water'd with the *Blessed Gospel* in the Apostolick Age.

Phœnicia, or Phœnice.

THIS Country (very famous of old, but now of a very sad and melancholy Aspect, and groaning under the *Turkish Yoke*) hath undergone such dismal Devastations by the destroying *Arabs*, that there's nothing now remarkable in it, save a few ancient Maritime Cities (mostly in Ruins) which yet maintain something of Trade with Strangers, as particularly *Damascus* (call'd by the *Turks*, *Scham*) *St. John d' Acre* (formerly *Ptolemais*) and lastly, *Sure* and *Said*, which were the ancient *Tyre* and *Sidon*. Leaving therefore this desolate Country, we pass on to

Palestine, or Judæa.

Name.] **T**HIS Country [most memorable in Holy Scripture, and sometimes stil'd *Canaan*, from *Canaan*, the Son of *Cham* ; sometimes the *Land of Promise*, because promis'd to *Abraham* and his Seed ; and sometimes *Judæa*, from the Nation of the *Jews*, or People of the Tribe of *Juda*, and now bounded on the East and North by part of *Syria propria* ; on the West by part of the *Mediterranean Sea* ; and on the South by *Arabia Petrea*] is term'd by the *Italians* and *Spaniards*, *Palestina* ; by the *French*, *Palestine* ; by the *Germans*, *Palestinen*, or *das Gelobte Land* ; by the *English*, *Palestine*, or the *Holy Land*. It's call'd *Palestine*, *quasi Philistin*, from the *Philistins*, once a mighty Nation therein ; and *Holy Land*, because 'twas the Scene of the Life and Sufferings of the Ever-blessed and most Holy *JESUS*, the glorious Redeemer of Men.

Air.] The *Air* of this Country, excepting those Parts adjacent to the Lake of *Sodom* (of which afterwards) is so extraordinary pleasant, serene and healthful to breathe in, that many of its present Inhabitants do frequently arrive to a considerable Age. The opposite Place of the Globe to *Palestine*, is that part of the vast *Pacifick Ocean* between 227 and 232 Degrees of Longitude, with 29 and 32 Degrees of South Latitude.

Soil.] This Country (situated partly in the 4th and 5th North Climate, and not exceeding Seventy Leagues in Length from North
to

to South, and thirty in Breadth from East to West) was blessed with an extraordinary rich and fertile *Soil*, producing all things in such abundance, that the Scripture terms it, *A Land flowing with Milk and Honey*; yea, so wonderful was the Fertility thereof, and such vast Multitudes of People did it maintain, that *K. David* numbred in his Time no less than 1300000 fighting Men, besides the Tribes of *Levi* and *Benjamin*. But, alas! such were the crying Sins of its Inhabitants, that it not only spew'd them out, as it had done those who dwelt before them; but the Almighty being highly provoked by their many and repeated Abominations, hath turn'd that fruitful Land into Barrenness, for the Wickedness of them who dwelt therein. For such is the dismal State of this Country at present, that (besides the *Turkish* Yoke, under which it groans) the greatest part thereof is not only laid waste, but even whereduly manur'd, 'tis generally observ'd, that the *Soil* is not near so fertile as formerly. The longest Day in the Northmost part of this Country, is about 14 Hours and a quarter; the shortest in the Southmost, is about 10 Hours, and the Night proportionably.

Commodities.] Such is the mean and depauperated State of this Country at present, that we may now reckon it destitute of all *Commodities* for the Merchant; its Inhabitants, now a-days, being mere Strangers to all manner of Commerce. In its flourishing Condition, under the Kings of *Judah* and *Israel*, the People thereof did indeed manage a very considerable Trade abroad, and that chiefly by the two famous *Emporiums* of *Tyre* and *Sydon* above-mention'd, besides the Ships of *Tarshish*, which *Solomon* sent yearly to the Land of *Ophir*; and so noted were these two maritime Cities of old for Merchandizing, that the Evangelical Prophet, *Isaiah* xxiii. 8. denouncing the Overthrow of *Tyre*, calls it, *The crowning City, whose Merchants are Princes, and whose Traffickers are the Honourable of the Earth*: And, Verse. 3. he termeth *Sydon*, *A Mart of Nations*. But so fully accomplish'd is the prophetic Denunciation against 'em both, and so low and despicable is their Condition at present, that I heartily wish all flourishing Cities of *Christendom* might be so wise, as seriously to reflect on the same, and to take timely Warning by them, especially considering, that most of our Populous and Trading Cities, are now such Dens of Iniquity, that their Inhabitants may justly dread, That 'twill be more tolerable for *Tyre* and *Sydon* in the Day of Judgment, than for them.

Rarities.] In the Southern Parts of *Palestine*, is *Asphaltis* or *Asphaltites* (so term'd from ἀσφαλτῖς, i. e. *Bitumen*) that noted Lake of *Judea*, where the abominable Cities of *Sodom* and *Gomorrab* formerly stood, otherwise called the *Dead Sea*, and remarkable at present for abundance of sulphureous Vapours, which still ascend in so great

great a measure, that no Bird is able to fly from one side of the Lake to the other. 'Tis also observable for good store of Apples growing near its Banks, which appear very lovely to the Eye, but being toucht and cut up, prove mere naught, being nothing else but a Heap of nauseous Matter. (2.) Nigh to the Place of the ancient *Sarepta*, are many Caves and Apartments hewn out of the firm Rock, which some vainly imagine to have been the Habitation of Men in the Golden Age, before Cities in these Parts of the World were well known; but others, with greater shew of probability, take 'em for the Caves of the *Sidonians*, mentioned in the Book of *Joshua*, under the Name of *Mearab*. (3.) Not far from the (once) noted City of *Tyre*, are several large square Cisterns, which still go by the Name of *Solomon's*, among the Christians of that Country; but why so call'd, they can give no other Reason than bare Tradition. (4.) At *St. John d'Acre* (the ancient *Ptolemais*) are yet to be seen the Ruins of a Palace, which acknowledgeth *Richard I.* King of *England*, for its Founder, and the Lion passant is still visible upon some of the Stones. (5.) On Mount *Carmel* are some Remains of a Monastery of *Carmelite* Friars, with a Temple dedicated to the blessed Virgin; and under it is a private Cell or Cave, which Travellers alledge to be the ancient residing Place of the Prophet *Elias*. On the same Mountain are found a great many Stones that have the lively Impression of Fishes Bones upon 'em; as also abundance of petrefy'd Fruit, particularly Plumbs, or Stones of that Resemblance. (6.) Not far from the Brook *Cedron* stands a part of the Pillar of *Abalom*, which he erected in his Life-time, out of an ardent Desire to eternize his Name; and nigh to it is a great Heap of small Stones, which daily increaseth, because either *Jew* or *Mahometan* passing by, seldom fail to throw one at the same, and that out of Abhorrency of the Son's Rebellion against the Father. (7.) In the Mountains of *Judah* is a remarkable Spring, where *Philip* is said to have baptized the *Ethiopian Eunuch*, whereupon 'tis call'd by the Name of, *The Ethiopian Fountain*, and hath a Church adjacent, erected ('tis probable) out of Devotion, in Honour of the Place, and Memory of that Fact. Yet (by the by) 'twould seem, that this were not the Place of the *Ethiopian's* Baptism; because those rocky and declining Mountains are hardly passable on Horseback, much less in a Chariot. (8.) Nigh to the aforesaid Fountain is a considerable Cave, where 'tis reported, *St. John* the Baptist did live from the seventh Year of his Age, till he appear'd in the Wilderness of *Judea*, as the promis'd *Elias*. (9.) At *Bethlehem* is the goodly Temple of the Nativity, erected by *St. Helena* (Mother of *Constantine the Great*) who call'd it *St. Mary's of Bethlehem*. 'Tis now possess'd by the *Franciscans* of *Jerusalem*, and is still intire, having many Chapels and Altars, but those little frequented, except it be upon extraordinary Occasions. (10.) In the Mountains of *Judea* are the Remains of an ancient Church, built by *St.*

St. *Helena*, and dedicated to St. *John* the Baptist, and that in the Place where *Zachary* the Prophet was born. And nigh to it (where the blessed Virgin did visit her Cousin *Elizabeth*) is a Grotto, in which, 'tis said, that the Body of *Elizabeth* lies interr'd. (11.) Upon the left hand in going out of the City of *Jerusalem*, by the Gate of *Joppa*, is Mount *Sion*, on whose top are still to be seen the Ruins of the Tower of *David*, which was once a Building of wonderful Strength, and admirable Beauty. (12.) Upon Mount *Calvary* is the stately Temple of the *Holy Sepulchre*, built by the aforesaid virtuous St. *Helena*, and hitherto visited by Multitudes of Christians, who flock to it from all Parts of the World, either out of Devotion or Curiosity. It's divided into a vast Multitude of Apartments, containing many Chapels and Altars, which, for the most part, receive their Names from some remarkable Circumstance of our Saviour's Passion; besides those peculiar to Christians of different Nations at *Jerusalem*, particularly the *Abyssines*, *Armenians*, *Georgians*, *Cophites*, *Jacobites*, *Maronites*, &c. and at the Entry of one of those Chapels is the Sepulchre of *Godfrey* of *Bulloign* on the one hand, and that of his Brother *Baldwin's* on the other. But lastly, In and about *Jerusalem* (besides the Observables above-mention'd) are these following Particulars, viz. A Mosque erected in the very Place where once stood the *Cœnaculum*, the Church of St. *Saviour*, and that of the Purification of the blessed Virgin, with her splendid Sepulchre; all three built by the incomparable St. *Helena*. Add to these the decent Tomb of *Zachary*, near Brook *Cedron*, with the Sepulchre of *Lazarus*, at the Town of *Bethany*. Here likewise are shewn to Pilgrims all other noted Places in or about the City, which are frequently mention'd in the Sacred Volume; as Mount *Olivet*, the Garden of *Gethsemane*, the Valleys of *Jehosaphat* and *Gehinnon*, the Pool of *Siloim*, the Field of Blood, &c. They moreover shew 'em the Places where formerly stood the Palaces of *Caiaphas*, *Pilate*, and *Herod*, with the Houses of *Martha* and *Mary*, and *Annas* the High-Priest; as also the particular Place where St. *Peter* wept upon the Denial of his Master, and where *Judas* the Traitor hang'd himself for betraying of him. And finally, The Pilgrims are conducted unto, and visit the respective Place of each particular Scene of our Saviour's Sufferings, with that of his Ascension at last. All which are fully described by G. *Sandys*, *Thevenot*, and other later Travellers in the *Holy Land*. To these Rarities of *Palestine*, I might also add those many remarkable Creatures (whether Beasts, Birds, or Fishes) that are mention'd in Holy Writ, and formerly more plentiful than at present in this Country. But having drawn out this Paragraph already to so great a length, I shall not venture upon so vast a Subject: remitting the Reader to that incomparable Work of the learned *Bechartus*, *De Animalibus S. Scripturæ*, where he may be fully satisfy'd in that Matter.

Archbishopricks.] As for *Archbishopricks, Bishopricks, Universities,* see *Natolia.*

Manners.] The mountainous Parts of this Country are mostly possess'd by the *Arabs* (of whom in *Arabia*) the Valleys by the *Moors* (of whom in *Africa*). Other People here residing, are a few *Turks*, and many *Christians*, particularly *Greeks* (of whom in *Europe*) and intermix'd with all these, are some *Jews*, and of them here in particular. The *Modern Jews*, to say nothing of 'em in former Times, are generally characteris'd thus, viz. A Vagabond, Perfidious and Obstinate sort of People; a People now living as mere Aliens, not only in most Parts of the Earth, but also in this [once] their own Country; a People indeed universally given to Trading where-ever dispers'd, but as universally addic'ted to Cozening and Usury where-ever they find Occasion; a People so singularly stigmatiz'd by Heaven, that (according to the Prophet's Prediction) they're now become an *Astonishment and Hissing to all Nations*. In a Word, The *Modern Jews* (being extremely blinded in Judgment, and perverse in Will) do not only remain most obstinate in denying the *Messias* already come, notwithstanding the clearest Demonstration to the contrary; but also they're a People, that's universally corrupted in Morals; and that in the highest Degree, the Generality of 'em being addic'ted to the blackest of Vices.

Language.] This Country being under the *Turkish Yoke*, its Inhabitants do generally use the *Turkish Tongue*. The various *Christians* here residing (whether *European* or *Asiatick*) do commonly speak those Languages peculiar to the Countries to which they originally belong.

Government.] How, and by whom this Country was govern'd, till it became a *Roman Province*, is best learn'd from the Historical Part of the Sacred Volume, and the Writings of the noted *Jewish Historian, Josephus*. The Land of *Palestine* being brought under the *Roman Senate* by *Pompey the Great*, continu'd subject to that State, till the Beginning of the Seventh Century, when 'twas invaded by the *Persians*, and afterwards made a Prey to the *Saracens*, yet rescu'd from them by the *Christians*, under *Godfrey of Bulloign*, Anno 1099. whose Successors held it about Eighty Years; but being taken from them by *Saladin*, King of *Syria* and *Egypt*, it remain'd subject to the *Calyphs* of *Egypt*, till conquer'd, Anno 1517. by *Selimus the First*, Emperor of the *Turks*, who subjected the same to the *Ottoman Yoke*, under which it groans to this very Day.

Arms.]

Arms.] The *Arms* of the Christian Kings of *Jerusalem* were *Luna*, a Cross Croiset-croffe, *Sol*, commonly call'd the Cross of *Jerusalem*. But this Country being now a Part (as aforesaid) of the *Ottoman* Dominions, is allow'd no particular Arms at present, and can only claim a Share of the Ensigns Armorial of the *Turkish* Empire in general. What these are, see *Turkey in Europe*, p. 118.

Religion.] The present Inhabitants of *Palestine*, are in Point of Religion, reducible to Three Classes, viz. *Christians*, *Jews*, and *Mahometans*. The chief Tenets embrac'd and maintain'd by the first and last of these, may be seen in their proper Places, when treating of *Christendom* and *Turkey in Europe*. As for the *Jews*, I think no Place more proper to discourse of their Religion, than in this their ancient Country. Know therefore, that the *Modern Jews*, both here and elsewhere, adhere still as closely to the *Mosaick* Dispensation, as their present Circumstances in a dispers'd and despis'd Condition will allow. Their Service chiefly consists in reading of their Law in the Synagogue, together with various Prayers, which they perform with little or no Appearance of Devotion. Sacrifices they use not since the Destruction of their Temple at *Jerusalem*. The chief Articles of their present Belief and Practice, are these following: (1.) They all agree in the Acknowledgment of a Supreme Being, both essentially and personally one; but entertain some ridiculous Apprehensions concerning him, as particularly, the great Pleasure they vainly imagine he takes in reading their *Talmud*. (2.) They acknowledge a twofold Law of God, viz. a *Written* and *Unwritten* one: The *Written* is that deliver'd by God to the *Israelites*, and recorded in the Five Books of *Moses*. The *Unwritten* was also, as they pretend, deliver'd by God to *Moses*, and handed down from him by Oral Tradition, and now to be receiv'd *pari pietatis affectu*, with the former. (3.) They assert the *Perpetuity* of their Law, together with its *Perfection*; believing there can be nothing added to it, or taken from it. (4.) They unanimously deny the Accomplishment of the Promises and Prophecies concerning the *Messias*; obstinately alledging, that he is not yet come, and that whenever he appears, 'twill be with the greatest worldly Pomp and Grandeur imaginable, subduing all Nations before him, and making them acknowledge Subjection to the House of *Judab*. For evading the express Predictions of the Prophets, concerning his mean Condition and Sufferings, they, without any Shadow of Divine Authority, do confidently talk of a twofold *Messias*; one *Ben-Ephraim*, whom they grant to be a Person of a mean and afflicted Condition in this World; another *Ben-David*, who they believe shall be a victorious, powerful Prince, and the Restorer of 'em to their former Liberty and Possessions. (5.) They think that the Sacred Name of God can't be blasphem'd by Man, if he

only

only refrain from expressing the adorable *Τεσσαρταμιατον*. (6.) They condemn all manner of Images, though only design'd as a bare Representation of Persons to After-ages. (7.) They imagine, That the Sabbath-Day is to be so strictly observ'd, that Works even of Necessity and Mercy are to be neglected. *Lastly*, They believe a Resurrection from the Dead at the End of Time, and expect a General Judgment at the last Day. These we may reckon the chief Articles of the *Jewish* Creed at present; but besides them, they admit of many other Things which only Use and Custom have authoriz'd, and those are very different, according to the different Countries in which they now reside. They are still observant (according to their Circumstances) not only of the various Festivals appointed by God in the *Jewish* Church; but also several others of Human Institution, particularly that which they yearly celebrate in Memory of their Deliverance from the projected Ruin of wicked *Haman*; during which Festival, the Book of *Ester* is thrice read over in their Synagogues; and whenever the Name of *Haman* is mention'd, they all with one accord, beat furiously with Hammers upon their Desk, as shewing thereby their Abhorrency of that Person who intended so bloody a Massacre of their Forefathers. The joyful Tidings of the blessed Gospel were proclaim'd in this Country by *Christ* himself, and his Apostles; but the obstinate *Jews* did shut their Eyes against the Light, and still persist in their inflexible Obstinacy to this very Day.

§ 4. The Euphratian Provinces.

Name.] THE remaining Parts of the *Asiatick* Turkey, are *Georgia*, *Turkomania*, and *Diarbeck*. These Provinces are bounded on the East by *Persia*; on the West by part of *Natolia* and *Syria propria*; on the North by a little of *Moscovia*; and on the South by *Arabia Deserta*. *Georgia* (formerly *Iberia*) is so call'd from *Georgi*, a People anciently inhabiting these Parts. *Turkomania* (formerly *Armenia Major*) so call'd from the *Turks*, a *Scythian* People, who broke thro' the *Caspian Straits*, and possess'd themselves of these adjacent Provinces. And *lastly*, *Diarbeck* (formerly *Mesopotamia* and *Padan-Aram*, of the Scriptures) but why so call'd, I find no satisfactory Account. We chuse to consider all these Three under the assum'd Title of *Euphratian Provinces*, because they lie near the Body and Branches of that [once] famous River of *Euphrates*.

Air.] The Air of these Countries is generally very pleasant, healthful, and temperate, especially in the first and last. The opposite Place of the Globe to these Provinces, is that part of the vast *Pacific Ocean*, lying

lying between 237 and 247 Degrees of Longitude, with 37 and 45 Degrees of South Latitude.

Soil.] The *Soil* of these various Provinces (they lying in the 6th and 7th North Climate) is generally reckon'd very fit for Pasture on the Bank of the *Tygris* and *Euphrates*; and in many Places it produceth abundance of Fruits, with Variety of Grain. As also *Georgia* is said to afford great Plenty of excellent Wine. The longest Day in the Northmost Part of these various Provinces, is about 15 Hours and an half; the shortest in the Southmost is 9 Hours and 3 Quarters, and the Nights proportionably.

Commodities.] These being inland Provinces, do not manage any brisk or considerable Trade with foreign Parts, and therefore their *Commodities* are not very numerous; those they export or barter with their Neighbours, being chiefly Pitch, Fruits, Silk, and such like.

Rarities.] At *Ourfa*, in *Diarbeck*, is a large Fountain well stock'd with Fishes, call'd by the *Turks*, *Abraham's Fountain and Fishes*; and of so great a Veneration among 'em, that the Banks of it are cover'd with curious Carpets for above 20 Paces in Breadth. (2.) Nigh to the aforesaid *Ourfa*, is a Mountain remarkable for several *Grottoes*, in which are to be seen very ancient Sepulchres of many primitive Christians. (3.) Adjacent to *Carasara* (another Town in *Diarbeck*) are many little Rooms hewn out of the firm Rock, which were probably some private Cells for ancient Christians, who affected such Retirements; each of 'em having, as 'twere, a Table and Bench, with a reposing Place, all artificially cut out of the hard Stone, and over each of their Doors is a lively Impression of a Cross. (4.) On the East of *Tygris*, over against *Mosul*, are the Ruins (and those hardly discernable) of the once great and famous City of *Nineweh*; the very Prospect of which, may strike the Beholder with just Apprehensions of the fading Glory or all sublunary Magnificence, and that the largest of Cities are not too big a Morfel for devouring Time to consume. (5.) About a Day and half's Journey from *Bagdat*, is the Sepulchre of the Prophet *Ezekiel*, which is yearly visited by the *Jews* of *Bagdat* with great Devotion. (6.) About the same Distance from *Bagdat*, but between the *Euphrates* and *Tygris*, is a prodigious Heap of Earth, intermix'd with a multitude of Bricks bak'd in the Sun, whereof each is 30 Inches square, and 3 thick, the whole being 300 Paces in Circuit, is call'd *Nemrod* by the *Christians* and *Jews* in those Parts, and commonly believ'd, by the vulgar sort of 'em, to be the Remains of the renowned Tower of *Babel*; but others rather follow the Opinion of the modern *Arabs*, who call it *Agartouf*, and believe it to have been rais'd by an *Arabian Prince*, as a Beacon or Watch Tower, to call his Subjects together

ther upon all Occasions. (7.) Nigh to *Carklequen* (a Town of *Turcomania*) is a vast Rock, in which are divers artificial private Apartments, generally reckon'd the retiring Place of *St. Chrysostom*, during his Exile, as the *Christians* of those Parts alledge.

Archbishopricks, &c.] For *Archbishopricks*, *Bishopricks*, *Universities*; see *Natolia*.

Manners.] The Inhabitants of these different Provinces, are very different in their Tempers and Manners. The *Armenians* (or those of *Turcomania*) are Persons of a good Behaviour, and just in their Dealings; and some of them (addicted to Traffick) are dispers'd thro' most parts of the Trading World. But the People of *Georgia* are said to be extremely given to Thieving, Drunkenness, and most sorts of other Vices. Those of the Female Sex are generally reckon'd the most beautiful Women of any in all the Oriental Countries; and so highly esteem'd are they by the *Grand Seignior*, and King of *Persia*, that their respective *Seraglio's* are well stor'd with them.

Language.] The *Turkish*, *Persian*, and *Armenian Tongues*, are all understood, and much us'd in these Provinces, especially the *Turkish*. In *Diarbeck* the *Armenian Tongue* is chiefly made use of in Divine Service, and in *Georgia* the corrupted *Greek*.

Government.] The Western Parts of these Provinces do own Subjection mostly to the *Grand Seignior*, and the Eastern to the King of *Persia*, and that purely as the Necessity of their Affairs requires. Those subject to the *Grand Seignior*, are govern'd by various *Beglerbegs* of his Appointment; and those in Subjection to the *Persian Power*, are rul'd by several Princes, some bearing the Title of Kings (as one in the East of *Georgia*) who are elected by the King of *Persia*, and Tributary to him. Nevertheless, there are in these Provinces several Kings and Princes, who fear neither the *Ottoman Slavery*, nor the *Persian Power*; but eagerly maintain their Freedom, and keep all the Passes of the Mountains, notwithstanding many Efforts hitherto made to the contrary.

Arms.] See the Ensigns Armorial of the *Grand Seignior*, Page 188.

Religion.] The prevailing Religion in many Parts of this Country, is that of the *Armenians*: The principal Points whereof are these Three: (1.) They allow the *Apostolick* and *Nicene Creeds*, but agree with the *Greeks* in asserting the Procession of the Holy Ghost from the Father only. (2.) They believe that *Christ* at his Descent into Hell, freed the Souls of all the Damn'd from thence, and repriev'd them till

the End of the World, when they shall be remanded to eternal Flames. (3.) They also believe that the Souls of the Righteous are not admitted to the Beatifical Vision until after the Resurrection; and yet they pray to Saints departed, adore their Pictures, and burn Lamps before them, praying likewise for the Dead in general. They use Confession to the Priest, and of late have been taught the strange Doctrine of Transubstantiation by Popish Emissaries, dispers'd thro' most Parts of this large Country; but they still give the Eucharist in both Species to the Laity, and us'd unleaven'd Bread soak'd in Wine. In administering the Sacrament of Baptism, they plunge the Infant thrice in Water, and apply the Chrism with consecrated Oil in form of a Cross, to several Parts of the Body; and then touch the Child's Lips with the Eucharist. These are the chief Tenets and Practices of the *Armenians* in Religious Matters: But to these we may add that vast multitude of *Fasts* and *Festivals*, which they punctually observe (one fourth part of the Year being such); and truly, it is in the Observation of 'em that the very Face of the Christian Religion is as yet kept up among this People. *Christianity* was planted in these Parts of the World in the earliest Ages of the Church, *Bartholomew* the Apostle being generally reckon'd the chief, if not first, Propagator thereof.

S E C T. VI.

Concerning the Asiatick Islands.

Reduc'd (Page 45.) to six Classes,
viz.

The Japan Islands.
The Philipin Islands.
The Isles Des Larrons.
The Moluccoes.
The Islands of the Sund.
The Maldives and Ceylon.

| | | | | |
|--|---------------------------------------|----------------------|--|--------------------------|
| The chief of the Japan are, | { Japan — Tonsa — Bongo — | Remarkable Towns are | { Meaco — Saniqui — Idem — | { From N. E. to S. W. |
| The chief of the Phi- lippin are, | { Luconia — Tandaya — Mindana — | | { Idem — Achen — Idem — | |
| In the Islands Des Larrons | — | | None. | |
| The chief of the Mo- lucgoes are, | { Celebes — Gilolo — Ceram — | | { Idem } { Idem } { Cimbelo — | { W. to E. |
| The chief of the Isles of the Sund are, | { Bornè — Sumatra — Java — | | { Idem — Achem — Mata- ran, S. of | |
| | | | { Under the E- quator, Borneo. Sumatra, | |
| The chief of the Maldives is Male — | — | | None. | |
| In the Island Ceylon | — | | Candea, | |

These Islands (as aforesaid) being reduc'd to six Classes; of each of these Classes separately, and in their Order. Therefore,

§ 1. The Japan Islands.

Name.] These Islands (thought by some to be the *Jabadii* of the Ancients) are term'd by the *Italians*, *Giapone*; by the *Spaniards*, *Islas del Japón*; by the *French*, *Les Isles du Japon*; by the *Germans*, *Die Japanische Insuln*; and by the *English*, *The Japan Islands*; but why so call'd, I find no satisfactory Account among Criticks.

Air.] The Air of these Islands doth much incline to Cold, but is generally esteem'd very wholesome to breathe in. The opposite Place of the Globe to *Japan*, is that part of the *Paragweyan* Ocean, lying between 322 and 332 Degrees of Longitude, with 30 and 40 Degrees of Southern Latitude.

Soil.] The Soil of these Islands is reckon'd abundantly fertile in Grain; Roots, and divers sorts of pleasant Fruits; as also the Ground (though much over-spread with Forests, and encumber'd with vast Mountains) is very fit for Pasturage, and well stock'd with Multitudes of Cattle. The Length of the Days and Nights in these Islands, is much the same as in the middle Provinces of *China*, they both lying under the same Parallels of Latitude.

Commodities.] The chief Commodities of these Islands, are Gold, Silver, Elephants Teeth, and most sorts of Minerals.

Rarities.] There is in *Japan* (according to the Testimony of *Varenus*) a very remarkable Fountain, whose Water is almost equally hot with boiling Oil; it breaks forth only twice a Day for the space of one Hour, during which Time the Eruption is so violent, that nothing can withstand the Strength of its Current; for with such a mighty Force doth the Water burst out, that 'tis said to raise up, and throw away the greatest Stone they can lay over the Mouth of the Fountain, and that with such a Noise, that it frequently resembles the Report of a great Gun. (2.) In the same Island is a prodigious high Mountain, generally suppos'd to equal (and by some to surpass) the famous Pike of *Tenerife*, being visible almost 40 Leagues off at Sea, tho' 18 distant from the Shore. (3.) In this Cluster of Islands are commonly reckon'd no less than 8 different *Volcano's*, whereof some are very terrible. Here is also great variety of medicinal Waters, and many hot Springs, besides that most remarkable one above-mention'd. (4.) In the City of *Meaco* is a mighty *Colossus* of gilded Copper, to which People pay their Devotions: Of such a prodigious Bigness is that *Pagod*, that being set in a Chair, which is Eighty Foot broad, and Se-

venty high) no less than Fifteen Men may conveniently stand on his Head. His Thumb is said to be Fourteen Inches about, and proportionable to it is the rest of his Body. In this City are reckon'd about Seventy Heathen Temples, and one of them is said to be furnish'd with no fewer than 3333 gilded Idols.

Archbishopsricks, &c.] *Archbishopsricks, Bishopsricks, Universities; none.*

Manners.] The *Japanners* (being a People of an Olive-colour'd Complexion) are generally of a tall Stature, strong Constitution, and fit to be Soldiers. They're said to have vast Memories, nimble Fancies, and solid Judgments. They are abundantly fair and just in their Dealings, but naturally ambitious, cruel, and disdainful to all Strangers, especially those of the *Christian Religion*, admitting none such to traffick with 'em save only the *Dutch*, who (to monopolize an advantageous Trade) are so complaisant to those *Pagan* People, as to suspend the very *Profession of Christianity* during their Abode among them.

Language.] The *Japonese Tongue* is said to be very polite and copious, abounding with many synonymous Words, which are commonly us'd according to the Nature of the Subject; as also the Quality, Age, and Sex, both of the Speaker, and the Person to whom the Discourse is directed.

Government.] These Islands are govern'd by several petty Kings and Princes (or *Tanes*) who are all subject to one Sovereign, stild the *Emperor of Japan*. His Government is also Despotical, and his Subjects adore him as a God; never daring to look him in the Face, and when they speak of him, they turn their Countenances down to the Earth. Peculiar to the *Emperors of Japan*, is the following Custom, viz. That they esteem it a kind of Sacrilege to suffer either Hair or Nails to be cut after Coronation.

Arms.] The *Emperor of Japan* (according to the Relation of the *Ambassadors of the Dutch East-India Company*) bears Or, Six Stars, Argent, in an Oval Shield, and border'd with little Points of Gold. But according to others, his Arms are Sable, with Three Treefoils Argent.

Religion.] The *Japanners* are gross Idolaters, having a multitude of Idols, to whose particular Service great Numbers both of Men and Women do consecrate themselves. The chief of those Idols are call'd by the Names of *Amida* and *Foqueux*. The *Votaries of the former* are said to assert the Soul's Immortality, and the *Pythagorean Metempsychosis*;

and those of the latter imagine, That the frequent Repetition of certain Words will atone for all their Misdoings, and procure to 'em the Enjoyment of complete Felicity at last. Great was the multitude of Converts to *Christianity* once in these Islands, if we might safely credit the Testimony of our *Roman* Missionaries, who, *Anno* 1596. reckon'd no less than 600000 of the Natives, then actually professing the *Christian* Religion. But how many soever were really brought over to the Knowledge of the Truth, most certain it is, that they quickly apostatiz'd from the same; and that no Person dares openly avow the Doctrine of *Christ* since the Year 1614. all *Europeans* (save the *Dutch*) and others professing *Christianity*, being then expell'd those Islands, and not likely to have any more Accels there for the future.

§ 2. The Philippin Islands.

Name.] THESE Islands (discover'd by *Magellan*, *Anno* 1520.) are term'd by the *Italians*, *Philippine*; by the *Spaniards*, *Islas de Philippe*; by the *French*, *Philippines*; by the *Germans*, *Philippinische Insuln*; and by the *English*, The *Philippin Islands*; so call'd from *Philip II.* of *Spain*, in whose Time they began to be inhabited by *Spaniards*.

Air.] The *Air* of these Islands is very moderate, notwithstanding they lye so near the Line. The opposite Place of the Globe to them, is the Northmost part of *Brasil*.

Soil.] The *Soil* of these Islands is generally very fertile, producing in great abundance most sorts of Grain, Herbs, and Fruits. They are also very fit for Pasturage, and several of 'em are well furnish'd with some rich Mines of Gold, and other Metals. The Length of the Days and Nights in these Islands, is much the same as in the Southern Parts of *China*, they lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of these Islands, are Rice, Pulse, Wax, Honey, Sugar-Canes, Gold, Cotton-Wool, &c.

Rarities.] In the Sea surrounding these Islands, is frequently seen a sort of Fish or Sea-Monster, about the Bigness of a Calf, which in Shape doth much resemble the ancient *Sirenes*, so famous among the Poets; whence our *English* Navigators term it the *Woman-Fish*, because its Head, Face, Neck, and Breast, are somewhat like those of the Fair Sex. In several of the *Philippins* are some little *Volcano's*, especially those of the Island *Tandaia*.

Archbishops.] Here is one *Spanish Archbishoprick*, viz. that of *Manilla*.

Bishops.] And subject to him are several *Suffragan Bishops*, but their Number and Titles are uncertain.

Universities.] *Universities* in these Islands. None.

Manners.] The Natives of these Islands are generally a courageous and valiant sort of People, maintaining still their Liberty in several Places: They're said to be civil and honest enough in their Dealings with the *Chineses* and *Europeans*, but most of 'em have a great Aversion to the *Spaniards*, having been extremely ill us'd by that Nation in divers respects.

Language.] The prevailing *Language* in these Islands, is the *Spanish*, which is not only in use among the *Spaniards* themselves, but is also understood and spoken by many of the Natives. As for the *Language* peculiar to 'em, we can give no particular Account thereof, save only its near Affinity to the *Malay Tongue*.

Government.] These Islands being mostly subject to the King of *Spain*, are rul'd by a particular Vice-Roy appointed by his Catholick Majesty, whose Place of Residence is in *Luconia*, the biggest of 'em all. The Natives (as aforesaid) do still retain their Liberties in several Places, especially in the Isle of *Mindana*, where those People call'd *Hilanoones* (i. e. Mountaineers) *Sologues* and *Alfoores*, acknowledge nothing of Subjection to the *Spanish Power*,

Arms.]

Religion.] Many of the milder sort of the Natives are instructed in, and make Profession of the *Christian Religion*; and that by the Care and Diligence of *Roman Missionaries* sent thither from time to time. The rest being of a savage and untractable Temper, continue still in the thick Mist of *Paganism*. The *Spaniards* here residing, are the same in Religion with those in *Spain*.

§ 3. *Isles des Larrons.*

TH E S E Islands were discovered by *Magellan*, Anno 1520. and so nam'd by him from the Natures of their Inhabitants, who were excessively given to *Thieving*. This being all that's remarkable of 'em, we pass on to,

§ 4. The Molucques, or Moluccoes.

Name.] THESE Islands, unknown to the Ancients, are term'd by the *Italians*, *Molucche*; by the *Spaniards*, *Moluc:os*; by the *French*, *Isles Moluques*; by the *Germans*, *Die Moluccische Inseln*; and by the *English*, The *Molucques*, or *Moluccoe Islands*; so call'd from the Word *Moloc*, which in the Language of the Country signifieth the *Head*; because these Islands properly call'd the *Moluccoes*, are situated, as'twere, at the Head or Entrance of the *Indian Archipelago*.

Air.] These Islands lying under, and on either side of the Line, the *Air* is extremely hot, and generally esteem'd very unwholsome. The opposite Place of the Globe to the *Moluccoes*, is the Northern part of *Brasil*.

Soil.] The *Soil* of these Islands is not reckon'd so fertile as that of the *Philippin*, especially in Grain; but for abundance of Spices and rich Mines of Gold, they far surpass them. The Days and Nights do not much vary in their Extent all the Year round, these Islands being so near unto, and partly under the Equinoctial.

Commodities.] The chief *Commodities* of these Islands, are Gold, Cotton, Spices of all sorts, especially Cinnamon, Pepper, Cloves, Ginger, Nutmegs, Mastick, Aloes, &c.

Rarities.] In the Island of *Timor* and *Solor*, grows a Tree which stinketh exactly like Human Excrements: A considerable part of an Arm of which Tree, is to be seen in the publick *Museum* of *Gresham College*, *London*. (2.) In several of the *Moluccoes* are divers *Volcano's*, particularly that call'd *Gounong-apy* in *Banda*, which some Years ago made a dreadful Eruption, not only of Fire and Sulphur, but also of such a prodigious Number of Stones, that they cover'd a great part of the Island; and so many drop'd into the Sea, that where'twas formerly 40 Fathom Water near the Shore, is now a dry Beach. (3.) In *Terinata* (one also of the *Moluccoes*) is another *Volcano*, reckon'd by many to be yet more terrible than the former, for a particular Description of which, *Vid. Philos. Trans. N. 216*. (4.) In the *Moluccoes* is a Bird term'd by the Natives *Manucodiata*, i. e. *Avis Dei*; and by the *Europeans*, The Bird of *Paradise*. He is indeed a Creature of admirable Beauty, and being always seen upon the Wing, 'twas currently believ'd that he had no Feet. But that Opinion is now found to be a gross Mistake (as every noted *Museum* of natural Rarities sufficiently evinceth) notwithstanding the same was not only receiv'd by the un-

thinking

thinking Vulgar, but also embrac'd even by some considering (yet therein deceiv'd) Naturalists; among whom the great *Scaliger*, [*Exer. 228. Sect. 2.*] was one; and likewise *Gesner* [the *Pliny* of *Germany*] being led into the same Error, hath pictur'd that Bird accordingly. To these Remarkables above-mention'd, I may here add that rare Quality of *Cloves* (one of the chief Spices produc'd in these Islands) viz. their strange attractive Virtue when laid near any Liquids, being able to drain a Hogshead of Wine or Water in a short time; whereby some unwary Commanders of Ships have been most unexpectedly depriv'd of their beloved Liquors.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities. None.

Manners.] The Natives of these Islands, especially such as inhabit the midland Parts, are by most esteem'd a treacherous, inhuman, and base kind of People; much given to beastly Pleasures, and generally walking naked; but those upon or near the Sea-Coasts, who have Commerce with *Europeans*, are pretty well civiliz'd, and several of 'em prove very ingenious. Their manner of Dealing is all by Bartering, they being Strangers as yet to Money.

Language.] All we can find of the Language peculiar to the Natives of these Islands, is, That 'tis as barbarous as they who own it. The Trading Persons among 'em in their Dealings with Strangers use the *Portuguese* Tongue.

Government.] These Islands are subje& to many Sovereigns of their own, and some (particularly *Celebes* and *Gilolo*) have each of 'em several petty Kings, whom they own as Sovereign Lords and Governors. The *Portuguese* formerly had got considerable Footing in these Islands; but now the *Dutch*, who send thither many of their condemned Criminals to be there employ'd as perpetual Slaves.

Arms.]

Religion.] The Natives of the *Moluccoes* are, for the most part, gross Idolaters; and intermix'd with them are many *Mahometans*, with some who know a little of *Christianity*; which Knowledge hath not been improv'd very briskly in those poor Creatures, ever since they happen'd to change their Masters.

§ 5. *The Islands of the Sund.*

Name.] These Islands (unknown to the Ancients) are term'd by the *Italians*, *Isola di Sunda*; by the *Spaniards*, *Islas del Sond*; by the *French*, *Les Isles de la Sonde*; by the *Germans*, *Die Insuln in Sund*; by the *English*, *The Islands of the Sonde or Sond*; so call'd from the Straits of the *Sund*, between the *Isles of Java and Sumatra*.

Air.] The *Air* of these Islands is extremely hot (they being situated under the same Parallels of Latitude with the *Moluccoes*) and in *Sumatra*, 'tis mighty unwholsome, by reason of many Lakes where-with that Island abounds. The opposite Place of the Globe to the *Isles of the Sund*, is part of *Terra-firma*, and the Land of the *Amazons*, in *South America*.

Soil.] The *Soil* of these Islands is generally very good, especially in *Java* and *Sumatra*, affording great Plenty of Corn and Fruits; mightily abounding with the chiefest of Spices; well furnish'd with various kinds of Fowl; and wonderfully stor'd with rich Mines of Gold, Tin, Iron, Sulphur, and several other Minerals. The length of the Days and Nights in these Islands, is much the same throughout the whole Year, their Latitude either South or Northern being inconsiderable.

Commodities.] The chief *Commodities* of these Islands, are Gold in great Quantities, most sorts of Spices, plenty of Wax and Honey, store of Silks and Cottons, some precious Stones, and the best kind of Brass.

Rarities.] In the Island of *Java* are Serpents of a prodigious Length and Bigness; one being taken at a certain time, that was thirteen Yards and half long; and so big, that they found a young Boar in his Belly. In the same Island is a remarkable *Volcano*, which sometimes burns with great Rage. (2.) Towards the middle part of *Sumatra*, is another burning Mountain, call'd *Mons Baluwanus*, which vomits forth Fire and Ashes in like manner as Mount *Ætna* in *Sicily*, or *Vesuvius* in *Naples*. (3.) In the same Island is a very observable Tree, call'd *Sangali* by the *Malayans*; and by the *Portuguese*, *Arbortriste de dia*; so term'd from its remarkable Property of putting forth abundance of lovely Buds every Evening (which look very pleasant to the Eye, and fill the Places adjacent with a most fragrant Smell) but these fading and falling to the Ground when the Sun ariseth, it appears in a melancholy and mourning Dress all Day long. (4.) In the Island of
Borneo

Borneo is a Creature usually known to our *English* Navigators, by the Name of the *Savage Man*; being of all Brutes likest to Man, both in Shape, Stature, and Countenance, walking also upright upon his two hinder Legs, and that frequently, if not always. He is a Creature of great Strength, and extremely swift in running. Many reckon him the *Ape* peculiar to *Borneo*, and the hunting of him is esteem'd a princely Diversion.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities, none.

Manners.] The Natives of these Islands do considerably differ in point of *Manners*; those of *Borneo* being generally esteem'd Men of good Wits, and approved Integrity. Those of *Java* very treacherous, proud, and much given to Lying: And the Inhabitants of *Sumatra* are affirm'd to be good Artificers, cunning Merchants, and several of 'em expert Mariners.

Language.] The *Language* in these various Islands is not the same, at least, it doth mightily differ in variety of Dialects. The trading People who have frequent Dealings with the *Franks*, do understand and speak the *Portuguese Tongue*.

Government.] In each of these Islands are several Kings. In *Borneo* two; one *Mahometan*, and the other *Pagan*. In *Sumatra* and *Java*, are many Princes, some *Mahometan*, and some *Pagan*. The chief of those in *Sumatra* is the King of *Achem*, and *Materan* is the chief in *Java*. The *Hollanders* and *Portuguese* have establish'd several Factories in these Islands, especially the former.

Arms.]

Religion.] The Natives of these Islands, who reside in the Inland Parts, are generally gross Idolaters; but those towards the Sea Coasts are, for the most part, zealous Professors of the Doctrine of *Mahomet*, in several of its fundamental Points.

§ 6. The Maldives and Ceylon.

Name.] These Islands (unknown in former Times, except *Ceylon*, which is thought by some to be the *Ophir* of *Solomon*, and the *Taprobane* of the Ancients) are term'd by the *Italians*, *Maldivae Ceylon*; by the *Spaniards*, *Maldivas Ceylon*; by the *French*, *Isles des Maldives & Ceylon*; by the *Germans*, *Die Maldivische Inseln* &c.

& Ceylon; and by the English, the Maldives and Ceylon: They are called Maldives from Male, the chiefest of 'em, and Dive, which in their Language signifies an Island. But from whence Ceylon derives its Name is nor very certain.

Air.] The Air of these Islands (notwithstanding of their nearness to the Line) is very temperate, there falling a kind of Dew every Night, which mightily helps to qualifie the same, yet frequently mortal to Strangers. But in Ceylon 'tis so pure and wholesome, that the Indians term this Island, *Temarisin*, i. e. *A Land of Pleasure*. The opposite Place of the Globe to these Islands, is that of *Mare del Zur*, lying between 262 and 272 Degrees of Longitude, with the Equator, and 10 Degrees of South Latitude.

Soil.] The Soil of these Islands is extraordinary fruitful, except in Corn, whereof the Maldives are said to be scarce. The Length of the Days and Nights in them, is much the same throughout the whole Year, the Latitude of the Northmost of 'em being inconsiderable.

Commodities.] The chief Commodities of these Islands, are Cinnamon, Gold, Silver, most sort of Spices, Rice, Honey, Precious Stones, &c.

Rarities.] In Ceylon is that remarkable Mountain, commonly call'd *Adam's Pike*, which is of a great height, and reported to send forth sometimes from its Top both Smoke and Flame. In many of the Maldivoe Islands grows that Tree bearing the *Cocoa*, or *India Nuts*, which is very remarkable for its various Uses; for out of it is yearly drain'd a large Quantity of Juice, which being drawn at certain Seasons, and prepared after different manners, do taste exactly like excellent Oil, Butter, Milk, as also some sorts of Wine and Sugar. Of the Fruit they usually make Bread, and the Leaves serve as Paper to write upon: And as for the Trunk of the Tree, they employ it either in building of Houses or Ships. These Islands likewise abound with variety of pretty white Shells, which are much admir'd, and pass current as Money in many parts of the adjacent Continent.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities, none.

Manners.] The Natives of these Islands (being for the most part tall and stait of Body) are esteem'd a lazy, proud, and effeminate sort of People, yet some of 'em are reputed to be good Artificers in Metals. Most of 'em go stark naked, except what natural Instinct prompteth them to cover. To wear long Hair, is only the Privilege of the King and Soldiers.

Language.] The Inhabitants of the *Maldives* have a peculiar *Fargon* of their own. Those who reside on the Sea-Coasts of *Ceylon*, understand a little *Dutch*, and something of the *Portuguese* Tongue.

Government.] The *Maldives* are mostly subject to one Sovereign; who hath his ordinary Residence in *Male*, the chief of all those Islands. And *Ceylon* is governed by its own King, residing at *Candea*, to whom several little Princes are tributary; but much of the Sea-Coasts is possess'd by the *Dutch*. The *Maldiver* Sovereign is said to assume the Title of *Sultan*, King of Thirteen Provinces, and Twelve Thousand Islands, viz. those of the *Maldives*, their Number being generally accounted such.

Arms.]

Religion.] The Natives of this mighty Cluster of Islands, are partly *Mahometans*, partly *Idolaters*, especially the latter, *Paganism* being the most predominant of the two.

And so much for *Asia* and the *Asiatick* Islands. Now followeth,

CHAP. III. OF AFRICA.

| | | | |
|-------------------------|-------------------------|--------------|-------------|
| Divided (pag. 44.) into | Egypt ————— | Capital City | Cairo. |
| | Barbary ————— | | Fex. |

Concerning Egypt.

| | | | | | | |
|--------|-------------|-------|-------|-------------|-------------|--------------------------|
| Situat | { between } | d. 22 | m. 00 | { of Lon. } | Its great { | Length from N. E. to S. |
| | | 36 | 00 | | | W. is about 650 Miles. |
| | { between } | 21 | 00 | { of Lat. } | | Breadth from E. to W. is |
| | | 31 | 00 | | | about 310 Miles. |

| | | | | | | |
|------------------|-----------------------------|--|--------------|--------------|--|--------------|
| It comprehends { | Erife, or the Lower Egypt — | | Chief Town { | Alexandria — | | } Northward. |
| | Beckria, or Middle Egypt — | | | Cairo — | | |
| | Sabid, or Upper Egypt — | | | Sabid — | | } Southward. |
| | The Coasts of the Red Sea — | | | Coffir — | | |

Name.] This Country [much the same with ancient *Egypt*, and now bounded on the East by the *Isthmus of Suez*, and the *Red Sea*; on the West by *Barbary*, *Bildulgerid*, and *Zaara*; on the North by part of the *Mediterranean Sea*; and on the South by *Nubia* and *Abex*] was variously nam'd of old, as *Misraim*, by the *Jews*; *Augustanica*, by the *Romans*; *Oceana*, by *Berosus*; *Ogygia*, by *Xenophon*; *Potamia*, by *Herodotus*; and *Hefestia*, by *Homer*, &c. It is now term'd by the *Italians*, *Egypto*; by the *Spaniards*, *Egypto*; by the *French*, *Egypte*; by the *Germans*, *Egypten*; and by the *English*, *Egypt*; so call'd [as many imagine] from *Egyptus*, Son of *Belus*, and Brother to *Danaus*.

Air.] The *Air* of this Country is very hot, and generally esteem'd extremely unwholesome, being always infested with nauseous Vapours, ascending from the fat and slimy Soil of the Earth. That it never rains in *Egypt*, as some have boldly affirm'd, may deservedly claim a place among the *Vulgar Errors* of the World. The opposite Place of the Globe to *Egypt*, is part of *Mare Pacificum*, lying between 202 and 216 Degrees of Longitude; within 21 and 31 Degrees of South Latitude.

Soil.] *Egypt* (lying in the 4th and 5th North Climate) was, and is still accounted as fertile a Country as any in the World; the Soil being wonderfully fatned by the yearly overflowing of the *Nile*. It's exceeding plentiful of all sorts of Grain; and for its vast abundance of Corn in former Times, 'twas commonly term'd *Horreum Populi Romani*. The longest Day in the Northmost Parts, is about 14 Hours and half; the

the shortest in the Southmost is 10 Hours and a half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Sugar, Flax, Rice, all sorts of Grains and Fruits, Linen-Cloth, Salt, Balsam, Senna, Cassia, Butargio, &c.

Rarities.] In and near to ancient *Alexandria* (now term'd by the *Turks*, *Scanderick* or *Scanderie*) are many considerable Remains of Antiquity; particularly the ruin'd Walls of that ancient famous City, with a considerable Number of Towers, several of which are almost intire: here also are divers stately Porphyry Pillars, and several curious Obelisks of pure Garnet (especially that which bears the Name of *Pompey's Pillar*) some of 'em still standing, others thrown down, and all adorn'd with variety of Hieroglyphicks: For a particular Account of such Pillars, with a curious Draught of divers of 'em, representing both their true Dimensions and Hieroglyphick Characters, *vid. Philos. Transf. N. 161, and 178.* To these *Curiosities* we may add the [once] proud Palace of *Cleopatra*, now wholly in Ruins, being so defac'd, that 'tis hardly discernable if ever such a stately Structure was in that Place. (2.) In the ancient Castle of *Grand Cairo*, are several Remarkables worthy Observation, which Strangers, with some Difficulty, obtain leave to see: The chief whereof are these Three; First, The *Arcane*, which is a frightful dark Dungeon, and that (as they tell you) into which the Patriarch *Joseph* was thrown down. Secondly, A very large ancient Room, with about Thirty Pillars of *Thebaick Stone* as yet standing, which still bears the Name of *Joseph's Hall*. Lastly, In this Castle is a prodigious deep Pit, with a Spring of good Water in its bottom (a Rarity in *Egypt*) which the Natives term *Joseph's Well*. From this Pit some Travellers are pleas'd to talk of an artificial Communication under Ground, between the Pyramids on one Hand, and the Town of *Suez* on the other. For a farther Account of these Particulars, *vid. Thevenot's Travels, part 1. c. 9.* (3.) A few Miles West of *Grand Cairo*, are the *Egyptian Pyramids*, (call'd by the *Turks*, *Pharaon Daglary*; and by the *Arabs*, *Dgebel Pharaon*, i. e. *Pharaoh's Hills*) those famous Monuments of Antiquity, which 'twould seem devouring Time could not consume: The biggest of 'em hath these Dimensions, *viz.* Five Hundred and Twenty Foot high, upon a Base of Six hundred and two Foot square; Two hundred and fifty Steps from Top to Bottom, each Step being Two Hands broad, and almost Four high; and its Top being flat, is able to contain Thirty Men. (4.) Adjacent to the biggest Pyramid is a monstrous Figure of a prodigious Greatness, call'd *Sphinx*; and by *Herodotus*, *Androsphinx*: The Bust (being all of one Stone) represents the Face and Breasts of a Woman, whole Head, according to *Pliny*,

is a Hundred and thirty Foot in Circumference, and Forty three long; it's also a Hundred sixty two from the Top of the Head to the lowest part of the Belly. But these Dimensions are different from those of some modern Travellers, who say, that 'tis but twenty six Foot high, and fifteen from the Chin to one of the Ears, and the rest proportionably. (5.) Near to *Grand Cairo* are several deep subterranean *Cavities* (hewn out of the firm Rock, and having variety of Hieroglyphicks inscrib'd on the Walls) in which repose several of the famous *Egyptian Mummies*; and in some of those Repositories of the Dead it is, that certain Lamps are said to have been found, which constantly burn without consuming, till expos'd to the open Air. (6.) In the famous River of *Nile* are abundance of *Crocodiles*, those terrible and devouring Animals, which *Bochartus* (*de Animalibus*, S. S. Part 2. Chap. 16, 17, 18.) endeavours to prove to be the same with that Creature mentioned in the Book of *Job* under the Name of *Leviathan*, thought commonly, and hitherto taken for the Whale. A complete Skeleton of this Animal, about Four Yards three Quarters long, may be seen in the Repository of *Gresham College*, being presented to the *Royal Society* by that truly worthy and ingenious Gentleman the Honourable Sir *Robert Southwell*. To these *Curiosities of Egypt*, I might here add that supernatural (but fictitious) Prodigy that's reported to be yearly seen near to *Old Cairo*, viz. The annual Resurrection of many dead Bones, on *Holy Wednesday*, *Thursday*, and *Friday* (according to the old Calendar) which both *Turks* and *Christians* in those Parts do firmly believe, and that by means of some pious Frauds of a few designing *Santo's* among them.

[*Archbishopricks, &c.*] *Archbishopricks, Bishopricks, Universities*; see *Natolia*, page 271.

[*Manners.*] The *Egyptians* now a-days (being Persons of a low Stature, tawny Complexion, and of spare Bodies) are generally reckon'd Cowards, Luxurious, Cruel, Cunning, and Treacherous; they much degenerate from their Ancestors in every thing, save only a vain Affectation of Divining, which some as yet pretend unto.

[*Language.*] The chief Language commonly us'd in this Country, is the *Turkish* and vulgar *Arabick*, or *Morisk*, especially the latter. The *Arabs* brought in their Language with their Conquests, which hath been preserved here ever since; but the *Cophti's* still retain the use of the ancient *Egyptian Tongue* (which is very different from all the Oriental Languages) especially in their religious Performances. In Places of any considerable Traffick, many of the *European Tongues* are understood and spoken.

Government.] This Country (very famous of old, both in Sacred and Prophane History) being a Province of the *Turkish* Empire, is govern'd by a particular *Bassa* or *Beglerbeg*, who commonly resideth at *Grand Cairo*, which Post is generally esteem'd the most honourable Government of any belonging to the Port; having under him no less than Fifteen different Governments, as also a powerful Militia, commonly reckon'd the most considerable of all the *Ottoman* Empire.

Arms.] See *Turkey* in *Europe*, Page 188.

Religion.] The Inhabitants of this Country (being *Moors*, *Turks*, and *Arabs*, besides the natural *Egyptians*) are for the most part stricter Observers of *Mahomet's* Doctrine, than any People elsewhere thro' all the *Ottoman* Dominions. Here also are *Jews* in great Numbers, as also many *Christians* call'd *Cophti*, who follow the Errors of *Eutyches* and *Dioscorus*, yet not concurring with them in every Point. The *Christian* Faith was first planted here by *St. Mark*, who is universally acknowledg'd to have been the first Bishop of *Alexandria*.

S E C T. II.

Concerning Barbary.

Situated { between { $\begin{matrix} \text{d.} & \text{m.} \\ 352 & 00 \\ 30 & 00 \end{matrix}$ } of Lon. } Its great { Length from W. to E. is
 { between { $\begin{matrix} 29 & 00 \\ 37 & 00 \end{matrix}$ } of Lat. } { Breadth from N. to S. is
 { } { about 2300 Miles.
 { } { about 380 Miles.

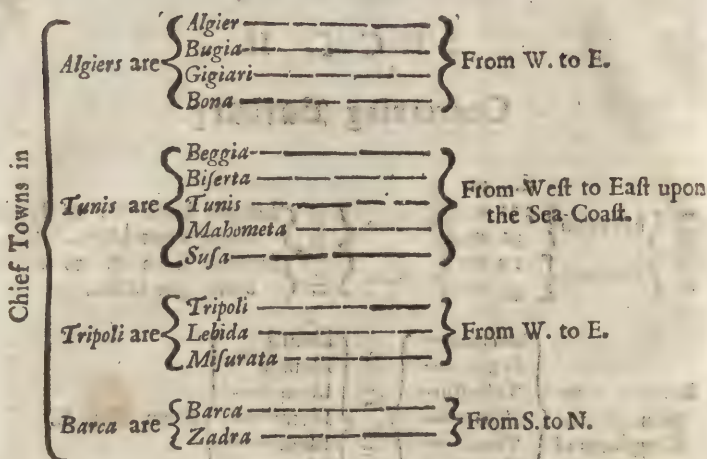

Barbary comprehends the Kingdoms of { $\begin{matrix} \text{Morocco} \\ \text{Fez} \\ \text{Telenfin} \\ \text{Algiers} \\ \text{Tunis} \\ \text{Tripoli} \\ \text{Barca} \end{matrix}$ } Chief Town { $\begin{matrix} \text{Idem} \\ \text{Idem} \\ \text{Idem} \\ \text{Idem} \\ \text{Idem} \\ \text{Idem} \\ \text{Idem} \end{matrix}$ } } From W. to E.

Barbary being the most considerable (at least, the best known) Country of all Africa, I shall in particular consider its Divisions; Therefore,

Chief Towns in { $\begin{matrix} \text{Morocco are} \\ \text{Fex are} \\ \text{Telenfin are} \end{matrix}$ } { $\begin{matrix} \text{Taradunt} \\ \text{Gazula} \\ \text{Morocco} \\ \text{Tedneft} \\ \text{Elmdin} \\ \text{Tefzea} \end{matrix}$ } } Found from S. to N.

Chief Towns in { $\begin{matrix} \text{Fex in the main Land.} \\ \text{Beniz} \\ \text{Sallee} \\ \text{Larac} \\ \text{Arzilla} \\ \text{Tangier [now demolish'd]} \\ \text{Centa} \end{matrix}$ } } From S. to N.E. upon the Sea-Coast.

Chief Towns in { $\begin{matrix} \text{Oran} \\ \text{Teno} \end{matrix}$ } } From W. to E.

Name.] Barbary [comprehending *Mauritania* of the Ancients, as also *Africa propria*, and *Lybia*; now bounded on the East by *Egypt*; on the West by part of the *Atlantick Ocean*; on the North by the *Mediterranean Sea*; and on the South by *Bildulgerid*] is term'd by the *Italians*, *Barbaria*; by the *Spaniards*, *Berberia*; by the *French*, *Barbarie*; by the *Germans*, *Barbaryen*; and by the *English*, *Barbary*; so call'd by the *Saracens* from *Barbar* (which signifieth a murmuring Sound) because this People seem'd at first to their Conquerors, to pronounce their Language after a strange murmuring manner. Others do rather imagine, that the *Romans* upon the Conquest of this Country, call'd it *Barbaria*, and its Inhabitants *Barbarians*, because of the Rudeness and Barbarity of their Manners.

Air.] The Air of this Country is indifferently temperate, and generally esteem'd very healthful to breathe in. The opposite part of the Globe to Barbary, is part of *Mare del Zur*, and *Mare Pacificum*, lying between 173 and 211 Degrees of Longitude, with 29 and 37 Degrees of Southern Latitude.

Soil.] This Country lying in the 4th and 5th North Climate is very fertile in Corn, and most kinds of Fruit, altho' tis full of Mountains and Woods, especially towards the *Mediterranean Sea*. It breedeth many kinds of Beasts, particularly Lions and Leopards, with many Apes, and some Elephants, besides abundance of Cattle. The longest Day in the Northmost Parts, is about 14 Hours and a quarter; the shortest in the Southmost, 10 Hours and an half; and the Nights proportionably.

Com-

Commodities.] The chief *Commodities* of this Country, are Honey, Wax, Oil, Sugar, Flax, Hemp, Hides, Cordevants, Dates, Almonds, Mantles, &c.

Curiosities.] On Mount *Zagoan* (about Six Miles South from *Tunis*) are many Ruins of an old Castle, built by the antient *Romans*, with several *Latin* Inscriptions, as yet to be seen upon divers Marble Stones. (2.) From the aforesaid Mountain to the City of *Carthage*, was once a curious *Aqueduct*: And upon Mount *Gueslet* (in the same Neighbourhood) are some plain *Vestigia* of *Roman* Magnificence, still visible to this Day. (3.) In the City of *Morocco* are two magnificent Temples, one built by *Aly*, and the other by *Adul Mumen*, which deserve the particular Regard of a curious Traveller. (4.) In the Palace Royal of the *Morocco* Emperors (a Building of a vast Extent, and term'd by the Natives, *Alcacave* or *Michouart*) is a stately Mosque, with a very high Turret, on whose Top are Four Apples of solid pure Gold, which all together weigh seven Hundred Pounds weight; and in another Court of the said Palace is a prodigious high Tower, so contriv'd, that the Emperor can mount up to the Top of it on Horseback. (5.) In the City of *Fez* is that famous Mosque call'd *Carween*, which is said to be almost half a Mile in Circuit, and furnish'd with Thirty Gates of a prodigious Bigness. It hath above three Hundred Cisterns to wash in, before they go to Prayers; and in it are upwards of nine Hundred Lamps, which are commonly lighted, and burn every Night. (6.) A few Miles from the Ruins of *Tangier*, is a narrow Descent of many Fathoms deep (resembling that of a Coal-Pit) which leads unto a large subterranean Apartment, from whence are Passages into several other Apartments; all of 'em done with good Marble; and no ways to be doubted but that they were designed by the Ancients for several Repositories for their Dead, there being found in them as yet many *Urns* and *Statues*, with some *Inscriptions* in the *Punick* Language. (7.) Over a certain River call'd *Sabu* (as it runs between two Hills, term'd *Benj-jasga* and *Silego*) is a remarkable Bridge, or rather a ready way of passing from one side of the River to the other; and that by the Help of two large Stakes fix'd fast in the Ground (on either side one) between which are extended two strong Ropes, and to one of them is ty'd a kind of a big Basket, able to contain ten Men, into which the Passengers being enter'd, and pulling one of the Ropes (which runs by a Pulley) they waft themselves over much sooner, than we *Europeans* can pass either by Bridge or Boat. *Vide Dapper's late Description of Africa.*

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*, none.

Manners.] The *Barbarians* [thus characteriz'd of old by *Herodian*, *Mauri* (inquit ille) *genus sunt hominum suapte naturâ coedis avidissimum, nibilique non facile audens & desperavis similes, contemptu scilicet mortis & periculorum*] are now a People that's generally very inconstant, crafty, and unfaithful, active of Body, impatient of Labour, and covetous of Honour. Some of 'em are studious in Matters of their Law; and others are inclin'd to the Liberal Sciences, especially *Philosophy* and the *Mathematicks*. The Inhabitants of *Salle*, *Tripoli*, and *Algiers*, are mightily given to Piracy; and many of the *Morocco's* are much addicted to Merchandizing. Dispers'd thro' all these Countries are the *Arabs*, who (especially in *Barca*) exercise their common Trade of robbing and molesting Travellers on the Highway.

Language.] In most of the Sea-Port Towns, and over all the Countries bordering on the Sea, the prevailing Language is *Arabesque*, or corrupt *Arabick*. In the City of *Morocco*, and several other Places, they still retain their ancient Language, or rather a corrupt Dialect of the old *African*. The Trading People, especially in their Dealing with Strangers, do use a certain *Jargon*, compounded chiefly of *Spanish* and *Portuguese*, not unlike the *Lingua Franca* among the *Turks*.

Government.] This large Country (comprehending several Kingdoms and Provinces) is chiefly under the *Great Turk*, and Emperor of *Morocco*. To the latter belong the Kingdoms of *Morocco* and *Fez*, and to him are ascrib'd (or rather he assumeth) the following Title, viz. Emperor of *Africa*, King of *Morocco*, *Fez*, *Sus*, and *Taffalet*; Lord of *Gago*, *Dara*, and *Guinen*, and Great Zeriff of *Mahomet*. The other Kingdoms or Provinces of this Country, are mostly subject to the *Great Turk*, and are govern'd by his particular *Bassa's* set over 'em; only *Tunis* and *Algiers* (two considerable Commonwealths, or rather distinct Kingdoms) tho' each of 'em hath their respective *Bassa* appointed by the *Grand Seignior*, yet they're so eager in maintaining their Liberties and Privileges, that those *Bassa's* are little more than mere Cyphers. For in the former of these, the Inhabitants have a Power of chusing their own Governor or Captain, term'd the *Dey*, who rules the Kingdom, constitutes *Cadi's*, and passeth Sentence in all Affairs, whether Civil or Criminal. The Divan of *Tunis* is compos'd of one *Aga*, one *Chaya*, 12 *Odabachi*, 24 *Bouloubachi*, 2 Secretaries, and 4 *Chiaoux*, who judge in all Matters, after they have heard the Sentiment of the *Dey*, who may accept or reject their Advice as he thinks fit. As for *Algiers*, the Government thereof is lodg'd in the Hands of the Army, particularly the Officers of the *Janizaries*, of whom the Council of State is compos'd, and of it the *Aga* of the *Janizaries* is President. It's true, the *Grand Seignior* keeps always in this Place

Place a *Bassa*, with the Title of *Viceroy*, but he's at best but a mere Shadow; for he may not so much as enter the great *Divan*, unless invited by the whole Council; and when admitted, he hath but one single Voice, and can only advise in Matters. Besides these two potent Republicks of this Country, there's another, *viz.* that of *Tripoli*; but it is intirely subject to the *Grand Seignior*, who governs the same by a particular *Bassa* sent from the *Ottoman Court*, and renew'd every third Year. He is honour'd with the Standard of *Tunis*, and the Title of *Beglerbeg*.

Arms.] The chief independent Potentate in these Countries being the Emperor of *Fez* and *Morocco*, he bears for Arms, Three Wheels *Argent*. As for the rest of *Barbary*, *vide Turkey in Europe*, Page 188.

Religion.] The establish'd Religion of this Country is *Mahometanism*; but the Inhabitants of *Morocco* differ from other *Mahometans* in several considerable Points; particularly those maintain'd by the Followers of *Hamet* (the first of the present Race of the *Morocco* Emperors) who was at first a kind of Monk, and quitting his Retirement, A.C. 1514. began publickly to preach to the People, That the Doctrine of *Hali* and *Omar*, and other Interpreters of the Law, was only Human Traditions, besides several other Things of that Nature, which occasion'd such Animosities between other *Turks* and the *Morocco's*, that a *Turkish* Slave with them is no whit better treated than a *Christian*. There are also many Persons in and about *Algiers*, who likewise differ from the other *Mahometans* in divers Particulars. Some of 'em maintain, That to fast Seven or Eight Months doth merit eternal Happiness: That Ideots are the Elect of God: That Sins against Nature are Virtues: That the *Marabouts* among 'em are inspir'd by the Devil, and yet they account it an honourable Thing to be desil'd by one of 'em. These, and many other such ridiculous Follies, do they believe and avouch. The *Christian* Faith was first planted in this Country by some of the Seventy Disciples, and St. *Simon* the Apostle, surnamed *Zelotes*.

S E C T. III.

Concerning Bildulgerid.

| | | d. | m. | | | | | |
|--------|-------------|-----|----|-------------|---------------|----------------------------|------------------|--|

| | | 31 | 00 | | | | | |
| | { between } | 29 | 00 | { of Lat. } | | { Breadth from N. to S. is | about 300 Miles. | |
| | | 31 | 00 | | | | | |

| | | | | |
|--|----------------------------------|--------------|---------------------|----------------------|
| Bildulgerid compre- hends the Provinces of | { Tefset ————— } | } Chief Town | { Idem ————— } | { From W. to E. |
| | { Dara ————— } | | { Idem ————— } | |
| | { Segelmess ————— } | | { Idem ————— } | |
| | { Tegerarin ————— } | | { Idem ————— } | |
| | { Zeb ————— } | | { Teulachar ————— } | |
| | { Bildulgerid, prop. so call'd } | | { Capbesa ————— } | { None considerable. |
| | { Defart of Barca ————— } | | | |

Damr.] Bildulgerid [the ancient Numidia, and now bounded on the East by Egypt; on the West by part of the vast Atlantick Ocean; on the North by Barbary; and on the South by Zaara, or the Defart] is term'd by the Italians, Spaniards, French, Germans, and English, Bildulgerid; so call'd from the vast Number of Dates it produceth, the Name in the Arabick Tongue signifying a Date.

Air.] The Air of this Country is very hot, but generally esteem'd abundantly wholesome to breathe in. The opposite Place of the Globe to Bildulgerid, is that of Mare del Zur, and Mare Pacificum, lying between 167 and 212 Degrees of Longitude, with 20 and 31 Degrees of Southern Latitude.

Soil.] The Soil of this Country (it lying in the 3d and 4th North Climate) is somewhat barren, the Ground, for the most part, being very sandy, yet in some low Valleys is found Corn, and great quantity of Dates. The longest Day in the Northmost Parts is about 14 Hours; the shortest in the Southmost, 10 Hours and a quarter; and the Nights proportionably.

Commodities.] The Commodities of this Country are very few, they chiefly consisting in Corn, Cattle, Dates, and Indigo.

Rarities.]

Rarities.] A certain River (whose Origin is in Mount *Atlas*, but watereth the Plain of *Bildulgerid* in its main Body) passing by a Town call'd *Teleocha*, hath a Current of Water extremely warm; and is known to *European Travellers* by no other Name than *la Riviere chaude*, or, *The hot River*. (2.) There's another River issuing out of the Mountains of *Numidia*, and passing by the four Forts of *Ifran*, disgorgeth it self into the main Ocean, between *Bojadore* and the Town of *Nun*, which in the Winter-time (when other Rivers do usually swell over their Banks) grows commonly dry, and goes thereupon by the *Frank* Name of *la Riviere Seche*. (3.) Nigh to the aforesaid *Teleocha*, is a little Village, call'd *Deusen*, which is of great Antiquity, being built by the *Romans*, as appears by the Remains of several Structures, and some *Roman Sepulchres*; besides variety of Medals (found frequently after a Rain) having commonly a Head upon one side of 'em, with *Latin* Inscriptions, and Trophies on the other. Vide *Dapper's late Description of Africa*.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities*; none.

Manners.] The Inhabitants of this Country (besides the Natives) being chiefly *Arabs*, are generally ignorant, cruel, lecherous, and much given to Robbing.

Language.] All we can learn of the *Language* commonly us'd by the Natives of this Country, is, that 'tis as rude and barbarous as they themselves. The *Arabs* here residing do still retain their own Tongue.

Government.] This great Body is subject unto several little Kings, or Lords, who (for the most part) are tributary to the *Great Turk*, and Emperor of *Morocco*. Some Places are govern'd in form of independent Commonwealths; and others are without any kind of Government, or Order among them.

Arms.]

Religion.] The *Religion* profess'd by the savage Inhabitants of this Country, is that of *Mahometanism*; but many of 'em are sunk into the grossest Stupidity as to religious Matters, either not knowing what they profess, or professing as good as none at all. Here are several *Jews* scatter'd up and down in those Places best inhabited. The *Christian Faith* was first planted in this Country much about the same Time with *Barbary*. Of which already.

S E C T.

S E C T. IV.

Concerning *Zaara*, or the Defart.

| | | | | | |
|-------|-----------|-----|----|-----------|-------------------------------|
| | d. | m. | | | |
| Sines | { between | 346 | 00 | } of Lon. | { Its great. |
| | | 26 | 00 | | |
| | { between | 15 | 00 | } of Lat. | |

| | | | | | { Length from W. to E. is a- |
| | | | | | bout 2340 Miles. |
| | | | | | { Breadth from N. to S. is a- |
| | | | | | bout 330 Miles. |

| | | | | |
|--|----------------|------------|---------------|-----------------|
| <i>Zaara</i> , or the Defart, comprehends the Provinces of | { Borné — } | Chief Town | { Idem — } | } From W. to E. |
| | { Gaogo — } | | { Idem — } | |
| | { Bardah — } | | { Idem — } | |
| | { Lempta — } | | { Idem — } | |
| | { Targa — } | | { Idem — } | |
| | { Zuenziga — } | | { Idem — } | |
| | { Zanbaga — } | | { Tagassa — } | |

Name.] *Zaara* [a part of ancient *Lybia*, the Seat of the *Getuli* and *Garamantes*; now bounded on the East by part of *Egypt* and *Nubi*; on the West by the vast *Atlantick Ocean*; on the North by *Bildulgerid*; and on the South by *Negroe-land*] is term'd by the *Italians*, *Zaara*; by the *Spaniards*, *Zaara o Desterto*; by the *French*, *Za-bara ou Desert*; by the *Germans*, *Zaara or Wiste*; and by the *English*, *Zaara, or the Defart*; so call'd by the *Arabians* (the Name signifying a *Defart*) because 'tis a Country very barren, and thinly inhabited.

Air.] The *Air* of this Country is much the same as in *Bildulgerid*, only a little more hot, but very wholesome to breathe in. The opposite Place of the Globe to *Zaara*, is that part of *Mare del Zur*, and *Mare Pacificum*, lying between 167 and 207 Degrees of Longitude, with 15 and 26 Degrees of South Latitude.

Soil.] This Country (lying in the 3d and 4th North Climate) being generally very dry and sandy, is not fertile either for Corn or Fruits; yea, 'tis generally so barren, that its Inhabitants can hardly live. Such are those vast Defarts, and terrible Mountains of Sand in this Country, that Travellers are frequently reduc'd to great Extremities, being liable either to be overwhelm'd with the Sand (if a Tempest of Wind arise) or to perish with Thirst if it chance not to rain. To prevent the last of these (the first being unavoidable in case of Wind) they commonly kill one of their Camels, and drink the Water in his Stomach; those

Crea-

Creatures taking in so large a Quantity at one time, as sufficeth Nature for fourteen or fifteen Days together. The longest Day in the Northmost part, is about 13 Hours and a quarter: the shortest in the Southmost, is 10 Hours three quarters, and the Nights proportionably.

Commodities.] The *Commodities* of this Country are very considerable, they chiefly consisting in a few Camels, Dates, and Cattle.

Rarities.] Nigh to C. *Bojadore*, on the West of *Zaara*, are certain Banks of Sand stretching along that part of the Coast, towards which so strong a Current sets in, that the Water being in a mighty Agitation, both Waves and Sand mixing together, do not only resemble a boiling Saltpan, but also they frequently mount up to a prodigious Height. (2.) In the Desert of *Aracan*, are two Tombs with Inscriptions upon 'em, importing that the Persons there interr'd, were a rich Merchant, and a poor Carrier (who both dy'd of Thirst) and the former had given Ten Thousand Ducats for one Cruise of Water. (3.) North of *Gaogo*, are some *Vestigia* of the ancient *Cyrene*, the chief City of *Lybia Cyrenaica*, and formerly one of the famous *Pentapolis*.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities*, none.

Manners.] The Inhabitants of this Country, being mostly *Arabs*, are an ignorant, brutish, and savage kind of People, resembling rather wild Beasts, than rational Creatures.

Language.] What was said of the *Language* spoken by the Natives of *Bildulgerid*, the same may be affirm'd of that commonly us'd in this Country, viz. That it's as rude and barbarous as they who speak it.

Government.] This great Country is subject to several particular Lords, whom they term *Xeques*; but many of them wander up and down, hunting in great Companies, accounting themselves Independent.

Arms.]

Religion.] This Country being stockt with *Arabs*, the only Religion here profess'd is that of *Muhamet*; but so barbarous and brutish is the generality of this People, that many of 'em live without the least sign of Religion among 'em. The *Christian Faith* was once planted here, but quite exterminated towards the beginning of the Eighth Century.

S E C T. V.

Concerning the Land of the *Negroes*.

| | | | | | | | |
|--------|-------------|-----|----|-------------|---------------|----------------------------|---------------------|

| | | 8 | 00 | | | | { about 600 Miles. |
| | | | 22 | 00 | | | |
| | | | | | | | |

| | | | | | | | | |
|--|---|----------|---|------------|---|------|---|---|
| The Land of the Negroes comprehends the Provinces of | { | Genoboa | { | Chief Town | { | Idem | { | From W. to E. upon the North of the Niger. |
| | | Gelata | | | | Idem | | |
| | | Tombut | | | | Idem | | |
| | | Agades | | | | Idem | | |
| | | Cano | | | | Idem | | |
| | | Cassena | | | | Idem | | |
| | | Guangara | | | | Idem | { | From W. to E. upon the South of the Niger. |
| | | Melli | | | | Idem | | |
| | | Mandinga | | | | Idem | | |
| | | Gago | | | | Idem | | |
| | | Guber | | | | Idem | | |
| | | Zegzeg | | | | Idem | | |
| | | Zanfara | | | | Idem | | |

Besides these is the Country of the *Falofes*, upon the Mouth of the *Niger*.

Nome.] *N*egro-land, or the Land of the *Negroes* (unknown to the Ancients, and bounded on the East by *Nubia*; on the West by part of the *Atlantick Ocean*; on the North by *Zaara*; and on the South by *Guinea*) is term'd by the *Italians*, *Paese di Mori*; by the *Spaniards*, *Tierra de los Negros*; by the *French*, *Pays des Negres*; by the *Germans*, *Moren-land*; and by the *English*, *Negro-land*, or, *The Land of the Negroes*; so call'd either from the Colour of its Inhabitants, or the River *Niger*.

Air.] The Air of this Country is very warm, yet generally esteem'd fowholsome to breathe in, that sick Persons are reported to be brought thither from several of the adjacent Countries, and upon their stay in it for any considerable time, are perfectly restor'd to their former Health. The opposite Place of the Globe to *Negro-land*, is part of the West
Americas

American Ocean, lying between 164 and 200 Degrees of Longitude, with 8 and 22 Degrees of Southern Latitude.

Soil.] The *Soil* of this Country (lying in the 2d and 3d North Climate) is very rich, especially towards the River *Niger*, which overflows a considerable part thereof, as the *Nile* doth *Egypt*. Here is great store of Corn and Cattle, and variety of Herbs. Here are many Woods, and those well furnish'd with Elephants, and other Beasts, both wild and tame. Here also are several Mountains, and those richly lin'd with valuable Mines of Silver and Gold. The longest Day in the Northmost part of this Country, is about 13 Hours and a quarter; the shortest in the Southmost is 11 Hours and a quarter; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Ostridge-Feathers, Gums, Amber, Gold, red Wood, Civet, and Elephants Teeth, &c.

Rarities.] In *Fuala* (a little Kingdom in the Country of the *Faloses*) is a small River, call'd by the *Franks*, *Rio de la Grace*; opposite to whose Mouth is a considerable Bank of Sand, out of which there issueth, at low Water, a gentle Stream of curious fresh Water, most pleasant to the Taste. (2.) Next to *Sanyeng* (a Village in the same Country) is a Well of ten Fathom depth, whose Water is naturally so very sweet, that in taste it comes nothing short of ordinary Sugar. (3.) In the Province of *Gago*, the sandy Desert is of such a nature, that human Bodies laid in the same (for many Persons perish in endeavouring to cross it) don't in the least corrupt, but become hard, like the *Egyptian* Mummies.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*, none.

Manners.] The *Negroes* (having their Denomination from the Blackness of their Complexion) are a People very ignorant in all Arts and Sciences. In Behaviour extremely rude and barbarous, much given to Luxury, addicted to beastly Pleasures, and universally great Idolaters. In the maritime Places they trade in Slaves with the *Europeans*, selling to them not only what Captives they take in Wars with one another, but also (many times) their nearest Relations, even Wives and Children not excepted.

Language.] In this vast Country there are variety of *Languages*, and very different from one another. The principal of which are the *Sangaj* and *Guler*; that of *Gualata*, and what they ordinarily use in *Guangara*.

Guangava. In the Country of the *Jaloses*, are those call'd by the Names of *Bolm* and *Timna*; the first being a Language that's extremely rough in Pronunciation, and hard to be learn'd; but the other is generally reckon'd very sweet and easie.

Government. This spacious Country is subject to many Kings, who are absolute over their own Territories, but all, or most of 'em are tributary to one Sovereign, viz. the King of *Tombute*, who is reckon'd the most powerful of 'em all. Next to him are *Mandingo*, *Gago*, and *Canu*.

Arms.]

Religion. The numerous Inhabitants of this vast Country, are either *Mahometans*, or gross Idolaters; and some in the midland Provinces live without any sign of Religion or Worship among them. A faint Knowledge of the *Mosaical Law*, was once introduc'd into some Parts of *Negroe-land*; and the *Marabouts* of *Cambea* and *Cassan* give still a confus'd Account of the Historical Part of the *Old Testament*. They acknowledge the Existence of One God, and never adore him under any corporeal Representation. They also own our Blessed Saviour as a mighty Prophet, and Worker of Miracles. They generally use Circumcision, as other *Mahometans* do. *Christianity* got once some footing in these Parts of the World, but was wholly overclouded by *Mahometanism*, towards the middle of the Tenth Century.

S E C T. VI.

Concerning Guinea.

| | | | | | | | | | | | | |
|--------|----|-----------|-----|-----------------------------|-----------|---|-----------------|---|----------------------------|---|---|------------------|
| Situat | { | between | d. | m. | } of Lon. | { | Its great | { | Length from W. to E. is a- | | | |

|---------------------------------|---|------------------|---|---|---|------------|---|---|---|----------|----------------------------|-------------------------|--|--|
| Guinea com- pre- hends | { | Guinea propr. | { | Ivory Coast, W. Quaqua Coast Gold Coast, E. | } | Chief Town | { | Timan ————— Tabo ————— Assin ————— S. George de Mina ————— Arda ————— | } | W. to E. | | | | |
| | | | | | | | | | | | [The Coasts of Maleguette] | [The Kingdom of Benin—] | | |
| | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | |

Name.] Guinea [unknown to the Ancients, and properly a part of *Negro-land*; now bounded on the East by part of *Ethiopia Exterior*; on the West by some of the vast *Atlantick Ocean*; on the North by *Negro-land*; and on the South by part of the *Indian Ocean*] is term'd by the *Italians* and *Spaniards*, *Guinea*; by the *French* and *Germans*, *Guinee*; and by the *English*, *Guinea*; so call'd, as most imagine, from the Nature of the Soil, and excessive Heat of the Country, the Name signifying *Hot and Dry*.

Air.] The Air of this Country is extremely hot, and very unwholesome, especially to Strangers, with whom it so disagreeeth, that many live but a short time after their Arrival in it. The opposite Place of the Globe to Guinea, is that part of *New Guinea*, and adjacent Ocean between 170 and 197 Degrees of Longitude, with 5 and 13 Degrees of Southern Latitude.

Soil.] The Soil in many Places is wonderful fertile, producing the choicest of Grains and Fruit. This Country is well stor'd with Elephants, whose Teeth bring great Gain to the Inhabitants, when either sold or barter'd for other Goods of those Merchants who trade with them. Here also are several inexhaustible Mines of Gold; and in many of its Rivers are found some Pearls of great Value, with abundance of Gold Dust. The longest Day in the Northmost Part is about 12 Hours and 3 quarters; the shortest in the Southmost is 11 Hours and 3 quarters; and the Night proportionably.

Com,

Commodities.] The chief *Commodities* of this Country, are Gold, Ivory, Hides, Wax, Amber-gris, Guinea-Pepper, Red Wood, Sugar, Civer, &c.

Rarities.] So impetuous is the Current of *Rio da Volta*, that the Sea, for about a Mile near the Place where the River disgorgeth it self, appears always of a whitish Colour, and is said to have a sweetish Taste for almost ten Fathoms deep. (2.) In several Parts of *Guinea* grows a certain Tree (commonly called *Mignolo*) which having an Incision made in its Body, doth yield an excellent Liquor, of much request among the Natives, proving to them more pleasant, strong and nourishing, than the choicest of Wines. (3.) In several Inland Provinces of *Guinea*, and the Countries adjacent, is sometimes seen that remarkable Creature, term'd *Savage* by the *Portuguese* [and by the Natives, *Quoja Marrow*] but most usually found in *Angola* (and there call'd *Ourang Outang*) from whence one was lately brought to *England*, and view'd by Multitudes of People at *London*. Such Creatures walk frequently upright as Men; at other Times on all Four; and so near is their Resemblance to Human Shape, that many of the *Negroes* either take them for real Men, imagining, that by long Continuance in the Woods they're become *Demi-Brutes*, or look upon them as the spurious Issue of unnatural Commixtures. Some of our modern Travellers would fain perswade the World, that such Creatures are the genuine Off-spring either of the ancient *Satires* or *Pygmies*, so famous among the Poets, and so frequently mention'd by *Pliny* (who spoke much of them by Hearsay). But others, with more shew of Probability, do reckon them specifically the same with the *Apes* of *Borneo*, already mention'd, Page 299. For a full and satisfactory Account of this remarkable Creature, with a nice Examination of the various Conjectures about it, I refer the Reader to a particular Treatise on that Subject, lately published by the learned *Dr. Tyson*.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*, none.

Manners.] The Natives of this Country are great Idolaters, very superstitious, and much given to stealing. In Complexion they're of the blackest sort, and most of 'em walk quite naked without the least Shame. Some of 'em on the Sea-Coasts are given to Trading, and understand Commerce tolerably well: But generally they're a cheating, proud, lazy, and fluttish kind of People. Remarkable is one fundamental Law (or rather an ancient Custom) among some People upon the *Quaqua Coast*, viz. That every Person is oblig'd to be-
take

take himself to the same Trade or Employment which his Fore-fathers have follow'd. Upon the Death of a Husband in the Kingdom of *Benin*, the Widow becomes wholly subject to her own Son (if any) and may be reckon'd among his Number of Slaves; only with this Difference, that she can't be sold without Leave obtain'd from the immediate Prince of the Country where they live. To kill a considerable Number of Slaves at the Funeral of any great Person, was a Custom (almost) universal thro' all Pagan Countries, and particularly here, but much worn out in these latter Ages.

Language.] The chief *Language* in this Country, is that call'd *Sungai*, which is also understood and spoken in several adjacent Countries, particularly *Tombut* and *Melli*. Of the several Tongues in use upon the *Golden Coast*, that of the *Acanistes* is most universal, being current almost all *Guinea* over; except *Anten*, *Acara*, *Ningo*, and *Sinco*, which have each their particular Dialects. The Trading Part of 'em understand and speak *Portuguese*.

Government.] This Country owneth Subjection to several Sovereigns, the chief of whom is ordinarily stil'd, The *Emperor of Guinea*, to whom divers other Kings and Princes are subject. Next to him is the King of *Benin*, who is esteem'd a powerful Prince, having several States subject and tributary unto him.

Arms.]

Religion.] *Paganism* is the *Religion* of this Country, the Profession whereof is attended with many ridiculous Superstitions; and in some Places on the *Golden Coast*, that diabolical Custom of offering up Human Sacrifices, is still in use, but not so current as formerly. The *Pythagorean* Opinion (embrac'd by a great part of the Heathen World) prevails mightily here. Those of the Kingdom of *Benin* do own a Supreme Being, whom they call by the Name of *Orisa*, acknowledging him as the Creator of Heaven and Earth; but think it needless to serve him, because (say they) he being infinitely Good, will be sure not to hurt them. On the very contrary Account, they're very careful in paying their Devotions, and offering Sacrifices to the Devil, or some bad Spirit, who they think is the Cause of all their Calamities. They likewise offer up a yearly Sacrifice to the Sea, reckoning thereby to appease the Waves, and procure calm and peaceable Weather. In several other Parts of this Country, are neither Idol nor Temple, and many of the People seem to entertain but very slender Hopes of a future State; and wholly deny the Resurrection of the Body, except those who are kill'd in the Wars. Which Exception hath been undoubtedly inculcated upon 'em by some of their Princes, and that, 'tis very probable, out of a Political Design.

S E C T. VII.

Concerning Nubia.

| | | | | | | | |
|--------|-------------|----|----|-------------|-------------|---|--|
| Situat | { between } | d. | m. | { of Lon. } | Its great { | { Length from N. E. to S. | |
| | | 31 | 00 | | | | |
| | { between } | 39 | 00 | { of Lat. } | | { W. is about 840 Miles. | |
| | | 14 | 30 | | | | |
| | | 22 | 00 | | | { Breadth from E. to W. is about 570 Miles. | |

Nubia { North — } the River Nuba, chief Towns are, { Samna.
South — } Nubia.

Name.] NUBIA [known formerly under the same Name; and now bounded on the East by part of *Ethiopia Exterior*; on the West by *Zaara* and *Negroe-land*; on the North by *Egypt* and part of *Bildulgerid*; and on the South by *Ethiopia Interior*] is term'd by the *Italians* and *Spaniards*, *Nubia*; by the *French*, *Nubie*; by the *Germans*, *Nubien*; and by the *English*, *Nubia*; so call'd from its ancient Inhabitants, the *Nubi*, or *Nubii*; or (according to others) the *Nobada* and *Nobades*; and finally, some would derive its Name from *Nnabia* (once) the Capital City of the whole Country.

Air.] The *Air* of this Country is every where extremely hot, it being seldom-qualified with Showers of Rain. The opposite Place of the Globe to *Nubia*, is part of *Mare del Zur*, lying between 211 and 219 Degrees of Longitude, with 14° 30' and 22 Degrees of Southern Latitude.

Soil.] The *Soil* of this Country (it lying in the 2d and 3d North Climate) is said to be very fertile in those Parts adjacent to the River *Nile*; but elsewhere 'tis generally very barren, being cumbered with many formidable Mountains of Sand. Here is good store of Elephants, some Sugar Canes, and (as several report) a few Mines of Gold. The longest Day in the Northmost Parts is about 13 Hours and half; the shortest in the Southmost 11 Hours and half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Civer, Sugar, Ivory, Arms, &c.

Itatis

Rarities.] In divers Parts of *Nubia* are still extant the Ruins of many Christian Churches (being reckon'd one Hundred and Fifty in all) with several Pictures of our Blessed Saviour, the Virgin *Mary*, and many Saints. Most observable is that strange subtle Poison produc'd in this Country, one Grain thereof being able to kill ten Men in a quarter of an Hour. It's commonly sold at an hundred Ducats an Ounce, but never to Strangers, unless they promise by Oath not to use it in these Parts of the World. Remarkable is this Country for being the Birth-place of the famous *Nubian Geographer*.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities;* none.

Manners.] The *Nubians* (of a Colour extraordinary Black) are said to be a strong, courageous, and cunning sort of People, much given to War, very laborious, and many of 'em exceeding wealthy, there being establish'd a considerable Traffick between them and the Merchants of *Grand Cairo* in *Egypt*.

Language.] The *Nubians* have a particular Language of their own, which hath some Affinity with the *Arabick* and *Chaldean*, as also some Agreement with the old *Egyptian* Tongue.

Government.] This Country is govern'd by its own independent King, who is said to be a very powerful Prince. One of his Predecessors, call'd *Cyriacus*, upon Information of the *Christians* being oppress'd in *Egypt*, is reported to have rais'd one Hundred Thousand Horse for their Relief.

Arms.]

Religion.] This spacious Country was once *Christian*; but the Ministry failing, the Inhabitants, for want of Pastors, fell off from *Christianity*, and in process of Time became either strict *Mahometans*, or gross *Idolaters*. The Sound of the blessed Gospel did reach the *Nubians*, and was cordially receiv'd by them in the earliest Ages of the Church.

S E C T. VIII.

| | | | | | |

THIS vast complex Body being generally consider'd, as divided into these two Classes, viz. *Upper* and *Lower*; or rather *Ethiopia Interior* and *Exterior*; I shall separately treat of them both. Therefore,

§ 1. *Ethiopia Interior*, or the Land of the *Abyssins*.

Name.] THIS Country [badly known to the Ancients, and now bounded on the North by *Nubia*; on the East, West, and South, by *Ethiopia Exterior*] is term'd by the *Italians* and *Spaniards*, *Abyssinia*; by the *French*, *l'Empire des Abyssins*; by the *Germans*, *Abyssinen*; and, by the *English*, *Ethiopia Interior*, or, *The Land of the Abyssins*. It's call'd *Interior*, because of its Situation, in respect of the other *Ethiopia*, being encompass'd by the same on three sides; and *Abyssinia*, either from the River *Abas*, or its Inhabitants, whom the *Arabians* call *Abassi*, a People once residing in *Arabia Fœlix*. The Name in the *Egyptian* Language signifieth *scattered Nations*.

Air.] This Country being wholly within the *Torrid Zone*, its *Air* is generally very hot, but yet in some Valleys extremely cool and temperate, by reason of the many and prodigious high Mountains, so situated in divers Places, that at certain times of the Year, they intercept the Sun-beams from low Valleys lying between them. The opposite Place of the Globe to the Land of the *Abyssins*, is part of *Mare del Zur*, and *Mare Pacificum*, lying between 212 and 222 Degrees of Longitude, with 9 and 16 Degrees of Southern Latitude.

Soil.] The *Soil* of this Country (it lying in the 1st, 2d, 3d North, and 1st, 2d, 3d South Climate) is very different; for in some Places adjacent to the numerous Branches of the *Nile*, the Ground is fit to produce most sorts of Grain, Fruits, and Herbs, in great plenty; but in those that are mountainous and remote from the *Nile*, nothing is to be seen, but vast Desarts, sandy Mountains, and formidable Rocks. This Land is also said to produce great store of Sugar Canes, Mines of Iron, a great Quantity of Flax, and plenty of Vines; but the Inhabitants either know not, or care not, to make use of these things to any considerable Advantage. The longest Day in the Northmost Parts is about 13 Hours and a half; the shortest in the Southmost 10 Hours and a half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Metals, some Gems, Corn, Cattle, Salt, Flax, Wines, Sugar Canes, &c.

Rarities.] Many are the natural Salt Pits of excellent Rock-Salt in this Country; and in the Confines of *Dancala* and *Tigra*, (two adjacent Kingdoms) is a large Plain of four Days Journey,

one side whereof is entirely crufted over with pure white Salt, which ferves the Inhabitants of the Country, both far and near; fome Hundreds of Camels, Affes, and Mules, being daily employ'd in carrying of it. (2.) In the Mountains of *Gojame*, is a great natural hollow Rock; oppofite to which is another fo fituated, that (according to Travellers Accounts of thofe Parts) a Word only whisper'd on its Top, is heard at a confiderable Distance; and the joint Voices of feveral Perfons fpeaking at once, appear as loud as a great Shout of a numerous Army. (3.) Of the many Christian Temples in this vaft Empire, there are Ten ftately ones hewn out of the firm Rock, which are reported to have been all perfected in Twenty four Years; and each of 'em are faid to be proportionable in all its Parts; with Gates and Windows in a moft regular manner: For the *Ichnography* of one of thofe Temples, *vid. Comment. J. Ludolphi in Hiftoriam fuam Ethiopicam, lib. 2. cap. 5. Page 235.* (4.) In feveral Lakes of this Country, and the River Nile, is frequently feen that amphibious Creature, call'd by the *Ethiopians*, *Bibat*; and *Hippopotamus* by the *Greeks*, becaufe of its having fome Refemblance to a Horfe in feveral Parts of the Body. This is that Creature which goes by the Name of *Bekemoth* in the Book of *Job*, according to the learned *Bochartus* [*De Animalibus, §. 5. par. 2. cap. 15.*] who therein differs extremely from the vulgar (and formerly receiv'd) Opinion in this Matter. (5.) In other Lakes and Rivers, is fometimes taken the *Torpil* *Fifh*, whole Nature is fuch, that if a Perfon only touch it, he's fuddenly feiz'd with an exceffive Cold and Trembling. The Natives are faid to allay the violent Heat of burning Fevers by touching the Patient therewith. (6.) Of the many curious Birds in this Country, the *Pipis* is moft observable, as being the ready Conductor of Hunters to find out their Game; for having difcover'd any Beaft in his lurking Place, he's faid to fly towards the Huntsmen, and calling inceffantly *Fenton Ketre* (which imports, that they fhould follow him) he flies foftly before them, and is fure to conduct them to their defir'd Prey. (7.) Great is the Variety of ftrange Animals to be feen in various Provinces of this vaft Empire; the moft noted of which are thefe Three. *First*, That Creature commonly call'd by the Natives, *Arwehavis* [and by the *Arabs*, *Havifh*, or *Harfbam*]; which hath one long Horn in its Forehead: Whereupon fome conclude, that this is the famous Unicorn of the Ancients. *Secondly*, The *Cameleopard* (fo term'd from having a Head and a Neck like a Camel, and a spotted Body as a Leopard) which is faid to have fo long Legs, that a Man mounted on an ordinary Horfe may eafily pafs under his Belly, without fo much as touching him. *Laftly*, The *Zecora*, which is generally reckon'd the moft comely Creature of all Quadrupedes whatfoever. For a particular Account of thefe, and many more in this Country,

vid.

vid. Ludolphus above-mention'd, lib. 1. cap. 10. And the learned Bochartus his *Hieroicoicon*, par. 1. lib. 3. To these *Rarities* of this Country, I might here add the thrice famous Mountain of *Amara*, which ought indeed to lead the Van, rather than bring up the Rear, if only a tenth part of what hath been related of it were really true. As for the *Sabbatical River* (mention'd both by *Pliny* and *Josephus*, and which some of the modern *Jews* would fain persuade the World, were now to be found in this Country, being formerly said to be in *Judea*) 'tis justly look'd upon as one of the many *Rabbinical Fictions* among them.

[*Archbishopricks, &c.*] Although the *Abyssins* allow of an Ecclesiastical Hierarchy in the *Alexandrian Church* (whose Patriarch is own'd as their Head) yet they don't now admit of any other Order among 'em superior to that of a *Presbyter*, save only their *Abbuna*.

[*Manners.*] The Inhabitants of this Country (being Persons of a tawny Colour) are generally esteemed an ignorant, lazy, and perfidious sort of People; not to be credited, unless they swear by the Life of their Emperor. Of several ridiculous Customs among 'em, one is, That they generally hate a Smith as the Devil. Those in and about *Chaxumo*, are reckon'd the best of the whole Empire; divers of them being accounted very ingenious, besides many others, who betake themselves to a devout and religious sort of Living.

[*Language.*] The *Abyssine Tongue* seems to have some Affinity with the *Hebrew* and *Chaldaick*. It's divided into a great many Dialects (the chief and 'most refin'd of which, is the *Amaris*) and those seem different Languages within the Limits of this Empire. Remarkable is the *Abyssine Tongue* for one Thing truly singular, and peculiar to it, viz. That whereas the Letter *A* is reckon'd the first, by the *Abyssins*, 'tis commonly accounted the Thirteenth, according to *Ludolphus's Grammar*.

[*Government.*] This spacious Country is subject to one Sovereign, styl'd in the *Ethiopian Language*, *Naggasi* (which signifies Lord, or Ruler) otherways, *Neguscb*, *Nagasche*, i. e. *Rex Regum*: As for the *European Title* of *Prefter*, or *Presbyter John*, that's now reckon'd as one of the many vulgar Errors in the World. It's now generally agreed upon, That this *Ethiopian Monarch* fancieth himself to be sprung from *Solomon* and *Maqueda* (or *Nizaule*, according to *Josephus*) Queen of the South. He's said to assume a great many
vain

vain and exorbitant Titles, expressing all those Provinces & Names comprehended within the Circuit of his Dominions; and styling himself, *The Beloved of God, sprung from the Stock of Judah: The Son of David: The Son of Solomon: The Son of the Column of Sion: The Son of the Seed of Jacob: The Son of the Hand of Mary: The Son of Nahu after the Flesh: The Son of St. Peter and Paul after the Spirit, &c.* His Government is altogether Despotical, his Subjects being treated as the worst of Slaves. He is so reverenc'd by the greatest of 'em, that at his very Name they bow their Bodies, and touch the Ground with one of their Fingers. The Empire doth not descend to the eldest Son, but to him whom the Father upon his Death-bed shall be pleas'd to name.

Arms.] The *Abyssine* Emperors, for Ensigns Armorial, bear a *Lion* holding a *Cross*, with the following Motto, *Vicit Leo de Tribu Judæ.*

Religion.] Within the Limits of this spacious Empire, is a great Mixture of People, as *Pagans, Jews, and Mahometans*, of various Nations; but the main Body of the Natives is *Christian*. They hold the written Word of God to be the only Rule of Faith; and that the Canon of Holy Scripture consists of Eighty five Books, whereof Forty six, they say, are in the *Old*, and Thirty nine in the *New Testament*. They're not well acquainted with the *Apostolick Creed*, but in lieu thereof do use the *Nicene*, or rather *Constantinopolitan*. As to the grand Doctrine of the *Incarnation*, they're generally *Eutychians*, being formerly led into that detestable Heresy by *Dioscorus*, Patriarch of *Alexandria*. In the Person of their Emperor they lodge the supreme Authority in all Matters, as well Ecclesiastical as Civil; and do thereupon wholly deny the Supremacy of the Bishop of *Rome*, allowing him indeed to be the first Patriarch, but esteeming it Antichristian in him, to pretend to a Jurisdiction over the whole Church of Christ. As they disown the Pope's Supremacy, so also do they disclaim most Points of the Popish Doctrine; particularly, those of *Transubstantiation, Purgatory, Service in an unknown Tongue, Auricular Confession, Images in Churches, Celebacy of the Clergy, Extreme Unction, &c.* They make use of different Forms in Baptism, and keep both *Saturday* and *Sunday* as Sabbath. They punctually observe Circumcision, and abstain from eating of Swines Flesh, not out of any regard to the *Mosaick Law*, but purely as an ancient Custom of their Country. They're much inclin'd to giving of Alms, and visiting the Sick. Their Divine Service doth wholly consist in reading of the Holy Scriptures, Administration of the Eucharist, and hearing some Homilies of the Fathers. They repair
to

to Church betimes, and never enter with their Shoes on, nor sit down, unless upon the bare Ground. They carefully observe the appointed Hours for publick Prayer, and perform that Duty with great Devotion. In a Word, many of the *Abyssins* express in several respects, a deep Sense of Religion. For a particular Account of this People, both as to their Religion and other Remarkables, *vide* *J. Ludolphus's Ethiopick History*. The *Roman* Missionaries did so prevail about Seventy Years ago, that the Popish Religion was like to have got sure footing in this Empire; for they had once gain'd the Emperor and Court, and obtain'd a Proclamation in their Favour, enjoying the whole Body of the People to embrace the Doctrine of the *Roman* Church. But the *Abyssins* were so loth to part with the Religion of their Forefathers, that the Emperor's Endeavour to propagate the *Roman* Faith, occasion'd many dreadful Insurrections in his Empire; which could not be quell'd without shedding a Sea of Blood. Finding therefore his Endeavours to be in vain, and dreading the Consequence of making any new Attempt, he wholly gave over the Design, and not only return'd to his former Belief himself, but also gave leave to all his Subjects to do the same. And that he might regain the [almost lost] Affection of his People, he forthwith banished out of his Dominions all *Roman* Missionaries whatsoever, together with *Alphonso Mendez*, a Jesuit, who having been consecrated Patriarch of *Ethiopia* at *Lisbon*, and approved by the Pope, had been honourably received by the *Abyssine* Emperor under that Character, and resided at Court in a peaceable Discharge of his Office for several Years. As for the Plantation of *Christianity* in this Country, 'tis a constant Tradition among the Inhabitants, that the *Eunuch* baptized by *Philip* the Deacon, was Steward to the Empress of *Ethiopia*; and that upon his Return, he converted the Court and whole Empire to the Christian Faith. But (following the Opinion of others) this Country was destitute of the blessed Gospel till the Fourth Century, when first instructed therein by *Frumentius* (the Son of a *Tyrian* Merchant) who was consecrated Bishop by *St. Athanasius*, and is commonly reckon'd the first *Abbuna* of this mighty Empire.

§ 2. Ethiopia Exterior.

Name.] THIS Country (or rather a complex Body of several Countries, and those unknown to the Ancients) is bounded on the North by *Abyssinia*; on the East, West, and South, by the *Ethiopick* Ocean. Which Country, together with the *Abyssine* Empire above-mention'd, is term'd by the *Italians* and *Spaniards*, *Ethiopia*; by the *French*, *Ethiopie*; by the *Germans*, *Ethiopien*; and, by

by the *English*, *Ethiopia*; so call'd from *αἴθω*, *uro*; and *ἄλ*, *vultus*; upon the account of its excessive Heat, the greatest Part thereof being in the *Torrid Zone*. This *Ethiopia* is styl'd *Exterior*, because of its Situation, in respect of the other.

Air.] This vast Body, comprehending several Kingdoms, Empires, and Sovereignities, and those mightily extended from *South* to *North*, can't reasonably be suppos'd to enjoy the same Nature of *Air* in all its Parts. In *Biafara* and *Congo*, 'tis extremely hot, and would be intolerable to the Inhabitants, were it not qualified in the first of these Kingdoms, by daily Showers of Rain, and in the other by violent Winds, which frequently blow from the Western Ocean. In *Monomotapa* and *Monocemungi*, as also the Coasts of *Cafres*, the *Air* is much more temperate; in *Zanguebar*, very unwholesome; and in *Ajan* and *Ahex*, extremely hot. The opposite Place of the Globe to *Ethiopia Exterior*, is that part of *Mare del Zur*, lying between 190 and 230 Degrees of Longitude; with 10 Degrees South, and 25 Degrees North Latitude.

Soil.] The various Divisions of this great Body being situated in different Climates (particularly the first, second, third Northern; and the first, second, third Southern) the *Soil* must of necessity be very different. *Biafara* is said to be less fertile than *Congo*: The Empires of *Monomotapa* and *Monocemungi*, do produce abundance of Grain, and are generally esteem'd very fit for Pasturage. The other Divisions on the East and South East of the *Abyssines*, are for the most part very barren in all sorts of Grain, yet productive enough of some Sugar Canes, several kinds of Fruits and Spices; are also furnish'd with some considerable Gold and Silver Mines, and every where abounding with Elephants and Lions. So rich were these Mines found by the *Portuguese*, in *Zanguebar*, and several Parts of the *Cafres*, that the Country about *Sofala*, hath been look'd upon by some modern Geographers, as the much controverted Land of *Ophir*. The longest Day in the Northmost Parts is 13 Hours and an half; the shortest in the Southmost 9 Hours and three quarters; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Silver, Amber-gris, some Pearls and Musk, Rice, Millet, Catle, Limons, Citrons, Ivory and Oil, &c.

Rarities.] In the Kingdom of *Angola* is found the *Quoja* *Marrow*, that remarkable Creature, of whom already in *Guinea*, P. 320. (2.) Most sorts of Creatures in *Congo* are to be seen also in *Angola*, particularly, a Serpent (call'd *Minia* by the Inhabitants of *Quoja*, and

and *Embamma* by the *Angoloi*.) which is reported to be of such a prodigious bigness, that he's said to swallow a young Deer at one Morfel. (3.) In divers Lakes of *Angola* (particularly thole of *Quihaite* and *Angolone*) are frequently seen some Water-Monsters, term'd *Ambisanguo* and *Pessigoni*, by the Natives; but *Europeans* give them the Title of *Syrenes*, because (when taken) they fetch heavy Sighs, and cry with a dolorous Tone, resembling very much the mournful, yet charming Voice of a Woman. One Hand of that remarkable Creature I have lately seen in the Repository of *Natural Rarities* at *Leyden*: And two Hands in the *Museum Regium* at *Copenhagen*. (4.) In the Island *Levanda* is a remarkable Tree, call'd by the Inhabitants *Eufada*, and *Arbor de Raiz* (i. e. *Arbor Radicum*) by the *Portugueze*. It derives this Name from the Nature of its Branches, which spring forth on all sides from the Trunk (where 'tis generally three Fathoms in Diameter) and many of 'em bowing so low as to touch the Ground, take Root, and spring forth anew, till by their Weight they bow down again, and take Root the second time, and so on, till they cover a thousand Paces in Circuit, and able to lodge under its Branches three thousand armed Men, who may find Defence not only from Heat, but also Rain; so thick and numerous are those Filaments, and so well lin'd with Leaves. (5.) In several Parts upon, and South of the River *Coanza*, are considerable Mines of Rock-Salt. For these, and several other Remarkables of this Country, *vide Dapper of Africa*.

[*Archbishopricks, &c.*] *Archbishopricks*, *Bishopricks*, *Universities*, none.

[*Manners.*] The various Inhabitants of these many and vastly extended Countries, are generally a dull, savage, and swarthy kind of People, among whom a great many remarkable Customs prevail. To instance only in a few: It's reported of the Emperor of *Monomotapa*, that whene'er he drinks in publick, the whole Court doth jointly put up their Prayers in his Behalf, and that with a very loud Voice, which being heard in the Neighbourhood, all Persons there living are bound to do the same; as likewise others hearing them, and so on; whereby the whole City or Country adjacent, is always sensible when the Emperor takes his Glass. In the Kingdom of *Loango* are many Cannibals, and in several Places 'tis as usual to sell humane Flesh publickly in Shambles, as other Nations do commonly Beef and Mutton. In the same Kingdom 'tis establish'd by an ancient Custom, That whene'er a Father deceaseth, his Goods belong not to the Children, but his own Brothers or Sisters, who are bound to take care of such of the little ones, as they think are not able to care for themselves. To add no more, We read of another Custom yet more uncouth, among a certain People

ple inhabiting the *Cafres*, which is, That whene'er a Father deceaseth, the Children, both old and young, are oblig'd to lose the little Finger of their Left-hand, and to bury it with him. For deferring the Performance of that painful Duty, they're commonly very tender of their Parent's Health, and take all Care imaginable to prolong his Life; which was probably the original Cause of so strange a Practice. But of all the Inhabitants of these various Countries, there's none more observable for their manner of living, than a certain People near unto, and upon the Cape, and commonly call'd by the Name of *Hottantots*. They're so term'd from a frequent Repetition of that or such like Word; and may be reckon'd the most Nasty and Brutish of all reasonable Creatures, having nothing, save the Shape of Man, that can lay claim to that noble Character. Their Bodies are usually besmeared with common Grease, or some worse stinking Stuff, which occasions a very loathsome Smell. Their ordinary Habit is a Sheep's Skin, just as 'tis pull'd off from the Carcass: and they use (as Ornaments) the Guts, *cum puris naturalibus*, wrapt about their Legs and Arms two or three Inches deep, on which they frequently feed when scarce of fresh Provisions. Notwithstanding the unparalell'd Nastiness of this People, yet some Travellers talk of a certain inland Canibal Nation (term'd *Cobonas*) who make frequent Incursions into their neighbouring Countries, and spare none they catch, no, not the swinish *Hottantots* themselves, who ('twould seem) should make but a very unfavoury Repast.

[Language.] There is a wonderful Variety of Languages in those various and vastly extended Countries, which go under the Name of *Ethiopia Exterior*. The Inhabitants of *Congo* and *Angola* have each of 'em a peculiar Language of their own. In the Eastern Divisions, particularly *Ajan* and *Abex*, the *Arabian*, with Variation of Dialect, doth chiefly prevail; but the Language in use among those of the *Cafres*, especially the *Hottantots*, doth seem to be only a confus'd and inarticulate Noise and Bellowing.

[Government.] The various Divisions of this great Body, are subjected to various Sovereigns; particularly the Kingdoms of *Biafara* and *Congo*, are rul'd by their own Kings, to whom several Princes are subject. The Empires of *Monomotapa* and *Monoemungi* are govern'd by their respective Emperors (who are reckon'd powerful Princes) and to them several Kings are tributary. The People inhabiting the South and South-East Coasts of this great Body (except those of the *Cafres*, who know little or nothing of Government) are subject to several Princes, as *Zanguebar* is govern'd by some petty Kings of its own, and many Places on the Sea-Coasts are tributary to the *Portuguese*. The Coast of *Abex* doth principally belong to the *Turk*.

Turk. And lastly, *Ajan* is partly under the *Turk*, and partly its own Kings.

[Arms.]

[Religion.] The numerous Inhabitants of these many Countries, are generally gross Idolaters, excepting those of *Zanguebar*, *Ajan*, and *Abex*, who incline to *Mahometanism*; and some on the Coast of the *Cafres* (particularly the *Hottantots* above-mentioned) who live without any sign of Religion, being destitute both of Priest and Temple; and never shew any Token of Devotion among 'em, except we reckon their Dancing at the Full and New Moon for such. In the Kingdom of *Loango*, the Generality of People entertain certain faint *Idea* of God (whom they term *Sambian Pongo*) but being sunk into the blackest Idolatry, they admit of many ridiculous Superstitions in their way of Worship. However, the Inhabitants of *Malemba*, in the same Kingdom, do vastly surpass their Neighbours, and by some wonderful Marks of Natural Religion, do publicly baffle their gross Stupidity; for of them we are credibly informed, that they set apart every Fifth Day for publick Worship; at which Time one of reputed Integrity, makes a publick Oration, deterring them from the Commission of Murther, Stealth, Impurity, or such like; and to enforce his Exhortation, he backs the same with the powerful Topicks of Rewards and Punishments in a future State; affrighting their Conscience with a miserable State in the Society of *Benimbe* (*i. e.* the Devil) on one Hand; and solacing their Minds on the other, with the Hopes of enjoying *Zammampoango*, by which they mean God, or the Maker of this visible World. They likewise use Circumcision, admitting their Children into their Religion by that Ceremony, which is perform'd by one of themselves set apart for that Office.

S E C T.

S E C T. IX.

Concerning the African Islands.

| | | |
|----------------------------|---------------------|---|
| The African Islands, being | More remarkable, as | <i>Madagascar.</i> <i>Isles of Cape Verde.</i> <i>The Canary Islands.</i> <i>The Madera.</i> |
| | Less remarkable, as | <i>Zocotera.</i> <i>Isles of Comore.</i> <i>St. Thomas.</i> <i>The Princess's Island.</i> <i>Anobon.</i> <i>St. Helena.</i> <i>The Isle of Ascension.</i> |

Madagascar [containing many Provinces, but very uncertain] its chief Town is *Fanshere*, upon the S. E. Part of the Island.

| | | | |
|---------------------------|--|------------------------------|--|
| Islands of Cape Verde are | <i>St. Anthony</i> ————— <i>St. Vincent</i> ————— <i>St. Lucia</i> ————— <i>St. Nicholas</i> ————— <i>Insula de Sal</i> ————— <i>Bonavista</i> ————— <i>Mago</i> ————— <i>Fago</i> ————— <i>Insula del Fuego</i> ————— <i>Brava</i> ————— | } W. to E. } N.E. to S.W. | } Chief Town of all is <i>St. Fago</i> , in the <i>Isle St. Fago</i> |
| | | | |

| | | |
|------------------------|---|--|
| The Canary Islands are | <i>Lancerota</i> ————— <i>Forte ventura</i> ————— <i>Canavia</i> ————— <i>Teneriffe</i> ————— <i>Gomera</i> ————— <i>Ferro</i> ————— <i>Palma</i> ————— | } From E. to W. Chief Town of all is <i>Canavia</i> , in the <i>Island Canavia</i> . |
| | | |

Madera, lying in 32 Deg. 30 Min. North Latitude. Its Chief Town is *Tunchal* or *Tonzal*.

The

THE most remarkable of the *African Islands*, being here reduc'd to Four Classes, viz. *Madagascar*, *Cape Verde Islands*, the *Cana-ries*, and *Madera*, we shall particularly consider them, and then take a general View of all the rest. Therefore,

§ 1. M A D A G A S C A R.

Name.] THIS Island (unknown to the Ancients) is term'd by the *Spaniards*, *Isla de San Lorenzo*; by the *French*, *St. Laurence*, otherwise *Dauphine*; by the *Italians*, *Germans*, and *English*, *Madagascar*; which Name was us'd by the Natives, and still retain'd. As to the Title of *St. Laurence*, the same was given to this Island by the *Portuguese*, it being on *St. Laurence's Day* that they made their first Discovery of it.

Air.] The *Air* of this Island is generally very temperate, and by most affirm'd to be exceeding wholesome to breathe in. The opposite Place of the Globe to *Madagascar*, is the South Part of *California*.

Soil.] The *Soil* of this Island is extraordinary fruitful in many Parts thereof, affording all Things necessary for the Life of Man in great Plenty. The Length of the Days and Nights in *Madagascar*, is the same as in *Monoenungi*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island, are Rice, Hides, Wax, Gums, Crystal, Steel, Copper, Ebony, and Wood of all sorts.

Rarities.] Towards the Eastern Part of this Island is a pleasant and fertile Valley, call'd *Amboufe*, which is stock'd with several rich Mines of Iron and Steel, and yields great store of the Oil of *Sejanum*. (2.) Nigh to the aforesaid Valley is an excellent Medicinal Well of hot Water, which proves a ready Cure for cold Distempers in the Limbs. (3.) In the same Neighbourhood is a high Mountain, on whose Top is a remarkable Spring of very Salt Water, though upwards of Thirty Leagues from the Sea. (4.) In this Island (especially the Southern Provinces) are most sorts of Mineral Waters, very different both in Colour, Taste, and Qualities; and some Places afford large Pits of *Bitumen*. (5.) In this Island is also a River, whose Gravel is so exceeding hot, that there's

there's no treading upon it, and yet the Water of that River is extremely cold.

Manners.] The Natives of *Madagascar* are reported to be a lecherous, ignorant, inhospitable, and treacherous sort of People, they hate Polygamy, and still punish Murder by Death. Divers singular Customs prevail in several Parts of this Island, particularly these two: *First*, If a Woman be safely delivered of a live Child, and afterwards die in Childbed, the living Child is bury'd with the dead Mother; being better [say they] that the Child should die than live, having no Mother to look after it. The other is, The exposing of their Children to wild Beasts, if brought forth upon an unlucky Day (as they term it) or during some unfortunate Aspects of the Planets, as their *Ombiaffes*, or Priests, pretend to tell them. So numerous are those Days they reckon *unlucky*, that almost one half of the Year is accounted such; and hence it is that this Island is so thinly stock'd with Inhabitants.

Archbishopsricks, &c.] *Archbishopsricks, Bishopsricks, Universities*, none.

Language.] The *Language* here commonly us'd, is as barbarous as they who speak it. Almost every Province hath its peculiar Dialect, yet not so different but that they understand one another; so that the Natives of this Island may be said to have but one Tongue in common among 'em all.

Government.] This Island is subject to many particular Lords, commonly called *Robandrians*, who are continually at War among themselves about their Cattle and Slaves, yet unanimous enough to defend themselves against the Invasion of Strangers. Some formerly reckon'd Six Sovereign Princes, or Kings, in *Madagascar*; others Four; but now every Province has its particular Governor, having under him various *Filoubei* (*i. e.* Governors of Villages and Castles) who stand accountable to him in every thing.

Arms.] *Arms*, none.

Religion.] The Inhabitants of this Island are either *Pagans* or *Mahometans*, except those People living upon the Eastern Coasts, between Fifteen and Eighteen Degrees and an half of South Latitude, term'd *Zaffehibrain* [*i. e.* the Race of *Abraham*]; and others on the adjacent Island, call'd *Nossi Hibrain* [*i. e.* the Isle of *Abraham*] who differ extremely from their Neighbours in religious Matters. For many of 'em are said to observe the *Jewish Sabbath*,
and

and give not only a faint Account of the Creation of the World, and Fall of Man; but also a few broken Passages of the Sacred History concerning *Noah* and *Abraham*, *Moses* and *David*. Whence divers Travellers conjecture, that they're originally descended of some *Jews*, who might have been driven upon that part of the Island, none knows how, nor when.

§ 2. Cape Verde Islands.

Name.] THESE Islands (the *Hesperides* of the Ancients) are termed by the *Italians*, *Isola di Capo Verde*; by the *Spaniards*, *Islas de Cabo Verde*; by the *French*, *Les Isles du Cape Verde*; by the *Germans*, *Cape Verd Insuln*; and, by the *English*, *Cape Verde Islands*; so call'd from the opposite Cape in *Negroe Land*, which beareth that Name, and that because it is, or appeareth always of a Green Colour.

Air.] The Air of these Islands is generally reckon'd very unwholesome, especially in *St. Fago*, the biggest and chief of them all. The opposite Place of the Globe to *Cape Verde Islands*, is part of the *West American Ocean*, lying between 153 and 160 Degrees of Longitude, with 12 and 18 Degrees of Southern Latitude.

Soil.] The Soil of these various Islands, is not the same in all, some of 'em being very fertile, and others extremely barren. The Length of the Days and Nights in them, is the same as in the Land of the *Negroes*, they both lying under the same Parallels of Latitude.

Commodities.] From these Islands the *Portuguese* transport incredible Quantities of Salt, as also great Numbers of Goats-skins (of which they make excellent Cordevants): And likewise from thence may be brought most sorts of pleasant Fruits, particularly Limons, Citrons, Oranges, Coccoes, Figs, and Melons.

Rarities.] The most remarkable of these Islands, is the *Isle de Fuego*, or *Fogo*, so call'd, as being a noted *Volcano*, continually sending up sulphurous Exhalations, and sometimes the Flame breaks out (*Ætna* or *Vesuvius* like) in such a terrible manner, and vomits forth such a Number of Pumice-stones, that it annoys all the adjacent Parts. In *Insula de Sel*, are many natural Salt-pits, which yield a prodigious Quantity of Salt; from whence the Island derives its Name.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities;* none.

Manners.] The Inhabitants of these Islands being *Portuguese*, are much the same with those on the Continent.

Language.] The Inhabitants of these Islands being *Portuguese* (as aforesaid) do still retain their own *Language*.

Government.] These Islands at their first Discovery being destitute of Inhabitants, were peopled by their Discoverers the *Portuguese*, and at present belong to the Crown of *Portugal*, and are rul'd by a particular Governor, who assumeth the Title of *Vice-Roy*, and commonly resideth in the Island of *St. Jago*.

Arms.]

Religion.] The *Portuguese* here residing, are of the same *Religion* with those in *Portugal*.

§ 3. The Canary Islands.

Name.] THESE Islands (the *Insule Fortunatæ* of the Ancients) are term'd by the *Italians*, *Isola di Canaria*; by the *Spaniards*, *Islas Canarias*; by the *French*, *Les Isles Canaries*; by the *Germans*, *Canarische Inseln*; and by the *English*, *The Canary Islands*; so call'd from the chief Island *Canaria*, which deriv'd its Name from *Can* [i. e. *Dog* in *Spanish*] because a vast Number of Dogs were found thereon by the *Spaniards* at their first Discovery of it.

Air.] The *Air* of these Islands (inclining to Heat) is generally esteem'd extraordinary wholesome. The opposite Place of the Globe to the *Canary Islands*, is that part of the vast *Occidental Ocean*, lying between 162 and 168 Degrees of Longitude, with 27 and 30 Degrees of South Latitude.

Soil.] The *Soil* of most of 'em is wonderfully fertile. In the Island *Canaria* they have commonly two Harvests in the Year. *Teneriffe* is noted not only for its high Pike (of which afterwards) but also many Laurel and Dragon-Trees, where the sweet Singing-birds do daily warble their pleasant Notes. These Islands (besides their great plenty of Fruits and Grain) are famous for producing the best Wine in the World. The Length of the Days and Nights in them, is the same as
in

in *Bildulgerid* on the Continent, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of these Islands, are Wine, Honey, Wax, Sugar, Oad, Plantons, Dragons-Blood, Canary-Birds, &c.

Rarities.] Among the *Rarities* of these Islands, is reckon'd a certain Tree in the middle of *Fero* (term'd *Garoe* by the Natives; and by the *Spaniards*, *Santo*) whose Top is said to be encompass'd every Night with a thick misty Cloud, which condensing into Water, doth drop from the Leaves the next Morning, and that in such Quantity, as sufficiently serves all the Inhabitants, the Island it self being destitute of Springs. As for the Isle of *Teneriffe*, 'tis famous all the World over, for its prodigious Pike, which (appearing to the Eye as a large Mass of many Rocks promiscuously heap'd up, in form of a rugged Pyramid) is thought by some curious Naturalists, to have been rais'd on a sudden by a mighty Conflagration of much subterraneous, sulphurous Matter, whose forcible Eruption the very Rocks themselves could not withstand, but were thereby pil'd up in the manner they now appear. For strengthening of this Conjecture, they alledge the great Quantity of Sulphur with which this Island doth still abound (especially nigh the Foot of the Pike) and the Colour of the Rocks themselves, many of 'em seeming to Spectators, as if long burnt in a Fire.

Archbishopricks, &c.] In these Islands is only one *Bisshoprick*, viz. that of *Canaria*.

Manners.] The Inhabitants of these Islands being mostly *Spaniards*, are much the same in *Manners* with those on the Continent. The few Natives yet remaining (term'd *Guanchas*) do mostly reside in Mountains, Dens, and Caves.

Language.] The *Spaniards* here residing do still retain their own *Language*.

Government.] These Islands belong to the King of *Spain*, who for the better ordering of Affairs in them, doth always keep a Governor in *Canaria*, the chief Town of the chief Island. His Power extendeth over all these Islands in Affairs both Civil and Ecclesiastical.

Religion.] The Inhabitants of these Islands (as aforesaid) being mostly *Spaniards*, are of the same *Religion* with those in *Spain*.

§ 4. *Madera* or *Madera's*.

Name.] THIS Island (not observable of old) is term'd by the *Italians* and *Spaniards*, *Madera*; by the *French*, *Madre*; by the *Germans*, *Maderen*; and, by the *English*, *Madera* or *Madera's*; so call'd by the *Portuguese* at their first Discovery of it, Anno 1429. because wholly overgrown with Trees; the Word *Madera* signifying a *Wood*.

Air.] The *Air* of *Maderas* being very temperate, considering the Latitude of the Island, is generally esteem'd very healthful to breathe in. That Place of the Globe opposite to *Madera*, is part of the vast *Occidental Ocean*, between 163 and 164 Degrees of Longitude, with 32 and 33 Degrees of Southern Latitude.

Soil.] The *Soil* of this Island is very fertile, producing in great plenty most sorts of excellent Fruits, and a kind of Wine that's much esteem'd of, being fit to keep for a long time both by Sea and Land. The Length of the Days and Nights in this Island, is much the same as in *Zaara* on the main Continent, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island are excellent Wine, and most sorts of desirable Fruits, as also Honey and Wax, &c.

Rarities.] What mostly deserves the Epithet of *Rare* on this Island, is that excellent Quality, either of its *Air* or *Soil*, or both, which, like our Neighbouring Island [*Ireland*] proves mortal to all venomous Animals; none such being found here, or able to live, if brought hither from abroad. In the side of a Hill, nigh *Fonzal*, is a remarkable Fountain, whose Waters do sometimes issue forth in such abundance, that the adjacent Parts of the Island are then subject to a terrible Inundation.

Archbishopricks, &c.] *Archbishopricks*, none. One *Bishoprick*, viz. that of *Fonzal* or *Fouchale*, which is Saffragan to *Lisbon*.

Manners.] The Inhabitants of this Island being *Portuguese*, are much the same in *Manners* with those on the Continent, but more vitiously inclin'd (if that can be well suppos'd) being mighty Proficients in their common Crimes of Theft and Murder.

Language.] The *Portuguese* here residing do still retain their own *Language*.

Government.] This Island belonging to the Crown of *Portugal*, is rul'd by a particular Deputy, whose Place of Residence is commonly at *Fonzal*.

Religion.] The Inhabitants of this Island being *Portuguese*, as aforesaid, are of the same *Religion* with that publickly profess'd in the Kingdom of *Portugal*.

Having thus consider'd, in particular, the most remarkable of the *African Islands*; proceed we now (in pursuance of our propos'd Method) to take a general View of all the rest, or those that are *less remarkable*. Now such Islands (to be very brief) being strangely scatter'd up and down the *Æthiopic* and *Atlantick* Oceans, do mightily differ in their *Air* and *Soil*, according to the various *Climates* they lie in; and in none of 'em is any remarkable Place, except only the Isle of *Zocotora*; in which is a Town of the same Name. As for the chief Observables relating to their Inhabitants [particularly their *Manners*, *Language*, and *Religion*] we may sufficiently learn the same, only by naming those several States or Sovereigns on the Continent, to whom these Islands belong (they being generally peopled and possess'd by some of them). Their present Possessors then, in short, are as followeth:

| | | | |
|-------------------------------|----------------------------------|-----------------|-------------------------|
| Less remarkable Islands being | Zocotora | is possess'd by | the <i>Arabians</i> . |
| | Comore | | the <i>Natives</i> . |
| | St. Thomas | | the <i>Portuguese</i> . |
| | The <i>Princes</i> Island | | the <i>Portuguese</i> . |
| | Annohon | | the <i>Portuguese</i> . |
| | St. Helena | | the <i>English</i> . |
| | Ascension Island, not inhabited. | | |

And so much for *Africa* and the *African Islands*. Now followeth,

CHAP. IV.

OF AMERICA.

| | | | | |
|-------------------------|---------------------|---------------------|--------------|-------------------|
| Divided (page 44.) into | North comprehending | Mexico or N. Spain | Capital City | Mexico. |
| | | N. Mex. or Granada | | S. Fee. |
| | | Florida ———— | | Coca. |
| | | Terra Canadensis — | | Boston. |
| | | Terra Arctica ——— | | ————— |
| | South comprehending | Terra Firma ——— | | S. Fee de Bagota. |
| | | Peru ———— | | Lima. . |
| | | Land of the Amazons | | ————— |
| | | Brasil ———— | | S. Salvador. |
| | | Chyli ———— | | S. Jago. |
| | | Paraguay ——— | | Assumption. |
| | | Terra Magellanica | | ————— |
| | | Terra Antarctica — | | ————— |

To these add the *American Islands*.

Of all which in Order. Therefore,

| | Honduras | | New Valladolia | | |
| | Vera Pax | | Idem | | |
| | Chiapa | | Cividad Real | | |

Name.] THIS Country (discover'd at first by *John Grijaalve*, but more exactly view'd, and at last conquer'd by the valiant *Ferdinando Cortez*, Anno 1518.) is bounded on the East by the Gulf of *Mexico*; on the West by *Mare del Zur*; on the North by *Nova Granada*; and on the South by *Terra-firma*. It is term'd by the *Italians*, *Spagna Novella*; by the *Spaniards*, *Nueva Espana*; by the *French*, *Nouvelle Espagne*; by the *Germans*, *Neu Spanien*; and by the *English*, *Mexico*, or *New Spain*; call'd *Mexico*, from the chief City thereof; and *New Spain*, to distinguish it from the Kingdom of *Spain* in *Europe*.

Air.] Notwithstanding this Country (for the most part) lieth within the *Torrid Zone*, yet the *Air* is very temperate, and generally reckon'd extraordinary wholesome to breathe in, being qualify'd with refreshing Showers in the hottest Month, and cold Breezes from the Sea all the Year. The opposite Place of the Globe to *New Spain*, is part of the *East India Ocean*, lying between 75 and 115 Degrees of Longitude, with 13 and 32 Degrees of South Latitude.

Soil.] This Country (lying in the 3d and 4th North Climate) is blest with a very fertile *Soil*, producing many sorts of Grain, as *Wheat*, *Barley*, *Pulse*, and *Maize*; several kinds of Fruits, as *Pomegranates*, *Oranges*, *Limons*, *Citrons*, *Malicats*, *Cherries*, *Pears*, *Apples*, *Figs*, *Cocoa Nuts*; and great plenty of Herbs, Plants, and Roots. Here also are some rich Mines of Gold and Silver; and vast and spacious Plains, affording the best of Pasturage. The longest Day in the Northmost part of this Country, is about 13 Hours and three quarters; the shortest in the Southmost 12 and an half, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are *Wooll*, *Cotton*, *Sugar*, *Silk*, *Cocheneel*, *Feathers*, *Honey*, *Balm*, *Amber*, *Salt*, *Tallow*, *Hides*, *Tobacco*, *Ginger*, and divers medicinal Drugs.

Rarities.] About three Leagues from *Guayaca* is the Stump of a hollow Tree (call'd *Tlaco-Chavoya*) which was of a prodigious Bigness when intire, being then reckon'd 16 Fathoms in compass near the Root, and somewhat higher 12. Before 'twas Thunder-struck (which occasion'd the Hollowness) no fewer than a thousand Men, 'tis said, could conveniently shelter themselves from Rain, under its wide extended Boughs. (2.) In several Parts of this Country, grows a certain Tree (call'd *Magney*) which may be said to yield Water, Oil, Wine, Honey, and Vinegar. For the Body of the Tree being big and hollow, contains a good Quantity of Liquor, as limpid as the best Fountain-Water, and the Surface thereof is cover'd with a pure Oily Substance. This Liquor being a little boil'd, tastes like a good palatable

latable Wine; if much boil'd it's extremely sweet, and if long kept [unboil'd] no Vinegar is sower. (3.) In the Audience of *Guatalama* are several remarkable *Volcano's*, particularly that near *Rea-Lejo*, which towers up like a Sugar-loaf to a great height, and always smokes. As also the burning Mountain of *Leon*, West of the Lake *Nicaragua*, which frequently evacuates Fire as well as Smoke. (4.) Nigh to *Guatulco*, on the Western Coast, is a great hollow Rock (call'd by the *Spaniard*, *Buffadore*) which having a large Hole in its top, makes a hideous Noise at every Surge of the Sea, and spouts up Water (as a Whale) to a prodigious Height. In some Parts of this Country are several Springs of Water, so impregnated with certain Minerals, the Current issuing from them is of sodarkish a Colour, that it resembles a Stream of Ink. (5.) Remarkable is the Lake of *Mexico* for several Particulars: as, *First*, Its having two sorts of Water, viz. *Fresh* and *Salt*. *Secondly*, That the *Fresh* is usually Calm, and aboundeth with Fishes; whereas the *Salt* is, for the most part, boisterous, and breedeth none. *Thirdly*, In the middle of this Lake is a pleasant Rock, out of which doth issue a considerable Stream of hot Water, much esteem'd of for several Distempers. *Lastly*, Upon this Lake are several delightful artificial Gardens, well stock'd with variety of Herbs and Flowers, and moveable from one Place to another, being supported by large Floats of Timber. *Vid. J. Acosta's Natural and Moral History of the Indies.*

[*Archbishopricks.*] Here is one *Spanish Archbishoprick*, viz. that of *Mexico*.

[*Bishopricks.*] *Spanish Bishopricks* erected here, are these of,

| | | |

| <i>Guadalajara,</i> | <i>Puebko de los Angelo,</i> | |

[*Universities.*]

[*Manners.*] The Natives of this Country, are now esteem'd a People very civil and docile, and extraordinary faithful to those they love. Some of 'em are wonderfully ingenious, especially in Painting, and making most lively Pictures with various colour'd Feathers of certain little Birds call'd *Cireons*. Others are said to play incomparably well upon divers Musical Instruments. In short, the Generality of this People is so civiliz'd, that they live after the manner of the *Spaniards*, save a few, commonly residing in the Mountains, who continue as wild and savage as ever. The *Spaniards* here residing, are much the same with those in *Spain*.

[*Language.*]

Language.] The prevailing *Language* in this Country, is the *Spanish*, it being not only in use among the *Spaniards*, but also the *Natives* themselves, who generally understand and speak the same. The various *Dialects* of their ancient *Targon* do daily decrease, and in a few Generations will be extinguish'd.

Government.] This large and pleasant Country was of old subject unto, and rul'd by its own Sovereign Princes, call'd *Kings of Mexico*, and had continued (according to probable Conjectures) a mighty and flourishing Monarchy for several Ages, before 'twas invaded by *Spaniards*: But being fully conquer'd by them with only a handful of Men, Anno 1521. under the valiant *Ferdinando Cortez*, it hath ever since remain'd subject to the Crown of *Spain*, being govern'd by a *Vice-Roy* commonly residing at *Mexico*, and to him is intrusted the Oversight of the Governors of the various Provinces belonging to his Catholick Majesty in *North America*.

Arms.]

Religion.] The Inhabitants of this Country are partly *Christian*, partly *Pagan*, and, as 'twere, a Mixture of the two. The *Spaniards* are rigid *Papists*, according to the strict Profession of *Popery* in their own Country. Of the *Natives*, many do still retain their Heathenish Worship, and indeed Multitudes are converted to Christianity, according to the Doctrine of the Church of *Rome*; but (by our latest Accounts) they're hardly persuaded as yet of the Truth of those Doctrines taught them.

S E C T. II.

Concerning *New Mexico* or *Nova Granada*.

This Country is of no certain Extent nor Division ; its chief Town is *St. Fee*, or *New Mexico*, upon the River *Nort*.

Name.] This Country (discover'd by the *Spaniards*, Anno 1540. and bounded on the East by *Florida* ; on the West by part of *California* ; on the North by *Terra Arctica* ; and on the South by *Mexico* or *New Spain*) is term'd by the *Italians*, *Granada Nouella* ; by the *Spaniards*, *Nueva Granada* ; by the *French*, *Novelle Granada* ; by the *Germans*, *Neu Granada* ; and by the *English*, *New Mexico* or *Nova Granada*. It was call'd *Mexico*, after the Empire of that Name, describ'd in the foregoing Section ; and the Epithet *Nueva* (or *New*) was added by the *Spaniards*, to distinguish it from the said Empire, its Discovery being posterior to that of *Mexico*. The Title of *Nova Granada* was also given it by the *Spaniards*, and that from a Province of the same Name in their own Country.

Air.] The Air of this Country (according to the Climate) is abundantly temperate, and generally esteem'd very wholesome to breathe in, but attended with the great Inconveniency of frequent Hurricanes, besides Thunder and Lightning. The opposite Place of the Globe to *Nova Granada*, is that part of the *Ethiopic* Ocean, lying between 65 and 79 Degrees of Longitude, with 27 and 40 Degrees of South Latitude.

Soil.] This Country is but badly known, and the Soil of those Parts already discover'd, very ordinary ; being generally a dry, sandy, barren Ground, far inferior to most other Countries in *America*, belonging to the *Spaniards*. Its Bounds being undetermined (especially in the Northmost Parts) we can say nothing of the true Extent of its Days and Nights.

Commodities.] This Country being none of the best, and but rarely frequented by Strangers, its *Commodities* are very few, Cattle being the chief or only thing they trade in.

Rarities.] What things in *Nova Granada* do truly merit the Epithets of *Rare* and *Curious*, we must refer to the better Discovery of After-Ages, our Knowledge of this Country being as yet but very slender.

Arch.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities,* none.

Manners.] The Inhabitants of this Country (except those call'd *Panches*, in the Southmost Parts) are said to be of a much less savage Temper, than most of the wild *Americans*. They are much given to Hunting, and several of 'em understand Agriculture tolerably well.

Language.] The *Spaniards* here residing, do commonly use the *Spanish* Tongue. As for the Natives of this Country, they retain their own *Jargon*, of which we can give no Account.

Government.] The *New Mexicans* are still govern'd by certain Captains of their own, call'd *Caciques*; but the *Spaniards* here residing, and those of the civilized Natives, are rul'd by a particular Governor, sent thither by the King of *Spain*, whose Place of Residence is ordinarily at *Santa Fee*, upon the River *Nort*.

Arms.]

Religion.] The Natives of this Country are generally gross Idolaters, and many of 'em have little or no Sign of Religion at all. The *Spaniards* here residing, are the same in Religion with those in *Europe*.

S E C T.

S E C T. III.

Concerning *Florida*.

| | | d. | m. | | | | | |
|--------|-----------|-----|----|-----------|--------------|------------------------------|--|-------------------------------|
| Situat | { between | 283 | 00 | { of Lon. | { Its great. | { Length from W. to E. is a- | | |
| | | 260 | 00 | | | | | about 1000 Miles. |
| | { between | 25 | 00 | { of Lat. | | | | { Breadth from N. to S. is a- |
| | | 38 | 00 | | | | | |

The large Country of *Florida* being of no certain Divisions; its

Coca, in the main Land.

Chief Towns are { *S. Augustine*,
 { *S. Matthea*, } in the *Peninsula* of *Tegefe*.

Nome.] **T**His Country (first discover'd by *Sebastian Cabot*, Anno 1497. but more particularly afterward by *John Depony*, a *Spaniard*, who took Possession thereof in the Name of his Catholick Majesty, Anno 1527.) is bounded on the East by the main Ocean; on the West by *New Mexico*; on the North by *Carolina*, and part by *Terra Arctica*; and on the South by *Sinus Mexicanus*. It is term'd by the *Italians* and *Spaniards*, *Florida*; by the *French*, *Floride*; by the *Germans* and *English*, *Florida*; so call'd by the *Spaniard*, either because they arriv'd at it on *Palm Sunday* (which they term *Pascha Florida*) or because they found the Country full of *Flowers* at their Arrival.

Air.] The *Air* of this Country is said to be so extraordinary temperate, that (according to our latest Accounts) the Inhabitants live to a great Age. The opposite Place of the Globe to *Florida*, is that part of the *East Indian Ocean*, lying between 77 and 100 Degrees of Longitude, with 25 and 38 Degrees of South Latitude.

Soil.] The *Soil* of this Country (it lying in the 5th and 6th North Climate) is wonderfully fertile, abounding in most sorts of Grain, Herbs, and Fruit. It's also well stor'd with Venison and Fowl; enrich'd with considerable Mines of Gold and Silver, especially those of the *Appalachine Mountains*; and here they fish vast numbers of valuable Pearls. The longest Day in the Northmost Part of this Country, is about 14 Hours and a quarter; the shortest in the Southmost, is 9 Hours; and the Nights proportionably.

Commodities.] This Country being slenderly known in the inland parts, and even those next the Sea, but little frequented by Stran-

Strangers, its *Commodities* are very few, yet very costly, viz. Gold, Silver, Pearls, and Furs.

Rarities.] In these Parts of *Florida*, grows a certain Tree, about the Bigness of an ordinary Apple Tree, the Juice of whose Fruit the Natives use to squeeze out, and therewith anoint their Arrows, being a rank sort of Poyson. If there be no Fruit, then they break off a Branch, and out of it do press a milky Substance, equally poisonous with the Juice of the Fruit. So strong a Poison is this Tree, that if a few handfuls of its Leaves are bruised and thrown into a large Pond of Standing-Water, all sorts of Beasts that happen to come and drink thereof, do suddenly swell and burst asunder; Purchas his *Pilgrims*, par. 4. lib. 8. cap. 1. In *Bahama* (an Island near Cape Florida) is the famous *Bahama Spider*, the biggest of all the Species, being two Inches long, and deservedly term'd *Phalangium maximum Indicum*: he hath 6 Eyes, and those not so big as the smallest Pin's Head. Some of these remarkable Insects are to be seen in the publick *Museum* of Gresham College, London.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities, none.

Manners.] The *Floridins* are naturally white, but by anointing themselves (both Men and Women) with a certain Ointment, they still appear of an Olive Colour. They are tall of Stature, well proportion'd. Lovers of War, and ordinarily go quite naked, except a small piece of Deer-skin, which many wear about their Middle.

Language.] The *Language* of the Natives doth very much differ in Dialect, according to the different Parts of this Country. The few *Spaniards* here residing, do still retain the *Spanish*.

Government.] The Natives of this Country are subject to several Lords of their own (term'd *Parouffes* or *Caciques*) one of whom is said to have the Precedency, and is generally respected by the rest, as an Emperor. The *Spanish* Colonies on the Sea-Coasts, have their peculiar Governors appointed by his Catholick Majesty.

Arms.]

Religion.] The Natives of this Country are gross Idolaters, worshipping the whole Host of Heaven, especially the *Sun*, to whom they attribute the good Fortune of all their Victories, and return him Thanks accordingly. They mightily respect their Priests (who are generally Sorcerers) and call them by the Name of *Joanas*, and in some Places *Jawa's*. Several Missionaries were sent into this Country in the Days of Charles V. but the savage Inhabitants quickly destroy'd them.

T*erra Canadensis* (so called from the River *Canada*) being a vast complex Body, consisting of several large and considerable Countries, and particularly those in which the *English* Nation is chiefly concerned; we shall distinctly consider its various Division (especially those of the *English* Empire) and that in the same Order laid down in the foregoing Table. Therefore,

§ 1. *Terra Canadensis propria.*

THis Country being the Northmoſt of all the reſt, is eſteem'd none of the beſt. But being ſo ſlenderly known as yet, we paſs on to

§ 2. *Nova Britannica.*

WHich Country is likewiſe of a very ordinary Soil, by what we find, and almoſt as thinly inhabited and little frequented as the former. We ſhall therefore make no ſtay therein, but proceed to

§ 3. *Nova Francia.*

THis Country is reckon'd to be much colder than moſt others in the ſame Latitude; however, 'tis ſaid to be bleſs'd with a Soil abundantly fruitful; and is chiefly furniſh'd with Stags, Bears, Hares, Martins, Foxes, Conies, and great ſtore of Fiſh and Fleſh. The *French* here reſiding (about Six Thouſand in Number) do commonly trade in Bever, Mouſe-Skins, and Furs. This being all that is remarkable of it, we continue our Progreſs to the next Diviſion, viz.

§ 4. *Nova Scotia.*

WHich Country (firſt diſcover'd by *Sebastian Cabot*, at the Charge of *Henry the Seventh*) was once inhabited by a *Scotch* Colony, ſent over *Anno 1622.* by *Sir William Alexander* [then Lord Secretary of *Scotland*] to whom King *James*, by Letters Patents, made a Donation thereof; but that Colony failing, the *French* became Maſters of the Country, and ſettled themſelves therein, calling it by the Name of *Accadie*.

But leaving theſe Northern Parts of *Terra Canadensis*, as Countries little known, and of leſs Note unto us; proceed we to that which more nearly concerns us, viz. A peculiar View of the various Parts of the *Western Engliſh Empire*; and that according to their Order, as they lie in the foregoing Table. The firſt whereof is

§ 5. *New-*

§ 5. New-England.

Name.] THIS Country, discover'd first by the *English*, under the Conduct of the two *Cabots*, Anno 1497. and afterwards taken Possession of for *Q. Elizabeth* by Sir *Philip Amadas*, Anno 1558. is bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*; on the North by *Accadie* or *Nova Scotia*; and on the South by *New York*. It is term'd by the *Italians*, *Inghilterra Nouella*; by the *Spaniards*, *Nueva Inglaterra*; by the *French*, *Nouvelle Angleterre*; by the *Germans*, *Neu Engeland*; and by the *English*, *New-England*; so call'd by the Discoverers, after the Name of their own Country.

Air.] Notwithstanding this Country is of a Situation considerably more Southern than *Old England*, yet the Air of both is much the same; the Heat thereof being allay'd by cooling Breezes, which frequently happen. The opposite Place of the Globe to *New England*, is that part of the vast *Atlantick Ocean*, lying between 107 and 112 Degrees of Longitude, with 41 and 45 Degrees of South Latitude.

Soil.] The Soil of this Country is in most Parts very fertile, producing in great plenty most sorts of *English Grain*, Fruits, and Roots, besides *Indian Corn*. It's very well stock'd with Fish and Fowl, as also variety of tame and wild Beasts. In short, 'tis not only furnish'd with the Necessaries, but likewise many of the Comforts of human Life; and the Colony (now upwards of an Hundred Thousand) doth flourish daily more and more. The Length of the Days and Nights in *New England*, is much the same as in the Northern Provinces of *Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country, are Fish, Grain, Masts for Ships, Deal-boards, Iron, Tar, Bever, Mouse-Skins, Furs, &c. And 'tis observable of those in *New England*, that they have annually, for some Years, imported and exported to and from *Old England*, as many Commodities in Value as they carry'd out at first.

Rarities.] In several Parts of *New England* grows a certain Fruit, term'd, *The Butter Nut*, so call'd from the Nature of its Kernel, which yields a kind of sweet Oil, that hath the exact Taste of ordinary Butter. (2.) In *Baker's Cave*, about 50 Leagues East from *Boston*, is found the *Scarlet Mussel*, whose purple Vein being prick'd with a Needle, yields a Juice of a pure purple Colour, which gives so deep a Die, that no Water is able to wash it out. (3.) About eighty Miles North-East of *Scarborough*, is a Ridge of Mountains in length about an hundred Leagues,

and known commonly by the Name of the *White Mountains*, because their Tops are cover'd with Snow all the Year round. Upon the highest of these Mountains is a large Plain, and at the farthest end of it, a natural rocky Pyramid (vulgarly call'd *The Sugar-Loaf*) to the uppermost part of which one may easily ascend by a continued Set of inartificial Steps, winding about the rocky Mount, up to its very Top, where is another Plain of about an Acre of Ground, and in the middle of it a deep Pond of clear Water. (4.) Upon the Sea-side, near *New-Haven*, is a large Bed of Sand of a perfect black Colour, with many Grains of red and white intermix'd. (5.) Upon the Coast of *New-England* is sometimes taken that remarkable Fish, which the *English* Inhabitants call by the Name of *The Monk Fish*, because he hath, as 'twere, a Hood much of the same Fashion with a Friar's Cowl. (6.) In divers Parts on the Coast of this Country, is found the *Stella Marina Arborescens*, or *Branched Star-Fish*; a rare kind of which, taken in the Bay of *Matachuset*, is to be seen in *Gresham College*, and describ'd in the *Philos. Transact.* N^o. 53. under the Name of *Piscis Echionostellaris Visciformis*. (7.) Of many rare Birds in *New England*, the most remarkable are the *Troculus*, and that call'd the *Humming Bird*. The former of these (being about the bigness of a Swallow) is observable for Three Things; First, Having very short Legs, and hardly able to support himself, Nature hath provided him with sharp-pointed Feathers in his Wings; by darting of which into the Wall of a House, he sticks fast, and rests securely. Secondly, The Manner of his Nest, which he useth to build (as Swallows) in the Tops of Chimneys, but of such a Fashion, that it hangs down about a Yard long. Lastly, Such Birds are remarkable for their Ceremony at departing; it being always observ'd, that when they remove, they never fail to leave one of their Young behind in the Room where they have nested, making thereby (as 'twere) a grateful Acknowledgment to the Landlord for their Summer's Lodging. As for the *Humming Bird*, he is observable for being the least of all Birds. The manner of his Nest resembles a Bottom of soft Silk, and the Egg in which he's hatch'd is not larger than a white Pea of an ordinary Size. But of him else where. For these and some other such Remarkables, *vide* that small Treatise, entituled, *New England's Rarities*, per *J. Josselyn*, Gent.

[*Archbishopricks*, &c.] *Archbishopricks* and *Bishopricks*, none. As for *Universities*, here are Two Colleges erected at *New Cambridge*, which in Conjunction with other such Nurseries of Learning, hereafter establish'd, may, we hope, deserve that Title in process of Time.

[*Manners*.] The *English* here residing, are much the same with those in *Old England*. As to the Natives, they are generally characterized thus, viz. A People that's crafty, timorous, as also barbarous.

cruel and revengeful when they find Opportunity. But some of 'em are of a much milder Temper, being likewise very ingenious and quick of Apprehension. Their Number (especially within the *English* Territories) is mightily diminish'd, the greatest part of 'em being swept away by the Small Pox, about the first Settlement of the *English*; others by Tumults among themselves, and most of the rest by the late treacherous Wars with the *English*.

Language.] The *English* Inhabitants of this Country use their own *Language*. As to that of the Natives, it's divided into a great many Dialects, and reckon'd very difficult to be learn'd by Strangers; the Generality of its Words being extremely long, and of an inarticulate Pronunciation.

Government.] The Natives of this Country are divided into many Bodies, and are subject unto their *Sachams* and *Sagamores*, who exercise an absolute Jurisdiction over them; the Will of their respective Governors being all the Law they pretend to. The *English* here residing, are govern'd by their own Laws, and have several Courts of Judicature erected for hearing and determining of Causes, both Civil and Criminal; as also for making and repealing of Laws that concern the Plantation. The Management of publick Affairs is in the Hands of a certain Number of Magistrates and Assistants, determin'd by their Patent; and out of these do the People annually chuse a Governor, and Deputy-Governor.

Religion.] The *English* here residing are Professors of the *Protestant Religion* in general, but greatly divided (as too common elsewhere) into different Parties. The Natives continue *Pagan*, except those few acquainted with the Principles of *Christianity*, by a late serious Divine, Mr. *John Eliot*, who [by translating the Holy Bible, and several Books of Devotion, into a certain Dialect of the *Indian* Tongue, and by frequently preaching among them in their own Language] laid some Foundation for a more general Conversion; did such a generous Spirit possess the Minds of Christian Benefactors, as to extend their Charity that way (than which none can be more extensive) or to mortify some part of their worldly Estate for that noble Undertaking (which might probably be less subject to Abuses, than erecting and endowing of Hospitals, Alms-houses, and such like) that in process of Time, such a Stock of Money might be settled in a sure Fund, as yearly to afford a desirable Competency to a continued Set of Men, who should be found sufficiently able and willing to labour in that most Christian Design.

§ 6. *New York.*

Name.] **T**His Country (discover'd *Anno* 1608. by Mr. *Hudson*, and bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*; on the North by *New England*; and on the South by *New Jersey*) is term'd by the *Italians*, *York Nou-ella*; by the *Spaniards*, *Nuevo York*; by the *French*, *Nouvelle Yorke*; by the *Germans*, *Neu Yorke*; and by the *English*, *New York*; so call'd from the then Duke of *York*: For it being sold by Mr. *Hudson* to the *Dutch*, without Leave from his Master the King of *England*; and they keeping Possession thereof, under the Name of *New Netherland* till the Year 1664. 'twas then reduc'd to the *English* Crown; whereupon King *Charles II.* by special Writ, made his Royal Brother [the Duke of *York*] Proprietor of it, from whom (as aforesaid) it derives its Name.

Air.] The *Air* of this Country, is commonly reputed to be much the same with that of *New England*. The opposite Place of the Globe to *New York*, is that part of the *East-Indian* Ocean, lying between 106 and 107 Degrees of Longitude, with 41 and 44 Degrees of South Latitude.

Soil.] The *Soil* of this Country, as also *Long Island*, is (by general Relation) so rich, that one Bushel of *European* Wheat doth ordinarily produce an hundred in many Places. It aboundeth likewise with most sorts of *English* Grain, Herbs, and Fruits; and produceth excellent Tobacco, as also Melons, Pumpkins, &c. The Length of the Days and Nights in this Country, is the same as in the Kingdom of *Naples*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country, are Tobacco, Bever, Otter, Rattoon, Deer, and Elk-Skins, and other costly Furs; for which the *English* and *Dutch* trade with the Natives.

Rarities.] In divers Parts of *New York* (especially those high unto and upon the Banks of the River *Connecticut*) grows a sort of *Snake-weed*, whose Root is much esteem'd of for the Biting of the Rattle-Snake; being pulveriz'd, it hath an excellent fragrant Smell, and a good aromack Taste, but seems different from the *Serpentaria* of the Shops.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*, no re.

Man

Manners.] The Natives of this Country (especially those of *Long Island*) are, by mortal Diseases and frequent Wars among themselves, reduc'd to a small Number. Some of 'em are now serviceable to the *English*; and the rest spend their Time commonly in Hunting, Fowling, and Fishing; especially the Men, who remove from Place to Place, and leave their Wives for tilling the Ground, and planting the Corn. They're much given of late to Drinking, and frequently intoxicate themselves with strong *European* Liquors.

Language.] The Inhabitants of this Country being *English*, and a few *Dutch*, do use the *Languages* peculiar to their respective Countries. The Natives speak a very unpleasant Dialect of the *Indian* Tongue.

Government.] The Natives of this Country are govern'd by their peculiar *Sachems*, who are said to advise with their chief Counsellors in Matters of Importance, but still to pronounce the definitive Sentence themselves, which their People commonly receive with great Applause. The *English* here residing, are subject unto and rul'd by their own Governor, authoriz'd and sent over by His Majesty the King of Great Britain,

Arms.]

Religion.] The *English* here residing, are much the same in point of Religion with those here in *England*: But the Natives are still in the dark, and addicted to the blackest Idolatry, the generality of 'em being said to worship the Devil, under the Name of *Monetto*, to whom they frequently address themselves with a kind of magical Rites, and their Priests (call'd *Pawaws*) do act as so many Conjurers.

§ 7. New Jersey.

Name.] **T**His Country (discover'd by the *English*, under the Conduct of the two *Cabots*, Anno 1497. lately divided into *East* and *West Jersey*, and bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*; on the North by *New York*; and on the South by *Pensilvania*) is term'd by the *Italians*, *Fersea Novella*; by the *Spaniards*, *Nuevo Jersey*; by the *French*, *Nouvelle Jersey*; by the *Germans*, *Neu Jersey*; and by the *English*, *New Jersey*; so call'd from the Island *Jersey* in the *British* Channel; but why so term'd is somewhat dubious.

Air.] The *Air* of this Country is esteem'd abundantly healthful to breathe in, and agreeable enough to *English* Constitutions, as sufficiently appears from the long Experience of many Planters. The opposite Place of the Globe to *New Jersey*, is that part of the vast *Indian* Ocean, lying between 105 and 107 Degrees of Longitude, with 39 and 42 Degrees of Southern Latitude.

Soil.] The *Soil* is not every where the same, being in some Parts extraordinary good, and in others very indifferent. But 'tis generally believ'd to prove much better after the felling of the Timber, and clearing the Ground, in which the Colony begins now to make a good Progress. The Length of the Days and Nights in this Country, is the same as in the South of *Italy*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* exported hence for *England*, are Whale-Oil, Whale-Fins, Bever, Monkey, Rattoon, and Martin-Skins: As also Beef, Pork, Corn, Butter and Cheese, to the adjacent Islands,

Rarities.] As the principal Observables of *New Jersey*, we may reckon some rare Plants growing in divers Parts of that Country, and easily found by the curious *Botanist*, if only at the Pains to make a Search proportionable to his Curiosity. Here also is that huge Creature call'd the *Moose*, of whose Skin they make excellent Buff.

Archbishopricks, &c.] *Archbishopricks, Bishopricks, Universities*, none.

Manners.] The Natives of this Country (fewer in Number than in most of the adjacent Colonies) are generally reckon'd a very simple and an innocent sort of People, and many of 'em are now become very serviceable to the Planters. The *English* here residing, are much the same in *Manners* with those in *England*.

Language.] All that can be said of the *Language* of the Natives of this Country, is, in general, that 'tis one of the many different Dialects of the *Indian* Tongue. Those of the Plantation retain and use their own Language.

Government.] This Country being divided into a certain number of *Shares* or *Proprieties*; out of each *Propriety* is annually chosen a Freeholder by the Inhabitants thereof. These Freeholders meet at a certain Time of the Year, as a general Assembly, or complete Re-

pre-

presentative Body of the whole Colony : In that Assembly (together with the Governor or his Deputy) is lodg'd the Legislative Power, in making or repealing of Laws relating to the whole Province ; but still with this Restriction, That they no ways infringe that Liberty of Conscience, at first establish'd ; and that by an irrevocable fundamental Constitution, never to be alter'd by any subsequent Law whatsoever. No Tax or Subsidy, Rates or Services, are to be impos'd upon the People, but by and with the Consent of their Representatives in that Assembly.

[Arms.]

[Religion.] The *English* here residing, are of different Perswasions in Point of Religion, there-being a Liberty of Conscience allow'd to all of the Colony. But the poor Natives (to our great Shame) are still groping in the Twilight of Paganism.

§ 8. *Pensilvania.*

[Name.] **T**His Country (discover'd at the same Time with the rest of the adjacent Continent, and bounded on the East by part of the main Ocean ; on the West by some of *Terra Africa* ; on the North by *New Jersey* ; and on the South by *Maryland*) is term'd by the *French*, *Pensilvanie* ; by the *Germans*, *Pensilvanien* ; by the *Italians*, *Spaniards*, and *English*, *Pensilvania* ; so call'd from *William Penn*, Esq ; whom King *Charles II.* made first Proprietor thereof by Letters Patent, Anno 1680.

[Air.] The Air of this Country is generally granted to be clear and sweet, the Heavens being seldom over-cast with Clouds. The Length of the Days and Nights, is much the same here as in *New Jersey*.

[Soil.] The Soil of this Country is tolerably good in many Parts, but in some Places extremely barren. The opposite Place of the Globe to *Pensilvania*, is that Part of the *East-Indian Ocean*, lying between 106 and 102 Degrees of Longitude, with 39 and 42 Degrees of South Latitude.

[Commodities.] There being no considerable Trade as yet settled between this and Foreign Countries ; the chief *Commodities* hitherto exported, are mostly Horses and Pipe-Staves, commonly sent to the Island of *Barbadoes*.

Hotities.] In several Parts of *Pensilvania*, are Springs of good mineral Waters, particularly those about two Miles from *Philadelphia*, which, for Operation, are accounted much the same with our purging Waters at *Barnet*.

Archbishopsricks, &c.] *Archbishopsricks*, *Bishopsricks*, *Universities*, none.

Manners.] The Natives of this Country, being Persons of tall Bodies, and swarthy Complexions, are generally reckon'd more mild and civilly inclin'd, than most others of the *Indian Nations*. The *Europeans* here residing, being mostly *English*, with a few *Dutch* and *Svedes*, are much the same with those in *Europe*.

Language.] The *Language* of the Natives, being a Dialect of the *Indian Tongue*, is said to be very lofty, sweet, and emphatick, in respect of many others in these Parts of the World; as also very easie to be acquir'd by Strangers. The *Europeans* here residing, retain the respective Languages of their own Country.

Government.] This Country being granted (as aforesaid) to *William Penn*, by his Majesty King *Charles II.* the publick Affairs thereof are manag'd by several Courts of Justice, there establish'd under him as Proprietor, who (or his Deputy) rules the same in Subordination to the King of *Great Britain*.

Arms.]

Religion.] The *English* here residing, are of different Sects and Perswasions, but *Enthusiasm* chiefly prevails, this Country being stock'd with *Quakers* by their Governor *William Penn*. The Natives are said to have a pretty clear Notion of a Supreme Being, the Immortality of the Soul, and a future State. Their Worship chiefly consists in Sacrifices and Songs, intermix'd with Dancing.

§ 9. *Mary-Land.*

Name.] **T**His Country (discover'd by the *English*, under the Conduct of the two *Cabots*, Anno 1497. and bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*; on the North by *Pensilvania*; and on the South by *Virginia*) is term'd by the *Italians*, *Marylandia*; by the *Spaniards*, *Tierra de Maria*; by the *French*, *Terre du Marie*; by the *Germans*, *Marienland*; and

and by the *English*, *Mary-Land*; so call'd at last in Honour of Queen *Mary*, Wife to King *Charles I.* who gave it by Letters Patent, under that Name, to the Right Honourable *Cacilius Calvert* Lord *Baltimore*, Anno 1632.

Air.] The *Air* of this Country is much more healthful now, and more agreeing to *English* Constitutions than formerly, when the Woods were intire; And the better it still grows, the greater Progress they make in felling the Timber. The opposite Place of the Globe to *Mary-Land*, is that part of the *East Indian Ocean*, lying between 101 and 106 Degrees of Longitude, with 37 and 40 Degrees of South Latitude.

Soil.] The *Soil* of this Country it generally reckon'd very fertile and rich, producing in great Plenty the same Things with *New York*. The Length of the Days and Nights in *Mary-Land*, is much the same as in the Southern Provinces of *Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country, are Tobacco, Hemp, Flax, Wood, Hops, Rape-Seed, Madder, Furs, Elk-Skins, &c.

Rarities.] Of several rare *Crustaceous Animals* found in this Country, that call'd the *Signoe* or *Signenoc*, is most observable; and that particularly for the admirable Contrivance of his Eyes. For they being plac'd under the Covert of a thick Shell, Nature (whose Operation is wonderful in every Thing) hath so order'd, that those Parts above the Eyes are so transparent, as to convey a Competency of Light, whereby the (otherwise benighted) Animal can clearly see its way. For several other remarkable Creatures, with a Catalogue of rare Plants in *Mary-Land*, vide *Philos. Trans.* N^o. 246.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*; none.

Manners.] The Natives of this Country (considered in the main) are generally reckon'd the same with those of *New-York*, or the nearest to them in their Temper and Customs of any other of the *American Nations* whatsoever. The *English* here residing, are much the same with those in *England*.

Language.] The *Language* of the Natives in this Country, is said to consist of divers Idioms, very different from one another; and none of 'em either so pleasant to the Ear, or so easy to be acquired
by

by Strangers, as those in *Pensilvania*. The *English* here residing use their own Language.

Government.] The Right Honourable *Cacilius Calvert*, Lord *Baltimore*, his Heirs and Assigns, being by Letters Patent [*Anno* 1632.] created Lords and Proprietors of *Mary-Land*, excepting the Sovereign Dominion and Allegiance, with a fifth part of the Gold and Silver Ore reserv'd to his Majesty: The *Government* of the Colony, by their Lordship's Care and Prudence, is so model'd, that we may reckon it a Diminutive of that of *England*. For the Supreme Court (call'd a *General Assembly*) resembles, in some measure, our *English* Parliament, being divided into an *Upper* and *Lower House*. The *Upper* consists of the Governor himself, with his Council, and such Lords of Mannors, and others, as his Lordship, or Lieutenant, shall by Writ call thither. The *Lower* is made up of Delegates elected and sent up by each County of the whole Plantation. This Assembly is conven'd, prorogu'd, or dissolv'd at Pleasure, by his Lordship or Lieutenant; and whatever is agreed upon, and enacted by both Houses, and assented unto by his Lordship, hath the Sanction of a Law, and can't be repeal'd but by the same Authority. Next to this Legislative Assembly, is the Provincial Court, generally held at *St. Mary's*, to which Appeals are made from all inferior Courts of the whole Province.

Arms.]

Religion.] The *English* here residing are of various Perswasions in point of Religion, there being a Toleration enjoyn'd for all Sects of Christianity. The Natives know nothing, as yet, of the true God, save what they obscurely see by the glimpsing Light of Nature.

§ 10. Virginia.

Name.] **T**HIS Country (discover'd first by *Sebastian Cabot*, *Anno* 1497. but afterwards more perfectly by Sir *Walter Rawleigh*, *Anno* 1584. when he took Possession thereof in Queen *Elizabeth's* Name) is bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*; on the North by *Mary-Land*; and on the South by *Carolina*. It is term'd by the *French*, *Virginia*; by the *Germans*, *Virginien*; by the *Italians*, *Spaniards*, and *English*, *Virginia*; so call'd in Honour of Queen *Elizabeth*, that Masculine Virgin Queen, of happy Memory.

Air.] The *Air* of this Country, at to Heat and Cold, Dryness and Moisture, is variable according to the Winds; those from the North and North-West being universally cold and piercing; but those from the South and South-East, do commonly bring along with them great Heat in the Summer, which is frequently succeeded in September by Rain in such Quantity, that it hath several Times occasion'd an Epidemical Sicknesh among the People. The opposite Place of the Globe to *Virginia*, is that part of the *East-Indian Ocean*, lying between 101 and 105 Degrees of Longitude, with 37 and 39 Degrees of South Latitude.

Soil.] The *Soil* of this Country (strangely intermix'd with a vast Number of Oyster-shells) is generally sandy, yet abundantly fertile in Grain, where employ'd that way. It affordeth also most sorts of Roots, and desirable Fruits, with Physical Plants and Herbs in great Plenty; but above all, it produceth a wonderful Quantity of Tobacco, that bewitching Weed, so accounted of all the World over. The Length of the Days and Nights in *Virginia*, is the same as in the Southern Provinces of *Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Country, in which the Natives traffick with the *English*, are Skins of Deer, Bever, and other wild Beasts; for which the *English* return them Guns, Powder, Shot, Iron Tools, Brandy, &c. but the chief Thing exported hence for *England*, is Tobacco, there being above an hundred and fifty Sail of Ships commonly that load therewith every Year.

Rarities.] Such is the prodigious multitude of Oyster-shells intermix'd with the Earth in *Virginia*, that in some Places they're found 3 or 4 Yards deep in the Ground; where lying close together, they're said to petrify, and seem to make a Vein of such a Rock. But whether the Parts of that Rock are really the Shells of Oysters, there left by the Sea (which some suppose to have overflow'd this Tract of Land) or *lapides sui generis, sub judice lis est.* (2.) In some lesser Banks of Shells are found Teeth (about two or three Inches long, and one broad) suppos'd to be those of Fishes; and in other Parts are dug up the Bones of Whales several Yards deep, and that many Leagues from Sea. (3.) Near the River *Patomeck* is a sort of Aluminous Earth, of an Ash-Colour, very soft and light, and of an acid astringent Taste, almost like that of *Allum.* (4.) In many Parts of this Country is found a certain kind of Squirrel, who, at his Pleasure, can stretch out the Skin of his Sides, Thighs, and Legs, about an Inch in breadth (almost like the Wings of a Bat) by the help of which, he leaps farther,
and

and alights more surely than the ordinary sort, and is therefore call'd the *Flying Squirrel*.

[*Archbishopricks, Bishopricks, &c.*] *Archbishopsricks, Bishopsricks*, none. As for *Universities*, here is a considerable Seminary of Learning lately establish'd at St. *James's Town*, which already merits the Title of *College*, and we hope it will in process of Time deserve the Name of an *University*.

[*Manners.*] The Natives of this Country being Persons generally of tall and slender Bodies, black Hair, and of a tawny Complexion, are much given to Revenge, and very exact in vindicating the Death of a Friend, if they can by any means possible. They spend most of their Time in hunting wild Beasts, particularly Deer and Bever, whose Skins (as aforesaid) they interchange with the *English* for what Necessaries they want. Natives of the inland Parts are said to burn their Dead, and lay up their Ashes near their Cabins. Those whom they own as Priests, are look'd upon as so many Conjurers, because by their Invocations in a private Cabin, 'tis reported, that they frequently cause abundance of Rain to fall. The *English* here residing are much the same with those in *England*.

[*Language.*] The Language of the Natives of this Country is remarkable for its vast Variety of Dialects, and those so different from one another, that People of Twenty Miles distance (and sometimes less) are as quite different Nations, neither of them being able to comprehend the full meaning of one another's *Jargon*, without the Help of an Interpreter. Of such People or Nations are chiefly reckon'd the *Charwonocks, Mangoags, Monacans, Masawomekes, Manna-bocks, Pawbatans, &c.* The *English* here residing retain and use their own Language.

[*Government.*] The Natives (especially those in the Inland Parts of this Country) own Subjection to certain Governors of their own, call'd *Weroans*. The *English* are subject unto, and rul'd by a particular Governor, appointed and sent thither by his *Britannick Majesty*. The various Laws which immediately relate to the Colony it self, are made by the Governor, with the Consent of his Council, in Conjunction with the Burgesses elected by Freeholders. But for Decision of Matters (whether Civil or Criminal) in general, they're the very same with those here in *England*. The chief Court of Judicature being held Quarterly, is call'd the *Quarter Court*: In it, the Governor and Council are Judges, who determine in Affairs of the greatest moment; and to it Appeals are made from inferior Courts, Monthly kept in every County; there being Sheriffs, Justices of the

the Peace, and other Officers appointed for that end by the Governor.

Arms.]

Religion.] The *English* here residing are (for the most part) Professors of the Protestant Doctrine, and Observers of the Forms of Divine Worship, according to the Model of the Church of *England*. But the Natives continue *Pagan*, except a few of the younger sort already taught the Element of Human Literature, and instructed in the Principles of Christianity by the Members of our lately created Seminary of Learning at St. *James's Town*; of whose happy and desired Progress in this Matter, we have all Reason in the World to wish, and no small Grounds to hope the best.

§ II. *Carolina.*

Name.] THIS Country (discover'd at first about the same Time with *Virginia*, and afterwards, Anno 1660. granted by Patent to several Noblemen as Proprietors thereof) is bounded on the East by part of the main Ocean; on the West by some of *Terra Arctica*: on the North by *Virginia*; and on the South by part of *Florida*. It is term'd by the *French*, *Caroline*; by the *Italians*, *Spaniards*, *Germans*, and *English*, *Carolina*; so call'd, in Honour of his *Britannick Majesty King Charles the Second*.

Air.] The Air of this Country is reckon'd very healthful to breathe in, and so temperate, that 'tis a good Medium between the Extremities of Heat and Cold, that are most sensibly felt in divers Parts of the World. The opposite Place of the Globe to *Carolina*, is that part of the *East Indian Ocean*, lying between 98 and 105 Degrees of Longitude, with 30 and 37 Degrees of South Latitude.

Soil.] The Soil of this Country is for the most part very fruitful, producing in great Plenty most sorts of Fruits, Roots, Plants, Herbs, &c. besides variety of *English Grain*. The Length of the Days and Nights in *Carolina*, is much the same with those in the Southmost part of *Spain*, and Northmost of *Barbary*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* exported hence, are Skins of Otters, Bears and Leopards; as also Oil, Olives, Cotton, Indico, Ginger, Tobacco, Sarsaparilla, Turmeric, Snakes-Root, &c.

Rarities.] What chiefly deserves the Epithet of *Rare* in *Carolina*, is a certain Herb, which goes by the Name of the Country; and remarkable for its long red Root, which draws upon Paper good red Lines, but answers not in Dying.

Archbishopsicks, &c.] *Archbishopsicks, Bishopsicks, Universities;* none.

Manners.] The Natives of this Country, being naturally Men of good Courage, and for a long time at Wars among themselves, are mightily diminish'd in their Number to what they were. But those remaining are generally Persons of a good agreeable Temper, and maintain a firm Friendship with our Colony. The *English* here residing are the same in *Manners* with those here in *England*.

Language.] The Natives have a particular *Jargon* of their own, which sounds very harsh to the Ear, and seems to Strangers extremely hard, if not impossible to be acquir'd. The *English* use their own Language.

Government.] King *Charles II.* having granted *Carolina* by Letters Patent, in Propriety to *George Duke of Albemarle, Edward Earl of Clarendon, &c.* by those Letters, the Laws of *England* were to be always in force in this Country; only the Lords Proprietors are impower'd (together with the Consent of the Inhabitants) to make or repeal such By-Laws, as shall from Time to Time be thought expedient, for the better Governing of the whole Colony.

Arms.]

Religion.] The *English* here residing are of many and different Perswasions in Matters of *Religion*, there being a Liberty of Conscience allow'd by the very Constitution of their Government. The Natives have as yet no reveal'd Knowledge of the True God, but follow the vain Imaginations of their own Mind; however, they are said to acknowledge one Supreme Being, whom they worship under the Name of *Okee*, and to him their Priests do frequently sacrifice; but they believe that he takes no Care of Human Affairs, committing them to lesser Deities. They acknowledge also a Transmigration of Souls, and a future State of Happiness after this Life.

S E C T. V.

Concerning *Terra Arctica*.

UNDER the Title of *Terra Arctica*, we comprehend all those Northern Countries, lying either entirely (or mostly) within the *Arctic* Polar Circle. The chief of which are these following, *viz.*

Greenland,
Spitsberg,

Nova Zembla,
Terra de Jesso,

New Denmark,
New North Wales.

Of these we know little more, as yet, than their bare Names. I am very sensible, That in treating of them (yea, and that individual part of the Earth exactly under the North Pole) some Writers are pleas'd to speak as particularly, as if they were discoursing of the Fifty two Counties of *England*. But leaving such Gentlemen to divert themselves with their own *Chimera's*; and leaving these Countries to the better Discovery of future Ages, I pass on to the various Divisions of *South America*; chusing rather to say nothing of the aforesaid unknown Countries, than to relate Things of them satisfactory neither to my self, nor the Reader; being willing to have due Regard to that excellent Saying of the *Roman Orator*, *Quam bellum est velle confiteri potius nescire quod nescias, quam ista effutientem nauseare, atque ipsum sibi displicere?* Cic. de Nat. Deor. Lib. I. Now followeth,

Name.] THIS Country (discover'd by the Spaniards, and conquer'd Anno 1514.) is bounded on the East by part of the main Ocean; on the West by *Mare del Zur*; on the North by *Mare del Nort* and the Bay of Mexico; and on the South by Peru, Amazonia, and part of Brasil. It is term'd by the Italians, *Terra Firma*; by the Spaniards, *Tierra Firma*; by the French, *Terre Ferme*; by the Germans, *Het vast Land*; and, by the English, *Terra Firma*; so call'd by the Discoverers thereof, as being one part of the *Firm Land*, or main Continent, at which the Spaniards first touch'd in their Western Discoveries.

Back of
Foldout
Not Imaged

Air.] The *Air* of this Country is extremely hot, yet generally accounted very wholesome, save in the Northmost Parts adjacent to the *Isthmus* of *Panama*, where the Ground is full of Lakes and Marshes, which by their ascending Vapours do render the *Air* very gross, and consequently less wholesome to breathe in. The opposite Place of the Globe to *Terra Firma*, is that part of the *East Indian* Ocean, lying between 129 and 160 Degrees of Longitude, with 1 Degree of South, and 11° 30° of Northern Latitude.

Soil.] This Country (lying mostly in the first North Climate) is said to be blessed with an excellent *Soil*, producing a great Plenty of Corn and Fruits, where duly manur'd. It mightily abounds in Venison, Fish and Fowl. A great part of it is planted with Cotton, and others are very productive of Sugars and Tobacco. Here are also very considerable Mines of Gold, Silver, Brass, &c. many precious Stones, and in several Places good fishing of Pearls. The longest Day in the Northmost part of this Country is 12 Hours and an half; the shortest in the Southmost is 12 Hours, or thereabouts; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Silver, and other Metals, Balsam, Rozin, Gums, Long Pepper, Emeralds, Sapphire, Jasper, &c.

Rarities.] Upon the Coast of *Terra Firma*, nigh *Surenam*, is frequently seen, and sometimes taken that Fish, usually call'd by Mariners the *Old Wife*, but otherwise, the *Square Acarauna*; so term'd from his Figure, being almost a complete *Quadratum*. (2.) In several parts of *Guiana*, are certain Trees, call'd *Totock*, remarkable for their Fruit, which is of so great a Bulk, and withal so hard, that People can't with Safety walk among 'em, when the Fruit is ripe, being in danger every Moment to have their Brains knock'd out. (3.) In one of the Branches of *Oronoque* River is such a hideous Cataract, that the Water falling down, makes as loud a Noise as if a thousand Bells were knock'd one against another; vide *Heylin's Cosmog.* last Edition, p. 1086. (4.) On the top of a high Mountain, call'd *Cowob*, is a considerable Lake (according to the Report of the Natives) and that well stock'd with most sorts of Fishes. (5.) In some Rivers of *Guiana*, is a certain little Fish, about the Bigness of a Smelt, and remarkable for having Four Eyes; two on each side, one above the other; and in swimming, 'tis observ'd to keep the uppermost two above, and the other two under Water. (6.) In the Island of *Trinidad* [near the Coast of *Terra Firma*] is a remarkable Fountain of Pitch, which boileth out of the Earth in great abundance, and is exported thence to various Places in these parts of

the World. (7.) Near C. Brea, on the Continent, is another Fountain of pitchy Substance, much us'd in trimming of Ships, with good Success, and preferable to the ordinary Pitch in those hot Countries, being able to resist the scorching Heat of the Sun-Beams. *Vide Purchas's Pilgrims, par. 4. lib. 6.*

Archbishops.] Here is one *Spanish Archbishoprick*, viz. that of *St. Fe de Bagota*.

Bishops.] *Bishopricks* four, viz. those of

Popayan,
Panama,

Cartbagena,
St. Martha.

Universities.] None.

Manners.] The Natives of this Country being Persons of a tawny Colour, and (for the most part) of very robust and proper Bodies, are a People that's very healthful, and generally live to great Ages, notwithstanding the Air they breathe in is none of the best. They spend most of their Time in Hunting, and such like Diversions, as the Generality of other *Americans* do, and commonly walk naked above their Middles. By the latest Accounts of this Country, there are still in *Guiana* a great many *Cannibals*: The Eating of humane Flesh (especially that of vanquish'd Enemies) is so relishing to the Palate of those Savages, that two Nations of them, by mutual devouring, are now reduc'd to two Handfuls of Men.

Language.] Here is a great Diversity of *Languages* among the Natives, and each of these divided into several *Dialects*. The *Europeans* here settled, retain the several *Languages* peculiar to their respective Countries from whence they came.

Government.] This spacious Country is, in a great part, subject to the King of *Spain*, and govern'd by the Vice-Roy of *Mexico*, under whom are several Deputy-Governors in divers Parts, for the better Management of the whole; and for an equal Distribution of Justice every where, there are establish'd many Courts of Judicatory, in which all Causes, whether Civil or Criminal, are heard and determin'd. Some of the midland Provinces are as yet free from the *Spanish* Power, being still maintain'd by the Natives, who acknowledge Subjection unto, and are govern'd by the Heads, or Eldest of their Families.

Arms.]

Arms.]

Religion.] The Natives of this Country (especially in the mid-land Provinces) are gross Idolaters. Nigh unto, and upon the River *Wiapoco*, is a certain Nation (call'd *Marasheewacas*) whose Object of Religious Worship, is a monstrous Idol of Stone, set up in a most frightful Posture: For it is fashioned like a very big Man sitting upon his Heels, resting his Elbows upon his Knees, and holding forwards the Palms of his Hands, and looking upwards, doth gape with his Mouth wide open. The different *Europeans* here residing, are of the same Religion with that establish'd in the respective Countries from whence they came.

| | | | | |
|--------------------------------------|----------------|------------|----------------|---------------|
| Peru comprehends the Provinces of | Posto ——— | Chief Town | Poston ——— | From N. to S. |
| | Los Quixos ——— | | Baesa ——— | |
| | Pacamores ——— | | Valladolid ——— | |
| | Quito ——— | | Idem ——— | |
| | Peru ——— | | Lima ——— | |
| | Los Carcas ——— | | Potosi ——— | |

Name.] THIS Country (discover'd by the *Spaniards*, Anno 1525. and bounded on the East by *Amazonia*; on the West by *Mare del Zur*; and on the South by *Chili*) is term'd *Peru* by the *Italians*, *Spaniard*, *French*, *Germans*, and *English*; so call'd (according to the best of Criticks) from a certain Rivulet, which bore that Name among the *Indians*, at the *Spaniards* first Arrival.

Mir.] The Air of this Country is of a very different Nature, being in some Places extremely hot, and in others extraordinary sharp and piercing. The Wind upon this Coast (according to *J. Acosta*) blows always from the South and South West (contrary to what's usual between the Tropicks) and is not violent, tempestuous, or unhealthful, as elsewhere; but very moderate and agreeable. He farther observes, That all along the Coast call'd *Lanos*, it never rains, thunders, snows, nor hails; yet very frequently a little out at Sea; and that among the *Andes*, it rains in a manner continually. The opposite Place of the Globe to *Peru*, is that part of the Gulf of *Bengale*, between 102 and 122 Degrees of Longitude, with 1 and 24 Degrees of South Latitude.

Soil.] This Country (lying in the 1st, 2d, and 3d South Climate) consisteth of many large and pleasant Vallies, with divers high and lofty Mountains. The Vallies in some Places, especially

towards the Sea-Coasts, are very sandy, and frequently subject to Earthquakes; in other Places they are very rich, and the Air extremely sultry. The Mountains (particularly the *Andes*) are, for the most part, continually cold in their Tops, yet exceeding fertile, and generally lin'd with most costly Mines beyond any Country in the World, witness the famous lofty Hill of *Potozi*, in the Province of *Los Carcas*, before 'twas sunk by an Earthquake, which happen'd in the Time of *O. Cromwell's* Usurpation. It is universally esteem'd the richest of all the Foreign Plantations belonging to the *Spaniards*. The longest Day in the Northmost part of *Peru*, is about 12 Hours and a quarter; the shortest in the Southmost is 10 Hours and a half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold and Silver in vast Quantities, costly Pearls, abundance of Cotton, Tobacco, Cochineel, medicinal Drugs, &c.

Rarities.] There's a high Mountain in *Peru* (call'd *Periataka*) to whose Top if any Person ascend, he's suddenly taken with a terrible Fit of Vomiting. And many Travellers endeavouring to pass over the Desert of *Punas*, have been benumb'd on a sudden, and fall'n down dead; which makes that way wholly neglected of late. (2.) On the Tops of the highest Mountains in *Peru* (as in other parts of the World) are frequently found some considerable Lakes, several of which are very hot. (3.) In the Valley of *Tarapaya*, near to *Potozi*, is a very hot Lake of a circular Form, whose middle part (for above twenty Foot square) continually boils up; and though the Water is so extremely warm, yet the Soil about the Lake is extraordinary cold. (4.) At the Baths of *Ingua*, is a Stream of Water almost boiling hot; and hard by it doth issue forth another Stream which is as cold as Ice. (5.) In the Province of *Los Carcas* is another Spring of Water, so very hot, that one can't hold his Finger in it for the short space of one *Ave Maria*. And somewhere else in this Country is a Fountain, out of which there issueth a considerable Current, of a Colour almost as red as Blood. (6.) Among the Quicksilver Mines in *Guiana-vilica*, is a Fountain of hot Water, whose Current having run a considerable way, turns at last into a soft kind of Rock, which being easily cut, and yet very lasting, is usually employ'd for building of Houses thereabouts. (7.) Nigh Cape *S. Helene*, and all along the Coast, are many Fountains of *Coppey* (a Substance resembling Pitch, and frequently us'd as such) or *Gultran* Rozin, which flow in such abundance, that Ships at Sea (out of Sight of Land) can give a shrewd Guess where they are, by the very Smell of such Fountains, provided there be a gentle Breeze from the Shore. (9.) In divers Parts of *Peru*, are still extant the

Ruins of many stately *Indian* Temples, particularly that call'd the *Pachamana* (about Four Leagues from *Lima*): And another in the City of *Cusco*, which might have been formerly accounted the *American Pantheon*, for the Idols of all Nations conquer'd by the *Inguas*, were always brought thither, and there set up. (10.) In *Peru* are divers ancient Causeways of a prodigious Length, some being reckon'd above twelve Hundred Leagues; Works that far surpass those of that nature among the *Romans*, even the famous *Via Appia*, *Æmilia*, and *Flaminia* in *Italy*. (11.) Among the *Curiosities* of this Country, we may also reckon the *Cucujus Peruvianus*, or *Lanthorn Fly*: An Insect of a considerable Bigness, and remarkable for its shining Property in the Dark (appearing as a little Lanthorn at a Distance) whereupon the Natives, when obliged to travel on Nights, do usually fasten a few of 'em to a Stick, and by their Light can clearly see their Way. We may also add those extraordinary little Birds of this Country, call'd *Tomineios* [of whom in *Brazil*] being of so small a Bulk, that they surpass not common wild Bees in bigness. And finally, those prodigious great Birds [nam'd *Candores*] who are so large and strong, that they'll set upon and devour an ordinary Calf. For all these, and several other Remarkables of *Peru*, vide *J. Acosta's Natural and Moral History of the Indies*.

Archbishops.] Here is one *Spanish Archbishoprick*, viz. that of *Lima*.

Bishops.] *Bishopricks* are those of

Cusco,
Arequipa,

Truxillo,
Guamanga,

Quinto.

Universities.] *Universities* in this Country, none.

Manners.] The Natives of this Country are reported to be a People that's, for the most part, very simple, and grossly ignorant. Those towards the Equator, are generally esteem'd more ingenious than the rest, but withal, much addicted to two most detestable Vices, viz. Diffimulation and Sodomy. The *Spaniards* here residing are much the same with those in *Spain*.

Language.] The *Language* of the Natives, did formerly consist of several quite different Dialects (or rather so many distinct Tongues, they being unintelligible to one another) but these are much diminish'd, and daily grow fewer; for the People in the lower part of this Country, being now (almost) entirely civilized, have left their ancient Jargon, and commonly use the *Spanish Tongue*.

Govern

Government.] This rich Country [by most probable Conjectures] was govern'd by its *Incas*, or Hereditary Kings, above three Hundred Years before the *Spaniards* got any footing therein ; but being fully master'd by them, Anno 1533. under the Conduct of *Pizarro*, it hath been ever since accounted a considerable Part of the King of *Spain's* *American* Dominions, and is govern'd by his Vice-Roy, who ordinarily resideth at *Lima*. In several Places, the Natives (especially those of the Mountains) maintain as yet their Liberties, and are rul'd by some particular *Cacique*.

Arms.]

Religion.] The *Peruvians* (except those converted to Christianity) are gross Idolaters, worshipping the Sun, Moon, Stars, Lightning, Thunder, &c. To each of such Deities were formerly erected in this Country very stately Temples, whose Remains are still extant in many Places, besides one almost intire, *viz.* that at *Cusco*. This Temple was dedicated to the Sun, but is now a part of the Monastery of *St. Dominick*. Its Walls were overlaid with Plates of Gold from Top to Bottom, and in it was set up a glorious Representation of the Sun, being a lively Figure of that celestial Body in pure massy Gold. Near to this Temple were four others ; one whereof was dedicated to the Moon, whom they call'd *Quilla*, reckoning her either Wife or Sister to the Sun ; another to the Planet *Venus*, which they term'd *Chasca* ; a third to Thunder and Lightning, which went by the common Name of *Yllapa* ; and a fourth to *Chuychu*, i. e. *Iris*, or the Rainbow. All of them were wonderfully enrich'd with either Gold or Silver ; and besides these were many others, through the various Provinces of this [once] mighty Empire ; but the most magnificent Temple of all *Peru*, was that splendid Piece of *Indian* Architecture in a certain Island of the Lake *Titicaca*, in which the *Incas* are believ'd to have hid a great deal of Treasure, when the *Spaniards* invaded their Country.

S E C T. VIII.

Concerning the Land of the Amazons.

This vast Country is of no certain Extent nor Division, neither hath it any remarkable Town.

Name.] THIS Country (discover'd by the Spaniards, Anno 1541. and bounded on the East by *Brazil*; on the West by *Peru*; on the North by *Terra Firma*, and on the South by *Paraguay*) is term'd by the *Italians*, *Paese di Amazona*; by the Spaniards, *Tierra de las Amazonas*; by the French, *Pais des Amazone*; by the Germans, *Yland van d' Amazones*; and by the English, *The Land of the Amazons*; so call'd from the many warlike Women (resembling the ancient *Amazons*) who appear'd in Arms upon the Banks of the River *Amazone*, at the Europeans first entring into this Country.

Air.] The Air of this Country, in Places as yet discover'd, is reported to be very temperate, considering the Latitude of the Country. The opposite Place of the Globe to the Land of the *Amazons*, is partly the Gulf of *Bengal*, and partly the *Peninsula of Malacca*.

Soil.] The Soil of this Country, it lying in the first, second, and third South Climate, where yet discover'd, is very fertile, producing great variety of Fruits and Grain. Here also are abundance of Mines, Sugar-Canes, Cocoa, and Tobacco. The longest Day in the Northmost Parts, is about 12 Hours and a little more; the shortest in the Southmost is 11 Hours, and the Nights proportionably.

Commodities.] The Commodities of this Country are reckon'd Gold, Silver, Sugar, Cocoa, Ebony, Tobacco, &c. but this Part of the World being as yet very slenderly known, and little frequented by Strangers, these may be rather reckon'd the Product, than Staple Commodities of this Country.

Rarities.] In the River *Amazone*, is a dreadful Cataract, a considerable way from the Sea; for the Water being penn'd up between two steep Rocks (under which is a hideous Precipice) the Stream fallerth down with great Violence and Noise. Yet notwithstanding this so terrible a Fall, there be many of the Natives, who, 'tis reported, are so bold, as to descend that Stream in their little Canoos. In falling they are sure to turn topsie-turvy many times, and are severely plung'd

plung'd in the Deep when down ; yet such is their Care and Nimbleness, that they quickly recover their Canoos, and forthwith proceed on their Voyage. *J. Acosta.*

Archbishopsicks, &c.] *Archbishopsicks, Bishopsicks, Universities ; none.*

Manners.] Upon the Bank of the River *Amazone* (as is hinted at already) were discover'd about fifty different Nations, who seem'd generally to be a fierce and savage sort of People ; all, both Men and Women, appearing in Arms at the first approaching of the *Spaniards* ; and they still continue as fierce and savage as formerly, and many of 'em are reported to be *Anthrophagi*, or Eaters of Human Flesh.

Language.] Our Knowledge of this (as yet) ill-discover'd Country, is so slender, and the Commerce between *Europeans* and this People so little, that we can make no Observations of the Nature and Number of their *Languages*.

Government.] How this People is govern'd (or if any Form of Government among them) is not yet very certain. A farther Enquiry into the same, must be referr'd to the better Discovery of future Ages.

Arms.]

Religion.] That the Inhabitants of this Country are in general gross Idolaters, is the most that can be said of them as yet. They are reported to make their Images of Wood, and to set them up in the Corners of their Houses (having no Temples) and do firmly believe, that those polish'd Pieces of Timber are really inhabited by some Divinities descended from Heaven, being taught the same by their Priests.

S E C T. IX.

| | Farrayba | — | |

Name.] This Country, discover'd by the *Portuguese*, Anno 1501. and bounded on the East by part of the main Ocean, on the West by *Amazonia*; on the North by *Terra Firma*, with some of the main Ocean; and on the South by *Paraguay*, and the main Ocean, is term'd *Brasil* by the *Italians*, *Spaniards*, *French*, *Germans* and *English*; but why so call'd is not certain. Those who derive the Name from the abundance of that Wood term'd by the *Europeans*, *Brasil-Wood*, which grows in this Country, do give (methinks) no satisfactory Account of the Matter.

Air.] The *Air* of this Country is generally very wholesome; and notwithstanding *Brasil* is almost intirely within the *Torrid Zone*, yet in those Parts already discover'd, 'tis exceeding temperate, being daily qualify'd by Sea-Breezes about Noon. Opposite on the Globe to *Brasil*, are the *Philippin Islands*, with part of the Eastern Ocean adjacent to them.

Soil.] The *Soil* of this Country (it lying in the 1st, 2d, 3d, 4th South Climate) is reported to be extraordinary fertile, especially in those Places already discover'd. The longest Day in the Northmost Parts

Parts is about 12 Hours and a quarter; the shortest in the Southmost, 10 Hours and an half; and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Red-wood (otherwise Brasil-wood, much us'd for Dying) in great Quantities, abundance of Sugar, as also Amber, Rozin, Balm, Tobacco, Train Oil, Confectures, &c.

Rarities.] As the principal *Rarities* of *Brasil*, we may fitly reckon the considerable Number of very strange Creatures found in that Country: The chief of which I shall here mention, and those reducible to Four general Classes, viz. *Beasts*, *Serpents*, *Birds*, and *Fishes*.
I. Of Beasts. The most remarkable of them are these following.
 (1.) *Monkeys*, particularly that sort call'd by *Europeans*, the *King's Monkey*, the biggest of the whole Species, and observable for having a thin hollow Throttle-Bone, near the upper end of the *Larynx*, by the Help of which he makes a great Noise. Here also are many *Monkeys* (of a yellowish Colour) that smell like ordinary Musk.
 (2.) The *Sloth* [term'd by the Natives *Haii*, from his Voice of a like Sound] but by most *Europeans*, *Ignavus* or *Pigritia*, and corruptedly *Pereza* by the *Spaniards*; so call'd from the Nature of that Animal, being of so slow a Motion, that he requires three or four Days to climb up a Tree of an ordinary height, and twenty four Hours to walk fifty Paces on plain Ground; his Fore-feet are almost double his Hinder in Length; and when he climbs a Tree, his Hold he takes is so sure; that while he hangs by a Branch, he can sleep securely. (3.) The *Tomanduo Guacu* [which is a great Bear] so term'd by the Natives; but commonly by *Europeans*, the *Ant-Bear*, because he usually feeds upon Ants, at least destroys those Creatures where-ever he finds them. His Tail is so big, that, Squirrel-like, he can cover his whole Body therewith. (4.) The great *Shell'd Hedge-hog*, call'd by the Natives *Tatu*, and *Armadillo* by the *Spaniards*, because he gathers himself up, Head, Feet, and Tail, within his Shell, as round as a Ball; and that as a sure Defence, when either he goes to Sleep, or is actually assaulted by any destructive Creature with whom he dares not grapple.
II. Of Serpents. The most remarkable of them, are, (1.) That call'd by the Natives *Ibibaboca*, which is about three Yards and an half long, and of a considerable Bigness; his Colours are originally White, Red, and Black, of all kinds; and his Bite is most pernicious of any, yet worketh the slowest. (2.) The *Boiguacu*, which is the biggest of the whole Species, being half a Yard in Compass about the Middle, and almost Seven Yards long. (3.) The *Boicinga*, otherwise the *Rattle-Snake*, so call'd by *Europeans*, from a Rattle in the End of his Tail, compos'd of a number of dry Bones, from Eight
 to

to Sixteen, which are hollow, thin, hard, and very sonorous. Those Persons whose Misfortune it is to be bitten by him, are tormented with exquisite Pain (their whole Body cleaving into Chops) and frequently die within twenty four Hours, in a most sad Condition. But, as a remarkable Act of the Divine Providence, this noxious Animal gives timely Warning to Travellers to avoid him, by making a great Noise with his Rattle, as soon as he hears any Person approaching towards him. III. Of *Brasil Birds*, the most remarkable are, (1.) The *Humming Bird*, which is so call'd from the humming Noise he makes with his Wings like a Bee, when he feeds, by thrusting his small Bill into Flowers. The *Brasilians* term him *Guanumbi*, and some Writers *Ouvissia*, i. e. *The Sun-Beam*, because of his radiant colour'd Feathers, with which the *Indians* adorn their Images; but the *Spaniards* call him *Tomineus*, because so small, that one of them with its Nest, weighs only two *Tominos*; a Weight in *Spain* consisting of Twelve Grains. (2.) The *Anhima*, so call'd by the Natives; but by *Europeans* the *Unicorn-Bird*, because he hath a kind of Horn growing out of his Forehead about two or three Inches long, of a brittle Substance, and blunt at the Top; and is therefore neither defensive, nor offensive to him. (3.) That call'd *Guara* by the *Brasilians*, and by *Europeans* the *Sea-Curlew*; the same with *Nu-menius Indicus*, and *Arcuata Coccinea* among *Latin* Authors, and remarkable for its Alterations of Colours; being at first Black, then Ash-colour'd, next White, afterwards Scarlet, and last of all Crimson; which grows the richer Dye the longer he lives. IV. Of *Fishes* taken upon the Coast of *Brasil*, the most remarkable are, (1.) *Orbis Minor*, or the *Globe-Fish*, so call'd from his orbicular Form; and remarkable for being arm'd with many long, round, hard, and sharp Spikes and Needles all over his Body, almost like those of an Hedge-hog. When he swims, 'tis believ'd, that he draws those Needles in, depressing them to his Body, to facilitate his way through the Water; and that he advances them at any time he happens to be pursu'd, bidding (as 'twere) the Enemy to come at his peril. (2.) Upon this Coast is frequently seen the *Icheneis* or *Remora*, a Fish very famous among the Ancients for its stupendous Power in stopping a Ship (as they imagin'd) though under Sail, and before a brisk Gale of Wind. Which strange Account was generally believ'd for many Ages, and not a few have labour'd to assign the Cause; but it is now look'd upon as a ridiculous Story, and deservedly exploded by every ordinary Traveler. These are the most remarkable Creatures, whether *Beasts*, *Serpents*, *Birds*, or *Fishes*, belonging to *Brasil*; and all (or most) of them, are to be seen in the publick Repository of *Gresham College*,
Lon-

London. As also the *Museum Regium* at Copenhagen, and several other celebrated Repositories in Europe.

Archbishopsricks, &c.] Here is one *Portuguese* Archbishoprick, viz. That of *St. Salvadore*, to whose Incumbent are subject several Suffragans, but their Number and Names are uncertain. Universities none.

Manners.] The *Brasilians* are reported to be generally a cruel, thievish, and revengeful sort of People; yet some on the Sea-Coast being civiliz'd, prove very ingenious. This vast Body comprehends several different Nations, the chief of which are the *Topinambous*, the *Margajas*, the *Tapuyes*, &c. who are ordinarily distinguish'd from one another by the wearing of their Hair. They generally go quite naked, and in many Places of the main Land are Multitudes of Cannibals. Their manner of reposing on Nights is in a kind of Net, gather'd at each End, and ty'd to two Poles fix'd fast in the Ground. This Net is made of the Rind of a certain Tree call'd *Hamack*, and hence is deriv'd the vulgar Appellation of Sea-Bedding, commonly us'd in the *English* Fleet.

Language.] The Diversity of Languages among the Natives of those Places already discover'd on the Sea Coasts, doth sufficiently evince, that their Number must be much greater in the inland Parts of this vastly extended Country. The only thing observable of those Languages upon the Sea-Coasts, is, That the Natives can't pronounce the three Letters of L, F, R. and that their manner of Pronunciation is much thro' the Throat. The *Portuguese* here residing, retain and use their own Language.

Government.] The *Brasilians* being divided (as aforesaid) into many different Nations, several of them chuse certain Captains or Governors, by whom they are ruled; others wander up and down, and live without any Order or Government among them. The *Portuguese* being Masters of almost all the Sea-Coasts since the Year 1501. and having divided them into certain Praefectures, over each of these is set a particular Governor, which Governors are all accountable to the Vice-Roy of Portugal, whose Place of Residence is ordinarily at *St. Salvadore*.

Arms.]

Reli.

Religion.] The Natives of *Brasil* are reported to entertain but a faint Notion of a Supreme Being, and a future State, and many are sunk even beneath Idolatry it self, having neither Idol nor Temple to be seen among them. Others are said to believe the Soul's Immortality; and to give some obscure Hints of an universal Deluge. Many of those who live nigh unto, and upon the Sea-Coasts, are converted to Christianity, and that by the commendable Industry of the *Portuguese*, who are of the same Religion with that establish'd in *Portugal*.

S E C T. X.

Concerning *Chili*.

| | | <i>Chili Imperial</i> — | | | | <i>Balvidia</i> — | | Sea-Coast. |
| | | <i>Chucuito</i> — | | | | <i>Mandosa</i> , | | <i>Chili Propria</i> . |
| | | | | | | East of — | | <i>Chili Imperial</i> . |

Name.] This Country discover'd by the *Spaniards*, Anno 1554, and bounded on the East by *Paraguay*; on the West by *Mare Pacificum*; on the North by *Pern*; and on the South by *Terra Magellanica*, is term'd *Chili* by the *Italians*, *Spaniards*, *French*, *Germans*, and *English*; so called (as most imagine) from a large and spacious Valley of that Name.

Air.] The *Air* of this Country, during the *Summer*, is much of the same Quality as in *Spain*, or rather more temperate, being frequently fann'd by Westerly Sea Breezes; but in the *Winter*, the Cold is so excessively piercing, that both Man and Beast do perish in great Numbers. The opposite Place of the Globe to *Chili*, is the South part of *Tartary*, between 107 and 117 Degrees of Longitude, with 25 and 44 Degrees of North Latitude.

Soil.] The Mountainous Parts of this Country (it lying in the 3d, 4th, 5th, 6th South Climate) are generally dry and barren, but in the large Valleys towards the Sea, the *Soil* is exceeding fertile, producing great plenty of Maize, Wheat, and most sorts of other Grain, as also Variety of Herbs and Fruits; and the Vines brought hither from *Spain*, do prosper extraordinary well. This Country affordeth likewise some rich Mines of Gold and Silver. The longest Day in the Northmost Parts, is about 13 Hours and an-half; the shortest in the Southmost, is 7 Hours and an-half, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country, are Gold, Silver, Maize, Corn, Honey, Qstridges, and several Metals.

Harr.

Rarities.] In *Chili* is a very remarkable Bird, call'd *Cuntur* (corruptedly *Condor* by the *Spaniards*) which is of a prodigious Size, and extremely ravenous. He frequently sets upon a Sheep or Calf, and comes down with such Force, that his Blow is always mortal, and not only kills, but is also able to eat up one of 'em entirely. Two of 'em will dare to assault a Cow or Bull, and usually master them. The Inhabitants of this Country are not free from such Attempts; but Nature hath so order'd, that this destructive Creature is very rare, the whole Country affording only a very small Number, otherwise not to be inhabited. Vide J. Acofta's *Natural and Moral History of the Indies*.

Archbifhopricks, &c.] *Archbifhopricks, Bifhopricks, Universities,* none.

Manners.] The Natives of this Country, being of a white Complexion, and tall of Stature, are a very warlike and courageous sort of People, especially the *Araucques*, who are as yet unconquer'd by the *Spaniards*. For Cloathing, they use nothing else than the Skins of wild Beasts.

Language.] The prevailing *Language* of this Country, is the *Spanish*, which is not only in use among the *Spaniards* themselves, but also is currently spoken (at least understood) by the Plurality of the Natives. Those of 'em who entertain little Commerce with the *Spaniards*, retain still their own Jargon, as in ancient Times.

Government.] The Natives (where they maintain their Freedom as yet) are rul'd by certain Captains of their own chusing; but this Country being invaded, and taken Possession of by the *Spaniards*, above an hundred Years ago, is mostly subject to the Crown of *Spain*, and rul'd by a particular Governor, residing at *Conception*, in Subordination to the Vice-Roy of *Peru*.

Arms.]

Religion.] The Natives of this Country (excepting those converted to Christianity) are generally reckon'd the grossest Idolaters of all the *Americans*, the chief Object of their Worship being the Devil, whom they term *Eponamon*, which signifies *Strong* or *Powerful*. The *Spaniards* here residing, are *Roman Catholicks*, as in the Kingdom of *Spain*.

S E C T. XI.

Concerning Paraguay.

| | | | | | | |
|--|---|---------------------|------------|---|---------------|-------------------------------------|
| Paraguay divided into several Provinces, the best known of which are | { | Guayra ——— | Chief Town | { | Ciudad Real — | E. to W. on the Br. of Rio de Plat. |
| | | Paragaita Propria — | | | Villa Rica — | |
| | | Chaco ——— | | | Conception — | |
| | | Tucoman ——— | | | St. Fago — | |
| | | Rio de la Plata — | | | Assumption — | |

Name.] THIS Country (discover'd first by *John Dias de Solis*, and afterwards taken Possession of by the *Spaniards*, Anno 1546. and bounded on the East by part of the main Ocean; on the West by *Chili*; on the North by the Land of the *Amazons*, and part of the main Ocean) is term'd by the *Germans*, *Paraguaiti*; by the *Italians*, *Spaniards*, *French*, and *English*, *Paraguay*; so call'd from a River of the same Name. It's also call'd *Rio de la Plata* by the *Spaniards*, because of the abundance of Silver they found therein.

Air.] The Air of this Country is generally reported to be very temperate, and abundantly healthful to breathe in. The opposite Place of the Globe to *Paraguay*, is that part of the Kingdom of *China* and the *Mogul's* Empire, between 112 and 144 Degrees of Longitude, with 18 and 37 Degrees of North Latitude.

Soil.] The Soil of this Country (it lying in the 2d, 3d, 4th, and 5th South Climate) is esteem'd to be very fertile in most Places, producing abundance of Corn, Wine, Fruits and Herbs, and here also are several considerable Mines. The longest Day in the Northmost Parts is about 13 Hours: the shortest in the Southmost, is 10 Hours and an half, and the Nights proportionably.

Commodities.] The chief *Commodities* of this Country (at least the Product thereof) are reckon'd to be some Gold, Silver, Brass, Iron, Sugars, Amethysts, &c.

Rarities.] Upon *Rio de la Plata* are frequently seen, and sometimes kill'd divers kinds of Serpents of a prodigious bigness. (2.) Towards the Northern Parts of *Paraguay*, is a certain Champaign Country, about six Leagues square, which is all overspread with an excellent sort of Salt, and that to a considerable Height. (3.) In the Western Parts of *Tucuman*, is a prodigious high and large Mountain, which for its wonderful Glistering in a clear Sun-shine Day, is call'd the *Crystal Mountain*. Under it is extended a hideous Cave-Passage, through which doth glide a considerable Current of Water, with so many Windings and Turnings, that from the Time of its Entry under the Mountain, to its issuing forth on the other side, is almost the space of Twenty four or Thirty Hours, according to the Computation of some *Portuguese*, who were so adventurous as to make the Experiment, and that by hazarding their Persons upon a Raft made of Canes. *Vide Purchas's Pilgrims*, Par. 4. Lib. 6.

Archbishopricks.] Here is one *Spanish Archbishoprick*, viz. that of *Rio de la Plata*.

Bishopricks.] To the *Archbishoprick* of *Rio de la Plata*, are several *Suffragans*, viz. those of

St. Jago de Lesterio, *Assumption*, *Panama*, *Paraguay*.

Universities.] As for *Universities*, here are none.

Manners.] The *Paraguayans*, though Persons of very big and tall Bodies, are nevertheless reported to be very nimble, and much given to Running. They are said to be somewhat laborious, and less savage than many others of the adjacent Nations, yet a little inclin'd to a revengeful Humour against those who chance to wrong them.

Language.] All we can learn of the *Language* mostly in use among the Natives, is in general, that 'tis a very harsh and unpleasant *Jargon*, as the Plurality of the *Indian Tongues* are. The *Spaniards* here residing do commonly use their own *Language*.

Government.] The Natives of this Country (according to our latest Account) are in a great part subject to their own Captains or *Caciques*,

Caciques, whom they chuse among themselves, and under whose Conduct they go out to War. A considerable part of this Country doth belong to the King of *Spain*, who ordinarily keepeth one Governot at *St. Fago* in *Tucuman*, and another at *Assumption* in *Rio de la Plata*, both of 'em being answerable to the Vice-Roy of *Peru*.

Arms.]

Religion.] The Natives of this Country are generally gross Idolaters, yet 'tis reported of 'em, that they're more capable of learning our *Arts* and *Religion*, than most of the other *Americans*. And some speak of a Tradition spread among 'em, importing, That certain Priests shall come into their Country, and instruct them of a new Religion, whereby they shall be most happy in another World. The *Spaniards* here residing, are (as in *Spain*) rigid Papists.

S E C T. XII.

Concerning Terra Magellanica.

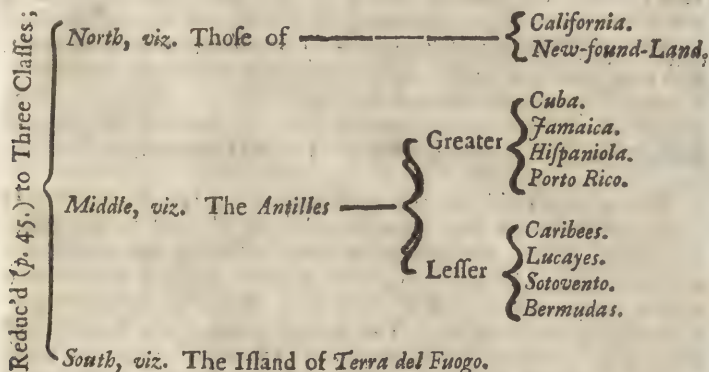

THIS Southmost part of the Continent of *South America* (call'd also *Regio Patagonum*) derives its Title from *Ferdinand Magellan*, a *Portuguese*, who made the first Discovery thereof, Anno 1519. as also of that famous Streight which still bears his Name, he being the first (for ought we know) that ever pass'd through the same. Many Things (equally frivolous as ridiculous) are related of this Country and its Inhabitants, with which I shall neither trouble my self nor the Reader, but proceed to

S E C T. XIII.

Concerning *Terra Antarctica*.

BY *Terra Antarctica*, we understand all those unknown or scarcely discover'd Countries towards the Southern Parts of the Globe; the chief of which do bear the Names of *New Guinea*, *New Zeland*, *New Holland*, and (which may comprehend these and all the rest) *Terra Australis Incognita*. Which Southern Countries, tho' they belong not to the Continent of *America*, yet we chuse to mention 'em in this Place, since the Southmost Part of the Continent of *South America* doth extend it self farther towards the South, than any Part or Head-land of the old Continent. What was said of the Northmost Countries [Sect. 5.] under the Title of *Terra Arctica* (viz. that our Knowledge of them did reach little farther than their bare Names) so the same may be affirm'd of those that bear the Title of *Terra Antarctica*. Leaving them therefore to the better Discovery of future Ages, we pass on to

S E C T. XIV.

Concerning the American Islands.

Of which Islands distinctly, and in their Order. Therefore,

§ 1. *California.*

THIS Island was formerly esteem'd a *Peninsula*, but now found to be intirely surrounded with Water. Its North Part was discovered by Sir *Francis Drake*, Anno 1577. and by him call'd *New Albion*; where erecting a Pillar, he fasten'd thereto the Arms of *England*. The inland Parts thereof were afterwards search'd into, and being found to be only a dry, barren, cold Country, *Europeans* were discourag'd from sending Colonies to the same, so that it still remains in the Hands of the Natives: And there being nothing remarkable relating either to them or it, we shall proceed to,

§ 2. *New-found-Land.*

NAME.] **T**HIS Island (discover'd first by the Two *Cabots*, at the Charge of *Henry* the 7th of *England*, Anno 1497. but more particularly by *Thorn* and *Eliot* of *Bristol*, Anno 1527. and the *English* Title thereto being renew'd in the Name of *Queen Elizabeth*, Anno 1583. a Colony was settled therein about 30 Years afterwards)

is term'd by the *Italians*, *Terra Novella* ; by the *Spaniards*, *Tierra Nueva* ; by the *French*, *Terre Nueve* ; by the *Germans*, *New-funden-Land* ; and by the *English*, *New-found-Land* ; the Derivation of which Name is sufficiently expreſs'd in the Name it ſelf.

Air.] Notwithstanding this Iſland is ſituated between the Parallels that paſs thro' the Southern Part of *England*, and Northern of *France*, yet the *Air* thereof doth extremely differ from that in either of theſe Countries, it being ſubject to a greater Exceſs of Heat in the Summer, and more pinching Cold in the Winter, than commonly happens in them. The oppoſite Place of the Globe to *New-found Land*, is that part of *Terra Auſtralis Incognita*, between 122 and 127 Degrees of Longitude, with 47 and 51 Degrees of South Latitude.

Soil.] This Iſland, for the moſt part, is overſpread with Woods which are but ſlowly cut down, becauſe the Country is very thinly inhabited. Where the Ground is already clear'd, the *Soil* is not altogether deſpicable, affording Variety of Roots, and ſeveral ſorts of our *English* Grain ; and thoſe Parts poſſeſs'd by the *French* produce ſome plenty of Vines. This Iſland is ſufficiently ſtock'd with Deer, Hares, Otters, Foxes, &c. Here alſo are abundance of Land and Water-Fowl ; but above all Things, its Coaſts are ſurrounded with incredible Multitudes of Cod-Fiſh. The length of the Days and Nights in *New-found-Land*, is the ſame as in the Southmoſt Parts of *England*, and Northern of *France*, they all lying under the ſame Parallels of Latitude.

Commodities.] The *Commodities* of this Iſland, are principally Furs, Whale-Oil, and Cod-Fiſh, eſpecially the latter, whereof there is ſuch plenty, that the fiſhing and bringing of them to *Europe* (particularly the *Streights*) is now grown to a ſettled and very advantageous Trade.

Rarities.] Nothing here deſerves the Epithet of *Rare*, unleſs we reckon that prodigious large Bank of Sand upon the South-Eaſt of the Iſland (about 300 Miles in Length, and upwards of 75 in Breadth, where broadest) remarkable for thoſe vaſt Multitudes of *Bacalaos* (or Cod-fiſh) and *Poor John*, which are taken in great Numbers by divers *European* Nations, who yearly reſort hither for that end. So thick do theſe Fiſhes ſometimes ſwarm upon this Bank, that they retard the Paſſage of Ships ſailing over the ſame.

Archbiſhopricks, &c.] *Archbiſhopricks*, *Biſhopricks*, *Universities* ; none.

Manners.] The Natives of this Island are (for the Plurality of 'em) Persons of a middle Stature, broad-fac'd, and those of the masculine Sex are usually beardless. They generally colour their Faces with Oker, and for Cloathing use Skins of wild Beasts. They live by Ten or Twelve Families together, in poor Cabins made of Poles, in form of our Arbors, and cover'd with Skins. They ordinarily employ themselves in Hunting, as most of the *Americans* usually do. The *English* and *French* here residing, are much the same with those in *Europe*.

Language.] All that can be said of the *Language* here commonly us'd among the Natives, is, That 'tis a certain Dialect of the *Indian* Tongue, which prevails among all the *Indian* Inhabitants, with little Variation of Accent in the various Parts of the Island. The *Europeans* here residing, do still retain the maternal Language of the respective Countries from whence they came.

Government.] In the Year 1623. Sir *George Calvert*, principal Secretary of State, having obtained a Patent for a part of *New found-Land*, erected the same into a Province [call'd *Avalon*] and therein settled a Plantation; which after him was enjoy'd by his Son *Cecilius* Lord *Baltimore*. This Island was set upon, and master'd by the *French* in the late tedious War, but speedily retaken by the *English*, who are now in full Possession of what they formerly enjoy'd.

Arms.]

Religion.] The Natives of this Island (upon its first Discovery) were found to acknowledge a Supreme Being, whom they own'd as the Creator of all Things; but err'd extremely in their Apprehensions about the manner of their Creation: Alledging, That Men and Women were at first made of a certain Number of Arrows stuck fast in the Ground. They generally believe the Immortality of the Soul, and that the Dead go into a far Country, there to make merry (as they think) with their Friends.

§ 3. Cuba.

Name.] THIS Island, discovered by the *Spaniards*, Anno 1494. is term'd by the *Italians*, *Spaniards*, *French*, *Germans*, and *English*, *Cuba*. Which Name is the same it had when first discover'd, being so call'd by the Natives and neighbouring Islanders; what may be the Etymology of that *Indian* Appellation, we know not.

Air.] The *Air* of this Island (considering its small Latitude) is very temperate, being mightily qualified by Vapours that daily ascend from the Earth. The opposite Place of the Globe to *Cuba* is that part of the *East-Indian* Ocean, lying between 97 and 105 Degrees of Longitude, with 19 and 23 Degrees of South Latitude.

Soil.] This Climate (lying in the same Climate with the Northern Part of *New Spain*) is not so fertile in Grain as Wood, being generally cover'd over with Trees, some of which do drop the purest *Rozin*: Here is great plenty of Fish and Flesh; and in some Parts are divers kinds of excellent Fruits. The length of the Days and Nights in *Cuba*, is much the same as in the North of *New Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island, are Gold, Ginger, Cassia, Mastick, Aloes, Cinamon, Sugar, &c.

Rarities.] The most remarkable Thing in this Island, is a noted bituminous Fountain, out of which there flows a sort of pitchy Substance, commonly us'd for calking of Ships. Here is also a Valley full of Flint-stones of different Sizes, and those by Nature so round, that they may serve as Bullets for most sorts of Cannons. *Vide Heylin's Cosmog.* Page 1079.

Archbishopsricks, &c.] In this Island is one *Bishoprick*, viz. that of *St. Jago*, Suffragan to the *Archbishop* of *St. Domingo* in *Hispaniola*.

Manners.] The Inhabitants of this Island, being for the most part *Spaniards*, are the same in *Manners* with those on the Continent.

Language.] The *Spaniards* here residing, do still retain, and commonly use the *Spanish* Tongue.

Government.] This Island was formerly govern'd by certain *Caciques*, or Captains; but is now wholly subject to the King of *Spain*, who still keeps a particular Governor in it, whose ordinary Residence is in that great and populous City *Havana*.

Arms.]

Religion.] The *Spaniards* here residing, are of the same Religion with that establish'd and universally profess'd in *Spain*.

§ 4. *Jamaica.*

Name.] **T**His Island (first discover'd by *Columbus*, in his Second Voyage to *America*, and brought into Possession of the English by *Penn* and *Venables*, in the Time of *Oliver Cromwell*) is term'd *Jamaica* by the *Italians*, *Spaniards*, *French*, *Germans*, and *English*. It was at first call'd *St. Jago* by *Columbus*, which Name was afterwards chang'd to that of *Jamaica* (after King *James*, then Duke of *York*) when it had been subjected for some time to the Crown of *England*.

Air.] The Air of this Island is more temperate than in most of the Neighbouring Islands, the Heat thereof being much allayed by fresh Easterly Breezes that blow in the Day-time, and the frequent Showers that fall in the Night. Hurricanes and Earthquakes (so frequent in the *Caribees*) are seldom heard of here; whereupon we may justly impute that terrible Earthquake [*Annō 1692.*] rather to a Moral than a Natural Cause, viz. The many and horrid Abominations abounding among the Inhabitants, which, without doubt, did loudly call for Judgments from Heaven. The opposite Place of the Globe to *Jamaica*, is part of the *East Indian Ocean*, lying between 102 and 105 Degrees of Longitude, with 18 and 19 Degrees of South Latitude.

Soil.] The Soil of this Island is extraordinary rich and fertile, producing great Quantities of Corn, Herbs, and Fruits; abounding also in Sugar, Cotton, Tobacco, various kinds of Spices, with divers sorts of Physical Drugs and Gums, as *Sumach*, *Guaiacum*, *Aloes*, *Benjamin*, *Sarsaparilla*, &c. The large and pleasant Fields appear constantly green and springing, they being well stock'd with variety of Trees and Plants, which are never disrob'd of their Summer Liveries. Here likewise are several Rivulets, and those affording many excellent Fish, especially Tortoise. The Length of the Days and Nights in *Jamaica*, is the same as in the middle Provinces of *New Spain*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island, are Cocoa, Sugar, Indico, Cotton, Tobacco, Hides, Copper, Piemento, or *Jamaica Pepper*, Tortoise-shells, Wood for Dyers, and several sorts of Drugs, &c.

Rarities.] This Island is furnish'd with some Springs of Mineral Waters; particularly two, whereof one is sulphurous, and the other salt;

salt; but both approved of for the common Distempers of the Place. (2.) In divers Parts of *Jamaica* grows that Fruit, call'd the *Machinel Apple*, which is very beautiful to the Eye, of a pleasant Smell and Taste, yet mortal if eaten; whence some term it the *Eve-Apple*. (3.) Here are many shining Flies (a kind of *Cantharides*) appearing of a green Colour in the Day-time, but shining in the Night with such a Lustre, that one may see to read by their Light. (4.) Of all Creatures belonging to this Island, the most remarkable is the *Allegator*, that destructive Animal, commonly harbouring in or near to Rivers and large Ponds, and may very fitly be reckon'd the *Jamaican Crocodile*. Although he be a very big Creature, about ten, fifteen, or twenty Foot in Length, yet he's hatch'd of an Egg not larger than that of a *Turkey*. His Back being full of hard Scales, is impenetrable, whereupon it is a difficult matter to kill him, unless he receive a Wound in the Eye or Belly. He is an amphibious Animal, and to enable him either to walk upon dry Ground, or swim in the Water, Nature hath furnish'd him both with Feet and Fins. In moving on the Land he's very swift (provided his Course be straight forward) but extremely slow in turning, and therefore easily avoided. Lastly, In *Jamaica* are produc'd some rare Plants, much regarded by the inquisitive *Botanist*. But for a particular Account of them, and all others, found both in this, and several of the *Caribee* Islands, I refer the Reader to a curious Catalogue, publish'd some Years ago, by that great Promoter of Natural Knowledge, the ingenious Dr. *Sloane*.

[*Archbishopricks, &c.*] *Archbishopricks, Bishopricks, Universities*, none.

[*Manners.*] The Inhabitants of this Island being *English*, are much the same in *Manners* with those in the Kingdom of *England*, only with this Difference, that the Generality of 'em are somewhat more viciously inclin'd, a Thing too common in most of our Western Plantations.

[*Language.*] This Island being entirely inhabited by *English*, they retain, and still use, their own native *Language*.

[*Government.*] *Jamaica* is wholly subject to the Crown of *England*, and rul'd by a particular Governor, sent thither by His Majesty the King of *Great Britain*. The Laws by which they are govern'd, are (as near as can be) those of *England*. Here they have several Courts of Judicatory for hearing and determining of all Causes between Man and Man; and for the better Assistance of the Governor, he is furnish'd with his Council to consult with, when occasion requires.

[*Arms.*]

Arms.]

Religion.] The Inhabitants of this Island are of the same Religion with that publickly profess'd, and by Law establish'd in England; excepting the *Negroe Slaves*, who (both here, and in other Islands of the *English* Plantations) are still kept in woful Ignorance; which is undoubtedly a grievous Scandal to our Holy Profession in general, and an abominable Shame to their respective Masters in particular: But let such Masters know, That the Time is coming, when the [now] despis'd Souls of those toiling Slaves will certainly be requir'd at their Hands.

§ 5. *Hispaniola.*

Name.] **T**his Island (discover'd by Columbus, Anno 1492.) is term'd by the *Spaniards*, *Espaniola*; by the *French*, *Espagnole*; by the *Italians*, *Germans*, and *English*, *Hispaniola*; so call'd by the first Planters therein, viz. the *Spaniards*, as a Diminutive of their own Country.

Air.] The Air of this Island is much inferior to that in *Jamaica*, being much infested with Morning Heats, which would be intolerable, were they not allay'd by some cooling Breezes in the Afternoon. The opposite Place of the Globe to *Hispaniola*, is that part of the *East-Indian* Ocean, lying between 105 and 112 Degrees of Longitude, with 17 and 20 Degrees of South Latitude.

Soil.] This Island is blest'd with an extraordinary rich and fertile Soil. The Trees and Meadows in it are still so green, that we may truly say, it enjoys a continual Spring. Herbs and Fruits are said to ripen in Eighteen Days, and so rich and fruitful is the native Turf, that of several Grain, the common Increase is an Hundred-fold. Here is abundance of Palm-Trees, of a prodigious Height and Bigness, in whose Body an Incision being made near the Top, from thence doth flow a Liquor, usually call'd *Palm-Wine*, which being kept for some time, fermenteth, and becometh very strong. Here is also abundance of those Trees term'd *Cabbage-Trees*, because their Tops resemble *European Cabbage*, and are commonly us'd as such by the *Spaniards*. This Island is likewise stock'd with good store of Sugar-Canes, and some rich Mines of Gold. The Length of the Days and Nights in *Hispaniola*, is the same as in the middle Provinces of *New Spain*, they both lying under the same Parallels of Latitude.

Commo,

Commodities.] The chief *Commodities* of this Island, are Cattle, Hides, Cassia, Sugar, Ginger, Cochineel, Guaiacum, &c.

Rarities.] In this Island is some store of *Genippa-Trees*, whose Fruit (about the Bigness of a Man's two Fists) being press'd before thorough ripe, affords a Juice as black as Ink, and fit to write withal, did it not disappear entirely in nine or ten Days. (2.) Here grows another Tree, call'd *Mananilla* or *Dwarf-Apple-Tree*, whose Fruit is of so venomous a quality, that if any Person eat thereof, he's instantly seiz'd with an unquenchable Thirst, and dies raving mad in a short time. (3.) Of the many Insects belonging to this Island, the Glow-worm (term'd by the *Spaniards* *Cochinillas*) is most remarkable, and that chiefly for two little Specks on his Head, which by Night give so much Light, that if a Person lay three or four of those Creatures together, he may see to read the smallest Print. (4.) In *Hispaniola* are Spiders, about the Bigness of an ordinary Hen's Egg, having Legs as long as Sea-Crabs of a middle Size. They are hairy all over, and have four black Teeth like Rabbits, and commonly bite very sharply, but are not venomous. (5.) Most remarkable of all Creatures in this Island, is the *Cayman* (commonly reckon'd the *Crocodile* of *Hispaniola*) which being an Animal of a prodigious Bigness, is much noted for his rare Subtily in catching his Prey; for lying upon a River-side, he so gathereth his Body together, that in Form he resembles exactly the large Trunk of an old Tree. In which Posture he continues, till Cattle, or other Creatures, come to the River to drink, when, to their surprize, he suddenly springs up and assaults them: And (to enhance the Wonder) this strange Creature is said to use yet a more strange Stratagem to effect his End, for Travellers generally affirm of him, That before he lays himself (as aforesaid) upon the River-side, he's employ'd for some time in swallowing down several hundred weight of small Pebble-stones; by which additional Weight of his Body, he can keep a faster hold of his Prey, and be the sooner able to draw it into, and dive with it under Water. *Vide late History of the Buccaneers in America*, Part I. Cap. 4.

Archbishopricks, &c.] Here is one *Archbishoprick*, viz. that of *St. Domingo*. Suffragan to whom are *St. Jago* in *Cuba*, *St. John de Port-Rico*, and *Coro* in *Terra Firma*.

Universities.] *Universities*, none.

Manners.] The Inhabitants of this Island (being mostly *Spaniards*, with some *French*) are the same in *Manners* with those on the Continent.

Lanc

Language.] The Inhabitants of this Island being *Spaniards* and some *French* (as aforesaid) do still retain and use their respective maternal Tongues.

Government.] This Island being wholly subject to the Crown of *Spain* (except the Western Parts now possess'd by the *French*) is rul'd by a particular Governor, appointed by his Catholick Majesty, whose Power doth extend it self over all the *Antilles* belonging to *Spain*.

Arms.]

Religion.] The Inhabitants of this Island, whether *Spaniards* or *French*, are of the same *Religion* with those on the old Continent.

§ 6. Porto-Rico.

THis Island was term'd *S. Johannis Insula* by *Columbus*, at his first Discovery thereof, and *Boriquen* by the Natives, but now *Porto-Rico*, from its chief City and Haven of that Name. The *Soil* is tolerably good in many Parts, and *Air* abundantly temperate, except those Months immediately before and after the Summer and Winter Solstice. From hence are exported Sugar-Canes, Ginger, Cassia, and good store of Hides. Here grow divers remarkable Trees, and some poysonous Shrubs upon the Sea-side. The whole Island belonging to the Crown of *Spain*, is ruled by a particular Governor sent thither by his Catholick Majesty; and the Inhabitants thereof being *Spaniards*, are the same in *Manners*, *Language*, and *Religion*, as elsewhere, either upon the Old or New Continent.

§ 7. The Caribee Islands.

THe Caribees are reckon'd that goodly Company of Islands, beginning at the East of *Porto-Rico*, and reaching South wards almost to *Terra Firma*. They derive their Appellation from the Nature of their Inhabitants, who (when first discover'd) were generally *Cannibals*, the Name *Caribees* being of the same Importance. Taken all together, they come nearest in form to the Segment of a great Circle, and are in number about Thirty; the chief of which [proceeding from North to South] with their present Possessors, are as follow :

| | | |
|----------------------|-------------------------|---|
| Anguila ——— | At present possess'd by | The English, but little esteem'd. |
| St. Martin ——— | | The French and Dutch. |
| Sancta Crux ——— | | The French. |
| Barbada ——— | | The English, but of small Account. |
| St. Christophers ——— | | The English and French. |
| Nevis or Mevis ——— | | The English. |
| Antego ——— | | The English. |
| Montserrat ——— | | The English, but mostly inhabited by Irish. |
| Gnadalupa ——— | | The French. |
| Marigalant ——— | | The French. |
| Dominica ——— | | The English and Natives. |
| Martinico ——— | | The French. |
| Barbadoes ——— | | The English. |
| St. Lucia ——— | | The French. |
| St. Vincent ——— | | The English and Dutch, especially the latter. |
| Grenada ——— | | The French. |
| (Tabago ———) | | The English. |

Of all the *Caribee* Islands belonging to the *English*, the most remarkable (upon several Accounts) is *Barbadoes*. Of it therefore in particular,

BARBADOES.

Name.] **T**His Island is term'd by the *Spaniards*, *Barbadas*; by the *French*, *Barbade* or *Barboude*; by the *Italians*, *Germans*, and *English*, *Barbadoes*; but why so call'd we can give no Account, the Name being an *Indian* Appellation. It was discovered in the Reign of King *James I.* by Sir *William Curten*, driven upon its

its Coasts by Strefs of Weather. Meeting with no Inhabitants at his Arrival, and finding the Nature of its Soil to be inviting, the *English*; upon his Return, sent some Planters thither, who, for want of Trade, were reduc'd to great Extremity, till about the Year 1627. when they began to plant it to purpose.

Air.] The *Air* of this Island is very hot and moist, especially for Eight Months, yet in some measure qualified by cold Breezes of Wind, which rising with the Sun, blow commonly from the North East by East, unless there happens a *Turnado*, and grow fresher as the Sun mounteth up. The opposite Place of the Globe to *Barbadoes*, is part of the *East-Indian* Ocean, between 118 and 119 Degrees of Longitude, with 18 and 19 Degrees of South Latitude.

Soil.] This Island (not above eight Leagues in length, and five in breadth, where broadest) is bless'd with a *Soil* wonderfully fertile. Generally taken, 'tis not above One or Two Foot thick. Yet that small Depth of Earth resembles, in a manner, one continued hot Bed, being almost every where grounded with white spongy Lime-Stones, which retain and reflect the Solar Heat, piercing through the over-spreading Mould. Whereupon the Island beareth Crops all the Year round, and its Trees, Plants, and Fields, appear always green. But in this and the Island *Jamaica*, were formerly Mountain Cabbage-Trees of a prodigious Height. The Length of the Days and Nights in *Barbadoes*, is the same as in those Parts of *New-Spain*, lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of this Island, are Sugars, Indico, Cotton-Wooll, Ginger, Log-Wood, Fustick, *Lignum-Vitæ*, &c. and those in such abundance, that some Hundred Sail of Ships do Yearly receive their Loadings here.

Rarities.] In the Island of *Barbadoes* are Ants of a very big size, who build their Nests with Clay and Lome, against the Body of a Tree, or Wall of an House; and that to the bigness of ordinary Bee-hives, and those divided into a great many Cells. (2.) Here are some Snakes of a considerable Length and Bigness, that frequently slide up and down the Wall of an House, and out of one Room into another, with wonderful Agility of Body. (3.) The Water of that Rivulet (commonly call'd *Tugh-River*) hath upon its Surface in many Places a certain Oily Substancè, which being carefully taken off, and kept a little time, is fit to burn in Lamps like ordinary Oil. (4.) Here are divers large and hideous Caves (some of which are big enough to contain Five Hundred Men) and several remarkable Trees, particularly the *Calibah*, *Palmete*, *Roucou*, and that which goes by the vulgar Name

Name of the *Poyson-Tree*. (5.) Among some rare Insects to be seen upon this Island, we may reckon those small Flies (term'd *Cayonyou*) most observable, and that chiefly for their Wings, which give a mighty Lustre in the Night-time while they fly.

Archbishopricks, &c.] Archbishopricks, Bishopricks, Universities; none.

Manners.] The Inhabitants of this Island (excluding the *Negroes*) being mostly *English*, are much the same in Behaviour and Manners of living; with those here in *England*.

Language.] What was said of the Inhabitants in respect of *Manners*, the same may be affirm'd of them in point of *Language*. As for the *Negroes*, the generality of them (if any considerable Time upon the Island) do also understand and speak *English*.

Government.] This Island belonging to the Crown of *England*, is rul'd by a particular Governor appointed and sent hither by his Majesty the King of *Great Britain*. He with his Council do discuss all Matters of Importance, and the better to quell any Insurrection that may be made (especially by the *Slaves*) he still keeps a standing Militia, consisting of two Regiments of Horse, and five of Foot, always in readiness upon a Call. The Laws by which this Island is govern'd, (except some *By-Acts*, which immediately concern the Plantation) are the same with those of *England*. The Island being divided into four Circuits, in each of them is establish'd an inferior Court of Judicatory for hearing all manner of Civil Causes; from which Courts Appeals may be made to the Supreme Court: And for due Administration of Justice in Criminal Matters, here are yearly held Five Sessions. When there appears a real Necessity of making new Laws (which must never contradict those of *England*) or abrogating old ones, the Governor calls an Assembly for that end. This Assembly resembles in some manner our *English* Parliament; for the Governor being reckon'd Supreme, those of his Council are as so many Peers; and Two Burgesses chosen out of each Parish, represent the Body of the People.

Arms.]

Religion.] The *English* here residing, make Profession of the same Religion, with that generally own'd, and by Law establish'd in *England*. As for the *Negro-Slaves*, their Lot hath hitherto been, and still is, to serve such *Christian* Masters, who sufficiently declare what Zeal they have for their Conversion, by unkindly using a serious Di-

vine

vine some time ago, when only proposing to endeavour the same. I'm very sensible of a vulgar Opinion hitherto current among our *English* Planters, viz. That *Slaves* do cease to be *Slaves* when once baptiz'd. But how current soever such an Opinion hath hitherto been, and may still obtain with some, 'tis but a groundless Imagination, and a vulgar Error at best. For there's no Law either in the Old or New Testament against *Slavery* in general; nor any Inhibition of *Christian Slaves* in particular, in the whole Body of the Civil Law, so far as I can learn from those whose Studies bend that way. Besides, If *Onesimus* was a *Slave* (as all agree) would not *St. Paul* in his Epistle have told *Philemon*, That 'twas against the *Christian Law* to keep such? But we find, that the Strain of that Epistle runs otherwise.

§ 8. The *Lucayes*.

THE *Lucayes* (so call'd from *Lucayone*, the biggest of 'em all) are those several Islands lying North of *Cuba* and *Hispaniola*. They belong mostly to the *Spaniards*, and the chief of them

| | | | | | |
|--------------|---|--|----------|---|---|
| Are those of | { | | aliter { | } | Extended from the E. of <i>Tegesta</i> in <i>Florida</i> , to the North of <i>Hispa- niola</i> . |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |
| | { | | | | |

Of these Islands, *Bahama* may be reckon'd the most remarkable, and that chiefly for the famous rapid Channel between that Island and the Main, through which the *Spanish Fleets* usually pass in their Return from *Mexico* to *Europe*; a Passage equally fatal to the *Spaniard*, as fortunate to the *English*: Fatal to the former for some dreadful Shipwrecks sustain'd therein; and fortunate to the latter, for vast Quantities of Plate recover'd by skilful Divers. This Island is also observable for several uncommon Insects found upon it, particularly the *Babaria Spider*, already mention'd, Page 351.

§ 9. The Sotovento.

THE Sotovento Islands, are those lying along the Northern Coast of Terra Firma. They belong mostly to the Spaniards, and receiv'd the Title Sotovento (*quasi sub vento*) from them, because they appear to the Leeward of their Fleet coming down before the Wind to enter the Gulf of Mexico. The chief of such Islands

| | | | |
|--------------|-----------|---|---------------------|
| Are those of | Trinidad | } | Found from E. to W. |
| | Margarita | | |
| | Tortuga | | |
| | Orchilla | | |
| | Rocca | | |
| | Bonayre | | |
| | Curacao | | |
| | Oruba | | |

Trinidad (term'd by the Natives *Samsonate*) is observable for being a noted Place of Bartery between the Inhabitants of New Spain, and those of Peru. And Margarita is much frequented upon the account of Pearl Fishery, from whence it derives its Name. The rest are not of any great moment.

§ 10. Bermudas.

NAME.] THIS little Cluster of Islands (lying about five Hundred Leagues East of Florida) is term'd by the Italians, *Bermuda*; by the French, *Bermudes*; by the Spaniards, Germans, and English, *Bermudas*; so call'd, from one John Bermudas, a Spaniard, who made the first Discovery of them. They are otherwise term'd the Summer Islands, from Sir George Summers, an Englishman, who suffer'd Shipwreck near to them, Anno 1609.

Air.] The Air of these Islands is reckon'd extraordinary healthful to breathe in, the Sky being almost always serene and smiling. But when overcast at any Time, then they're sure of a terrible Tempest, attended with frightful Claps of Thunder, and Flashes of Lightning. So healthful are these Islands to breathe in, that their Inhabitants (now in number about four or five Thousand) are seldom visited with Sickness, and generally arrive to a good old Age. The opposite Place

Place of the Globe to *Bermudas*, is that part of the *East-Indian* Ocean lying between 113 and 114 Degrees of Longitude, with 32 and 33 Degrees of South Latitude.

Soil.] The *Soil* of these Islands has been hitherto reckon'd very rich and fertile, yielding the Labourer two Crops a Year; and the arable Ground is of such an excellent Mould, that it affords neither Sand, Flints, Pebbles, nor Stones so hard as are fit to grind Knives. But how rich and plentiful soever these Islands have been heretofore, they are now upon the declining Hand, and grow apace both poor and barren. For which is commonly assign'd a two-fold Reason, *viz.* (1.) The Fall of their *Cedars*, which formerly did shelter their Fruit from hurtful Winds, whereas now they're continually blasted. (2.) A certain Worm or Ant, which has lately bred so much among them, as to consume the greatest part of their Corn. The Length of the Days and Nights in *Bermudas*, is the same as in the Northmost Parts of *Florida*, they both lying under the same Parallels of Latitude.

Commodities.] The chief *Commodities* of these Islands, are Oranges, *Cochineel*, Tobacco, Cedar-Wood, some Pearls, and Ambergris in considerable Quantity, &c.

Rarities.] Observable are these Islands for nourishing no venomous Creature, none such being found upon them, nor able to live if brought thither. Here indeed are many Spiders, but those no ways poisonous, and very remarkable for their Webs, having the Resemblance of Raw Silk, and woven so strong, that little Birds are sometimes intangled in them. (2.) If Wells are dug in *Bermudas* above the Surface of the surrounding Ocean, the Water is sweet and fresh; but if lower, then salt or brackish; and all of them have some sensible Flux and Reflux with the Sea. (3.) Upon the Coast of these Islands is sometimes taken that remarkable Fish, term'd the *File-Fish*; being so call'd from a part of his Back Bone, which hath the exact Resemblance of a File.

Archbishopricks, &c.] *Archbishopricks*, *Bishopricks*, *Universities*; none.

Manners.] The Inhabitants of these Islands being *English*, are much the same in *Manners* and *Way* of living, with those here in *England*.

Language.] What was said of the Inhabitants of *Bermudas* in respect of *Manners*, the same may be affirmed of them in point of *Language*.

Government.] These Islands being wholly subject, and of right belonging to the Crown of England, are rul'd by a particular Governor appointed and sent thither by the King of England.

Arms.]

Religion.] The Religion here establish'd and publickly profess'd, is the Protestant, according to the Reformation of the Church of England.

§ 11. Terra del Fuogo.

THIS is a large triangular Island (or, as some think, several) lying on the South part of America, and separated from the main Continent by the Streights of Magellan. It's call'd by the Name of Terra del Fuogo, because (it seems) the first Discoverers thereof did observe some particular Volcanoes upon it. Our Knowledge of this Island and its Inhabitants, is, at best, but very uncertain; and almost every new Adventurer in these Parts of the World, gives us a new Relation of Things. Whosoever therefore desires a certain or satisfactory Account, must defer his Enquiry to the better Discovery of After-times.

And so much for America and its Islands.

A. N. APPENDIX,

Comprehending

A brief ACCOUNT of the *European* Plantations in *Asia*, *Africk*, and *America*: As also some Reasonable Proposals for the Propagation of the Blessed GOSPEL in all Pagan Countries.

IN running over the various Divisions of *Asia*, *Africk*, and *America*, I have under the Title of *Government*, transiently mention'd those principal Kingdoms or States in *Europe*, who are mostly concern'd in those Countries, but since a more particular Account of the same is desir'd by some, I shall endeavour to do it in these following Lines; and then, by way of Conclusion to the whole Treatise, shall subjoin some Proposals for the Propagation of the Blessed Gospel in all Pagan Countries. To return to the first.

The chief of the *European* Nations, who have any Footing in *Asia*, *Africk*, and *America*, are these following, viz.

| | |
|-----------------|-------------|
| The English, | The French, |
| The Spaniards, | The Dutch, |
| The Portuguese. | The Danes, |

Of all these in Order.

§ 6. To

§ 6. To the *Danes* belong,

In *Asia*, { *Frankebar* — — — } on the Coast of *Cormandel*.
 { *Dansburg* — — — }

In *Africa*, is *Christianburg* or *St. Francisco Xavier* in *Guinea*.

In *America*, is *New Denmark* in the North part thereof.

These are the chief of the *European* Plantations in *Asia*, *Africa*, and *America*: And to these we might have here added the late Settlement of the *Scots* at *Darien*, had not that unfortunate Colony met with repeated dismal Disasters. Now follows the latter part of the Appendix, containing

Some Reasonable PROPOSALS for the Propagation of the Blessed Gospel in all Pagan Countries: Especially those adjacent to the English Plantations in North America.

BY what hath been briefly said in the foregoing Treatise, concerning the State of Religion in all Countries of the World, it may sufficiently appear in general, That the *Christian Religion* is of a very small Extent, if exactly compar'd with those many and vast Countries wholly overspread with gross *Idolaters*, numerous *Mahometans*, and many others, who either know not, or (at least) own not, the Blessed *Messias*. But more particularly, this great and sad Truth may farther appear by the following Calculation, ingeniously made by some, who dividing the inhabited World into Thirty Parts, do find, That

| | | | |
|-----|---------------------------|---|---|
| XIX | } of 'em are possess'd by | { | Blind and gross <i>Idolaters</i> . |
| VI | | | <i>Jews</i> , <i>Turks</i> , and <i>Saracens</i> . |
| II | | | Those of the <i>Greek Church</i> . |
| III | | | Those of the { <i>Church of Rome</i> . <i>Protestant Communion</i> . |

Thus *Christianity* taken in its largest Latitude, bears no greater Proportion to the other grossly false Religions, than Five to Twenty five. This melancholy Consideration doth force me to bewail that woful Neglect of the best Part of the *Christian Church*, for not being so

diligent as others are, in endeavouring to abolish Heathenish Idolatry, and that most lamentable Ignorance, which as yet overshadoweth so great a part of the inhabited World. It's undoubtedly well known, that the effectual Performance of such a Work as this, would require no inconsiderable Stock of Money (it being now impracticable to make solemn Missions, or qualify Men for them, without considerable Charges) and yet a sufficient Fund might be so easily rais'd, that none could reasonably complain of the Burden, should the following Proposals be so happily made, as to meet with a due Reception.

" Did every Freeholder of the Three Kingdoms advance only for
 " One Year the *Five hundredth Part* of his Yearly Incomes. Did
 " those Merchants of this great City (who are particularly concern'd
 " in our Foreign Plantations, and daily imploy great Multitudes of
 " *Pagan Slaves* in their Service) allow the *Two hundredth Part* of
 " One Year's Gain: And finally, Did the Clergy of the three King-
 " doms (whose Zeal in such a Matter would probably transcend others)
 " appropriate to this pious Use, *One hundredth Part* of their Yearly
 " Revenues. I say, Did Priest and People thus unanimously combine
 " together in carrying on this most Christian Design, what an easie
 " matter were it in a short time, to raise such a Fund of Money,
 " that the Annual Interest thereof might sufficiently serve to send
 " Yearly some Pious and Able Divines into all Quarters of the
 " World? And since Rational Methods might be taken, to have
 " several *Pagan Tongues* taught in our own Island, a considerable
 " part of the aforesaid Money might be likewise employ'd to edu-
 " cate a competent Number of young Students of Theology in these
 " Foreign Languages, which Number being still continued, would
 " serve as (a choice Nursery) to afford a constant Supply of able
 " Men, who might Yearly go abroad, and be sufficiently qualified
 " at their first Arrival, to undertake that great Work for which they
 " were sent."

But since the latter Part of the foregoing Proposal (which imports, that *Europeans* might learn some of the present *Indian Languages*) doth seem impracticable to several, by reason of the prodigious multitude of those *Pagan Tongues*, and their vast Variety of quite different Dialects (especially those now in use among the unciviliz'd Natives of *North America*); " Then we may follow the Example of the
 " *Ancient Romans*, whose Endeavour and Interest it was to extend
 " their own Language with their Conquest; and so extinguish, in
 " process of Time, the very Dialect of the Conquered. Did we this
 " in all Parts of our Western Empire [which might probably be
 " accomplish'd in a few Generations, by duly encouraging some

" Hun-

“ Hundreds of Christians to live among the Natives, and those to
 “ endeavour in the most alluring manner to instruct the younger sort
 “ of the *Indians* in the *English* Tongue.] Then in the next or fol-
 “ lowing Age we might address our selves to those blind *Gentiles* in
 “ our own Language, and so instilling in them by degrees, the Prin-
 “ ciples of Christianity, might thereby, in a short time, bring in ma-
 “ ny Thousands of Souls to the Sheepfold of the Pastor and Bishop
 “ of our Souls.” I think it needless to express how commendable
 such a Design would be in it self; and how desirable the Promotion
 thereof should be to all who stile themselves *Christians*, of what Par-
 ty or Profession soever they are. And I humbly suppose it might
 be a Work (if unanimously minded by Christians) more becoming
 the Followers of the Prince of Peace, than to be Abettors of the
 frequent Jars and Broils of *Christendom*. Besides, there’s certainly
 nothing that could prove more beneficial to the publick Good of
 this Nation, and particular Interest of the Crown of *England*; for did
 most (or many) of the Natives understand or speak our own Language,
 then might we not thereby more exactly discover the inland Parts
 of these Countries, and with greater Security improve them to the
 greatest Advantage? Might we not thereby make Multitudes of idle,
 wandring *Indians* very useful to our *English* Colonies; and then chief-
 ly employ *Europeans* for the Guard and Safety of the Country; Yea,
 did many of the Natives but tolerably understand and speak the
English Tongue, then might we not (in all human Appearance) civil-
 ize them entirely in a short time, and so add many Thousands of
 new *English* Subjects to the *English* Empire? All which are morally
 impossible now to be done, since the numerous Dialects of their bar-
 barous *Jargon*, together with their own *Barbarity*, are as so many
Bars against such Undertakings.

Great Sirs.

Pardon these PROPOSALS here offer’d to the serious Consideration of
 those whom they chiefly concern; and give me leave to declare un-
 to you, how infinitely it would tend to the Glory of God, the Good
 of his Church, and Honour of our Nation, did we sincerely endea-
 vour to extend the Limits of our Saviour’s Kingdom, with those of
 our new Dominions; and to spread the true *Reformed Religion*, as far
 as the *English* Sails have done for Traffick. With what Anxiety of
 Mind, and Fatigue of Body, do we pierce into the remotest Coun-
 tries of the World? And all to heap up a little *White* and *Yellow*
Earth, or to purchase some Things (call’d *Precious* by Man) which
 [abstracting human Fancy] do differ nothing from common *Pebble-*
Stones; and yet what a supine Neglect doth attend us, in doing that
 which would bring more Honour to our Holy Religion, and prove
 at last more profitable to our selves, than the actual Possession of all
 the

the *Treasures* in the Universe! What a lamentable Thing is it, that those very *Indians* who border upon the *English* Pale (not to mention some thousands of *Negroes* who slave in our Service) should still continue in most wretched Ignorance, and instead of knowing and worshipping the *True God*, should as yet reverence not only *Stocks* and *Stones*, but also adore the *Devil* himself! *Christians*! Shall we covet and thirst after their *Talents* of Gold, and yet keep hid in a Napkin that *Talent* intrusted to us? Shall we greedily bereave them of their *Precious Pearls*, and not declare unto them the Knowledge of the *Pearl of Price*? No! No! Let us not act as others have done, in making *Gold* our God, and *Gain* the sole Design of our Trading. But let us effectually improve those choice Opportunities (now in our Hands) for the singular Glory of our Great God, and of *Jesus Christ* our Blessed Redeemer. And let our *Planters* duly consider, That to extirpate Natives, is rather a supplanting than planting a new Colony; and that it's far more honourable to overcome *Paganism* in one, than to destroy a thousand *Pagans*. *Each Convert is a Conquest.*
